NURSING PRACTICE, DOCTOR OF (D.N.P.) WITH A CONCENTRATION IN ADULT-GERONTOLOGY ACUTE CARE NURSE PRACTITIONER

The D.N.P. program is strongly positioned to prepare students to improve the quality of health care delivery and patient outcomes. Graduates of the D.N.P. program at VCU will be prepared to improve health care delivery by critically appraising scientific evidence to inform practice, sharing clinical expertise in collaborative and dynamic environments, leading interprofessional teams, providing systems leadership for sustainable best practices in clinical settings and influencing health policy. Building on the university’s mission to improve human health, VCU D.N.P. graduates will translate evidence that leads to sustainable practice change for improved patient quality and safety outcomes.

The 66-credit hour B.S. to D.N.P. pathway will prepare students to apply the knowledge and skills acquired in the program to health care settings. Those students who pursue the program’s nurse practitioner concentrations will possess the knowledge and skills to serve as certified nurse practitioners in health care settings. The purpose of the adult-gerontology nurse practitioner concentration is to prepare students with the knowledge and skills for clinical practice to provide direct acute care to the entire spectrum of adults, including young adults, adults and older adults. The focus of the course work is on the care of adult patients who are characterized as physiologically unstable, technologically dependent and/or are highly vulnerable to complications.

Program goals

Students will achieve D.N.P.-level competencies by demonstrating:

1. Use of quality and safety outcomes to evaluate practice improvement initiatives
2. Skills in using evidence-based practice to achieve sustainable practice change
3. Advanced decision-making skills founded in ethics and the highest level of nursing practice
4. Leadership strategies to influence health policies
5. Interprofessional collaboration in health care systems

Student learning outcomes

At the completion of the D.N.P. program, students will have the knowledge and skills to:

1. Synthesize knowledge from nursing and other sciences to lead efforts to promote health and improve outcomes of individuals, populations and systems
2. Demonstrate integration of population health concepts in systems-based care delivery models designed to promote quality, safety and excellence in advanced nursing practice
3. Lead the development, implementation and evaluation of policy initiatives to improve quality and safety in health care systems
4. Translate and disseminate evidence-based practices toward improving health care outcomes and reducing disparities
5. Lead innovative approaches in the application of health information technology that supports delivery and evaluation of patient-centered care
6. Apply principles of ethical and moral reasoning in advanced practice roles to lead to sustainable change in health care
7. Demonstrate advanced levels of clinical and ethical judgement, systems thinking and accountability in designing, delivering and evaluating evidence-based care to improve patient outcomes

Concentration-specific outcomes for adult-gerontology acute care

Students who select this concentration will be able to meet the following outcomes:

1. Perform assessment, diagnosis and management of young adults, adults and older adults who are physiologically unstable, technologically dependent and/or are highly vulnerable to complications
2. Synthesize knowledge from advanced practice nursing and related sciences to successfully complete a clinical practicum in an acute care setting with adult and gerontology patients

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.
Graduation requirements
As graduate students approach the end of their academic programs and
the final semester of matriculation, they must make formal application
to graduate. No degrees will be conferred until the application to graduate
has been finalized.
Graduate students and program directors should refer to the following
graduation requirements as published in the Graduate Bulletin for a
complete list of instructions and a graduation checklist.
Visit the academic regulations section for additional information on
graduation requirements.
Other information
VCU School of Nursing Student Policy and Information handbooks
(http://nursing.vcu.edu/about-us/resources/) are located on the school's
website.
Our international and non-native English-speaking students bring
different perspectives and new thinking to our nursing programs. To
ensure that all incoming student are prepared for the school's academic
rigor, all international applicants and non-native English speaking
applicants without a degree from a U.S. high school, college or university
must provide additional information with their applications according to
the English language proficiency guidelines on the program admission
web site.
Admissions website (https://www.vcu.edu/admissions/apply/
international/graduate-applicants/#tabs-193125).
Note: Requests for exceptions to the above criteria will be considered on
a case-by-case basis.
In accordance with VCU's Graduate School policy, a maximum of 50
percent of the didactic hours required for a graduate degree or any
graduate certificate program may be transferred from another institution
and, if not applied previously toward another degree, may be applied
toward a degree. Prerequisite course work that does not count toward the
VCU degree may not be transferred.
Degree requirements
The post-bachelor’s pathway to the D.N.P. is a 66-credit-hour degree
program that requires no thesis. The focus of the program is quality and
safety in advanced practice nursing. The curriculum prepares advanced
practice registered nurses with a terminal clinical practice doctorate
that focuses on improving quality and safety outcomes. This is a direct
clinical care concentration that prepares graduates to become certified in
the specialty of adult-gerontology acute care nurse practitioner. Course
work culminates in the successful completion of a D.N.P. project focusing
on a quality or patient safety issue in the student’s specific patient
population or area of focus.

