CHEMISTRY, MASTER OF SCIENCE (M.S.)

Program goal
The Department of Chemistry is committed to the dual mission of teaching and research at the bachelor’s, master’s and doctoral level. In teaching, the purpose is to provide high quality education in chemistry to students in preparation for professional careers at all levels. In research, the goals are to advance the science of chemistry, to keep faculty on the forefront of the field and to maintain an educational program consistent with the latest technology and development of the discipline. Service to the chemical profession is also an important aspect of the department’s activities.

Student learning outcomes
1. Demonstrate expertise (breadth and depth) in chemistry
2. Demonstrate appropriate ability to design and conduct experimental research
3. Demonstrate ability to analyze data critically and to design experiments independently
4. Develop competency in the responsible conduct of research
5. Develop effective oral and written communication skills

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (http://bulletin.vcu.edu/graduate/study/general-academic-regulations-graduate-students)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (http://bulletin.vcu.edu/graduate/study/general-academic-regulations-graduate-students/degree-candidacy)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (http://bulletin.vcu.edu/graduate/study/general-academic-regulations-graduate-students/graduation-requirements)

Other information
The Department of Chemistry graduate handbook is available at chemistry.vcu.edu/graduate-programs/graduate-handbook.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

In addition to the general admission requirements of the VCU Graduate School (http://bulletin.vcu.edu/graduate/study/admission-graduate-study/admission-requirements), the following requirements represent the minimum acceptable standards for admission:

1. Have a bachelor’s degree from an accredited college or university with 30 credit hours in chemistry
2. Admission on a provisional basis is possible for a student temporarily lacking this expected chemistry background.

Degree requirements
In addition to general VCU Graduate School graduation requirements (http://bulletin.vcu.edu/graduate/study/general-academic-regulations-graduate-students/graduation-requirements), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: Students in the M.S. in Chemistry program are required to earn a minimum of 30 graduate-level credit hours beyond the baccalaureate. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.
2. Proficiency exams: Students must demonstrate competency in analytical, inorganic, organic and physical chemistry by satisfactory performance on the proficiency exams or with a minimum grade of B in the appropriate course. These examinations are at the level of...
Curriculum requirements

Required didactic courses

Select three core courses of the following four areas:

- CHEM 504: Advanced Organic Chemistry I
- CHEM 510 or CHEM 511: Analytical, Inorganic, Organic and Physical Chemistry
- CHEM 620: Advanced Inorganic Chemistry I
- CHEM 63x or ENGR 691: (course in analytical area)

Course completed twice

- CHEM 698: Investigations in Current Chemistry Literature (0.5 credit hour)

Select five credit hours of recommended electives from the following, in consultation with adviser

1. CHEM 500-level (except CHEM 505, CHEM 506 and CHEM 507)
2. CHEM 530: Biochemistry, Cell and Molecular Biology Module 1: Protein Structure and Function
3. CHEM 531: Biochemistry, Cell and Molecular Biology Module 2: Basic Metabolism
4. CHEM 532: Biochemistry, Cell and Molecular Biology Module 3: Central Dogma of Molecular Biology
5. CHEM 533: Biochemistry, Cell and Molecular Biology Module 4: Lipids/Membranes and Bioenergetics
6. CHEM 602: Physical Properties of Macromolecules
7. BIOS 543: Graduate Research Methods I
8. BIOS 544 or STAT 544: Graduate Research Methods II
9. CHEM 500-level
10. CHEM 604: Advanced Organic Chemistry II
11. CHEM 605: Physical Organic Chemistry
12. CHEM 606: Advanced Spectroscopic Methods in Organic Chemistry
13. CHEM 610: Applied Quantum Chemistry
14. CHEM 611: Molecular Spectroscopy
15. CHEM 612: Modern Statistical Mechanics: Fundamentals and Applications
16. CHEM 615: Chemical Thermodynamics
17. CHEM 616: Chemical Kinetics
18. CHEM 620: Advanced Inorganic Chemistry I
19. CHEM 621: Advanced Inorganic Chemistry II
20. CHEM 630: Electroanalytical Chemistry
21. CHEM 631: Separation Science
22. CHEM 632: Chemometrics
23. CHEM 633: Mass Spectrometry
24. CHEM 634: Surface Science
25. CHEM 635: Spectrochemical Analysis
26. CHEM 691: Topics in Chemistry
27. CHEM 698: Investigations in Current Chemistry Literature
28. ENGR 591: Special Topics in Engineering
29. ENGR 691: Special Topics in Engineering
30. MEDC 541: Survey of Molecular Modeling Methods
31. MEDC 670: Advanced Molecular Modeling Theory and Practice
32. NANO 570: Nanoscale Physics
33. NANO 571: Nanoscale Chemistry
34. NANO 650: Experimental Techniques in Nanoscience I
35. NANO 651: Experimental Techniques in Nanoscience II
36. NANO 660: Theoretical Studies of Nanostructures
37. NANO 661: Computational Nanoscience
38. PHYS 550: Techniques in Material Research
39. PHYS 573: Analytical Methods in Physics
40. PHYS 576: Electromagnetic Theory
41. PHYS 580: Quantum Mechanics
42. PHYS 591: Topics in Physics
43. PHYS 661: Surface and Materials Physics
44. PHYS 691: Special Topics

Other required courses

- CHEM 690: Research Seminar in Chemistry (credit hours variable)
- CHEM 692: Chemistry Seminar Presentation
- CHEM 693: Chemistry Perspectives and Ethics
- CHEM 697: Directed Research

Total Hours

- 30

1. Students must earn a minimum of 15 credit hours in six didactic graduate courses, not including credit hours for CHEM 690, CHEM 692, CHEM 693 or CHEM 697.
2. One of these courses may be waived upon satisfactory proficiency exam scores. The required number of credit hours for the degree does not change.
3. The ENGR 691 topics course must be materials characterization.
4. In some cases, students may be required to enroll in both CHEM 510 and CHEM 511 because of proficiency exam scores. The required number of credit hours for the degree does not change.
5. Students are expected to enroll in CHEM 698 (0.5 credit hour) twice during their graduate studies, including the semester preceding their literature seminar presentation (CHEM 692). Note: A maximum of two credit hours of CHEM 698 may be presented toward the didactic course graduation requirements to count as one course.
Students are expected to participate in the department’s seminar program by enrolling in CHEM 690 or CHEM 692 every spring and fall semester. At least two formal talks are to be presented in the seminar program by enrolling twice in CHEM 692 (one credit hour).

Students are expected to enroll in CHEM 693 within their first year of enrollment.

Students are expected to enroll in CHEM 697 (one credit hour minimum) every spring and fall semester.

**Total graduate credit hours required (minimum) 30**
