A basic tenet of the Ph.D. in Business program is that the classic trilogy of research, teaching and service typically invoked in university mission statements is synergistic. The program strives to develop graduates who share this perspective and aspire to well-rounded individual roles within universities, colleges and other learning organizations. For this reason, the program provides instruction in both research and teaching.

Instruction in basic and applied research is the cornerstone of the program. To fulfill the requirements for the degree, students must demonstrate successful completion of prerequisite and advanced
courses, comprehensive examinations, and completion and defense of a dissertation. The advanced courses provide coverage in basic theories, methodologies and techniques needed to conduct research. The dissertation demonstrates the student’s competence in conducting independent research.

Enhancement of teaching skills is emphasized in the program. It provides students with mentoring and teaching experience. Formal instruction designed to augment student teaching skills is also required. Mentoring involves teaming a student with a faculty member with the goal of augmenting student self-awareness and self-confidence in the classroom. Classroom experience is required to insure that the Ph.D. graduate enters the job market with certifiable teaching experience. The formal courses are designed to provide substantive instruction on teaching the adult learner.

Student learning outcomes
1. Students will demonstrate the ability to apply general principles of scientific research and methodologies to critically review published research papers.
2. Students will demonstrate the ability to
   a. Design a research study
   b. Select the appropriate methodology
   c. Develop the study into a research proposal
3. Students will demonstrate the ability to identify ethical dilemmas in the major area of study and know how to respond ethically to such issues.
4. Students will demonstrate an understanding of current knowledge in the major area of study.
5. Students will demonstrate the ability to effectively communicate and teach knowledge in the major area of study.
6. Students will demonstrate the ability to develop and conduct research in the major area of study (i.e., complete an independent doctoral-level research project pertaining to the state of the art of the student’s major area).

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information
School of Business policies and procedures for graduate master’s degree students (http://business.vcu.edu/graduate-studies/current-graduate-students/) are available on the school’s website.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

<td>Fall</td>
<td>Feb 1</td>
<td>GMAT or GRE</td>
</tr>
</tbody>
</table>

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants to the doctoral program in business must submit an up-to-date resume.

Degree requirements

Upon admission to the Ph.D. program, faculty will evaluate students to determine if they have attained a basic competency level in general business disciplines. Students who have already completed a master’s degree in business will likely have met all foundation/prerequisite requirements.

Students who enter the Ph.D. in Business without an education in business will be expected to meet the foundation requirements for the intended concentration area of study as determined by their advisers.

In addition to the VCU Graduate School graduation requirements (p. 31), Ph.D. in Business students must complete a minimum of 56 graduate credit hours, including core, concentration and elective course work, and a minimum of 12 credit hours of dissertation research. Each
student must also complete a teaching portfolio and take a written comprehensive examination in the concentration area.

Program goal

The goal of the Master of Science in Business with a concentration in finance is to train students to take on the quantitatively challenging and highly competitive business environment of the financial industry. Students learn skills to effectively analyze, develop and communicate solutions that take into consideration ethical implications.

Student learning outcomes

1. Graduates will be able to conceptualize and apply quantitative measurement methods, to analyze business problems and to propose solutions.
2. Graduates will be able to analyze a business problem in terms of both quantitative and qualitative aspects, including:
   a. A precise statement of the problem and how it relates to the goals of the firm
   b. A consideration of the ethical, policy and/or practicality limitations on any proposed solution strategy
   c. A statement and consideration of proposed solutions strategies and their implementation within the limitations
   d. A plan for implementation and monitoring of the proposed solution
3. Graduates will be able to analyze the ethical dimensions of a business situation and relate those dimensions to general ethical standards as well as to professional ethical standards.
4. Graduates will be able to express the analytic, quantitative and ethical dimensions of business problems and proposed solutions in a clear and well-organized manner.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.
Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

**Other information**

School of Business policies and procedures for graduate master's degree students (http://business.vcu.edu/graduate-studies/current-graduate-students/) are available on the school's website.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

</tbody>
</table>

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must submit an up-to-date resume.

*Test requirements may be waived for candidates with an undergraduate or graduate degree from an accredited U.S. institution with a minimum GPA of 3.25. Waiver request information can be found on the Graduate Studies in Business webpage (https://business.vcu.edu/graduate-studies/how-to-apply/).

**Degree requirements**

The finance concentration prepares students for financial decision-making positions in corporate, investment, financial and governmental institutions. Courses offered in finance include advanced financial management, investments and security analysis, funds management in financial institutions, international finance, and derivatives.

In addition to the VCU Graduate School graduation requirements (p. 31):

1. All students must have completed a course in calculus prior to attempting graduate business courses. This prerequisite can be met after admission to the program.
2. Students must complete up to four classes (zero to 12 credit hours) of foundation course work. At the time of application, all undergraduate and graduate transcripts will be reviewed to determine if the following courses may be waived. Waiver of a foundation course may be awarded when a student demonstrates equivalent knowledge, such as completing the required undergraduate equivalent course with a minimum grade of C.

Business, Master of Science (M.S.) with a concentration in global marketing management

Program accreditation
Association to Advance Collegiate Schools of Business (http://www.aacsb.edu/)

Program goal
The Master of Science in Business with a concentration in global marketing management offers students the opportunity to combine their studies in international marketing with contemporary issues in marketing management.

Student learning outcomes
1. Students will demonstrate the ability to evaluate global marketing programs to identify strategic issues.

2. Students will present an international marketing plan proposal that they developed to a client.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must submit an up-to-date resume.

*Test requirements may be waived for candidates with an undergraduate or graduate degree from an accredited U.S. institution with a minimum GPA of 3.25. Waiver request information can be found on the Graduate Studies in Business webpage (https://business.vcu.edu/graduate-studies/how-to-apply/).

Degree requirements

The global marketing management concentration provides the opportunity to focus on conceptual and experiential dimensions of marketing management. Students interested in the increasingly global nature of business will be well-suited for this unique graduate degree program. Core courses provide a framework for understanding the role of marketing in diverse organizations. Electives add knowledge in areas of growing importance to the profession and provide the flexibility for students to consider emerging topics in the global marketing environment. Client projects and global applications prepare students for marketing careers. Study abroad is available and encouraged.

In addition to the VCU Graduate School graduation requirements (p. 31), students must complete up to six classes (zero to 18 credit hours) of foundation course work. At the time of application, all undergraduate and graduate transcripts will be reviewed to determine if the following courses may be waived. Waiver of a foundation course may be awarded when a student demonstrates equivalent knowledge, such as completing the required undergraduate equivalent course with a minimum grade of C.

Business, Master of Science (M.S.) with a concentration in real estate

Program accreditation
Association to Advance Collegiate Schools of Business (http://www.aacsb.edu/)

Program goal

1. To prepare students for successful careers in real estate and lifelong learning by providing education that is firmly grounded in technology, interdisciplinary teamwork and a global perspective
2. To ensure that students understand and can apply appropriate analytical methodologies and technology to the discipline of real estate
3. To prepare students for professional licensing, certification and/or professional designations
Student learning outcomes
1. Graduates will demonstrate the ability to communicate the qualitative and quantitative dimensions of real estate in a clear and well-organized manner.
2. Graduates will be able to select, conceptualize and apply the appropriate quantitative measurement and analysis to correctly value real estate. Such methods might include an economic and financial analysis of commercial real estate investments, alternative financing structures and/or surveys of recent trends in the securitization of commercial real estate debt and equity markets.
3. Graduates will be able to analyze a real estate problem in terms of:
   a. Development of a precise statement of the problem and how it relates to the goals of the firm and/or client
   b. A consideration of the ethical, policy and/or practical limitations on any proposed solution strategy
   c. Statement and consideration of proposed solutions strategies and their implementation
   d. Formulation of a plan for implementation and monitoring of the proposed solution
4. Graduates will be able to analyze the ethical dimensions of a real estate situation and relate those dimensions to professional ethical standards.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information

School of Business policies and procedures for graduate master’s degree students (http://business.vcu.edu/graduate-studies/current-graduate-students/) are available on the school’s website.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must submit an up-to-date resume.

*Test requirements may be waived for candidates with an undergraduate or graduate degree from an accredited U.S. institution with a minimum GPA of 3.25. Waiver request information can be found on the Graduate Studies in Business webpage (https://business.vcu.edu/graduate-studies/how-to-apply/).

Degree requirements

The real estate concentration satisfies the rigorous educational requirements of the Appraisal Institute’s MAI designation. Students can satisfy most of the Appraisal Institute’s education requirements by completing the concentration. This concentration provides comprehensive education in related disciplines so that graduates’ analytical skills and abilities to communicate with other professionals are greatly enhanced.

In addition to the VCU Graduate School graduation requirements (p. 31), students must complete the following undergraduate prerequisite courses:

Curriculum requirements

Prerequisite undergraduate courses

Real Estate and Urban Land Development, Certificate in (Post-baccalaureate graduate certificate)

Program accreditation
Association to Advance Collegiate Schools of Business (http://www.aacsb.edu/)

Program goal
The post-baccalaureate graduate Certificate in Real Estate and Urban Land Development is designed for professionals who seek an opportunity for advanced study in real estate and are more interested in the focused knowledge obtainable than receipt of a graduate degree. The certificate provides students the ability to advance their careers while receiving recognition for their academic accomplishment in the form of a graduate certificate. Many working professionals, especially those with undergraduate majors in the liberal arts, will find this program attractive since they can concentrate their energies on a tightly focused curriculum without enrolling in a large number of prerequisite courses.

Student learning outcomes
1. Graduates will demonstrate the ability to communicate the qualitative and quantitative dimensions of real estate valuation in a clear and well-organized manner.
2. Graduates will be able to select, conceptualize and apply the appropriate quantitative measurement and analysis to correctly value real estate. Such methods might include an economic and financial analysis of commercial real estate investments, alternative financing structures and/or surveys of recent trends in the securitization of commercial real estate debt and equity markets.
3. Graduates will be able to analyze the ethical dimensions of a real estate situation and relate those dimensions to professional ethical standards. Specifically, graduates will have an understanding of the Uniform Standards of Professional Appraisal Practice.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the
Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information
School of Business policies and procedures for graduate master's degree students (http://business.vcu.edu/graduate-studies/current-graduate-students/) are available on the school's website.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Degree requirements
In addition to the VCU Graduate School graduation requirements (p. 31), in order to be eligible to receive the certificate, a student must maintain an overall GPA of 3.0. Eighteen credit hours beyond the bachelor's degree are required for completion of this graduate certificate program. A maximum of one three-hour course taken at another AACSB-accredited institution may be transferred into this program. Students interested in later applying for admission into either the Master of Business Administration program with a concentration in real estate or the Master of Science in Business with a concentration in real estate valuation must do so through a separate application process. Admission is dependent on the applicant having achieved a 3.0 GPA in the graduate certificate and a satisfactory score on the GMAT examination.

Sport Leadership, Master of (M.S.L.)

The School of Business offers a structured graduate program combining classroom theory with exposure to relevant field experiences. Through the sport leadership program, students will be prepared to assume the responsibilities for developing professional and amateur athletes and managing sports programs in a variety of academic, public and private sectors. The interdisciplinary faculty and curriculum give students the opportunity to concentrate on areas most important to them and most
relevant to the sports business. Students of the program are required to complete a comprehensive examination.

The program offers graduate courses online for those students who want to take advantage of educational opportunities via the Internet. Currently, three online classes are available each semester.

**Student learning outcomes**

1. Content knowledge of sport industry: Students will be able to analyze and synthesize information and develop plans to address issues in sport leadership.
2. Development of interpersonal skills and professionalism: Students will demonstrate interpersonal skills and professionalism appropriate to the fields of sport management and coaching.
3. Development of leadership skills: Students will demonstrate content knowledge of leadership skills and traits, as well as the ability to utilize these skills and traits in a professional setting.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for the final research phase of the degree program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor’s degree in an appropriate discipline
2. Three letters of recommendation addressing the student’s potential for graduate study in education
3. Student’s written statement concerning career interests
4. Transcripts of all previous college work

Students should contact the Center for Sport Leadership at VCU at (804) 828-7821 or link directly to sportleadership.vcu.edu (http://www.sportleadership.vcu.edu/) for information and application materials.

**Degree requirements**

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 36 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Examination requirement: Students must pass a comprehensive examination (see below).
4. Externship requirement: Students must complete an externship in the sport field.

**Comprehensive examination**

1. Written comprehensive examinations are required for all graduate students in the VCU Center for Sport Leadership.
2. Comprehensive examinations will take place at the end of the spring semester for each cohort of full-time, on-campus students and at the completion of 30 credit hours of course work for all part-time/distance-learning students.
3. Comprehensive examinations will be evaluated in a pass/fail format.
4. Comprehensive examinations will be independently evaluated by two faculty members; in the case that the faculty members disagree, a third faculty member will be brought in for a final decision.
5. Any student failing the comprehensive examination will have one additional opportunity to pass the exam. Failure to pass the comprehensive examination the second time will result in the student being dropped from the degree program.

M.B.A. programs
The School of Business allows students to complete requirements for an M.B.A. using two distinct modalities.

The curriculum for the evening M.B.A. program is flexible and is designed for students with diverse undergraduate backgrounds. Students may elect an M.B.A. without a concentration or may choose an M.B.A. with a single or double concentration. Concentrations are available in business analytics, corporate finance, entrepreneurship and innovation, global business, health care management, information resources management, investments, real estate, and supply chain management. Most classes are held in the evening to accommodate working students’ schedules. Classes typically meet one evening a week from 7 to 9:40 p.m. or in the early evening from 5:30 to 6:45 p.m. For additional information about the program, visit the M.B.A. options website (https://business.vcu.edu/academics/mba-options/).

The Executive M.B.A. curriculum takes advantage of students’ midlevel and executive professional experience by using it as a foundation on which to build a more sophisticated understanding of business. Core program components and differentiators include its integrated structure, experiential exercises and real-world application, which enable students to transition easily between the business world and their studies.

The program’s innovative, integrated modular structure enables students to approach issues by module topic, which accurately reflects the multidisciplinary demands of the real business world. The program is targeted to rising business executives, entrepreneurs, nonprofit managers and service professionals. It differs from other master’s programs at VCU because of its unique modular curriculum, which integrates components of communication, technology, service/quality, globalization and strategy.

The Executive M.B.A. program is a lockstep program that meets alternating weekends, Fridays from 12:30 to 6:15 p.m. and Saturdays from 8 a.m. to 2:15 p.m. The program can be completed in approximately 20 months.

Traditional program options
- Business Administration, Master of (M.B.A.) (p. 385)
- Business Administration, Master of (M.B.A.) with a concentration in business analytics (p. 388)
- Business Administration, Master of (M.B.A.) with a concentration in corporate finance (p. 390)
- Business Administration, Master of (M.B.A.) with a concentration in entrepreneurship and innovation (p. 392)
- Business Administration, Master of (M.B.A.) with a concentration in global business (p. 393)
- Business Administration, Master of (M.B.A.) with a concentration in health care management (p. 395)
- Business Administration, Master of (M.B.A.) with a concentration in information resources management (p. 396)
- Business Administration, Master of (M.B.A.) with a concentration in investments (p. 398)
- Business Administration, Master of (M.B.A.) with a concentration in real estate (p. 399)
- Business Administration, Master of (M.B.A.) with a concentration in supply chain management (p. 401)

Executive program options
- Business Administration, Master of (M.B.A.) [Executive] (p. 408)
- Business Administration, Master of (M.B.A.) [Executive] with a concentration in business analytics (p. 409)
- Business Administration, Master of (M.B.A.) [Executive] with a concentration in corporate finance (p. 410)
- Business Administration, Master of (M.B.A.) [Executive] with a concentration in entrepreneurship and innovation (p. 412)
• Business Administration, Master of (M.B.A.) [Executive] with a concentration in global business (p. 413)
• Business Administration, Master of (M.B.A.) [Executive] with a concentration in health care management (p. 414)
• Business Administration, Master of (M.B.A.) [Executive] with a concentration in information resources management (p. 416)
• Business Administration, Master of (M.B.A.) [Executive] with a concentration in investments (p. 417)
• Business Administration, Master of (M.B.A.) [Executive] with a concentration in real estate (p. 418)
• Business Administration, Master of (M.B.A.) [Executive] with a concentration in supply chain management (p. 420)

Dual degree programs

Business Administration, Master of (M.B.A.) (p. 385) dual degree with:
• Master of Accountancy
• Master of Arts in Economics
• Master of Decision Analytics
• Master of Product Innovation
• Master of Science in Business with a concentration in finance
• Master of Science in Business with a concentration in global marketing management
• Master of Science in Business with a concentration in real estate
• Master of Science in Information Systems
• Master of Sport Leadership
• Master of Supply Chain Management

Business Administration, Master of (M.B.A.)/Information Systems, Master of Science (M.S.) [dual degree] (p. 403)

Business Administration, Master of (M.B.A.)/Information Systems, Master of Science in (M.S.) with a concentration in information technology management [Executive] [dual degree] (p. 405)

Pharmacy, Doctor of (Pharm.D.)/Business Administration, Master of (M.B.A.) [dual degree] (p. 407)

Business Administration, Master of (M.B.A.) [Executive]/Information Systems, Master of Science (M.S.) with a concentration in information technology management [Executive] [dual degree] (p. 421)

Business Administration, Master of (M.B.A.)

Program accreditation

Association to Advance Collegiate Schools of Business (http://www.aacsb.edu/)

Program goal

The purpose of the Master of Business Administration program at VCU is to prepare individuals for the responsibilities of management. As students at VCU, individuals will learn the functions and techniques of effective management. The student also will come to understand the environmental and economic factors that affect decision-making in organizations. In short, the student will know what to do as future events unfold that affect his/her firm or organization.

An M.B.A. from VCU benefits students at various points in their careers. Individuals who have recently received their baccalaureate degrees may choose to refine their business skills while their undergraduate training is fresh. Individuals with work experience often find that an M.B.A. is the key to rapid promotion or a career change. Finally, an M.B.A. from VCU meets the needs of students who recognize that the best preparation for an uncertain future is continuous learning.

Student learning outcomes

1. Leadership and teamwork: Students will develop abilities to influence others and collaborate in teams.
2. Communication: Students will recognize the importance of and effectively demonstrate strong communication skills.
3. Analytical thinking: Students will demonstrate the ability to organize and interpret qualitative and quantitative information to make effective decisions.
4. Strategic thinking: Students will demonstrate the ability to apply appropriate conceptual frameworks to lead the organization in setting and meeting its goals and objectives.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.
Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

Other information
School of Business policies and procedures for graduate master's degree students are available on the school's website.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants to the master’s program in business administration must submit an up-to-date resume.

Degree requirements
In addition to the VCU Graduate School graduation requirements (p. 31), students in the M.B.A. program must complete a minimum of 45 graduate credit hours. In addition, a prerequisite course in precalculus is required. This prerequisite may be waived for students who present satisfactory equivalent preparation. Applicants who have not met this prerequisite may take the course after admission.

Students are expected to enter the program with basic computing proficiency. Specific expectations will be provided by the Graduate Studies in Business Office. Specific means of evaluating and correcting any deficiency also will be identified.

Curriculum requirements
The curriculum for the M.B.A. program is flexible and is designed for students with diverse undergraduate backgrounds. Students may elect an M.B.A. without a concentration or may choose an M.B.A. with a single or double concentration.

Most classes are held in the evening to accommodate working students’ schedules. Classes typically meet one evening a week from 7 to 9:40 p.m. or twice a week in the early evening from 5:30 to 6:45 p.m. For additional information about the program, visit vcu.edu/mba (http://www.vcu.edu/mba/).

