BIOSTATISTICS, MASTER OF SCIENCE (M.S.)

Program goal
The mission of the VCU Department of Biostatistics is to improve human health through methodological research, the education of graduate students and health science researchers in biostatistical methods and applications, and collaborative health sciences research. Faculty members conduct methodological research motivated by collaborative alliances, which in turn contributes to and enhances the department’s educational mission. By focusing on the integration of methodological and collaborative research, students develop strong biostatistical and communication skills, enabling them to assume leadership positions in academia, government and industry.

Student learning outcomes
This training program is designed to be completed in 18 months (four semesters: fall, spring, summer, fall) and will help students achieve the following learning outcomes:

1. The successful candidate will understand the modern and advanced literature of biostatistical concepts, ideas and methodologies.
2. The successful candidate will demonstrate the ability to effectively collaborate with both biostatistical and health science researchers, specifically with respect to planning and designing research studies, and also in analyzing data from a broad spectrum of research questions.
3. The successful candidate will develop fluency in several computational languages, will exhibit proficiency in standard computation and analytic procedures, and will demonstrate the ability to computationally solve new and complex problems.
4. The successful candidate will display exceptional written and oral communication skills in terms of explaining biostatistical concepts, methods and results to both biostatistical and non-biostatistical health sciences researchers.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

Other information
School of Medicine graduate program policies
The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on master’s programs is available elsewhere in this chapter of the Graduate Bulletin.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Admission requirements

<table>
<thead>
<tr>
<th>Degree</th>
<th>Semester(s) of entry</th>
<th>Deadline dates</th>
<th>Test requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>M.S.</td>
<td>Fall preferred</td>
<td>Applications received prior to Jan 15 given priority consideration</td>
<td>GRE</td>
</tr>
</tbody>
</table>

In addition to the general admission requirements of the VCU Graduate School (http://bulletin.vcu.edu/graduate/study/admission-graduate-study/admission-requirements/), applicants for the M.S. in Biostatistics must complete the verbal, quantitative and analytical writing sections of the Graduate Record Exam.

Additionally, the following mathematics courses or their equivalents are required for admission:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 307</td>
<td>Multivariate Calculus</td>
<td>4</td>
</tr>
<tr>
<td>MATH 310</td>
<td>Linear Algebra</td>
<td>3</td>
</tr>
</tbody>
</table>

Visit the academic regulations section for additional information on admission requirements.
Additional combination

There is no thesis requirement for the M.S. program. To be considered in the Ph.D. program, students must pass the qualifying examination at the Ph.D. level in order to apply and theoretical qualifying examinations at the Ph.D. level in order to also take the theoretical component of the qualifying examination. Students pursuing the M.S. degree must pass a qualifying examination administered after completion of their first-year courses. This examination covers material from the following first-year courses: BIOS 524, BIOS 571, BIOS 572 and BIOS 573. This examination is graded as pass or fail. A student must pass the qualifying examination at the M.S. level to continue in the M.S. program. A student who does not pass the qualifying examination at the M.S. level will have one opportunity to retake that part of the qualifying examination. Students interested in applying to the Ph.D. program in biostatistics (with no concentration or with a concentration in genomic biostatistics) are strongly encouraged to take both BIOS 513 and BIOS 514, participate in the Summer Student Training Program and present at the Biostatistics Student Research Symposium.

Qualifying exam

Students pursuing the M.S. degree must pass a qualifying examination administered after completion of their first-year courses. This applied examination covers material from the following first-year courses: BIOS 524, BIOS 571, BIOS 572 and BIOS 573. This examination is graded as pass or fail. A student must pass the qualifying examination at the M.S. level to continue in the M.S. program. A student who does not pass the qualifying examination at the M.S. level will have one opportunity to retake that part of the qualifying examination. Students interested in applying to the Ph.D. program in biostatistics (with no concentration or with a concentration in genomic biostatistics) are strongly encouraged to also take the theoretical component of the qualifying examination covering material from the following first-year courses: BIOS 513, BIOS 514, BIOS 553 and BIOS 554. These students must pass both the applied and theoretical qualifying examinations at the Ph.D. level in order to be considered in the Ph.D. program.

Thesis

There is no thesis requirement for the M.S. program.

Total Hours 23

Additional combination

Select at least four 500- or 600-level courses (minimum three credits), which may be selected from the following list or with program director approval:

BIOS 514 Mathematical Statistics II
BIOS 549 Spatial Data Analysis
BIOS 615 Advanced Inference
BIOS 632 Multivariate Analysis
BIOS 635 Structural Equation Modeling
BIOS 638 Statistical Design and Analysis in Toxicology
BIOS 639 Statistical Design and Analysis in Toxicology
BIOS 647 Survival Analysis
BIOS 649 Advanced Spatial Data Analysis
BIOS 650 Design and Analysis of Response Surface Experiments
BIOS 667 Statistical Learning and Data Mining
BIOS 668 Statistical Methods for High-throughput Genomic Data II
BIOS 688 Applied Bayesian Biostatistics
STAT 613 Stochastic Processes
STAT 614 Stochastic Processes
STAT 625 Applied Multivariate Analysis

Total Hours 12

Consulting and seminar

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>

<td>4</td>
</tr>
<tr>
<td>BIOS 690</td>
<td>Biostatistical Research Seminar (one-credit course taken three semesters)</td>
<td>3</td>
</tr>
</tbody>
</table>

Total Hours 7

The minimum total of graduate credit hours required for this degree is 42.

Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

Graduate program director

Roy T. Sabo, Ph.D.
Associate professor, Department of Biostatistics
roy.sabo@vcuhealth.org
(804) 828-3047

Additional contact (admissions and prospective students)

Russell M. Boyle
Assistant professor, Department of Biostatistics, and associate program director
