PHARMACEUTICAL SCIENCES, MASTER OF SCIENCE (M.S.) WITH A CONCENTRATION IN PHARMACEUTICS

Program goal
The School of Pharmacy offers the highest quality of graduate training in pharmaceutical sciences research and mentorship at the Master of Science level.

Student learning outcomes
1. Knowledge of research in pharmaceutical sciences
   The candidate should demonstrate a general knowledge of the elements of the pharmaceutical sciences and a detailed knowledge of his/her area of research, including an appropriate familiarity with the research literature, policies and procedures, and methodology pertaining to their field.

2. Design experiments in pharmaceutical sciences
   The candidate should demonstrate an appropriate level of skill in the design of experimental protocols and the technical conduct of experimentation related to his/her research.

3. Demonstrate appropriate communication skills
   The candidate should demonstrate that an appropriate level of oral, written and visual communication skill has been acquired.

4. Identify problems in pharmaceutical sciences
   The candidate should demonstrate an appropriate level of skill in the identification of meaningful problems in the pharmaceutical sciences and the design of and implementation of appropriate problem-solving methods.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

Special requirements
- Pharm.D. or bachelor’s degree in a related area

In addition to the general admission requirements of the VCU Graduate School, the applicant must fulfill all of the following:

- 1. Application for admission to the program of study must be submitted online at graduate.admissions.vcu.edu.
- 2. Official transcripts of all academic work from all regions of study must be submitted to the Office of Graduate Admissions.
- 3. Three letters of recommendation from professors or others who know the applicant’s abilities and potential for graduate study in the field of their training.
- 4. A personal statement of purpose and goals for graduate study.
- 5. A complete list of instructions and a graduation checklist.
- 6. Visit the academic regulations section for additional information on academic regulations for graduate students.
study/admission-requirements), applicants must have received a baccalaureate from an accredited institution in a related area demonstrating the ability to perform at the graduate level. Prerequisite and foundation course work may be required, depending upon the applicant’s discipline.

**Degree requirements**

In addition to general VCU Graduate School graduation requirements (http://bulletin.vcu.edu/academic-regs/grad/graduation-info), M.S. students in pharmaceutical sciences must complete a minimum of 30 didactic credit hours of required (both school and department core) and elective hours. All M.S. students must pass the thesis review and defense in each department in order to advance to graduate.

**Curriculum requirements**

**Prerequisites**

All students should have prerequisite knowledge in chemistry, mathematics and biology. The following departmental courses or their equivalents are required for admission into the Department of Pharmaceutics option. If a prospective student has not met any of the prerequisites, the course(s) may be included in the student’s core course requirements upon recommendation by the prospective graduate adviser and approval by the respective course coordinator (see below).

</tbody>
</table>

1 Undergraduate prerequisite course work may not count toward the minimum 30 graduate credit hours required for the degree and may not be included in the calculation of graduate statistics, i.e., GPA, 20 percent C or below rule, etc.

**School of Pharmacy core curriculum**

Select one of the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOS 543 or STAT 543</td>
<td>Graduate Research Methods I or Statistical Methods I</td>
<td>3</td>
</tr>
<tr>
<td>MEDC 541</td>
<td>Survey of Molecular Modeling Methods (1 credit repeated)</td>
<td></td>
</tr>
<tr>
<td>MEDC 601</td>
<td>Advanced Medicinal Chemistry I (1 credit repeated)</td>
<td></td>
</tr>
<tr>
<td>IBMS 600</td>
<td>Laboratory Safety (or equivalent)</td>
<td>1</td>
</tr>
<tr>
<td>OVPR 601</td>
<td>Scientific Integrity (or equivalent)</td>
<td>1</td>
</tr>
</tbody>
</table>

Select a minimum of one credit from the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PCEU/MEDC/ PHAR 614</td>
<td>Research Techniques (variable credit)</td>
<td></td>
</tr>
<tr>
<td>MEDC 526</td>
<td>Research Techniques in Medicinal Chemistry (variable credit)</td>
<td></td>
</tr>
</tbody>
</table>

Select a minimum of one credit from the following:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credit Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PCEU 690</td>
<td>Pharmaceutics Research Seminar (variable credit)</td>
<td></td>
</tr>
<tr>
<td>MEDC 690</td>
<td>Departmental Research Seminar (variable credit)</td>
<td></td>
</tr>
</tbody>
</table>

**Concentration**

**Electives**

Electives (minimum six credits)

A minimum of six elective credit hours is recommended for the M.S. These courses will be selected based upon individual research program needs and will be chosen through mutual consultation with the student and major adviser.

**Research**

Students are required to complete a thesis. The six credit-hour minimum may be waived for circumstances such as a prior related degree. If waived, students must still complete minimum number of hours required for the degree.

<table>
<thead>