</table>

SPTL 603 will also satisfy the M.B.A. SCMA 524 requirement.

For students pursuing the combined programs mentioned above, these courses fulfill the nine credits of electives for the M.B.A. program.

Electives and concentrations

Project courses (693), topics courses (691) and guided studies (697) may be available for use toward concentration electives. These courses must be preapproved by the director of graduate studies.

Courses at the 500- or 600-level taken outside of the School of Business may be used with the permission of the director of graduate studies in business. Students must satisfy the necessary prerequisites for all electives.

Business Administration, Master of (M.B.A.) with a concentration in business analytics

Program accreditation
Association to Advance Collegiate Schools of Business (http://www.aacsb.edu/)

Program goal

The purpose of the Master of Business Administration program at VCU is to prepare individuals for the responsibilities of management. As students at VCU, individuals will learn the functions and techniques of effective management. The student also will come to understand the environmental and economic factors that affect decision-making in organizations. In short, the student will know what to do as future events unfold that affect his/her firm or organization.

An M.B.A. from VCU benefits students at various points in their careers. Individuals who have recently received their baccalaureate degrees may choose to refine their business skills while their undergraduate training is fresh. Individuals with work experience often find that an M.B.A. is the key to rapid promotion or a career change. Finally, an M.B.A. from VCU meets the needs of students who recognize that the best preparation for an uncertain future is continuous learning.

Student learning outcomes

1. Leadership and teamwork: Students will develop abilities to influence others and collaborate in teams.
2. Communication: Students will recognize the importance of and effectively demonstrate strong communication skills.
3. Analytical thinking: Students will demonstrate the ability to organize and interpret qualitative and quantitative information to make effective decisions.
4. Strategic thinking: Students will demonstrate the ability to apply appropriate conceptual frameworks to lead the organization in setting and meeting its goals and objectives.
VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

Other information

School of Business policies and procedures for graduate master’s degree students are available on the school’s website.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants to the master’s program in business administration must submit an up-to-date resume.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 31), students in the M.B.A. program must complete a minimum of 45 graduate credit hours. In addition, a prerequisite course in precalculus is required. This prerequisite may be waived for students who present satisfactory equivalent preparation. Applicants who have not met this prerequisite may take the course after admission.

Students are expected to enter the program with basic computing proficiency. Specific expectations will be provided by the Graduate Studies in Business Office. Specific means of evaluating and correcting any deficiency also will be identified.

Curriculum requirements

The curriculum for the M.B.A. program is flexible and is designed for students with diverse undergraduate backgrounds. Students may elect an M.B.A. without a concentration or may choose an M.B.A. with a single or double concentration.

Most classes are held in the evening to accommodate working students’ schedules. Classes typically meet one evening a week from 7 to 9:40 p.m. or twice a week in the early evening from 5:30 to 6:45 p.m. For additional information about the program, visit vcu.edu/mba (http://www.vcu.edu/mba/).

However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

Other information
School of Business policies and procedures for graduate master’s degree students are available on the school’s website.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants to the master’s program in business administration must submit an up-to-date resume.

Degree requirements
In addition to the VCU Graduate School graduation requirements (p. 31), students in the M.B.A. program must complete a minimum of 45 graduate credit hours. In addition, a prerequisite course in precalculus is required. This prerequisite may be waived for students who present satisfactory equivalent preparation. Applicants who have not met this prerequisite may take the course after admission.

Students are expected to enter the program with basic computing proficiency. Specific expectations will be provided by the Graduate Studies in Business Office. Specific means of evaluating and correcting any deficiency also will be identified.

Visit the academic regulations section for additional information on academic regulations for graduate students.
Curriculum requirements

The curriculum for the M.B.A. program is flexible and is designed for students with diverse undergraduate backgrounds. Students may elect an M.B.A. without a concentration or may choose an M.B.A. with a single or double concentration.

Most classes are held in the evening to accommodate working students’ schedules. Classes typically meet one evening a week from 7 to 9:40 p.m. or twice a week in the early evening from 5:30 to 6:45 p.m. For additional information about the program, visit vcu.edu/mba (http://www.vcu.edu/mba/).

Business Administration, Master of (M.B.A.) with a concentration in global business

Program accreditation
Association to Advance Collegiate Schools of Business (http://www.aacsb.edu/)

Program goal

The purpose of the Master of Business Administration program at VCU is to prepare individuals for the responsibilities of management. As students at VCU, individuals will learn the functions and techniques of effective management. The student also will come to understand the environmental and economic factors that affect decision-making in organizations. In short, the student will know what to do as future events unfold that affect his/her firm or organization.

An M.B.A. from VCU benefits students at various points in their careers. Individuals who have recently received their baccalaureate degrees may choose to refine their business skills while their undergraduate training is fresh. Individuals with work experience often find that an M.B.A. is the key to rapid promotion or a career change. Finally, an M.B.A. from VCU meets the needs of students who recognize that the best preparation for an uncertain future is continuous learning.

Student learning outcomes

1. Leadership and teamwork: Students will develop abilities to influence others and collaborate in teams.
2. Communication: Students will recognize the importance of and effectively demonstrate strong communication skills.
3. Analytical thinking: Students will demonstrate the ability to organize and interpret qualitative and quantitative information to make effective decisions.
4. Strategic thinking: Students will demonstrate the ability to apply appropriate conceptual frameworks to lead the organization in setting and meeting its goals and objectives.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.
It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants to the master’s program in business administration must submit an up-to-date resume.

Degree requirements
In addition to the VCU Graduate School graduation requirements (p. 31), students in the M.B.A. program must complete a minimum of 45 graduate credit hours. In addition, a prerequisite course in precalculus is required. This prerequisite may be waived for students who present satisfactory equivalent preparation. Applicants who have not met this prerequisite may take the course after admission.

Students are expected to enter the program with basic computing proficiency. Specific expectations will be provided by the Graduate Studies in Business Office. Specific means of evaluating and correcting any deficiency also will be identified.

Curriculum requirements
The curriculum for the M.B.A. program is flexible and is designed for students with diverse undergraduate backgrounds. Students may elect an M.B.A. without a concentration or may choose an M.B.A. with a single or double concentration.

Most classes are held in the evening to accommodate working students’ schedules. Classes typically meet one evening a week from 7 to 9:40 p.m. or twice a week in the early evening from 5:30 to 6:45 p.m. For additional information about the program, visit vcu.edu/mba (http://www.vcu.edu/mba/).

Business Administration, Master of (M.B.A.) with a concentration in real estate

Program accreditation
Association to Advance Collegiate Schools of Business (http://www.aacsb.edu/)

Program goal
The purpose of the Master of Business Administration program at VCU is to prepare individuals for the responsibilities of management. As
students at VCU, individuals will learn the functions and techniques of effective management. The student also will come to understand the environmental and economic factors that affect decision-making in organizations. In short, the student will know what to do as future events unfold that affect his/her firm or organization.

An M.B.A. from VCU benefits students at various points in their careers. Individuals who have recently received their baccalaureate degrees may choose to refine their business skills while their undergraduate training is fresh. Individuals with work experience often find that an M.B.A. is the key to rapid promotion or a career change. Finally, an M.B.A. from VCU meets the needs of students who recognize that the best preparation for an uncertain future is continuous learning.

**Student learning outcomes**

1. **Leadership and teamwork:** Students will develop abilities to influence others and collaborate in teams.
2. **Communication:** Students will recognize the importance of and effectively demonstrate strong communication skills.
3. **Analytical thinking:** Students will demonstrate the ability to organize and interpret qualitative and quantitative information to make effective decisions.
4. **Strategic thinking:** Students will demonstrate the ability to apply appropriate conceptual frameworks to lead the organization in setting and meeting its goals and objectives.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council. It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

**Other information**

School of Business policies and procedures for graduate master’s degree students are available on the school’s website.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Business Administration, Master of (M.B.A.)/Information Systems, Master of Science (M.S.) [dual degree]

Program accreditation
Association to Advance Collegiate Schools of Business (http://www.aacsb.edu/)

Program goal

Master of Business Administration

The purpose of the Master of Business Administration program at VCU is to prepare individuals for the responsibilities of management. As students at VCU, individuals will learn the functions and techniques of effective management. The student also will come to understand the environmental and economic factors that affect decision-making in organizations. In short, the student will know what to do as future events unfold that affect his/her firm or organization.

An M.B.A. from VCU benefits students at various points in their careers. Individuals who have recently received their baccalaureate degrees may choose to refine their business skills while their undergraduate training is fresh. Individuals with work experience often find that an M.B.A. is the key to rapid promotion or a career change. Finally, an M.B.A. from VCU meets the needs of students who recognize that the best preparation for an uncertain future is continuous learning.

Master of Science in Information Systems

The Master of Science in Information Systems program is designed to prepare students for specialized roles using information systems to support organizations. The program is intended to provide a graduate-level, business-technology-oriented curriculum that focuses on the design and development of information systems to solve real-world problems. Graduates of the program are expected to be able to take significant roles in planning, organizing, managing, designing, configuring and implementing systems using state-of-the-art technologies within organizations.

Student learning outcomes

For M.B.A. graduates

1. Students should be able to demonstrate the capacity to apply business knowledge in new and unfamiliar circumstances.
2. Students should be able to demonstrate the ability to work in teams and other groups.
3. Students should understand and be able to develop the ethical and social responsibilities of organizations.
4. Students should be able to describe the factors involved in key operation decisions and to apply appropriately techniques that provide insight and structure for management decision-making.
5. Students should be able to identify and understand major issues faced by organizations with evolving information technology and investigate issues and challenges faced by managers with changes in information technology.
6. Students should be able to describe the factors involved in key operation decisions and to apply appropriately techniques that provide insight and structure for management decision-making.
7. Graduates of the program should be able to critically evaluate and use accounting and other information for managerial decision-making.
8. Graduates should be able to evaluate marketing programs.
9. Students should be able to think critically and systematically about financial issues in businesses to develop techniques to analyze these issues numerically.
10. Graduates of the program should be able to develop an analytical framework for identifying the objectives of the firm and to provide some tools for evaluating the firm’s performance.

For M.S. in Information Sciences graduates

1. Graduates should be capable of communicating and networking effectively within their profession and within their organizations, serving the profession by applying this knowledge broadly and maintaining key technical expertise in order to sustain required levels of competitiveness.
2. Graduates must have an understanding of information technology as it applies to business contexts and the skill to apply this technology effectively in specific circumstances.
3. Graduates must be able to develop efficient and effective IS solutions using appropriate technologies that can deliver competitive advantages to organizations.
4. Graduates must be able to develop and incorporate changes in the planning and management of IS resources based on an increased understanding of the dynamic changes in the organization, IS and global environments.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.
Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

2. Graduates must have an understanding of information technology as it applies to business contexts and the skill to apply this technology effectively in specific circumstances.
3. Graduates must be able to develop efficient and effective IS solutions using appropriate technologies that can deliver competitive advantages to organizations.
4. Graduates must be able to develop and incorporate changes in the planning and management of IS resources based on an increased understanding of the dynamic changes in the organization, IS and global environments.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

Other information
School of Business policies and procedures for graduate master’s degree students are available on the school’s website.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants to the dual degree Master of Business Administration and Executive Master of Science in Information Systems with a concentration in information technology management program must submit an up-to-date resume.

Degree requirements
In addition to the VCU Graduate School graduation requirements (p. 31), students can earn both M.B.A. and M.S. in Information Systems degrees by having 12 credit hours counted toward both degrees, thus requiring only 54 credit hours total of advanced course work (not counting foundation courses), rather than the 36 and 30 credit hours normally required for the two degrees.

To obtain both degrees, students will complete the entire 30 credit-hour information system master’s program plus six M.B.A. core courses (ECON 610, FIRE 623, ACCT 608, MGMT 642, SCMA 675 and MKTG 671) plus two elective courses. Students must also complete any designated required courses. The course ISTM 671 will substitute for MGMT 641; ISTM 672 will substitute for INFO 661; and ISTM 677 will substitute for INFO 664. ISTM 673 will count toward one of the three required M.B.A. elective courses.

Curriculum requirements

Course | Title                                | Hours |
-------|--------------------------------------|-------|
ACCT 507 | Fundamentals of Accounting           | 3     |
ECON 500 | Concepts in Economics                | 3     |
FIRE 520 | Financial Concepts of Management     | 3     |
MGMT 540 | Management Theory and Practice       | 3     |
MKTG 570 | Concepts and Issues in Marketing     | 3     |
Pharmacy, Doctor of (Pharm.D.)/Business Administration, Master of (M.B.A.) [dual degree]

The Pharm.D./M.B.A. program seeks to prepare pharmacists for careers that encompass pharmacy and business theories and principles. The program is designed to take advantage of efficiencies and electives in both the Pharm.D. and M.B.A. programs. Students in the dual degree program can earn both degrees and save as much as one year or more over the time required for completing the programs separately.

Students may be admitted into the program after the first year of enrollment in the Pharm.D. program. Applicants must be enrolled in the Pharm.D. program, have demonstrated a good academic record and have successfully completed the Graduate Management Admission Test.

To obtain both degrees, students will take all pharmacy courses unless waived, the seven business foundation courses, the nine M.B.A. core courses and three elective courses. The elective M.B.A. courses may be taken from pharmacy administration courses at the 600 level and a combination of a business seminar course and an elective advanced pharmacy practice experience in pharmacy management. The business foundation courses can be taken during the first two years in the pharmacy program with summer session(s). The M.B.A. core courses can be taken during the third and fourth years in the pharmacy program. The business electives can be taken during the fourth and fifth years in the dual degree program.

Apply online at graduate.admissions.vcu.edu (http://www.gradient.admissions.vcu.edu).

Application to Pharm.D./M.B.A. program

Students interested in pursuing the Pharm.D./M.B.A. program must first obtain admission to the Pharm.D. program. At the end of the first year of pharmacy school and after receiving permission from the dual degree committee in the School of Pharmacy, Pharm.D. students may apply to the M.B.A. program. Upon admission to the M.B.A. program, a Pharm.D. student will be considered a dual degree-seeking student. Students generally will register for a mix of School of Business courses and School of Pharmacy courses in the fourth, fifth and sixth semesters of the pharmacy program.

A student categorized as a Pharm.D. student will be charged tuition and fees from the School of Pharmacy and will be eligible to receive financial aid awards as a Pharm.D. student. Students categorized as M.B.A. students will be charged tuition and fee rates as graduate students and be eligible to receive financial aid awards as graduate students.

Business Administration, Master of (M.B.A.) [Executive]

Program accreditation
Association to Advance Collegiate Schools of Business (http://www.aacsb.edu/)

Program goal
VCU's School of Business Executive M.B.A. program provides experienced managers in Virginia and surrounding states with the knowledge and skills needed to solve real-world business problems in today's complex global environment. The Executive M.B.A. program accomplishes this purpose by using a curriculum with an integrated, modular, team-oriented, interdisciplinary approach that constantly challenges students to apply knowledge and skills to new and unfamiliar situations by using a conceptual understanding of relevant business disciplines.

Student learning outcomes
1. Demonstrate the capacity from an executive perspective to integrate knowledge-specific information to different business disciplines in helping teams to solve business problems in new and unfamiliar circumstances
2. Demonstrate communication knowledge and skills in both technical and interpersonal areas
3. Demonstrate an understanding of the ethical and social responsibility of business organizations in the U.S. and in other parts of the world
4. Demonstrate analytic skills using new and unfamiliar data sets

Business Administration, Master of (M.B.A.) [Executive] with a concentration in global business

Program accreditation
Association to Advance Collegiate Schools of Business (http://www.aacsb.edu/)

Program goal
VCU's School of Business Executive M.B.A. program provides experienced managers in Virginia and surrounding states with the knowledge and skills needed to solve real-world business problems in today's complex global environment. The Executive M.B.A. program accomplishes this purpose by using a curriculum with an integrated, modular, team-oriented, interdisciplinary approach that constantly challenges students to apply knowledge and skills to new and unfamiliar situations by using a conceptual understanding of relevant business disciplines.

Student learning outcomes
1. Demonstrate the capacity from an executive perspective to integrate knowledge-specific information to different business disciplines in helping teams to solve business problems in new and unfamiliar circumstances
2. Demonstrate communication knowledge and skills in both technical and interpersonal areas
3. Demonstrate an understanding of the ethical and social responsibility of business organizations in the U.S. and in other parts of the world
4. Demonstrate analytic skills using new and unfamiliar data sets

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the VCU Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.
Other information

School of Business policies and procedures for graduate master’s degree students are available on the school's website.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

</tbody>
</table>

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants to the master’s program in business administration must submit an up-to-date resume.

Degree requirements

The Executive M.B.A. program is designed for students with familiarity with significant work experience. The student's adviser will review the student's educational and professional background to determine the extent to which the student has satisfied the prerequisites. Those with outstanding prerequisites will be required to attend one or more training sessions to remove any deficiencies.

In addition to VCU Graduate School graduation requirements (p. 31), students seeking a concentration must complete a minimum of 48 graduate credit hours. The program consists of 13 courses that are divided into seven integrated modules plus the concentration electives.

Business Administration, Master of (M.B.A.) [Executive] with a concentration in supply chain management

Program accreditation
Association to Advance Collegiate Schools of Business (http://www.aacsb.edu/)

Program goal
VCU’s School of Business Executive M.B.A. program provides experienced managers in Virginia and surrounding states with the knowledge and skills needed to solve real-world business problems in today’s complex global environment. The Executive M.B.A. program accomplishes this purpose by using a curriculum with an integrated, modular, team-oriented, interdisciplinary approach that constantly challenges students to apply knowledge and skills to new and unfamiliar situations by using a conceptual understanding of relevant business disciplines.

Student learning outcomes
1. Demonstrate the capacity from an executive perspective to integrate knowledge-specific information to different business disciplines in helping teams to solve business problems in new and unfamiliar circumstances
2. Demonstrate communication knowledge and skills in both technical and interpersonal areas
3. Demonstrate an understanding of the ethical and social responsibility of business organizations in the U.S. and in other parts of the world
4. Demonstrate analytic skills using new and unfamiliar data sets

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

Other information
School of Business policies and procedures for graduate master’s degree students are available on the school’s website.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants to the master’s program in business administration must submit an up-to-date resume.

Degree requirements
The Executive M.B.A. program is designed for students with familiarity with significant work experience. The student’s adviser will review the student’s educational and professional background to determine the extent to which the student has satisfied the prerequisites. Those with outstanding prerequisites will be required to attend one or more training sessions to remove any deficiencies.

In addition to VCU Graduate School graduation requirements (p. 31), students seeking a concentration must complete a minimum of 48
The program consists of 13 courses that are divided into seven integrated modules plus the concentration electives.

**Total Hours** 48

The minimum total of graduate credit hours required for this degree is 48.

**Program goal**

**Executive M.B.A.**

VCU's School of Business Executive M.B.A. program provides experienced managers in Virginia and surrounding states with the knowledge and skills needed to solve real-world business problems in today's complex global environment. The Executive M.B.A. program accomplishes this purpose by using a curriculum with an integrated, modular, team-oriented, interdisciplinary approach that constantly challenges students to apply knowledge and skills to new and unfamiliar situations by using a conceptual understanding of relevant business disciplines.

**M.S. in Information Systems**

The Master of Science in Information Systems program is designed to prepare students for specialized roles in information systems. The program is intended to provide a graduate-level, technically oriented curriculum that focuses on the design and development of information systems to solve real-world problems. The department's curriculum is focused on the rapidly emerging area known as enterprise information systems. Graduates of the program are expected to be able to take significant roles in planning, organizing, managing, designing, configuring and implementing EIS using state-of-the-art technologies within organizations.

