URBAN STUDIES AND PLANNING LAB (URSZ)

URSZ 204. Physical Geography Laboratory. 1 Hour.
Semester course; 2 laboratory hours. 1 credit. Pre- or co-requisite:
URSP 204. Problem-solving and map-reading exercises related to topics
covered in URSP 204, such as earth-sun relationships, air temperature,
atmospheric pressure and precipitation, winds and global circulation,
plate tectonics, tectonic and volcanic landforms, weathering, and
the impacts of running water, waves, wind and glaciers in shaping
the landscape. Provides essential analytical skills aimed at a better
understanding of human-environment interactions, such as those related
to climate change.
