Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (http://bulletin.vcu.edu/academic-reg/grad/candidacy)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (http://bulletin.vcu.edu/academic-reg/grad/graduation-info)

Other information

The Department of Chemistry graduate handbook is available at chemistry.vcu.edu/graduate-programs/graduate-handbook (http://chemistry.vcu.edu/graduate-programs/graduate-handbook).

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

In addition to the general admission requirements of the VCU Graduate School (http://bulletin.vcu.edu/graduate/study/admission-graduate-study/admission-requirements), the following requirements represent the minimum acceptable standards for admission:

1. Have a bachelor’s degree from an accredited college or university with 30 credit hours in chemistry.
2. Admission on a provisional basis is possible for a student temporarily lacking this expected chemistry background.

Degree requirements

In addition to general VCU Graduate School graduation requirements (http://bulletin.vcu.edu/academic-reg/grad/graduation-info), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: Students in the Ph.D. in Chemistry program are required to earn a minimum of 60 graduate-level credit hours beyond the baccalaureate. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.
2. Proficiency exams: Students must demonstrate competency in analytical, inorganic, organic and physical chemistry by satisfactory performance on the proficiency exams or with a minimum grade of B in the appropriate course. These examinations are at the level of sound undergraduate courses and are offered preceding the start
Curriculum requirements

Required didactic courses

Select three core courses of the following four areas:
- analytical, inorganic, organic and physical

<table>
<thead>
<tr>
<th>Course</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>CHEM 504</td>
<td>Advanced Organic Chemistry I</td>
</tr>
<tr>
<td>or CHEM 511</td>
<td>Atomic and Molecular Structure 4</td>
</tr>
<tr>
<td>or CHEM 511</td>
<td>Chemical Thermodynamics and Kinetics</td>
</tr>
<tr>
<td>CHEM 620</td>
<td>Advanced Inorganic Chemistry I</td>
</tr>
<tr>
<td>CHEM 63xx or ENGR 691</td>
<td>(courses in analytical area) 3</td>
</tr>
</tbody>
</table>

Course completed twice
- CHEM 698
- Investigations in Current Chemistry Literature (0.5 credit hour)

Select eight credit hours of the following recommended electives, in consultation with adviser:
- BIOC 500-level (except BIOC 505, BIOC 506 and BIOC 507)
- BIOC 530
- Biochemistry, Cell and Molecular Biology Module 1: Protein Structure and Function
- BIOC 531
- Biochemistry, Cell and Molecular Biology Module 2: Basic Metabolism
- BIOC 532
- Biochemistry, Cell and Molecular Biology Module 3: Central Dogma of Molecular Biology
- BIOC 533
- Biochemistry, Cell and Molecular Biology Module 4: Lipids/Membranes and Bioenergetics
- BIOC 602
- Physical Properties of Macromolecules
- BIOS 543
- Statistical Research Methods I
- or STAT 543
- Statistical Methods I
- BIOS 544
- Graduate Research Methods II
- or STAT 544
- Statistical Methods II
- CHEM 601
- Chemical Biology I
- CHEM 602
- Chemical Biology II
- CHEM 500-level
- CHEM 600-level
- CHEM 610

</tbody>
</table>

1. Students must earn a minimum of 18 credit hours in eight didactic graduate courses, not including credit for CHEM 690, CHEM 692, CHEM 693 or CHEM 697.

2. One of these courses may be waived upon satisfactory proficiency exam scores. The number of required credit hours for the degree does not change.

3. The ENGR 691 topics course must be materials characterization.

4. In some cases, students may be required to enroll in both CHEM 510 and CHEM 511 because of proficiency exam scores.
Students are expected to enroll in CHEM 698 (.05 credit hour) twice during their graduate studies, including the semester preceding their literature seminar presentation (CHEM 692). Note: A maximum of two credit hours of CHEM 698 may be presented toward the didactic course graduation requirements to count as one course.

Students are expected to participate in the department’s seminar program by enrolling in CHEM 690 or CHEM 692 every spring and fall semester. At least two formal talks are to be presented in the seminar program by enrolling twice in CHEM 692 (one credit hour).

Students are expected to enroll in CHEM 693 within the first year of study.

Students must enroll in CHEM 697 (one credit hour minimum) every spring and fall semester for a minimum of 30 total credit hours. If the required minimum of 60 credit hours for the degree is not fulfilled after completion of all other course requirements, then additional credit hours of CHEM 697 may satisfy remaining credit hours for the degree.

**Total graduate credit hours required (minimum) 60**