**Student learning outcomes**

**Executive M.B.A.**

1. Demonstrate the capacity from an executive perspective to integrate knowledge-specific information to different business disciplines in helping teams to solve business problems in new and unfamiliar circumstances
2. Demonstrate communication knowledge and skills in both technical and interpersonal areas
3. Demonstrate an understanding of the ethical and social responsibility of business organizations in the U.S. and in other parts of the world
4. Demonstrate analytic skills using new and unfamiliar data sets

**M.S. in Information Systems**

Graduates should be able to:

1. Communicate and network effectively within their professions and organizations; serve the profession by applying this knowledge broadly; and maintain key technical expertise in order to sustain required levels of competitiveness
2. Understand information technology as it applies to business contexts and effectively apply this technology in specific circumstances
3. Develop efficient and effective IS solutions using appropriate technologies that can deliver competitive advantages to organizations
4. Develop and incorporate changes in the planning and management of IS resources based on an increased understanding of the dynamic changes in the organization, IS and global environments

**Business Administration, Master of (M.B.A.) [Executive]/Information Systems, Master of Science (M.S.) with a concentration in information technology management [Executive] [dual degree]**

**Program accreditation**

Admission notes regarding deadline: Students in the Executive M.B.A. program have the option to continue with the Executive M.S. in Information Systems with a concentration in information technology management program after having completed the requirements for the Executive M.B.A. to earn both degrees.

Applicants must meet all general admission requirements of the VCU Graduate School (p. 35).

Degree requirements

In addition to VCU Graduate School graduation requirements (p. 31), students must complete a minimum of 60 hours of graduate course work. Students pursuing this dual degree option will have three courses in the Executive M.S. program waived. These three courses cover the information systems content of the Executive M.B.A. program.

Graduate program director
The VCU Brandcenter offers graduate study in advertising, branding and experience design. The program offers a Master of Science in Business with a concentration in branding, and it is divided into five focus areas (tracks): art direction, copywriting, creative brand management, experience design and strategy.

The Brandcenter program is focused on preparing students for successful careers. The working environment is similar to that of agencies and their clients. Teams of students work together to develop ideas and campaigns that solve business problems strategically and creatively. They also learn how to present those ideas in engaging and persuasive ways.

After their first year, qualified students are offered internships where they gain experience and foster industry relationships. In their second year, students have the opportunity to network with professional mentors, guest speakers, alumni and recruiters from agencies and organizations around the country. Once students graduate, they become part of a tight-knit alumni network.

Student learning outcomes
1. **Presentation skills**: Students will demonstrate the ability to effectively present/sell their ideas in a clear, concise and compelling manner.
2. **Collaboration**: Students will demonstrate their ability to work together in cross-functional teams/groups (i.e., as art directors, copywriters, creative brand managers, experience designers and strategists) to develop viable business/marketing solutions.
3. **Creative and critical problem-solving**: Students will demonstrate the ability to research consumer culture (via secondary research, syndicated research and qualitative/quantitative research methods) and evaluate consumer media/technology usage habits to develop media-neutral business solutions.
4. **Culture**: Students will demonstrate an appreciation, interest in and openness for different cultures (both national and international) yielding more relevant, culturally savvy business solutions.
5. **Craft**: Students will demonstrate the ability to execute specific skills related to their individual subconcentration.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants to the concentration must have a working knowledge of Photoshop and InDesign and knowledge of layout, design and typography. Applicants must have at least one year of working experience or have taken an undergraduate course or a tutorial in these skills.

Degree requirements

The M.S. in Business with a concentration in branding requires 42 graduate credit hours beyond the baccalaureate degree. Students devote two years of full-time study to complete the degree requirements. In addition to the VCU Graduate School graduation requirements (p. 31), all students in the Brandcenter must complete a core curriculum as well as courses required for a specific subconcentration and must present a final major project, in portfolio form, before a committee review panel.

These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.
Other information
School of Business policies and procedures for graduate master’s degree students are available on the school's website.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu), and also complete the VCU Brandcenter application at brandcenter.vcu.edu/admissions (http://brandcenter.vcu.edu/admissions/).

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants to the concentration must be proficient in Excel, PowerPoint/Keynote and Pages and must have successfully completed a college math class. The admissions committee is looking for a minimum GRE score of around 300 (current scoring) or 1100 (former scoring) or a minimum GMAT score of around 540.

Degree requirements

The M.S. in Business with a concentration in branding requires 42 graduate credit hours beyond the baccalaureate degree. Students devote two years of full-time study to complete the degree requirements. In addition to the VCU Graduate School graduation requirements (p. 31), all students in the Brandcenter must complete a core curriculum as well as courses required for a specific subconcentration and must present a final major project, in portfolio form, before a committee review panel.

Business, Master of Science (M.S.) with a concentration in branding/experience design

Program goals

The VCU Brandcenter offers graduate study in advertising, branding and experience design. The program offers a Master of Science in Business with a concentration in branding, and it is divided into five focus areas (subconcentrations): art direction, copywriting, creative brand management, experience design and strategy.

The Brandcenter program is focused on preparing students for successful careers. The working environment is similar to that of agencies and their clients. Teams of students work together to develop ideas and campaigns that solve business problems strategically and creatively. They also learn how to present those ideas in engaging and persuasive ways.

After their first year, qualified students are offered internships where they gain experience and foster industry relationships. In their second year, students have the opportunity to network with professional mentors, guest speakers, alumni and recruiters from agencies and organizations around the country. Once students graduate, they become part of a tight-knit alumni network.

Student learning outcomes

1. Presentation skills: Students will demonstrate the ability to effectively present/sell their ideas in a clear, concise and compelling manner.
2. Collaboration: Students will demonstrate their ability to work together in cross-functional teams/groups (i.e., as art directors, copywriters, creative brand managers, experience designers and strategists) to develop viable business/marketing solutions.
3. Creative and critical problem-solving: Students will demonstrate the ability to research consumer culture (via secondary research, syndicated research and qualitative/quantitative research methods) and evaluate consumer media/technology usage habits to develop media-neutral business solutions.
4. Culture: Students will demonstrate an appreciation, interest in and openness for different cultures (both national and international) yielding more relevant, culturally savvy business solutions.
5. Craft: Students will demonstrate the ability to execute specific skills related to their individual subconcentration.
VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

Accountancy, Master of (M.Acc.) with a concentration in data analytics

Program accreditation
Association to Advance Collegiate Schools of Business (http://www.aacsb.edu/)

Program goal
The purpose of the Master of Accountancy program is to provide the skills and knowledge necessary to be future leaders in the professional business community and the public sector for students who wish to specialize in the areas of accounting/information systems, auditing, financial reporting and accounting/other fields of business.

Student learning outcomes

- Students demonstrate current knowledge of financial accounting standards and other professional guidance that affects the profession, and they are able to apply that knowledge in a variety of professional contexts.
- Students demonstrate the ability to analyze accounting data, propose recommendations and design appropriate methods to communicate their recommendations.
- Students demonstrate the ability to distinguish ethical dilemmas and apply the appropriate ethical principles in a variety of accounting contexts and circumstances. Students evaluate information in a manner free of distortion, personal bias or conflicts of interest; recognize situations where professional ethical standards apply; respect confidentiality.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

Department of Economics
Leslie S. Stratton, Ph.D.
Professor and chair

business.vcu.edu/academics/economics (https://business.vcu.edu/academics/economics/)

The Department of Economics provides instruction for degree programs at the baccalaureate, master’s and doctoral level. The faculty works to develop in students the ability to use economic reasoning to understand and analyze business and economic phenomena and policies — the skills needed for careers in a rapidly changing world. To enhance the educational process and to broaden the frontiers of knowledge, faculty members conduct basic and applied research and provide academic and professional service to the university and professional communities.

• Economics, Master of Arts (M.A.) (p. 432)
• Economics, Master of Arts (M.A.) with a concentration in financial economics (p. 434)
• Economics, Master of Arts (M.A.) with a concentration in health economics (p. 435)
• Economics, Master of Arts (M.A.) with a concentration in statistics (p. 437)

Economics, Master of Arts (M.A.)

Program accreditation
Association to Advance Collegiate Schools of Business (http://www.aacsb.edu/)

Program goal
The Master of Arts in Economics is designed to enhance the student’s abilities to use economic modeling to conduct applied analytical and econometric research. Students in this program are expected to demonstrate competence over a rigorous and current core curriculum in microeconomic and macroeconomic theory and in econometrics.

Graduates of the program should be well-qualified to conduct applied economic analysis in either a government or corporate research setting. The program also is an excellent preparation for entry into a doctoral program in economics or finance.

Student learning outcomes
1. Students will be able to use a standard macroeconomic model to analyze the impact of a policy action on major macroeconomic variables.
2. Students will be able to use advanced microeconomic models to analyze the behavior of consumers and firms and the impact of public policy on economic welfare.
3. Students will understand the properties of the ordinary least squares estimator under different assumptions about the data-generating process encountered in economics.
4. Students will understand circumstances in which estimation of an econometric time series model is appropriate.
5. Students will understand the application of models appropriate for analysis of limited dependent variables encountered in economics.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduated.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU
Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information

School of Business policies and procedures for graduate master's degree students are available on the school's website.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must submit an up-to-date resume.

*Test requirements may be waived for candidates with an undergraduate or graduate degree from an accredited U.S. institution with a minimum GPA of 3.25. Waiver request information can be found on the Graduate Studies in Business webpage (https://business.vcu.edu/graduate-studies/how-to-apply/).

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 31), the M.A. in Economics degree requires a minimum of 30 credit hours including six core courses in economics and four approved electives.

Prerequisite and/or foundation courses may be waived for students who present satisfactory equivalent preparation at either the undergraduate or graduate level. This determination is made by the faculty adviser at the time of admission.

Economics, Master of Arts (M.A.) with a concentration in financial economics

Program accreditation
Association to Advance Collegiate Schools of Business (http://www.aacsb.edu/)

Program goal
The Master of Arts in Economics is designed to enhance the student’s abilities to use economic modeling to conduct applied analytical and econometric research. Students in this program are expected to demonstrate competence over a rigorous and current core curriculum in microeconomic and macroeconomic theory and in econometrics.

Graduates of the program should be well-qualified to conduct applied economic analysis in either a government or corporate research setting. The program also is an excellent preparation for entry into a doctoral program in economics or finance.

Student learning outcomes
1. Students will be able to use a standard macroeconomic model to analyze the impact of a policy action on major macroeconomic variables.
2. Students will be able to use advanced microeconomic models to analyze the behavior of consumers and firms and the impact of public policy on economic welfare.
3. Students will understand the properties of the Ordinary Least Squares estimator under different assumptions about the data generating process encountered in economics.
4. Students will understand circumstances in which estimation of an econometric time series model is appropriate.
5. Students will understand the application of models appropriate for the analysis of limited dependent variables encountered in economics.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information
School of Business policies and procedures for graduate master’s degree students are available on the school’s website.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Economics, Master of Arts (M.A.) with a concentration in health economics

Program accreditation
Association to Advance Collegiate Schools of Business (http://www.aacsb.edu/)

Program goal
Graduates of the Master of Arts in Economics program will have the knowledge and experience to qualify for a wide and rapidly expanding range of analyst positions in the private or public sectors. Graduates will be particularly well-suited for positions requiring modeling skills and substantial experience in the analysis and interpretation of firm-level, industry or macroeconomic data. A unique feature of the program is a three-course core sequence in applied econometrics. These courses emphasize the application of modeling techniques and data analysis though the introduction of cases and projects. Through these courses, students acquire a working knowledge of up-to-date powerful statistical software and broad experience in working with a variety of real data sets. The concentration in health economics will allow students with particular interest in the health sector and in health policy issues to specialize in health economics, a topic currently quite relevant.

Graduates of the M.A.in Economics with a concentration in health economics, in addition to holding highly competitive terminal credentials as analysts, will find the program to be an outstanding bridge to doctoral work in programs such as the Ph.D. in Healthcare Policy and Research offered in the School of Medicine at VCU.

Student learning outcomes
1. Students will be able to use a standard macroeconomic model to analyze the impact of a policy action on major macroeconomic variables.
2. Students will be able to use advanced microeconomic models to analyze the behavior of consumers and firms and the impact of public policy on economic welfare.
3. Students will understand the properties of the Ordinary Least Squares estimator under different assumptions about the data generating process encountered in economics.
4. Students will understand circumstances in which estimation of an econometric time series model is appropriate.
5. Students will understand the application of models appropriate for the analysis of limited dependent variables encountered in economics.

### Department of Finance, Insurance and Real Estate

Manu Gupta, Ph.D.  
Associate professor and chair  

The Department of Finance, Insurance and Real Estate delivers knowledge to students in all programs offered by the School of Business and contributes to the expansion of knowledge by engaging in scholarly activity. The department provides core courses as well as majors, minors and concentrations. In addition, the department develops and delivers courses in continuing professional education for practitioners seeking to upgrade their skills and/or attempting to achieve professional certification.

### Department of Information Systems

Jim Wynne, Ph.D.
Traditional program options

- Computer and Information Systems Security, Master of Science (M.S.) (p. 439)
- Information Systems, Master of Science (M.S.) (p. 441)
- Information Systems, Master of Science (M.S.) with a concentration in health care management (p. 443)
- Information Systems, Master of Science (M.S.) with a concentration in information risk, security and assurance (p. 445) (admission temporarily suspended)

Executive program option

- Information Systems, Master of Science (M.S.) with a concentration in information technology management [Executive] (p. 447)

Dual degree programs

- Business Administration, Master of (M.B.A.)/Information Systems, Master of Science (M.S.) [dual degree] (p. 448)
- Business Administration, Master of (M.B.A.)/Information Systems, Master of Science in (M.S.) with a concentration in information technology management [Executive] [dual degree] (p. 450)
- Business Administration, Master of (M.B.A.) [Executive]/Information Systems, Master of Science (M.S.) with a concentration in information technology management [Executive] [dual degree] (p. 452)
- Health Administration, Master of (M.H.A.)/Information Systems, Master of Science (M.S.) [dual degree] (p. 454)

Computer and Information Systems Security, Master of Science (M.S.) [School of Business]

Program mission

The Master of Science in Computer and Information Systems Security provides for the scholarly and professional needs of several groups who have either accepted or are keen to take on the challenge of protecting information resources of firms and society at large.

Program goal

Graduates of this program are expected to take on leadership positions, including as chief security officer, in computer and information systems security in organizations. VCU’s program takes a broad interdisciplinary approach to computer and information systems security that will help develop the student’s ability to see the larger organizational, social, political, ethical and economic aspects of information security.

Student learning outcomes

Graduates of the program will be:

1. Prepared to take leading roles in planning, organizing, managing, designing and configuring security solutions in public and private organizations
2. Familiar with state-of-the-art security technologies and best practices

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to
graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Applicants must meet all general admission requirements of the VCU Graduate School (p. 35).

The Master of Science in Computer and Information Systems Security, jointly offered by the Department of Computer Science in the College of Engineering and the Department of Information Systems in the School of Business, is designed primarily for students interested in professional roles in business, industry or government. Program graduates will serve as leaders within the computer and information systems security community and as strategic partners within the enterprises in which they work. They will stay attuned to, and anticipate changes in, the computer and information systems security environment and ensure that security solutions create a sound, competitive, cost-effective advantage for the enterprise.

Graduates of the program will be prepared to take leading roles in planning, organizing, managing, designing and configuring security solutions in public and private organizations and will be familiar with state-of-the-art security technologies and best practices. The program takes a broad interdisciplinary approach to computer and information systems security that will help students develop the ability to see the larger organization and social, political, ethical and economic aspects of information security, as well as offering a unique graduate-level curriculum that is both technically and managerially oriented.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), the M.S. in Computer and Information Systems Security requires 30 graduate credit hours, including a core curricular component and an elective component. The elective component consists of three courses chosen by the student and selected from CISS course offerings or, with the approval of the program co-directors, from courses offered by the departments of Computer Science, Information Systems, Criminal Justice and Forensic Science.

Curriculum requirements

Students with an accredited bachelor's degree or post-baccalaureate certificate in fields such as computer science or information systems should be adequately prepared for the graduate curriculum. Students from other academic backgrounds may need to complete undergraduate prerequisite courses. Prerequisites are determined by the faculty adviser at the time of admission.

Information Systems, Master of Science (M.S.)

Program accreditation
Association to Advance Collegiate Schools of Business (http://www.aacsb.edu/)

Program goal
The Master of Science in Information Systems program is designed to prepare students for specialized roles using information systems to support organizations. The program is intended to provide a graduate-level, business-technology-oriented curriculum that focuses on the design and development of information systems to solve real-world problems. Graduates of the program are expected to be able to take significant roles in planning, organizing, managing, designing, configuring and implementing systems using state-of-the-art technologies within organizations.

Student learning outcomes
1. Graduates should be capable of communicating and networking effectively within their profession and within their organizations, serving the profession by applying this knowledge broadly and maintaining key technical expertise in order to sustain required levels of competitiveness.
2. Graduates must have an understanding of information technology as it applies to business contexts and the skill to apply this technology effectively in specific circumstances.
3. Graduates must be able to develop efficient and effective IS solutions using appropriate technologies that can deliver competitive advantages to organizations.
4. Graduates must be able to develop and incorporate changes in the planning and management of IS resources based on an increased understanding of the dynamic changes in the organization, IS and global environments.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must submit an up-to-date resume.

*Test requirements may be waived for candidates with an undergraduate or graduate degree from an accredited U.S. institution with a minimum GPA of 3.25. Waiver request information can be found on the Graduate Studies in Business webpage (https://business.vcu.edu/graduate-studies/how-to-apply/).

Degree requirements

Students applying to the Master of Science in Information Systems must show evidence of competence in selected prerequisite areas of information systems including: application programming, systems analysis and design, database, telecommunications and hardware/software. Evidence of this competence may include formal course work, comparable training within a work environment or significant, relevant and recent work experience in the field. Students enrolled as majors in the program who do not have a formal background or equivalent training must take the appropriate undergraduate courses to satisfy the prerequisites prior to taking master's program courses. Students without an accredited bachelor's degree or post-baccalaureate certificate in fields such as computer science or information systems will likely need to complete several undergraduate prerequisite courses. Prerequisites are determined by the faculty adviser at the time of admission.

In addition to the VCU Graduate School graduation requirements (p. 31), students who do not have a business degree must complete a minimum of two 500-level foundation courses (6 credit hours). Foundation courses may be waived for students who present satisfactory equivalent preparation at either the undergraduate or graduate level. Students who are required to take foundation courses may do so after admission. The foundation courses required will vary depending upon the student's background, career interests and the chosen area of specialization. Students applying to the program should consult with the master's program adviser to determine the foundation courses required for a particular area.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must submit an up-to-date resume.

*Test requirements may be waived for candidates with an undergraduate or graduate degree from an accredited U.S. institution with a minimum GPA of 3.25. Waiver request information can be found on the Graduate Studies in Business webpage (https://business.vcu.edu/graduate-studies/how-to-apply/).

Note: Admission to this program is temporarily suspended.

Degree requirements

Students applying to the Master of Science in Information Systems must show evidence of competence in selected prerequisite areas of information systems including: application programming, systems analysis and design, database, telecommunications and hardware/software. Evidence of this competence may include formal course work, comparable training within a work environment or significant, relevant and recent work experience in the field. Students enrolled as majors in the program who do not have a formal background or equivalent training must take the appropriate undergraduate courses to satisfy the prerequisites prior to taking master's program courses. Students without an accredited bachelor's degree or post-baccalaureate certificate in fields such as computer science or information systems will likely need to complete several undergraduate prerequisite courses. Prerequisites are determined by the faculty adviser at the time of admission.