The purpose of the adult-gerontology nurse practitioner concentration is
to prepare students with the knowledge and skills for clinical practice to
provide direct acute care to the entire spectrum of adults, including young
adults, adults and older adults. The focus of the course work is on the
care of adult patients who are characterized as physiologically unstable,
technologically dependent and/or highly vulnerable to complications.

Note: No admissions test is required for this program.

To be considered for admission to the School of Nursing, applicants
must:

1. Meet the general admission requirements of the VCU Graduate
   School (http://bulletin.vcu.edu/graduate/study/admission-graduate-
   study/admission-requirements/)
2. Submit all official college transcripts from each college attended,
   including concurrent college enrollment transcripts
3. Be eligible for readmission or be in good standing at the last college
   or university attended
4. Be a baccalaureate (or higher) graduate of an accredited (ACEN,
   CCNE or CNEA) nursing program
5. Have a current unrestricted R.N. license or authorization to practice
   as an R.N. in the U.S.
6. Submit three academic and/or professional references
7. Write a personal statement
8. Submit a resume/CV
9. Provide additional information with the application according to
   the English language proficiency guidelines for applicants who are
   international or non-native English speakers without a degree from
   a U.S. high school, college or university (Additional information can
   be found on the ‘Required materials’ tab of the VCU International
Practice hours/residency requirement

National accreditation requirements stipulate the completion of a minimum of 1,000 clinical hours for students in the post-bachelor’s pathway. These 1,000 hours are divided into two major foci: direct patient care clinical hours and residency hours. The program will include 600 direct patient care clinical hours. During this clinical component of the program, students will focus on their role as a care provider, which includes the diagnosis and management of patients appropriate to their concentration. Each clinical course has objectives, assignments and products that demonstrate student achievement of advanced practice patient care competencies. In order to achieve the D.N.P. essential competencies, students will then complete an additional 400 hours that focus on developing the skills needed to lead efforts to improve care outcomes in populations of patients.

D.N.P. program clinical experiences are developed to assist the students achieve the D.N.P. essential competencies. For example, students may work with the quality improvement team in a particular setting to develop and implement an improvement initiative; they may develop an evidence-based practice guideline for a patient problem; or they may develop a policy change initiative in concert with their professional association. The practice experiences, settings and focus of residency hours are individualized and developed mutually by the student and the faculty adviser. Each residency course has individualized objectives, assignments and products that demonstrate student achievement of specific D.N.P. essential competencies. Qualified preceptors, based on their expertise and experience, will be identified to provide supervision as needed to support particular practice experiences. Preceptors and faculty advisers will all contribute to evaluation of student success in meeting the identified objectives developed for each clinical and residency course.

Final evaluation of clinical courses is the responsibility of the clinical faculty for the course. Final evaluation of all residency requirements is the responsibility of the faculty for the course. Residency and clinical courses are graded on a pass-fail basis. The completed assignments from clinical and residency courses culminate in a professional e-portfolio that demonstrates achievement of all course objectives, student learning outcomes and the D.N.P. essentials.

Project requirements

The D.N.P. program culminates in the successful completion of a scholarly work — the D.N.P. project. In collaboration with faculty and their project team, students design, implement and evaluate a quality/safety project that is focused in their specialized clinical area. The final product is a scholarly manuscript describing the project that is suitable for publication in a professional journal. The project teams consist of doctorally prepared content experts, one of whom must be from the practice site, and select faculty. The curriculum is designed so that students begin planning their D.N.P. project during initial course work and complete the project in their final semester of study. Dissemination of the D.N.P. project findings occur during the final semester as part of the course work.