In addition to the VCU Graduate School graduation requirements (p. 31), students who do not have a business degree must complete a minimum of two 500-level foundation courses (6 credit hours). Foundation courses may be waived for students who present satisfactory equivalent preparation at either the undergraduate or graduate level. Students who are required to take foundation courses may do so after admission. The foundation courses required will vary depending upon the student's background, career interests and the chosen area of specialization. Students applying to the program should consult with the master's program adviser to determine the foundation courses required for a particular area.

Total Hours | 30

The minimum total of graduate credit hours required for this degree is 30 (36 if all foundation courses are required).
Information Systems, Master of Science (M.S.) with a concentration in information technology management [Executive]

Program accreditation
Association to Advance Collegiate Schools of Business (http://www.aacsb.edu/)

Program goal
The Master of Science in Information Systems program is designed to prepare students for specialized roles in information systems. The program is intended to provide a graduate-level, technically oriented curriculum that focuses on the design and development of information systems to solve real-world problems. The department’s curriculum is focused on the rapidly emerging area known as enterprise information systems. Graduates of the program are expected to be able to take significant roles in planning, organizing, managing, designing, configuring and implementing EIS systems using state-of-the-art technologies within organizations.

Student learning outcomes
1. Graduates should be capable of communicating and networking effectively within their profession and within their organizations, serving the profession by applying this knowledge broadly and maintaining key technical expertise in order to sustain required levels of competitiveness.
2. Graduates must have an understanding of information technology as it applies to business contexts and the skill to apply this technology effectively in specific circumstances.
3. Graduates must be able to develop efficient and effective IS solutions using appropriate technologies that can deliver competitive advantages to organizations.
4. Graduates must be able to develop and incorporate changes in the planning and management of IS resources based on an increased understanding of the dynamic changes in the organization, IS and global environments.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduation.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information
School of Business policies and procedures for graduate master’s degree students are available on the school’s website.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Degree requirements
In addition to the VCU Graduate School graduation requirements (p. 31), students must complete a minimum of 30 graduate credit hours.

The Executive Master of Science in Information Systems with a concentration in information technology management provides an opportunity for current information technology professionals and business managers to receive the necessary preparation to move into IT management roles. Participants gain a wide range of new skills and knowledge by combining course work with their day-to-day professional activities. The program is targeted to rising business executives, entrepreneurs and information systems professionals. The program differs from the regular M.S. in Information Systems program in that it is offered in a weekend format, with students meeting for classes on alternate weekends throughout the calendar year. The lockstep program consists of 10 required courses.

Business Administration, Master of (M.B.A.)/Information Systems, Master of Science (M.S.) [dual degree]

Program accreditation
Association to Advance Collegiate Schools of Business (http://www.aacsb.edu/)

Program goal

Master of Business Administration

The purpose of the Master of Business Administration program at VCU is to prepare individuals for the responsibilities of management. As students at VCU, individuals will learn the functions and techniques of effective management. The student also will come to understand the environmental and economic factors that affect decision-making in organizations. In short, the student will know what to do as future events unfold that affect his/her firm or organization.

An M.B.A. from VCU benefits students at various points in their careers. Individuals who have recently received their baccalaureate degrees may choose to refine their business skills while their undergraduate training is fresh. Individuals with work experience often find that an M.B.A. is the key to rapid promotion or a career change. Finally, an M.B.A. from VCU meets the needs of students who recognize that the best preparation for an uncertain future is continuous learning.

Master of Science in Information Systems

The Master of Science in Information Systems program is designed to prepare students for specialized roles using information systems to support organizations. The program is intended to provide a graduate-level, business-technology-oriented curriculum that focuses on the design and development of information systems to solve real-world problems. Graduates of the program are expected to be able to take significant roles in planning, organizing, managing, designing, configuring and implementing systems using state-of-the-art technologies within organizations.

Student learning outcomes

For M.B.A. graduates

1. Students should be able to demonstrate the capacity to apply business knowledge in new and unfamiliar circumstances.
2. Students should be able to demonstrate the ability to work in teams and other groups.
3. Students should understand and be able to develop the ethical and social responsibilities of organizations.
4. Students should be able to describe the factors involved in key operation decisions and to apply appropriately techniques that provide insight and structure for management decision-making.
5. Students should be able to identify and understand major issues faced by organizations with evolving information technology and investigate issues and challenges faced by managers with changes in information technology.
6. Students should be able to describe the factors involved in key operation decisions and to apply appropriately techniques that provide insight and structure for management decision-making.
7. Graduates of the program should be able to critically evaluate and use accounting and other information for managerial decision-making.
8. Graduates should be able to evaluate marketing programs.
9. Students should be able to think critically and systematically about financial issues in businesses to develop techniques to analyze these issues numerically.
10. Graduates of the program should be able to develop an analytical framework for identifying the objectives of the firm and to provide some tools for evaluating the firm's performance.
For M.S. in Information Sciences graduates
1. Graduates should be capable of communicating and networking effectively within their profession and within their organizations, serving the profession by applying this knowledge broadly and maintaining key technical expertise in order to sustain required levels of competitiveness.
2. Graduates must have an understanding of information technology as it applies to business contexts and the skill to apply this technology effectively in specific circumstances.
3. Graduates must be able to develop efficient and effective IS solutions using appropriate technologies that can deliver competitive advantages to organizations.
4. Graduates must be able to develop and incorporate changes in the planning and management of IS resources based on an increased understanding of the dynamic changes in the organization, IS and global environments.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants to the dual degree Master of Business Administration and Master of Science in Information Systems program must submit an up-to-date resume.

Degree requirements
In addition to the VCU Graduate School graduation requirements (p. 31), students can earn both M.B.A. and M.S. in Information Systems degrees by having 12 credit hours counted toward both degrees.

Students in the dual degree program will follow the same schedule as regular M.B.A. students, including the two lockstep semesters. To get both degrees, students will take all foundation courses required for the M.B.A. (unless waived), all nine core courses required for the M.B.A. and nine additional courses in the M.S. in Information Systems program, including INFO 610, INFO 620 and INFO 630. Students whose undergraduate degrees are not in information systems may also be required to take additional undergraduate prerequisite courses before taking the graduate information systems courses, as determined by the program adviser. The INFO 661 course taken for the M.B.A. will substitute for INFO 640, normally required for the M.S. in Information Systems degree, and three of the additional information systems courses also will count toward the normally required three elective courses in the M.B.A. program.

One of the information systems courses must have substantial global, entrepreneurial and/or experiential components. The six information systems courses to be taken in addition to INFO 661, INFO 664, INFO 610, INFO 620 and INFO 630 must be approved by the program adviser, and would normally be selected to satisfy one of the M.S. in Information Systems concentrations.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants to the dual degree Master of Business Administration and Executive Master of Science in Information Systems with a concentration in information technology management program must submit an up-to-date resume.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 31), students can earn both M.B.A. and M.S. in Information Systems degrees by having 12 credit hours counted toward both degrees, thus requiring only 54 credit hours total of advanced course work (not counting foundation courses), rather than the 36 and 30 credit hours normally required for the two degrees.

To obtain both degrees, students will complete the entire 30 credit-hour information system master's program plus six M.B.A. core courses (ECON 610, FIRE 623, ACCT 608, MGMT 642, SCMA 675 and MKTG 671) plus two elective courses. Students must also complete any designated required courses. The course ISTM 671 will substitute for MGMT 641; ISTM 672 will substitute for INFO 661; and ISTM 677 will substitute for INFO 664. ISTM 673 will count toward one of the three required M.B.A. elective courses.

Business Administration, Master of (M.B.A.) [Executive]/Information Systems, Master of Science (M.S.) with a concentration in information technology management [Executive] [dual degree]

Program accreditation

Association to Advance Collegiate Schools of Business (http://www.aacsb.edu/)

Program goal

Executive M.B.A.

VCU’s School of Business Executive M.B.A. program provides experienced managers in Virginia and surrounding states with the knowledge and skills needed to solve real-world business problems in today’s complex global environment. The Executive M.B.A. program
accomplishes this purpose by using a curriculum with an integrated, modular, team-oriented, interdisciplinary approach that constantly challenges students to apply knowledge and skills to new and unfamiliar situations by using a conceptual understanding of relevant business disciplines.

**M.S. in Information Systems**

The Master of Science in Information Systems program is designed to prepare students for specialized roles in information systems. The program is intended to provide a graduate-level, technically oriented curriculum that focuses on the design and development of information systems to solve real-world problems. The department's curriculum is focused on the rapidly emerging area known as enterprise information systems. Graduates of the program are expected to take significant roles in planning, organizing, managing, designing, configuring and implementing EIS using state-of-the-art technologies within organizations.

**Student learning outcomes**

**Executive M.B.A.**

1. Demonstrate the capacity from an executive perspective to integrate knowledge-specific information to different business disciplines in helping teams to solve business problems in new and unfamiliar circumstances
2. Demonstrate communication knowledge and skills in both technical and interpersonal areas
3. Demonstrate an understanding of the ethical and social responsibility of business organizations in the U.S. and in other parts of the world
4. Demonstrate analytic skills using new and unfamiliar data sets

**M.S. in Information Systems**

Graduates should be able to:

1. Communicate and network effectively within their professions and organizations; serve the profession by applying this knowledge broadly; and maintain key technical expertise in order to sustain required levels of competitiveness
2. Understand information technology as it applies to business contexts and effectively apply this technology in specific circumstances
3. Develop efficient and effective IS solutions using appropriate technologies that can deliver competitive advantages to organizations
4. Develop and incorporate changes in the planning and management of IS resources based on an increased understanding of the dynamic changes in the organization, IS and global environments

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

**Other information**

School of Business policies and procedures for graduate master's degree students are available on the school's website.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

**Admission requirements**

**Admission notes regarding deadline:** Students in the Executive M.B.A. program have the option to continue with the Executive M.S. in Information Systems with a concentration in information technology management program after having completed the requirements for the Executive M.B.A. to earn both degrees.
Applicants must meet all general admission requirements of the VCU Graduate School (p. 35).

**Degree requirements**

In addition to VCU Graduate School graduation requirements (p. 31), students must complete a minimum of 60 hours of graduate course work. Students pursuing this dual degree option will have three courses in the Executive M.S. program waived. These three courses cover the information systems content of the Executive M.B.A. program.

**Health Administration, Master of (M.H.A.)/Information Systems, Master of Science (M.S.) [dual degree]**

Advanced study in health administration and information systems is available through a dual degree program co-sponsored by the Department of Health Administration in the College of Health Professions and the Department of Information Systems in the School of Business.

The dual degree M.H.A/M.S. program allows students interested in the fields of health management and information technology to earn two highly ranked and relevant master’s degrees in just three years, which is the time it usually takes to complete just one of the degrees. The dual degree program is ideal for students who are pursuing careers in health IT management, health IT business consulting or working in the health IT vendor industry.

Applicants for this program are required to meet the admission requirements of each program. For information regarding the dual degree program, contact the director of the program.

The proposed curriculum allows students to earn both the M.H.A. and the M.S. in Information Systems with a total of 78 credit hours rather than the 89 credit hours that would be required to obtain the degrees separately. The dual degree option offers this credit-hour efficiency by taking advantage of curricular similarities in the two programs and allowing some courses to count toward both sets of requirements. A total of 12 credit hours will count toward both degrees and the M.H.A. foundation courses will be substituted for the business school foundation course requirements for combined degree students. Students in the combined degree program will follow the same schedule as regular M.H.A. students, including the two lockstep years.

Students will take 51 credit hours of health administration courses required for the M.H.A. and nine additional courses (27 credit hours) in the M.S. in Information Systems program, including INFO 610, INFO 620 and INFO 630. Students whose undergraduate degrees are not in information systems may also be required to take additional undergraduate prerequisite courses before taking the graduate information systems courses, as determined by the program adviser. The HADM 612 course taken for the M.H.A. will substitute for INFO 640, normally required for the M.S. in Information Systems degree, and one of the additional information systems courses will also count toward the elective courses in the M.H.A. program. A three-credit-hour, 10-week internship is required and must have substantial global, entrepreneurial and/or experiential components related to both degrees. The six information systems courses to be taken in addition to INFO 610, INFO 620 and INFO 630, must be approved by the program adviser and would normally be selected to satisfy one of the M.S. in Information Systems concentrations.

Department of Management and Entrepreneurship
S. Douglas Pugh, Ph.D.
Professor and chair

The Department of Management and Entrepreneurship offers a Bachelor of Science in Business with concentrations in human resource management, management/business administration, management/entrepreneurship and management/international management. The department also offers a human resource management minor and a certificate in international management studies, as well as a doctoral degree in business with a concentration in management.

Department of Marketing
Bruce Huhmann, Ph.D.
Professor and chair

business.vcu.edu/academics/marketing (https://business.vcu.edu/academics/marketing/)

The Department of Marketing provides students with a comprehensive introduction to the many topics and concepts that make up today’s marketing professions. Additionally students have the opportunity to participate in high quality learning experiences that broaden traditional ideas of the classroom in projects, exercises and internship experiences that involve a variety of business organizations as well as state and local government agencies.

Decision Analytics, Master of (M.D.A.)

Program accreditation
Association to Advance Collegiate Schools of Business (http://www.aacsb.edu/)

Program goal
The Master of Decision Analytics provides students with knowledge of the statistical, mathematical and scientific skills and experience necessary to utilize advanced methods of data analysis for business decision-making.

Student learning goals
Students will be able to examine a situation/problem to determine a relevant data-driven analysis to provide valuable information for decision makers and apply advanced analytical and quantitative skills to the decision problems of businesses, organizations and society. Students will be able to communicate analysis information and recommended decisions in a clear, ethical and transparent manner.

Student learning outcomes
1. Database structures and query: Students will have an understanding of basic database structures, be able to query databases and organize data for analysis.
2. **Quantitative skills:** Students will be able to identify appropriate data analysis approaches to address real-world problems. They will be able to perform the analysis using commercial software.

3. **Problem formulation:** Students will have the knowledge, skills and practice to take nonquantitative and perhaps ill-formed problems and issues and determine ways objective analysis can bring organization and insight to them. They will be able to determine data requirements and query available databases.

4. **Analytics applications:** Students will experience various applications of analytics in real situations.

5. **Technical communications and teamwork:** Students will be able to communicate analytical analysis and results effectively to nonquantitative audiences, and will develop skills in organizing, interacting and analyzing real problems as members of a team.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Total Hours 33

The minimum total of graduate credit hours required for this degree is 33 (30 if foundation course is waived).

Additional contact
Graduate Studies in Business
Email: gsb@vcu.edu
Phone: (804) 828-4622

Program website: business.vcu.edu/graduate/dsba.html

Program goal
The M.D.A. program provides in-depth knowledge of one business discipline and allows students to develop and build technical skills in their specific areas of interest. It is frequently recommended for students with undergraduate business degrees.

Student learning goals
Students will be able to examine a situation/problem to determine a relevant data-driven analysis to provide valuable information for decision makers and apply advanced analytical and quantitative skills to the decision problems of businesses, organizations and society. Students will be able to communicate analysis information and recommended decisions in a clear, ethical and transparent manner.

Student learning outcomes
1. Database structures and query: Students will have an understanding of basic database structures, be able to query databases and organize data for analysis.
2. Quantitative skills: Students will be able to identify appropriate data analysis approaches to address real-world problems. They will be able to perform the analysis using commercial software.
3. Problem formulation: Students will have the knowledge, skills and practice to take nonquantitative and perhaps ill-formed problems and issues and determine ways objective analysis can bring organization and insight to them. They will be able to determine data requirements and query available databases.
4. Analytics applications: Students will experience various applications of analytics in real situations.
5. Technical communication and teamwork: Students will be able to communicate analytical analysis and results effectively to nonquantitative audiences, and will develop skills in organizing, interacting and analyzing real problems as members of a team.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the
graduate faculty of the university through their elected representatives to
the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

Other information
School of Business policies and procedures for graduate master’s degree students are available on the school’s website.

Apply online at graduate.admissions.vcu.edu (http://wwwgraduate.admissions.vcu.edu).

In addition to the general admission requirements of the VCU Graduate School (p. 31), applicants should have three years of work experience in an application area. Students without the required work experience may take six credit hours of graduate-level courses in an application area prior to acceptance into the program. Applicants are expected to have successfully completed an undergraduate or graduate course in statistics, and it is preferable that they have programming experience. Exceptions may be made at the discretion of the program director.

Degree requirements
The Master of Decision Analytics provides students with a breadth of analytical and quantitative skills with experience in analyzing and communicating solutions to problems arising in an organization.

Leading organizations gain competitive advantage through the use of analysis of relevant data to guide and drive strategic and tactical decisions. Increased volumes of data and emphasis on data-driven decision-making create new challenges for decision-makers and provide new employment opportunities for people with deep analytical skills. There is a significant and growing demand for individuals with the ability to work collaboratively within an organization to mine relevant raw data and refine data into a recommended action of value to the enterprise. The decision analytics degree equips students with the essential skills to be analytically functional in an organization.

Skills, abilities and knowledge necessary for success in analytics:
1. Work in a collaborative environment
2. Translate specific business questions into problems that can be insighted through data analysis
3. Acquire and organize appropriate data so it can be used for analysis
4. Know general principles and common tools and be able to apply them to analyze specific business problems
5. Develop and effectively communicate an actionable solution for specific business questions

The decision analytics degree focuses on the applications of digital and information technology, decision sciences and statistics to decision-making and problem-solving in organizations. The program will give students the theory, knowledge and skills to:

1. Formulate frequently nonquantitative and ill-formed business issues so they can be insighted through data analytics
2. Retrieve, cleanse and organize data from mega databases (big data)
3. Perform appropriate statistical analysis and interpret the results
4. Explain analytical results to nonquantitative management

The professional track is presented in a concentrated weekend schedule, making the program attractive to midcareer professionals who want to gain or increase their analytics skills without interrupting their careers.

In addition to the VCU Graduate School graduation requirements (p. 31) and credit hour requirements, students must complete up to four classes (zero to 12 credit hours) of foundation course work. At the time of application, all undergraduate and graduate transcripts will be reviewed to determine if the following courses may be waived. Waivers of foundation courses only occur when a student has completed the required undergraduate equivalent courses with a minimum grade of C.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants to the master’s program in business must submit an up-to-date resume.

**Degree requirements**

The decision analytics degree provides students with knowledge of quantitative skills and experience in analyzing problems and using data for decision-making in a business environment. Depending upon individual student interests and adviser approval, the required nucleus is supplemented with relevant elective courses from within the School of Business or from outside departments.

In addition to the VCU Graduate School graduation requirements (p. 31):

1. All students must have completed a course in calculus prior to attempting graduate business courses. This prerequisite can be met after admission to the program.
2. Students must complete up to four classes (zero to 12 credit hours) of foundation course work. At the time of application, all undergraduate and graduate transcripts will be reviewed to determine if the following courses may be waived. Waiver of a foundation course may be awarded when a student demonstrates equivalent knowledge, such as completing the required undergraduate equivalent course with minimum grade of C.

The concentration in health care administration requires an additional nine credit hours beyond the minimum 30-credit hours required for the degree.

Decision Analytics, Master of (M.D.A.) with a concentration in health care management – professional track

Program accreditation
Association to Advance Collegiate Schools of Business (http://www.aacsb.edu/)

Program goal
The M.D.A. program provides in-depth knowledge of one business discipline and allows students to develop and build technical skills in their specific areas of interest. It is frequently recommended for students with undergraduate business degrees.

Student learning goals
Students will be able to examine a situation/problem to determine a relevant data-driven analysis to provide valuable information for decision-makers and apply advanced analytical and quantitative skills to the decision problems of businesses, organizations and society. Students will be able to communicate analysis information and recommend decisions in a clear, ethical and transparent manner.

Student learning outcomes
1. Database structures and query: Students will have an understanding of basic database structures, be able to query databases and organize data for analysis.
2. Quantitative skills: Students will be able to identify appropriate data analysis approaches to address real-world problems. They will be able to perform the analysis using commercial software.
3. Problem formulation: Students will have the knowledge, skills and practice to take nonquantitative and perhaps ill-formed problems and issues and determine ways objective analysis can bring organization and insight to them. They will be able to determine data requirements and query available databases.
4. Analytical applications: Students will experience various applications of analytics in real situations.
5. Technical communications and teamwork: Students will be able to communicate analytical analysis and results effectively to nonquantitative audiences and will develop skills in organizing, interacting and analyzing real problems as members of a team.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Supply Chain Management, Master of (M.S.C.M.)

Program accreditation
Association to Advance Collegiate Schools of Business

Program goal
The Master of Supply Chain Management program will educate students on the theory, skills and practices necessary to manage the daily challenges in managing global supply chains. Students will be introduced to supply management and logistics systems, international logistics, transportation management, enterprise resource planning and innovation processes. In addition, students will learn how to identify problems, gather information, analyze data, interpret solutions, establish contingencies and effectively present results.

Although developed in collaboration with the U.S. Army, the intent of the program is to provide an opportunity for both military officers and civilians to earn a master’s degree in supply chain management.

Student learning goals
Graduates will employ knowledge of supply chain management, while effectively utilizing analytics tools, to provide solutions and insight to complex business solutions.

Student learning outcomes
1. Content knowledge: Demonstrate an understanding of the complexities of global supply chains
2. Uncertainty and risk: Demonstrate appropriate strategies to assess and manage uncertainty and risk
3. Analytics methodologies: Employ analytics tools to support decision-making
4. Analytics applications: Apply analytics techniques to supply chain problems

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information
School of Business policies and procedures for graduate master’s degree students are available on the school’s website.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

SCHOOL OF DENTISTRY

The School of Dentistry was created in 1893 when the University College of Medicine opened with a dental department as one of its original divisions. The Medical College of Virginia inaugurated a dental education program in 1897, and in 1913 the two schools were merged to form the MCV School of Dentistry.

In 1968, by an act of the Virginia General Assembly, MCV was merged with Richmond Professional Institute to form Virginia Commonwealth University. The School of Dentistry is located on VCU’s MCV Campus.

The facilities of the School of Dentistry are housed in the Wood Memorial, Lyons and Perkinson buildings and contain clinical facilities, research facilities, classrooms, student laboratories, departmental offices and a computer-learning laboratory.

The school provides opportunities for selected, qualified individuals to study dentistry under the most favorable conditions and in accordance with the standards established by the Commission on Dental Accreditation of the American Dental Association.

The degree of Doctor of Dental Surgery (D.D.S.) is awarded to graduates of the school’s professional program and the Bachelor of Science degree to graduates of the Dental Hygiene Program within the Department of Oral Health Promotion and Community Outreach.

Graduates of the advanced dental education programs in endodontics, orthodontics, pediatric dentistry and periodontics are awarded the Master of Science in Dentistry degree.

Mission

The mission of the VCU School of Dentistry:
• Education of highly qualified dental professionals
• Research that advances the understanding of oral health, disease and effective treatment
• Service to the community
• Improved oral and general health of our patients and the general population

Philips Institute for Oral Health Research

Iain M. Morgan, Ph.D.
Director

The mission of the Philips Institute for Oral Health Research is to serve the university and the commonwealth of Virginia as a center of educational and research excellence focused on infectious, neoplastic and genetic diseases of the oral cavity, head and neck.

Dentistry, Master of Science in (M.S.D.) with a concentration in endodontics

Program accreditation
Commission of Dental Accreditation of the American Dental Association

Program goal

The advanced dental specialty education program in endodontics offers the resident a comprehensive 24-month course of study in clinical and didactic endodontics. The program is designed to educate qualified individuals to pursue careers as practicing clinical dental specialists in endodontics. The program meets the educational requirements for limitation of practice to the specialty of endodontics and prepares the student for examination by the American Board of Endodontics.

Students completing the program earn a specialty Certificate in Endodontics and a Master of Science in Dentistry degree. The program conforms to the Standards for Advanced Specialty Education in Endodontics and carries a full approval status from the Commission on Dental Accreditation of the American Dental Association.

Student learning outcomes

Graduates of this program will:
1. Formulate and conduct a relevant research project as evidenced in the completion of a master's thesis in a publishable format for a refereed journal
2. Be equipped to practice evidence-based endodontics
3. Have demonstrated the ability to communicate with patients, colleagues in general dentistry, dental specialties, medicine and other health care practitioners in the provision of ethical and informed patient care
4. Be proficient in:
   a. Diagnosis, treatment planning and prognosis of pulpal and periradicular disease
   b. Provision of nonsurgical endodontics, retreatment and surgical endodontics
   c. Outcome assessment
   d. Diagnostic imaging technologies
   e. Management of medically compromised patients
   f. Emergency management of endodonic conditions
   g. Management of orofacial pain and dental anxiety
   h. Use of magnification technologies
   i. Use of emerging techniques of endodontic treatment
   j. Management of traumatic dental injuries
5. Be eligible to sit for the Diplomate Boards of the American Board of Endodontists

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information

For a current copy of the program handbook, contact the VCU School of Dentistry's Department of Endodontics.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

</table>

Special requirements

- Applicants from countries where English is not the primary and official language must complete the TOEFL with a minimum score of 100.

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. Graduation from an accredited university or its equivalent, with a Doctor of Dental Surgery or Doctor of Medicine in Dentistry or the international equivalent
2. For international students, an external credential evaluation of all international transcripts to complete the application (WES, ECE, and AACRAO are some of the recommended NACES-approved providers.)
3. One “dean's letter” from the academic institution from which the individual received the dental degree that gives class rank, GPA and overall academic recommendation
4. Two letters of recommendation from individuals who are in a position to judge the applicant's ability to engage in graduate study and pursue advanced dental training
5. A written letter of professional intent or biographical statement that reflects the candidate's desire to pursue the specialty and the intent upon receipt of the degree and certificate
6. A resume or curriculum vitae
7. An administrative application fee made payable to the Department of Endodontics, School of Dentistry (See website for details. This fee is in addition to the application fee that has to be paid with the submission of the graduate application. One year of an AEGD, GPR or the private practice equivalent is preferred but not required.)

Admission to the advanced dental specialty program in endodontics is through American Dental Education Association Postdoctoral Application Support Service. PASS historically opens to receive applications mid-May of the year prior to the year for which the candidate wishes to enroll and is open until Aug. 15. Please refer to the VCU School of Dentistry website, Department of Endodontics postgraduate information or ADEA PASS for specific yearly dates of the application period.

Candidates are required to interview in person. Invitations to interview followed by an invitation to accept a position in the residency are extended by the program director in the fall at the close of the application period. For example, the candidate will submit an application through ADEA PASS during the application period (May through August). An invitation will be extended to interview with the advanced dental specialty program in endodontics admission committee in August or September. The candidate will be informed of selection or nonselection by Nov. 15. The resident will start the clinical program the following June and the academic program the following September.

Admission to the Master of Science in Dentistry degree program is made after the candidate has accepted a residency position in the advanced dental specialty program in endodontics.

**Degree requirements**

All course work must be completed within the 24-month timeframe for the program. Any extension of the 24-months is at the discretion of the program director. Extensions are approved only in extenuating circumstances.

In addition to general VCU Graduate School graduation requirements (p. 31), a cumulative GPA of 3.0 must be maintained. Residents must receive a minimum grade of B for all required courses. A student with a grade of C in a required course may be required to repeat the course. A second grade of C in a required course may result in dismissal from the program. At the discretion of the program director, a resident retaking a required course may still be eligible to take the comprehensive written and oral examinations and to start the thesis research process prior to successful completion of the repeat of the course.

In the last semester of the second year the resident will take a written and oral comprehensive examination designed to evaluate the resident’s ability to integrate the didactic and clinical course material, demonstrate critical-thinking skills and demonstrate command of evidence-based endodontics. Both the written and oral examinations must be successfully completed to receive the specialty Certificate in Endodontics.

The Certificate of Endodontics, conferred by the School of Dentistry, is only conferred upon completion and awarding of the Master of Science in Dentistry.

The residents must formulate, complete and defend a research project. The resident will prepare a manuscript in a thesis format or in the publishable format of a refereed journal. The project must be completed, defended and presented in a research forum in order for the resident to qualify for receipt of the Master of Science in Dentistry.

Dentistry, Master of Science in (M.S.D.) with a concentration in orthodontics

Program accreditation
Commission on Dental Accreditation of the American Dental Association

Program goal
The Department of Orthodontics offers a 24-month advanced education Master of Science in Dentistry program. The program teaches the latest in clinical care in an environment modeled after private orthodontic practice. The curriculum is composed of seminars and small-group instruction with emphasis on critical thinking and problem-solving. Contemporary concepts of orthodontic treatment are reviewed for substantive and scientific content. Also included are regularly scheduled orthognathic surgery conferences and seminars with other dental and medical specialists.

The postgraduate program is designed to develop skilled practitioners who are prepared to grow with the future and manage busy orthodontic practices. Our goal is not only to familiarize future orthodontists with contemporary techniques but also to teach them how to interpret cutting-edge scientific information and use it to approach clinical challenges logically and practically.

The program’s clinical experience consists of a wide variety of orthodontic patients, including complex cases requiring orthognathic surgery and patients with facial clefts and other craniofacial abnormalities. An original research experience is an integral part of our program with each project intended to produce results suitable for publication in a nationally circulated orthodontic journal. The successful completion of a research project is required. All senior residents present their research at the Virginia Association of Orthodontists’ meeting. The program makes students educationally qualified to take the written portion of the American Board of Orthodontics (http://www.americanboardortho.com) examination in the senior year. Residents are required to pass the written portion of the examination prior to graduation and are encouraged to continue and complete the board certification process. This exam is given prior to the American Association of Orthodontists’ meeting.

Students completing the program earn a specialty Certificate in Orthodontics and Master of Science in Dentistry degree. Students must complete the requirements for the master’s degree prior to being awarded the specialty certificate.

Students register for .5 credits for both fall and spring semesters for both years of the program. They receive a continuing grade in the fall semester and a pass/fail grade at the end of the spring semester for the entire year. Students take the class four times for .5 credits each time, but they are only graded for two .5 credit classes.
The program is accredited by the Commission on Dental Accreditation of the American Dental Association.

**Student learning outcomes**
Graduates of this program will:

1. Formulate and conduct a relevant research project as evidenced in the completion of a master's thesis in a publishable format for a refereed journal
2. Be equipped to practice evidence-based orthodontics
3. Have demonstrated the ability to communicate with patients, colleagues in general dentistry, dental specialties, medicine and other health care practitioners in the provision of ethical and informed patient care
4. Be proficient in:
   a. Diagnosis, treatment planning, treatment, retention and prognosis of dental malocclusions and dento-facial disharmony
   b. Use of various fixed and removable appliances, aligner technology
   c. Outcome assessment
   d. Diagnostic imaging technologies
   e. Management of patients with craniofacial deformities
   f. Management of combined orthodontic and surgical cases
   g. Use of temporary anchorage devices and soft tissue laser
   i. Use of digital technology for records taking and treatments with aligners
5. Be eligible to sit for the Diplomate Boards of the American Board of Orthodontists

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

**Degree candidacy requirements**
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

**Graduation requirements**
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

**Admission requirements**

<table>
<thead>
<tr>
<th>Degree</th>
<th>Semester(s) of entry:</th>
<th>Deadline dates:</th>
<th>Test requirements:</th>
</tr>
</thead>
<tbody>
<tr>
<td>M.S.D.</td>
<td>Fall (Jul 1 start date)</td>
<td>Sep 2</td>
<td>NBDE, GRE, TOEFL or IELTS if international</td>
</tr>
</tbody>
</table>

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. Agreement to participate in the Postdoctoral Dental Matching Program
2. Agreement to participate in the American Dental Education Association Postdoctoral Application Support Service
3. Graduation or anticipated graduation from dental school
4. Eligibility to obtain a Virginia temporary resident's license from the Virginia Board of Dentistry
5. Completion of National Boards Part I and anticipated completion of Part II
6. Completion of GRE
7. Completion of TOEFL or IELTS (for students whose native language is not English)
8. Application to the orthodontic graduate program through the ADEA PASS program. The PASS application should include the following items:
   a. Online application form
   b. Essay/personal statement: Please tell us about your personal history that led you to apply for an educational program in orthodontics. Include your plans for the future and any factors you believe are important for us to know in reviewing your application. Please limit your comments to one page.
   c. Curriculum vitae/resume: Include a curriculum vitae/resume to give us more information about yourself. Include your education
and work experiences, awards, honors, research experiences, and personal interests.

d. Undergraduate college transcripts: Include official transcripts from all colleges or universities you have attended before dental school.

e. Dental school transcripts

f. Institution Evaluation Form (completed by the dean of your dental school)

g. Personal potential index report (evaluation of different criteria by three to five evaluators compiled into a single report)

h. Professional evaluations: two letters of recommendation from individuals who can personally attest to your professional and personal qualities (the program director’s letter can count as one). A letter from the chair of orthodontics is not required, but may be included if the chair has personal knowledge of your skills. Note: Professional evaluations are listed as optional for PASS; however, they must be submitted for VCU’s program.

9. The following supplementary items are to be submitted directly to the VCU Department of Orthodontics:
   a. Application cover page

   b. Application fee of $50 (U.S. dollars drawn on a U.S. bank) made payable to VCU (Application fee is nonrefundable.)

   c. Official transcripts from all colleges or universities you have attended after dental school, if any (If you have attended a program without a transcript, such as a residency, we will need a letter from your program director documenting the experience.)

   d. Additional letters of recommendation may be submitted if you feel they would be beneficial to your application (optional).

   e. National Board scores: Have an original score report sent directly to the Department of Orthodontics from the National Board Office in addition to enclosing a copy in your supplementary materials package/envelope. If you have taken other exams (or if you wish to add to your file), you may send any item of this type for our consideration. The National Board scores, Part I, are required (even if you are a graduate of a foreign school) no exceptions.

   f. GRE scores: Have an original score report sent directly to the Department of Orthodontics from the Educational Testing Service office in addition to enclosing a copy in your supplementary materials package/envelope. The GRE scores are required (even if you are a graduate of a foreign school) no exceptions.

   g. TOEFL or IELTS scores are required for students whose native language is not English. These scores are not required if you went to dental school or graduate school in an English-speaking environment (U.S.A., Canada, Australia or Great Britain, etc.). Foreign dental school graduates: Graduation from our orthodontic program qualifies you to apply for a dental license in the commonwealth of Virginia; however, other regulations apply. For example, after graduation from our program, you will be required to take and pass a regional testing agency dental examination.

2. Didactic course work in the department consists primarily of small-group seminar sessions for an average of two hours each day.

3. Clinical work simulates a private-practice environment. Each team consists of one junior and one senior orthodontic resident and a dental assistant whose time is dedicated to that team. The orthodontic clinic has its own business manager, practice manager and receptionist. Patient records are computerized, and billing, scheduling and record storage are accomplished using a commercial orthodontic office management system. The objective is to maximize clinical efficiency so residents fully develop the thought processes necessary to master orthodontic principles and treatment techniques. Graduates are prepared to enter into a successful and busy orthodontic practice.

Total Hours: 92

Degree requirements

1. The 24-month certificate program in orthodontics begins July 1 with two weeks of classes to familiarize students with concepts of growth and development, diagnosis and treatment planning, and basic biomechanical principles. First-year residents see new patients in the clinic in mid-July. In August, first-year residents begin a full clinic schedule that includes a morning and afternoon clinic session on most days.

Students register for .5 credits for both fall and spring semesters for both years of the program. They receive a continuing grade in the fall semester and a pass/fail grade at the end of the spring semester for the entire year. Students take the class four times for .5 credits each time, but they are only graded for two .5 credit classes.

The minimum total of graduate credit hours required for this degree is 92.

**Total Hours:** 92

Students register for .5 credits for both fall and spring semesters for both years of the program. They receive a continuing grade in the fall semester and a pass/fail grade at the end of the spring semester for the entire year. Students take the class four times for .5 credits each time, but they are only graded for two .5 credit classes.

The minimum total of graduate credit hours required for this degree is 92.

---

**Dentistry, Master of Science in (M.S.D.) with a concentration in pediatric dentistry**

**Program accreditation**
Commission on Dental Accreditation of the American Dental Association

**Program goals and objectives**

The didactic requirements of the Master of Science in Dentistry are combined with the goals of the M.S.D. program to provide the student with a strong clinical background that is supported by a strong background in research methodology.
Program goals
1. To provide an academic environment for inquiry in which expertise and knowledge in basic sciences and clinical pediatric dentistry can be achieved
2. To provide a sound background in medicine as it applies to the pediatric/adolescent patient and to patients with special health care needs
3. To provide a sound background in oral pathology
4. To be able to interpret, critique and apply literature associated with the field of pediatric dentistry
5. To develop sound diagnostic, clinical, nonsurgical and surgical skills in the clinic and in the operating room
6. To provide didactic instruction and clinical training in the area of nonpharmacologic and pharmacologic behavior management
7. To provide instruction and training in growth and development to include clinical interceptive orthodontic care
8. To provide methods of pain and anxiety control, including nitrous oxide and oral conscious sedation
9. To provide an environment for the interpretation and implementation of research
10. Enable successful completion of the American Board of Pediatric Dentistry exam
11. To develop sound lifelong didactic and clinical learning skills
12. To provide specialists in pediatric dentistry for community health care, professional service and dental education

Program objectives
1. To be exposed to the basic sciences and be able to apply concepts to clinical pediatric dentistry
2. To be able to critically critique and interpret the old and new literature
3. To have an understanding of oral pathology and medicine as it applies to management of the pediatric/adolescent patient and patients with special health care needs
4. To have residents become exposed to and proficient in multiple nonsurgical and surgical treatment modalities to include treatment of patients under general anesthesia
5. To become competent in diagnosis and treatment planning
6. To obtain competency and certification in moderate conscious sedation
7. To complete research, M.S.D. and prepare a paper for presentation and publication
8. To prepare the student to successfully complete Part I and II of the ABPD examination
9. To develop communication and presentation skills and lifelong learners

Student learning outcomes
Graduates of this program will be competent in:

Knowledge – concepts, facts and information
1. Knowledge and skills in the areas of pediatric medicine and oral medicine, as well as the delivery of dental care and oral surgery for compromised children and adolescents
2. In-depth knowledge and skills in the use of pharmacologic and nonpharmacologic behavior management techniques
3. Knowledge of hospital protocol, policies, rules, regulations and the ability to treat pediatric dental patients in the hospital environment
4. Ability to evaluate the dental literature and its research findings to the benefit of patients and to engage in scholarly activity which results in completion of a master’s degree thesis suitable for publication
5. Knowledge of preventive and corrective dental procedures relating to general and oral health and to growth and development of the stomatognathic system
6. Knowledge and skill in oral and maxillofacial radiology specific to the needs of the child and adolescent
7. Preparation for managing a contemporary pediatric dental practice relative to practice administration, efficient auxiliary utilization and marketing
8. Understanding of the biomedical sciences related to the practice of contemporary pediatric dentistry: biostatistics/epidemiology, pharmacology, microbiology, embryology, genetics, anatomy and oral and medical pathology
9. In-depth knowledge of the physical, psychological and social development of children
10. In-depth knowledge of oral and perioral lesions and anomalies in the pediatric dental patient
11. In-depth knowledge of the management of dental and medical emergencies in the dental setting
12. Understanding of normal and abnormal language development
13. Understanding of jurisprudence, risk management and biomedical ethics
14. Understanding office and practice management including the use of contemporary technologies

Clinical competency
1. Ability to appropriately manage and guide the behavior of the child patient to accept needed treatment and to provide advice or guidance to the parent to enhance the child’s acceptance
2. Expertise in managing and rendering optimal dental care for the medically, emotionally or physically challenged pediatric dental patient
3. Ability to perform evaluations of the physical status of children and adolescents
4. Ability to transform didactic/learned information into appropriate clinical situations
5. Skill in the use of pharmacologic and nonpharmacologic methods for the comprehensive control of pain and anxiety
6. Ability to recognize, refer and treat children who have sustained abuse and neglect
7. Expertise in dental surgical procedures for the restoration of the dentition
8. Skill/dexterity in performing procedures of periodontal, mucocutaneous and associated hard tissues of the oral-maxillofacial region, including in-depth knowledge of biopsy and adjunctive diagnostic tests
9. Appropriate management of orofacial injuries

Diagnostic skills
1. Ability to recognize the early signs of child abuse and neglect
2. Ability to diagnose dental trauma
3. Skill in the diagnosis, prevention and treatment planning of pediatric disease in the primary and permanent dentition and periodontal,
mucocutaneous and associated hard tissues of the oral-maxillofacial region
4. Application and understanding of patient monitoring

Communication skills
1. Competence in the skills required to instruct and motivate children and their caretakers in methods of achieving and maintaining optimum oral health
2. Ability to prepare patients and caretakers for procedures
3. Ability to interact meaningfully with dental and nondental health care providers
4. Ability to work cooperatively with consultants and clinicians of other specialties and health-related fields

Organizational skills and documentation
1. Coordination of tasks such that diagnosis, case analysis, treatment planning and clinical management of oral-facial health problems of the pediatric dental patient occur in a logical, efficient manner
2. Ability to present an organized treatment plan to the patient, parent, attending and front desk
3. Ability to manage time and tasks and to work effectively with people

Research
1. Coordination and implementation of a research project
2. Successful completion of a research project, thesis preparation and thesis defense

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the VCU Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

</tr>
</tbody>
</table>

Special requirements
- Applicants from countries where English is not the primary and official language must complete the TOEFL.
- Upon acceptance in the specialty certificate program in pediatric dentistry, applicants must apply to the Graduate School for the M.S.D.

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. D.D.S. or D.M.D. from an American Dental Association-accredited dental school
2. Successful completion of Part I of the National Dental Board Exam at the time of application and completion of Part II by the time of matriculation
3. Minimum grade point average of 3.0 (4.0 scale) or equivalent
4. Ranking in the top 50 percent of the class of the dental school attended
5. Personal interview
6. An externship in pediatric dentistry of at least one week in duration while attending dental school (highly encouraged)
7. Participation status with American Dental Education Association Postdoctoral Application Support Service and the Postdoctoral Dental Matching Program
8. Agreement to participate in the Postdoctoral Dental Matching Program
9. Agreement to participate in the ADEA PASS
10. Graduation or anticipated graduation from a CODA-accredited U.S. or Canadian dental school
Eligibility to obtain a Virginia Temporary Resident’s License from the Virginia Board of Dentistry

Completion of GRE

Completion of TOEFL or IELTS for students whose native language is not English

Application to the pediatric graduate program is accepted through the ADEA PASS program. The PASS application should include the following items:

- Online application form
- Essay/personal statement: Please tell us about your personal history that led you to apply for an educational program in pediatrics. Include your plans for the future and any factors you believe are important for us to know in reviewing your application. Please limit your comments to one page.
- Curriculum vitae/resume: Include a curriculum vitae/resume to give us more information about yourself. Include your education and work experiences, awards, honors, research experiences, and personal interests.
- Undergraduate college transcripts: Include official transcripts from all colleges or universities you attended before dental school.
- Dental school transcripts
- Institution Evaluation Form (completed by the dean of your dental school)
- Personal potential index report (evaluation of different criteria by three to five evaluators compiled into a single report)
- Professional evaluations: two letters of recommendation from individuals who can personally attest to your professional and personal qualities (the program director’s letter can count as one). A letter from the chair of pediatrics is not required, but may be included if the chair has personal knowledge of your skills. Note: Professional evaluations are listed as optional for PASS; however, they must be submitted for VCU’s program.

Special admission requirements

International applicants must complete the following requirements and documentation. Permanent U.S. residents and international students are advised to contact VCU International Admissions (http://international.admissions.vcu.edu/) to ensure eligibility.

1. D.D.S. or D.M.D. from an international dental school program
2. Provide all information in items 1 through 7 above
3. Test of English as a Foreign Language (http://www.ets.org/toefl/) (minimum score of 600 on paper-based test and 100 on Internet-based test)
4. International English Language Testing System (http://www.ielts.org) (score of 6.5 or greater acceptable; test must be taken within two years of application date)

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), a cumulative GPA of 3.0 must be maintained. Students must receive a minimum grade of B for all required courses. Students will take written and oral examinations and must obtain a minimum grade of B in order to pass. If either is not obtained then the examination must be retaken. For research the student must have a thesis defense and present a poster by mid-April of their second year. Extensions may be approved at the students own expense.

### Program goals and objectives

**Program goals**

1. To provide an academic environment for inquiry in which expertise and knowledge in basic sciences and clinical periodontics can be achieved
2. To provide a sound background in medicine as it applies to the periodontal patient
3. To provide a sound background in oral pathology
4. To be able to interpret, critique and apply periodontal and associated literature
5. To develop sound diagnostic, clinical, nonsurgical and surgical skills
6. To provide didactic instruction and clinical training in the area of dental implants
7. To provide methods of pain and anxiety control, including ADA certification in intravenous conscious sedation
8. To provide an environment for the interpretation and implementation of research
9. Enable successful completion of the American Board of Periodontology exam
10. To develop sound lifelong didactic and clinical learning skills
11. To provide specialists in periodontics for community health care, professional service and dental education

**Program objectives**

1. To be exposed to the basic sciences and be able to apply concepts to clinical periodontics
2. To be able to critically critique and interpret the old and new literature
3. To have an understanding of oral pathology and medicine as it applies to management of the periodontal patient
4. To have residents become exposed to and proficient in multiple nonsurgical and surgical treatment modalities
5. To become competent in the treatment planning, site preparation, surgical placement and maintenance of dental implants
6. To obtain competency and certification in enteral and parental conscious sedation
7. To complete research, M.S.D. and prepare a paper for presentation and publication
8. To prepare the student to successfully complete Part I and II of the American Board of Periodontology examination
9. To develop communication and presentation skills and lifelong learners

**Student learning outcomes**

1. To provide an academic environment for inquiry in which expertise and knowledge in basic sciences and clinical periodontics are achieved
2. To provide a sound background in medicine as it applies to the periodontal patient
3. To provide a sound background in oral pathology with a 100 percent completion of oral pathology rotation
4. To be able to interpret, critique and apply periodontal and associated literature with a 100 percent completion of periodontal courses measured
5. To develop sound diagnostic clinic, nonsurgical and surgical skills
6. To provide didactic instruction and clinical training in the area of dental implants
7. To provide methods of pain and anxiety control, including ADA certification in intravenous conscious sedation
8. To provide an environment for the interpretation and implementation of research with a 100 percent successful completion of biostatistics and research design in dentistry course
9. Enable successful completion of the American Board of Periodontology written and oral examinations
10. To develop sound lifelong didactic and clinical learning skills
11. To provide specialists in periodontics for community health care, professional service and dental education with a 100 percent graduate participation in specialty clinical practice

---

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.gradschool.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)**

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student’s program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)**

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the academic regulations section for additional information on graduation requirements. (p. 31)**

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

**Admission requirements**

| Degree: M.S.D. | Semester(s) of entry: Fall (Jul 1 start date) | Deadline dates: Jul 1, a year previous to entry | Test requirements: National Dental Boards, Part 1 and 2 |

**Special requirements**

- Applicants from countries where English is not the primary and official language must complete the TOEFL with a score of 100 or higher.
- International applicants must include an external credential evaluation of all international transcripts to complete the application. WES, ECE and AACRAO are some of the recommended NACES-approved providers.
- Upon acceptance in the specialty certificate program in periodontics, applicants must apply to the Graduate School for the M.S.D.
In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. D.D.S. or D.M.D. degree from U.S. or Canadian dental school
2. Part I of the National Dental Board at the time of application and Part II by time of matriculation (official report or certified copy)
3. Transcripts in a sealed envelope from each college/university/dental program attended
4. GPA/class ranking forwarded from the dean's office of the dental school attended
5. Three letters of recommendation addressed to the director of graduate periodontics
6. Curriculum vitae and personal statement
7. Interview upon request from program director

**Special admission requirements**

International applicants must complete the following requirements and documentation. Permanent U.S. residents and international students are advised to contact VCU International Admissions (http://international.admissions.vcu.edu/) to ensure eligibility.

1. D.D.S. or D.M.D. from an international dental school program
2. Provide all information in items three through seven above
3. An external credential evaluation for international applicants of all international transcripts to complete the application (WES, ECE and AACRAO are some of the recommended NACES-approved providers.)
4. TOEFL with a minimum score of 100 for applicants from countries where English is not the primary and official language

**Degree requirements**

In addition to general VCU Graduate School graduation requirements (p. 31), a cumulative GPA of 3.0 must be maintained. Students must receive a minimum grade of B for all required courses. Students will take written and oral examinations and must obtain a minimum grade of B or a passing grade. If either is not obtained, then the examination must be retaken. For research the student must have a thesis defense, present a poster and prepare a manuscript for submission by May 1 of the third year. Extensions may be approved, but students are responsible for the expense.

**Total Hours** 119

For DENS 660, students register for .5 credits for both fall and spring semesters of all three years of the program. They receive a continuing grade in the fall semester and grade at the end of the spring semester for the entire year. Students take the class six times for .5 credits each time, but they are only graded for three 0.5 credit classes

The minimum total of graduate credit hours required for this degree is 119.

### Oral Health Research, Doctor of Philosophy (Ph.D.)

The Ph.D. in Oral Health Research prepares students for research-oriented careers as independent scientists in academia, government and industry. The curriculum is specifically designed to provide a strong foundation in biochemistry, molecular biology and oral biology. Students will select a research project from one of three main areas of focus:

- Cancer and developmental biology of the head and neck
- Infection and immunology in diseases of the head and neck
- Tissue engineering, stem cells and new materials for the orofacial region

These areas correspond to the critical areas identified by the National Institute for Dental and Craniofacial Research. The program emphasizes independent research culminating in the conduct of an original research project under the supervision of a faculty adviser. Participating faculty are associated not only with programs and departments within the Philips Institute for Oral and Craniofacial Molecular Biology within the School of Dentistry, but also the VCU Massey Cancer Center and VCU’s College of Engineering.

Ph.D. students are expected to enroll as full-time graduate students. During the first year, students pursue research rotations, take formal course work and become familiar with current research topics through...
semesters, discussion groups and lectures by distinguished scientists. By the end of the first year, students choose a faculty adviser and begin dissertation research. Following completion of the research project and defense of the doctoral dissertation, graduates will have acquired the necessary methods, techniques and critical-thinking skills to become the next generation of scientific leaders.

**Student learning outcomes**
- Graduates will have acquired fundamental knowledge of oral health research and strength in cutting-edge research that crosses disciplines and fosters the ability of the students to view oral health research questions from a broad perspective.
- Graduates will have an understanding of the structure, function and development of tissues of the oral and craniofacial region.
- Graduates will be able to evaluate molecular mechanisms associated with head and neck cancer and design research programs to improve treatment.
- Graduates will be able to evaluate infectious and immune diseases of the head and neck and design research programs to improve treatment.
- Graduates will be able to evaluate the use of bioengineering for diseases of the head and neck and design research programs to improve treatment.
- Graduates will have developed strong practical foundations on which to build research careers.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the VCU Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

**Admission requirements**

<th>Deadline dates</th>
<th>Test requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ph.D.</td>
<td>Fall</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Special requirements**

- Applicants whose native language is not English must submit satisfactory scores from a standardized test commonly used and deemed appropriate for evaluation of English language proficiency, such as the TOEFL. These scores should be 80 minimum for Internet-based tests, 213 minimum for computer-based tests and 550 minimum for paper-based tests.

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

- A minimum GPA of 3.0 on a 4.0 scale
- A personal statement, which should include long-term career goals to assess reasons behind the candidate’s application; how a Ph.D. helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration
- A current resume or curriculum vita
- Three letters of recommendation that speak to the scientific competency and experience of the applicant

**Degree requirements**

For students with a B.S. degree, the Ph.D. in Oral Health Research will require the completion of a minimum of 102 credits, including a minimum of 35 didactic credit hours comprising seven required courses (12 credits), six core courses (15 credits) and additional electives (eight credits). The remaining 67 credits (at minimum) will be taken in research courses.

Students entering the program with an M.S. will be required to complete a minimum of 81 credits, including a minimum of 23 didactic credit hours comprising six core courses (15 credits) combined with electives (eight
credits). These students must also complete the research requirements for a minimum of 58 credits.

Students entering the program with a D.D.S or D.M.D. will be required to complete a minimum of 84 credits, including a minimum of 24 didactic credits comprising five required course (six credits), four core courses (10 credits) and electives (eight credits). These students must also complete the research requirements for a minimum of 60 credits.

Advanced Dental Education

Oonagh Loughran, Ph.D.
Graduate program director
dentistry/dds-phd-oral-health-research/).

periodontics also are awarded a Master of Science in Dentistry degree

on a part-time basis. Trainees, considered to be the equivalent of full-time students. Under special circumstances, trainees may be accepted into some programs on a part-time basis.

The School of Dentistry provides advanced dental education programs

of a certificate of training and certifies eligibility for examination by the appropriate specialty board. All programs are accredited by the Commission on Dental Accreditation of the American Dental Association.

Satisfactory completion of a program leads to the award of a certificate of training and certifies eligibility for examination by the appropriate specialty board. All programs are accredited by the Commission on Dental Accreditation of the American Dental Association. Those enrolled in the advanced education programs are full-time residents. The residents will receive hands-on experience with diagnostic and therapeutic care of special patient populations in addition to extensive experience for the serious, conscientious student of dentistry. Regardless of how well-prepared a health professional may be at the time of graduation, the adequate knowledge of yesterday is often insufficient information for today and tomorrow. With the rapid advancements made in dental technology and techniques, the professional must constantly seek new knowledge if the health care provider is to improve the health care given to patients.

Although the majority of continuing education courses are presented at the School of Dentistry, some are offered in other locations. The courses, which vary in length from one to four days, are scheduled throughout the year and consist of a variety of instructional methods from didactic to hands-on participation in clinical programs.

The instructional staff comprises faculty from the VCU School of Dentistry, guest lecturers from other dental schools and members of the dental profession and related professions from the United States and other countries.

Advanced Dental Education programs

The School of Dentistry provides advanced dental education programs in the areas of endodontics, oral and maxillofacial surgery, orthodontics, pediatric dentistry, periodontics and advanced education in general dentistry. Satisfactory completion of the program leads to the award of a certificate of training and certifies eligibility for examination by the appropriate specialty board. All programs are accredited by the Commission on Dental Accreditation of the American Dental Association. Those enrolled in the advanced education programs are full-time resident trainees, considered to be the equivalent of full-time students. Under special circumstances, trainees may be accepted into some programs on a part-time basis.

Students enrolling in endodontics, orthodontics, pediatric dentistry and periodontics are afforded the opportunity to undertake advanced degree training while in dental school by combining doctoral study in oral health research with a professional degree in dentistry. The program seeks to train students interested in translating oral research to the clinic. These clinician-scientists will help bridge the gap between basic and clinical science in the field of dentistry. For more information, see the program page in the Professional Bulletin (http://bulletin.vcu.edu/professional-studies/dentistry/dds-phd-oral-health-research/).

Phone: (804) 828-3910
Program website: dentistry.vcu.edu/programs/oralhealthphd (http://dentistry.vcu.edu/programs/oralhealthphd/)

Advanced Dental Education in General Dentistry

Kevin M. Noall, D.D.S.
Program director

The purpose of this 12-month advanced dental education residency program is to provide advanced education and clinical experience to prepare dental school graduates for a career in the practice of general dentistry. This program has a strong emphasis on treatment planning, experience with new technology, developing skills in aesthetic dentistry and restoration of dental implants. Graduates of this program will have attained added competency and confidence in all areas of dental care, practice management and professional responsibility. Further, this program provides residents with meaningful experiences in the delivery of dental care to diverse populations and people at high risk for dental disease. A strong affiliation exists between the School of Dentistry and the statewide Virginia Area Health Education Center, whose mission is to increase primary health care in underserved areas. The AEGD program works in concert with AHEC to deliver dental care and recruit/train minority health care providers from health professional shortage areas.

The School of Dentistry is committed to advanced dental education. The residents will receive hands-on experience with diagnostic and therapeutic care of special patient populations in addition to extensive experience for the serious, conscientious student of dentistry. AEGD residents may be required to participate in off-site clinical experiences outside the city of Richmond, Virginia. Funds will be provided for travel and lodging when required.

Eligibility and selection

Dentists with the following qualifications are eligible to apply for the AEGD program: Dental graduates from institutions in the United States accredited by the Commission on Dental Accreditation of the American Dental Association and who have passed Part I of the National Board Dental Examination. Selection criteria include didactic and clinical achievements, extramural experience, interpersonal skills and a demonstrated commitment to pursue a career in general dentistry. Every effort is made to recruit qualified applications from minority dentists and dentists from health professional shortage areas or dentists who profess a desire to serve in these areas. A selection committee consisting of the program director, the assistant dean for admissions, members from specialty areas, former residents and current residents will screen all applications. Using the above-mentioned selection criteria, the most promising applicants will be invited for personal interviews. Trainees and alternates will be selected. This program participates in the Postdoctoral Application Support Service Program. Phone (804) 828-3601; fax (804) 828-3159; email drhaselton@vcu.edu.
Endodontics
Garry L. Myers, D.D.S.

Program director

The advanced dental education program in endodontics offers the student a comprehensive 24-month course of study in clinical, didactic and research endodontics. The program is designed to educate qualified individuals to pursue careers as educators, researchers and practicing clinicians, and meets the educational requirements for limitation of practice to the specialty of endodontics and examination by the American Board of Endodontics. The program is composed of several interrelated phases. The first phase consists of lecture courses that provide the student with a firm biological basis for patient care. The second phase consists of lectures, seminars and clinical training designed to produce clinical mastery of endodontics. The third phase is research experience gained through completion of an individual research project and master’s thesis.

Students completing the program earn a specialty certificate in endodontics and a Master of Science in Dentistry degree. Students must complete the requirements for the master’s degree prior to being awarded the specialty certificate.

The program conforms to the Standards for Advanced Specialty Education in Endodontics and carries a full approval status from the Commission on Dental Accreditation of the American Dental Association.

Oral and Maxillofacial Surgery
Robert A. Strauss, D.D.S., M.D.
Professor and program director

The oral and maxillofacial surgery program is designed to provide extensive didactic and clinical experience in all aspects of the specialty. Those who complete training satisfactorily fulfill the prerequisites for examination and certification by the American Board of Oral and Maxillofacial Surgery.

The didactic portion of the program includes formal courses in oral pathology, anatomy and physical diagnosis, as well as numerous weekly conferences and seminars. Clinical rotations on oral pathology, anesthesia, medicine, surgical oncology, neurosurgery, cardiology, general surgery, emergency room and the trauma services are used to supplement the trainee’s surgical experience. Throughout the program there is a constant correlation of the clinical experience with the biomedical sciences.

Through the multiple clinical and didactic facilities of the VCU Medical Center complex, the McGuire Veterans Affairs Medical Center and St. Mary’s Hospital, there is ample material for education in the latest oral and maxillofacial surgical techniques. The oral and maxillofacial surgery service is responsible for diagnosis and management of diseases and injuries related to the oral and facial region. Trainees are involved in all aspects of treatment including simple and complicated oral surgery, anesthesia and pain control, oral and maxillofacial trauma, pre-prosthetic surgery, orthognathic surgery, head and neck pathology, oral and maxillofacial reconstruction, temporomandibular joint surgery, laser surgery, cosmetic facial surgery, and microneural and microvascular surgery. During the four years, the trainee assumes ever-increasing responsibilities as time and abilities dictate.

Upon satisfactory completion of the four-year residency, the trainee may earn the Doctor of Medicine degree from the School of Medicine by enrolling in the second and third years of that curriculum.

Orthodontics
Bhavna Shroff, D.D.S.

Professor and program director

The Department of Orthodontics in VCU’s School of Dentistry offers a 24-month advanced education in orthodontics and Master of Science in Dentistry program. The program teaches state-of-the-art clinical care in an environment modeled after private orthodontic practice. The curriculum is composed of seminars and small-group instruction with emphasis on critical-thinking and problem-solving. Contemporary concepts of orthodontic treatment are reviewed for substantive and scientific content. Also included are regularly scheduled orthognathic surgery conferences and seminars with other dental and medical specialists.

The postgraduate program is designed to develop skilled practitioners who are prepared to grow with the future and manage busy orthodontic practices. The goal is not only to familiarize future orthodontists with contemporary techniques but also to teach them how to interpret cutting-edge scientific information and use it to approach clinical challenges logically and practically. Clinical experience consists of a wide variety of orthodontic patients, including complex cases requiring orthognathic surgery and patients with facial clefts and other craniofacial abnormalities. An original research experience is an integral part of the program, with each project intended to produce results suitable for publication in a nationally circulated orthodontic journal. The successful completion of a research project is a requirement of the program. All senior residents present their research at the Virginia Association of Orthodontists meeting. The program qualifies students to take the written portion of the American Board of Orthodontics examination in the senior year. Residents are required to take the written portion of the American Board of Orthodontics examination prior to graduation and are encouraged to continue and complete the board certification process. This exam is given prior to the American Association of Orthodontists meeting.

Students completing the program earn a specialty certificate in orthodontics and Master of Science in Dentistry degree. Students must complete the requirements for the master’s degree prior to being awarded the specialty certificate.

The program is accredited by the Commission on Dental Accreditation of the American Dental Association.

Pediatric Dentistry
William O. Dahike, D.M.D.
Associate professor and program director

The advanced education program in pediatric dentistry offers the student a comprehensive 24-month course of study in clinical and didactic pediatric dentistry. The program is designed to meet the educational requirements for limitation of practice to the specialty of pediatric dentistry and examination by the American Board of Pediatric Dentistry. The program emphasizes a diversified educational experience. The program places emphasis on all phases of pediatric dentistry including trauma, preventive dentistry, restorative, endodontics, periodontics, oral surgery, orthodontics and hospital dentistry. The program enables the student to provide comprehensive oral health care for the well child, the medically compromised and children with special needs. There
is extensive use of various treatment modalities for pain control and behavioral management, such as sedation, analgesia and general anesthesia. Research experience is gained through completion of an individual research project and master’s thesis.

Seminars are held in pediatric dentistry, orthodontic diagnosis and treatment, treatment planning, growth and development, cephalometric analysis, pediatric dentistry literature review, and behavior guidance. Formal courses in biostatistics, principles of pediatrics, pediatric advanced life support, head and neck anatomy, neurodevelopmental disabilities, leadership seminars, basic sciences and clinical core courses are required. The students participate in undergraduate clinical teaching and supervision.

One-month rotations occur in general anesthesia, and two-week rotations occur in the pediatric emergency room and pediatric medicine. During the year, rotations in cleft palate, craniofacial anomalies and hemophilia occur. Optional elective rotations are available in treating institutionalized handicapped patients (in Lynchburg). Elective didactic courses also are available.

Students completing the program earn a specialty certificate in pediatric dentistry and a Master of Science in Dentistry degree. Students must complete the requirements for the master's degree prior to being awarded the specialty certificate.

The program is accredited by the Commission on Dental Accreditation of the American Dental Association.

**Periodontics**

**Thomas C. Waldrop, D.D.S.**
Professor and program director

The advanced education program in periodontics consists of a 36-month clinical and didactic curriculum leading to a certificate in periodontics. Students are responsible for all materials and make up of lost clinical time. Courses in the basic and clinical sciences, medicine, head and neck anatomy, statistics and advanced cardiac life support are required. Students are responsible for attending and preparing for lectures, current and periodontal literature, medical-oral medicine, treatment planning, case presentation and surgical seminars. No grade less than 80 percent or passing is acceptable from any periodontal or basic science course work. Less than passing grades may require retesting or retaking of a course. Students are expected to be able to utilize a computer to prepare lectures and to access Internet resources.

Students are responsible for documentation of clinical and course work data. Specified digital intra-oral camera and documentation of all clinical cases and department archived is required. Students are responsible to the service for rotations in general medicine, dental anesthesia and oral pathology. Proficiency and certification in intravenous conscious sedation is required. Students are responsible for clinical and classroom teaching to undergraduate and specialty students. Research on a topic that is reviewed and approved by a faculty committee is required. Upon completion of the research, the student is required to prepare a thesis, defense and manuscript for publication. Certificates are not awarded until completion of the Master of Science in Dentistry requirements. Students are responsible for the purchase of program-required equipment, instruments, books and all associated fees. All students are required to become student members of the American Academy of Periodontology.

---

**Department of Endodontics**

**Clara M. Spatafore, D.D.S.**
Interim chair

The Department of Endodontics is dedicated to providing quality endodontic dental care services as well as advancing new knowledge through teaching, research, community involvement and patient care. The faculty participate in the training of predoctoral dental students in the area of clinical endodontics. After an introduction to the specialty in their first year, students learn and develop didactic and treatment skills during preclinical classes and labs in the second year. Advanced topics and clinical techniques are stressed in the third year, which allows patient treatment during the third and fourth years. In the fourth year, students are prepared for dental board examinations and are given the opportunity to treat a variety of clinical cases in both the School of Dentistry and off-site service-learning clinics.

**Department of Orthodontics**

**Steven J. Lindauer, D.M.D., M.D.Sc.**
Professor and chair

The Department of Orthodontics is dedicated to providing the best and latest care to patients, as well as offering the best preparation for graduate orthodontic residents. The department offers a 24-month advanced education Master of Science in Dentistry program. The program teaches state-of-the-art clinical care in an environment modeled after private orthodontic practice.

**Department of Pediatric Dentistry**

**Tegwyn H. Brickhouse, D.D.S., Ph.D.**
Associate professor, research director and chair

The vision of the VCU Department of Pediatric Dentistry focuses on the oral health of the growing and developing child and how oral health impacts the overall health of the individual, which in turn informs a multidisciplinary approach to prepare students and residents for a rapidly evolving health care environment. The VCU Department of Pediatric Dentistry is committed to clinical excellence, innovative educational initiatives and forging ahead with translational research.

**Department of Periodontics**

**Harvey A. Schenkein, D.D.S., Ph.D.**
Paul Tucker Goad Professor and chair

Faculty in the Department of Periodontics participate in the training of predoctoral dental students by emphasizing the evidence-based underpinnings of contemporary periodontics while providing innovative educational instruction. The department also trains specialists in periodontics via its postgraduate program. Furthermore, faculty provide outstanding care to patients through VCU Dental Care, the faculty practice of the VCU School of Dentistry.
SCHOOL OF EDUCATION

The Virginia Commonwealth University School of Education prepares effective, highly skilled teachers, counselors, school administrators, higher education faculty and other education professionals committed to making a difference in the lives of children and adults and their communities, particularly in urban and high-need environments.

Located on the university’s Monroe Park Campus, the School of Education has a strong commitment to social justice, diversity and inclusion among students, faculty and staff, as well as in its academic programs.

The School of Education offers five bachelor’s programs, seven master’s programs, two doctoral programs, seven post-baccalaureate certificates and two post-master’s certificates.

The guiding theme of educator preparation programs in the School of Education is educator as critically reflective practitioner. Courses and experiences provide opportunities for individuals to be engaged in meaningful dialog about the nature and application of appropriate knowledge and skills to make instructional, assessment, counseling and leadership decisions that improve student learning.

The School has 155 teaching and research faculty, many of whom are internationally renowned experts who produce and disseminate scholarship that extends knowledge, improves practice and collaboration, and supports schools and educational and human service agencies.

Administration

1015 West Main Street
Box 842020
Richmond, Virginia 23284-2020
Phone: (804) 828-3382
Fax: (804) 828-1323
soe.vcu.edu (http://www.soe.vcu.edu)

Andrew P. Daire, Ph.D.
Professor and dean

Kathleen M. Rudasill, Ph.D.
Associate dean for research and faculty development

Donna M. Gibson, Ph.D.
Professor and interim associate dean for academic affairs

Diane J. Simon, Ph.D.
Emeritus professor and interim associate dean for student affairs and inclusive excellence

Joan B. Johnson, Ph.D.
Executive director for accreditation and licensure

Counselor education

Accredited by the Council on Accreditation of Counseling and Related Educational Programs

This accreditation applies to both the K-12 school counseling track and the college student development and counseling track.

The school holds membership in the American and Virginia Association of Colleges of Teacher Education and in the Holmes Partnership.

Organization

The chief administrative office for the School of Education is Oliver Hall, Room 2090. The dean is responsible for the overall operation of the school, while two associate deans and an executive director (associate dean for academic affairs and graduate studies, associate dean for research and faculty development, executive director for licensure and accreditation) assist in the school’s administrative functions.

The school contains four academic departments: Counseling and Special Education, Educational Leadership, Foundations of Education, and Teaching and Learning. The school also supports eight centers and institutes:

• Center for School Community Collaboration
• Center for Teacher Leadership
• Child Development Center
• Metropolitan Educational Research Consortium
• Partnership for People with Disabilities
• Rehabilitation Research and Training Center
• The Literacy Institute

Facilities

The School of Education is housed primarily in Oliver Hall, where classroom, laboratory and activity centers, as well as faculty and administrative offices can be found. Clinical laboratories are located at 3600 W. Broad St. The affiliated centers have various locations close to the Monroe Park Campus.

Support/resource offices

The School of Education has several offices that provide support services to students and faculty. These offices include the Office of Graduate Studies, Student Services Center, Office of Assessment, Office of Communications and Enrollment Management, and Instructional Technology Services.

Office of Graduate Studies

The Office of Graduate Studies assists all departments with admission, matriculation, graduation, and special actions and appeals for graduate students. The office also supports and guides students throughout their graduate program, fostering a learning community that enhances students’ professional development.

Student Services Center

The Student Services Center provides support for teacher education and counselor education students as they progress through their academic programs. Services include:

Accreditation

Education (all degrees)

National Council for Accreditation of Teacher Education (initial licensure and advanced degrees for school personnel), the Virginia Department of Education and the Southern Association of Colleges and Schools.

- Advising for students in extended teacher preparation, post-baccalaureate, counselor education and special education programs prior to formal admission to graduate programs
- Processing of applications for admission to teacher preparation programs
- Processing of applications for clinical placements and coordinating for practica, student teaching, internships and externships in local school divisions and educational facilities
- Processing applications for licensure in Virginia and other states
- Providing general program and course information
- Assigning faculty advisers
- Entering, retrieving and managing data to document student progress through academic programs
- Serving as a repository of information on comprehensive examinations, application and forms for academic transactions, admission to teacher preparation, clinical experiences, and licensure

**Office of Assessment**
The Office of Assessment coordinates data collection, analysis and reporting for a variety of purposes, including accreditation, personnel evaluations, student assessment and survey research.

**Office of Communications and Enrollment Management**
The office coordinates all marketing and communication efforts for the school, provides brand alignment support and works with departments and programs on recruitment efforts. The team maintains the School of Education website, social media channels, and all marketing materials and communications to internal and external stakeholders.

**Information Technology Services**
The Information Technology Services center provides support and training for faculty, staff and students in the School of Education for various technology resources. The ITS houses both Mac and PC laptops, Chromebooks, netbooks, digital cameras, Promethean board accessories, mobile devices and more for use and checkout by faculty, staff and students. The office provides technical assistance to faculty and staff to assure that issues in using technology are quickly resolved. The center also coordinates two technology resources:

- **Digital playgrounds (rooms 3107 and 3108)**
  
  Digital playgrounds provide space and equipment that facilitate many opportunities to learn about incorporating computer-assisted instruction in the classroom. The digital playground in Room 3107 is equipped with several computers connected for use of pay-4-print services for students. Both rooms are equipped with smartboards, Promethean boards, 3-D printers, 3-D scanners and more for students to “play” with to develop more effective instruction. Technology devices can be checked out from ITS for use in these areas.

- **Distance-learning technology**

  The ITS also supports three rooms in Oliver Hall with distance-learning technology and provides ongoing assistance to faculty, preservice teachers and staff in the School of Education.

**Licensure and reciprocity**

Upon completion of degree requirements in any of VCU’s teacher preparation programs and with the recommendation of the School of Education, students are eligible to receive initial teacher licensure from the Virginia Department of Education. For additional information on licensure, licensure renewal or an add-on endorsement, contact the School of Education’s Student Services Center.

In Virginia, initial licensure requires successful completion of state-mandated tests. Passing scores on these tests are required to progress through different portions of the licensure programs from admission to teacher preparation, admission to student teaching and recommendation for licensure. For a list of testing requirements, please refer to the Students Services Center (https://soe.vcu.edu/current-students/student-services-center/) section on the School of Education website.

Students should request that their Praxis scores be reported to VCU.

Before a recommendation for licensure can be sent to the Teacher Licensure Division of the Virginia Department of Education, these test scores must be on file with the School of Education’s Student Services Center.

**Licensure for education personnel**

Licensure and endorsement are based in part on the successful completion of an approved program developed in response to nationally recognized standards. All licensure and endorsement programs offered by the School of Education are approved by the Virginia Department of Education and the National Council for the Accreditation of Teacher Education. The commonwealth of Virginia is a member of the National Association of State Directors of Teacher Education and Certification, which has a national reciprocity agreement for teacher licensure. Therefore, all licensure and endorsement programs in the School of Education have approved program status and are a part of the NASDTEC Certification Reciprocity Agreement.

**Graduate programs leading to initial teacher licensure**

Individuals often decide to pursue a teaching career after they have completed a baccalaureate degree. VCU serves qualified individuals through approved programs leading to a Master of Teaching, Master of Education (special education) or a post-baccalaureate Certificate in Teaching. Upon completion of a degree program, graduates are eligible for both Virginia licensure and/or endorsement in the specific degree area.

Individuals who wish to obtain licensure in art education or music education should consult the School of the Arts section of this bulletin.

The Master of Teaching program integrates undergraduate course work for a bachelor’s degree in a liberal arts or science major with course work and graduate study leading to a Master of Teaching in a program area.

**Approved programs and certification reciprocity**

All of VCU's initial and advanced educator preparation programs are approved by the Virginia Department of Education and lead to recommendation for a Virginia Professional License. Furthermore, our educator preparation programs are accredited by the Southern Association of Colleges and Schools and the National Council for Accreditation of Teacher Education. VCU's School of Education also holds
Based on the National Association of State Directors of Teacher Education and Certification agreement, VCU graduates may be eligible for teacher licensure reciprocity with other states. Please be aware that requirements for licensure vary from state to state. Students interested in licensure reciprocity should contact the School of Education’s Student Services Center or the Department of Education Office in the future hiring state.

If a student plans to be in a state other than Virginia while completing an online program at VCU, please note that state regulations in every state determine whether VCU may offer a place in a course or program. VCU participates in the National Council of State Authorization Reciprocity Agreements, which allows students from NC-SARA-approved states to enroll in VCU’s degree programs. All VCU licensure programs lead to a recommendation for a Virginia teaching license. Please also note that as a VCU student enrolled in an online program, all universitywide policies, as well as School of Education policies, would apply.

Programs

Master of Teaching (extended programs)

- Biology education
- Chemistry education
- Early and elementary education
- Earth science education
- English education
- History/social studies education
- Mathematics education
- Physics education

Master of Education

- Adult learning
  - Adult literacy
  - Human resource development
  - Teaching and learning with technology
- Counselor education
  - College counseling and student affairs
  - School counseling
- Curriculum and instruction
  - Instructional technology
  - Teaching and learning
- Educational leadership
  - Administration and supervision
  - Leadership studies
- Reading
  - K-12 reading specialist
  - Reading with TESOL/adult
  - Reading with TESOL/K-12
  - Without concentration
  - Special education
- Early childhood
- General education
- Severe disabilities
- Sport leadership

Ed.D.

- Leadership

Ph.D.

- Education
  - Art education
  - Counselor education and supervision
  - Curriculum, culture and change
  - Educational leadership
  - Educational psychology
  - Research, assessment and evaluation
  - Special education and disability leadership
  - Sport leadership
  - Urban services leadership

Post-baccalaureate graduate certificates

- Autism spectrum disorder
- Disability leadership
- Instructional technology
- Medical education
- Online teaching for K-12 educators
- Teaching
  - Biology education
  - Chemistry education
  - English education
  - History/social studies education
  - Mathematics education
  - Physics education
  - Teaching English to speakers of other languages

Post-master’s certificates

- Educational leadership
- Reading specialist

Dual-degree

- Sport leadership (with School of Business)

Extended Teacher Preparation Program

The School of Education, in cooperation with the College of Humanities and Sciences, offers extended teacher preparation programs in early childhood and elementary education (prekindergarten through grade six) and secondary education (grade six through grade 12). The successful completion of these programs results in the simultaneous awarding of both a bachelor’s and a master’s degree.

General degree requirements

The successful completion of these programs results in the simultaneous awarding of both a bachelor’s and a master’s degree. Prospective Master of Teaching students earn their bachelor’s degree in a specific field...
in which they plan to teach. A student generally begins work on the professional studies component in the third or fourth year of academic study.

A student enrolled in the extended teacher preparation program must complete a minimum of 153/154 credits. The student must maintain a cumulative GPA of 2.8 for admission to the teacher preparation program. Completion of at least 90 credits with a minimum GPA of 3.0 in the last 60 semester hours of study is required for that student to be admitted to the graduate studies portion of the extended program.

A post-baccalaureate graduate Certificate in Teaching is open primarily to those who have already earned a master’s degree. The candidate must complete at least 30 additional hours beyond the bachelor’s level. Admittance to this program requires a minimum GPA of 3.0 in the last 60 semester hours of study.

Clinical experiences

All initial licensure programs require clinical experiences throughout the program. During the initial stages of a program, these experiences occur as practica in varied placements in K-12 education relevant to the student’s program. The program also requires a capstone clinical experience in the form of student teaching. For student teaching, those pursuing early and elementary education are placed in two settings, one in early elementary grades (K-2) and one in upper elementary grades (3-5). Those pursuing secondary education receive a single placement in their discipline in a middle school or high school setting.

With the guidance of a clinical faculty member or cooperating teacher, the intern assumes more independence in the field setting. Satisfactory completion of the internship and the preceding training is charted through evaluations made by the university supervisor, clinical faculty or cooperating teacher, and school administrator.

Undergraduate major

Freshman students who plan to become early and elementary education teachers are required to enroll in the Bachelor of Interdisciplinary Studies liberal studies for early and elementary education major. Transfer students should meet with a B.I.S. adviser prior to course registration. The B.I.S. degree requirements are outlined in the College of Humanities and Sciences section of this bulletin.

Prospective secondary teachers should major in the discipline they wish to teach. The disciplines in which VCU offers licensure programs are as follows: English, history/social studies, mathematics and science (various specialties). Students should consult with their education adviser to ensure that courses taken to meet major requirements also meet state licensure requirements.

Change of major and transfer students

Students wishing to enter the Extended Teacher Preparation Program in early and elementary education or secondary education must transfer initially to the College of Humanities and Sciences. They must declare a major in the college and a specialization in the appropriate professional studies sequence in the School of Education.

For admission to teacher preparation, a minimum GPA of 2.8 is required. A minimum GPA of 3.0 in the last 60 semester hours of study is required for admission to the graduate phase of the Extended Teacher Preparation Program.

Transcript evaluation

The College of Humanities and Sciences evaluates transcripts of students pursuing the extended program in early and elementary education or secondary education. Credits are accepted if they conform to specific program guidelines; course equivalents from accredited colleges and universities are accepted if the grade earned is a minimum of C. From the extended program, 60 semester hours of acceptable undergraduate course work are required to be admitted to a teacher preparation program. See specific criteria in the admission information below.

Credits that are accepted from two-year institutions may meet liberal arts and sciences requirements, but will not meet professional requirements for upper-division course work. The VCU Transfer Guide for Virginia Community Colleges lists, in full, credits accepted by VCU that have been earned in the state’s community colleges.

After the initial student transcript evaluation, the assigned adviser reviews the accepted transfer credits with the student, determining what additional course work at VCU will be necessary. An adviser is not required to use all the accepted transfer credits in a student’s program of study. Only those credits approved for transfer can be applied toward the chosen degree.

Faculty advisement

An academic adviser is assigned to a student by the department of that student’s chosen major in the College of Humanities and Sciences. A professional studies adviser is similarly assigned by the Department of Teaching and Learning according to the student's proposed teaching endorsement. This adviser-student relationship continues throughout the course of study at VCU. Student and adviser jointly develop the student’s individual program. During the planning process, the student identifies, clarifies and explores his or her personal and professional goals.

Educator as reflective practitioner

The guiding theme of the teacher preparation program is "educator as reflective practitioner." The underlying foundation of instruction in the teacher preparation program is to challenge the prospective teacher to develop skills in critical reflection and to value thoughtful decision-making. Candidates demonstrate critical reflection by: being open to and respectful of all stakeholders; taking other perspectives into account; utilizing critical-thinking in framing and solving educational problems; making informed, ethical and professional decisions; and taking ethical and professional action.

Demographics consideration in teaching

The demographics of elementary, middle and high school students are changing. There is an increase in the number of students for whom English is not the first language, of minority students, of students who do not all learn or respond in similar ways and of students who may be identified as possessing a disability.

Future teachers are encouraged to take advantage of opportunities through formal courses and other experiences to gain greater insight and ability in addressing learners from differing cultural backgrounds and considering the needs of learners with different learning styles, participation styles, and special abilities or disabilities.
Standards of learning

Much of the prekindergarten through grade 12 curriculum is based on the commonwealth of Virginia’s current Standards of Learning. Students preparing to be teachers are advised to examine the SOLs for the grade levels and content areas they plan to teach. The School of Education website has a link to the SOLs.

In some instances the content and concepts associated with one or more SOLs may be incorporated in a course in the College of Humanities and Sciences or in the School of Education, but as the SOLs are for a kindergarten through grade 12 curriculum and not a college curriculum, one may need to study several of these on her or his own.

Technology standards

The use of computers, graphing calculators, science probeware and other technologies is integral to successful teaching in today’s schools. Individuals preparing to teach must be competent on each of the eight standards in Virginia’s Technology Standards for Instructional Personnel. These standards may be reached through the School of Education website.

Students are advised to consult with the professional studies adviser regarding the program’s requirements for demonstrating competence. Several of the standards may be documented as met by passing the Computer Literacy Examination offered online through Knowledgenet. Please see the general education requirements for undergraduate study (http://bulletin.vcu.edu/undergraduate/college-humanities-sciences/undergraduate-information/) in the College of Humanities and Sciences section of this bulletin.

Extended program in early and elementary or secondary education

In the extended program, a student generally begins work on the professional studies component in the third year of study. Information on specific requirements for all academic majors is available in the Department of Teaching and Learning, in the College of Humanities and Sciences’ associate dean’s office or through the department of the chosen major. Students may visit VCU 2019-20 Graduate Bulletin website has a link to the SOLs.

Admission information

Any undergraduate admitted to VCU who declares a major in the College of Humanities and Sciences is eligible to declare a specialization in special education or secondary education. Students specializing in early and elementary education must declare the liberal studies for early and elementary education major in the Bachelor of Interdisciplinary Studies program.

Transfer students and students currently attending VCU who wish to change their majors to this program must have a minimum GPA of 2.0; however, note the much higher GPA requirement for admission to teacher preparation and then to graduate study. All students in the program, upon completion of 60 hours of undergraduate course work and prior to completion of 90 hours, must apply for admission to teacher education. To be accepted, a student must have a minimum GPA of 2.8 and must have achieved the required commonwealth of Virginia scores on Praxis core tests and must have achieved the established score for the three tests.

Students who pursue one of the extended teacher preparation programs follow a series of steps as noted in order to meet all requirements, including the 153/154 credits.

Step 1: Admission to the university

Requirements

1. Scores from Scholastic Aptitude Test or American College Test
2. Minimum 2.0 GPA from high school or previous college

Procedures

1. Declare an undergraduate major in the College of Humanities and Sciences for early and elementary or secondary education.
2. Declare an education specialization in early and elementary education or secondary education.

Step 2: Admission to teacher preparation

Complete before enrolling in the first practicum (upon completion of 60 credits of liberal arts and prior to completion of 90 credits).

Requirements

1. Minimum GPA of 2.8
2. Completion of six hours of English, three hours of mathematics, four hours of laboratory science and six hours of social science and/or history
3. Meet Virginia scores required for the mathematics portion of Praxis and achieve a passing score on the Virginia Communication and Literacy Assessment
4. Confirmation of education specialization (Undecided majors must decide.)
5. Enroll in or have completed TEDU 101, EDUS 300, EDUS 301 or equivalent course

Procedures

1. Complete admission to teacher preparation application form (obtain in Office of Student Services) and submit a current transcript
2. Complete TEDU 101, EDUS 300, EDUS 301 or equivalent course; submit required Praxis scores
3. Register for practicum placement and accompanying courses. (Note: Students must be admitted to the teacher preparation program to be eligible for practicum placement and accompanying courses. Applications for practicum are available at the Student Services Center. In secondary education, these applications may be distributed at the initial class meeting.)
4. Register for, take and submit required Praxis core scores

Step 3: Application to graduate studies

Requirements

1. Minimum GPA of 3.0
2. Acceptable scores on the Graduate Record Examination or Miller Analogies Test [Generally students are expected to score at least a 290 composite (verbal and quantitative) on the GRE or 386 on the MAT.]
3. Personal statement addressing reasons for seeking graduate education, including career goals; experience working with age group to be taught; reasons for entering teaching; and success in organizing, planning and implementing work with other individuals
4. Three references: it is suggested that these be instructors or advisers in the College of Humanities and Sciences and the School of Education; use graduate studies reference forms

Procedures
1. Obtain Graduate School admissions packet from the Student Services Center in Room 1037, Oliver Hall
2. Return completed application packet, along with up-to-date transcripts, to the VCU Graduate School
   Note: Students must be admitted to the Graduate School to be eligible to enroll in graduate-level courses. No more than six graduate credits taken prior to admission to graduate study may be accepted toward the degree.

Application deadlines for early and elementary or secondary education
• Oct. 1 for spring semester
• Feb. 1 for summer and fall sessions

Step 4: Internship
All programs require a graduate-level internship (TEDU 672 and TEDU 674) during the fifth year. Applications for internship can be obtained in the Student Services Center in Room 1037, Oliver Hall. Individuals in early and elementary education are placed in a kindergarten and a grade one through six classroom in the same semester. Individuals in secondary education typically have a single placement, although perhaps with two different teachers.

Requirements
1. Minimum 3.0 GPA on graduate courses
2. Admission to teacher preparation and to graduate study
3. Completed application and transcripts submitted by established deadlines
4. Passing scores on applicable Praxis II specialty tests accompanying application
5. Passing scores on the Virginia Communication and Literacy Assessment

Procedures
1. Obtain application form from the Student Services Center
2. Submit copies of transcripts and required statement to a professional studies adviser for review
3. Obtain approval signature of professional studies adviser
4. Submit completed application to Student Services Center by Sept. 1 for the following spring semester, by Feb. 1 for the following fall semester

Step 5: Admission to the profession
(during the final semester of enrollment)

Requirements
1. Completion of all degree requirements
2. Completion of application for initial teacher licensure (obtain from Office of Student Services)

Procedures
1. Complete applications for undergraduate degree in humanities and sciences with academic major adviser, and graduate degree in teaching with professional studies adviser
2. Submit application for initial teacher licensure with signature of university supervisor or professional studies adviser to the Student Services Center

Added or add-on endorsements

Added or add-on endorsements Teaching English as a Second Language
The School of Education offers the Virginia Department of Education ESL preK-12 endorsement for pre-service and in-service teachers. The ESL endorsement program at VCU requires 18 credit hours of ESL course work and six credit hours of a modern foreign language. Candidates must complete the following courses:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL/LING/TEDU 552</td>
<td>Teaching English as a Second Language</td>
<td>3</td>
</tr>
<tr>
<td>FRLG 575</td>
<td>Intercultural Communication</td>
<td>3</td>
</tr>
<tr>
<td>LING/ENGL/ANTH 390</td>
<td>Introduction to Linguistics</td>
<td>3</td>
</tr>
<tr>
<td>TEDU 561</td>
<td>Reading Foundations: Sociological/ Psychological Perspectives</td>
<td>3</td>
</tr>
<tr>
<td>TEDU 562</td>
<td>Reading Instruction in the Content Areas</td>
<td>3</td>
</tr>
<tr>
<td>TEDU 681</td>
<td>Investigations and Trends in Teaching (ESL curriculum and assessment)</td>
<td>3</td>
</tr>
</tbody>
</table>

Foreign language courses (modern languages only)
Total Hours: 24

Add-on endorsements in grades 6 through 12, science
Add-on endorsements in science are available in biology, chemistry, earth science and physics. Each add-on requires a first endorsement in one science and at least 18 semester hours in the add-on science that includes preparation in specified areas. The earth science added endorsement is listed below. For information about the added endorsements in biology, chemistry or physics, contact the Department of Teaching and Learning.

Earth science
To add an earth science endorsement to an endorsement in another science discipline, the individual must earn at least 18 semester hours in the earth sciences, including preparation in geology, oceanography, meteorology and astronomy. Courses to meet these requirements include:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENVS 105 &amp; ENVZ 105</td>
<td>Physical Geology and Physical Geology Laboratory</td>
<td>4</td>
</tr>
<tr>
<td>ENVS 335 &amp; ENVZ 335</td>
<td>Environmental Geology and Environmental Geology Laboratory</td>
<td>4</td>
</tr>
<tr>
<td>ENVS 401</td>
<td>Meteorology and Climatology</td>
<td>3</td>
</tr>
<tr>
<td>ENVS 411</td>
<td>Oceanography</td>
<td>3</td>
</tr>
<tr>
<td>PHYS 103</td>
<td>Elementary Astronomy</td>
<td>3</td>
</tr>
</tbody>
</table>

Elective courses to complete at least 18 hours include: URSP 203 and URSP 204 and PHYS 391.
Graduate information

Admission procedures for graduate study

Application procedures

Application forms and instructions for applying to all graduate programs are available on the Graduate School website (http://www.graduate.vcu.edu). Note that applications cannot be processed until they are complete (including test scores). Admission information specific to each program can be found in the department pages within this bulletin.

Test scores

Either the GRE, general aptitude portion, or the MAT is required for the Master of Teaching, the Master of Education, post-master’s certificates, the post-baccalaureate Certificate in Teaching and the post-baccalaureate Certificate in Instructional Technology. The Ph.D. program requires the GRE. The Ed.D. in Leadership program requires the MAT.

A passing score on Praxis core, although not required for graduate admission, is required for placement in clinical experiences (practica, internships and certain externships) as well as for licensure in Virginia. Contact the Student Services Center (http://www.soe.vcu.edu/student-services-center/) for applications for admission to teacher preparation and booklets on Praxis core and Praxis II. Information about the Praxis may be obtained on the Praxis website at teacherstestprep.com/Praxis-Core. (http://www.teacherstestprep.com/Praxis-Core/)

Application deadlines

The following application deadlines have been established for the Master of Education, the Master of Teaching and the post-baccalaureate Certificate in Teaching.

<table>
<thead>
<tr>
<th>Degree:</th>
<th>Semester(s) of entry:</th>
<th>Deadline dates:</th>
<th>Test requirements:</th>

Students who are unable to enroll for the semester for which they are accepted must request a deferment.

General admission requirements

The admission decision will be made on an overall analysis of the following for each degree program. See each program listing for any additional information.

Master of Teaching, Master of Education, post-master’s Certificate in Educational Leadership, post-master’s Certificate in Reading, post-baccalaureate graduate Certificate in Instructional Technology and post-baccalaureate graduate Certificate in Teaching

- A minimum GPA of 3.0 on a 4.0 scale on the last 60 semester hours of study. Applicants whose GPA during the last 60 hours of course work falls just below 3.0 may be considered based on the strength of the overall application.
- Acceptable scores on the GRE or the MAT: Normally, students are expected to score at least 290 combined on the quantitative and verbal sections of the GRE with neither score falling below the 20th percentile, or at least 386 on the MAT.
- An interview with the applicant may be required by the faculty of the program to which the applicant is seeking admission.

Ph.D. in Education and Ed.D. in Leadership

Refer to the program pages of this bulletin for concentration- or degree-specific admission requirements.

Advising and student program planning

The chart below outlines the general steps to completing the Master of Education programs. All other graduate-level students in the School of Education should refer to the appropriate section of this bulletin for information specific to these programs.

Students are expected to work with their adviser to plan their programs of study. Each graduate program agreement, or changes thereto, must be approved by the adviser and the appropriate department chair. Courses taken without approval are taken at the student’s risk. Each student is required to complete and file a program plan with the department before the completion of the sixth credit hour.

1Not required in M.Ed. in Special Education and M.Ed. in Curriculum and Instruction

Admission to candidacy

Admission to graduate study in the Master of Education programs does not constitute candidacy for a degree. Rather, students who have been admitted to graduate study are advanced to degree candidacy upon the
recommendation of the adviser, core faculty and department in which the degree is sought.

Advancement to degree candidacy requires that students must have completed at least 12 but no more than 18 semester hours of graduate study with a minimum GPA of 3.0; must have demonstrated clearly the aptitude and ability to pursue graduate study, including independent study; must have exhibited a commitment to their profession; and must have demonstrated promise for a successful career in the field selected with respect to temperament and personality. Specific courses may be required prior to application for candidacy. Admission to degree candidacy is not an automatic process. Students must file an approved application for candidacy with their departments. Only students who have been admitted to candidacy may pursue additional work toward the degree.

Comprehensive examination

- Some students in a Master of Education program must take a three-hour written comprehensive examination.
- Written examinations will be given on the first Saturday in November, the fourth Saturday in March and the second Saturday in July. Students must notify the department in writing of the intention to take the examination at least 30 days prior to the published date. All comprehensive examinations must be taken on dates indicated except for religious or health reasons. Any exceptions must be approved in advance by the department chair.
- A minimum of three faculty members, designated by the core faculty, will evaluate each examination independently. Satisfactory performance on the comprehensive examination requires approval of two of the three evaluators.
- Any student failing the comprehensive examination must have a joint conference with at least two core faculty members, one of whom is the student’s adviser, before taking the comprehensive examination again.
- During the conference, the core faculty members may recommend additional academic preparation and/or competencies that must be met by the student prior to retaking the comprehensive examination.
- The student will be notified by letter of the recommendations made by the core faculty in the conference.

The student will have only two opportunities to take the comprehensive examination. Failure to pass the comprehensive examination the second time will result in the student being dropped from the degree program.

Transfer credit

A maximum of six credit hours of acceptable graduate credit may be transferred into a graduate degree program. Course work taken prior to being admitted to a program in the School of Education and not applied to another degree may be applied for transfer. This includes course work taken at VCU.

Course work submitted for transfer is evaluated by the student’s adviser and the department head. See the Ph.D. in Education program section of this bulletin for information regarding transfer credit for this program.

As a general rule, continuing education courses taken at institutions other than VCU will not be transferred.

Students seeking to earn credit at other institutions after acceptance to a graduate program in the School of Education must receive prior approval from their advisers and the department chair or the director for the Ph.D. program. See the Graduate study (p. 34) section of this bulletin for further information regarding transfer credit.

Education, Doctor of Philosophy (Ph.D.) with a concentration in art education

Program goal

The art education concentration allows students to connect contemporary art and education theories and philosophies, practical and professional experiences, and impact research to develop an area of expertise relevant to the field of art education. The program distinguishes itself by integrating urban community engagement, digital and emerging media, and research and assessment in diverse settings. Graduates will be highly qualified to serve in teaching, research and leadership positions at universities and in arts and education organizations.

Student learning outcomes

1. Develop research knowledge and skills (research component): Students will acquire the prerequisite skills essential to designing, conducting and interpreting qualitative and quantitative design research. Students will demonstrate this knowledge and skill set on a qualifying examination, which is independently evaluated by at least two faculty members. To address inter-rater reliability, if the two faculty members disagree on the student’s level of knowledge, a third faculty member is called in to evaluate the student’s responses on the qualifying examination.

2. Develop in-depth knowledge in one area of study (concentration component): Students will demonstrate in-depth knowledge and skills in an area of study that is congruent with their current or projected career goals. Content will differ according to chosen concentration.

3. Apply skills in external setting (externship component): Students will demonstrate their knowledge and skills in a professional placement in a school, agency or corporate setting. The faculty adviser and the externship site supervisor work together to evaluate the student.

4. Complete an original research study (dissertation component): Student will design, implement, analyze and defend an original research study. Once a student passes the prospectus hearing, he or she will collect and analyze the data and finish writing the last two chapters of their dissertation. Students have a committee of a minimum of four faculty members. Typically this consists of a chair, a methodologist, a subject-matter expert and an expert outside of the School of Education. Each committee member independently reviews the student’s work. Once the dissertation defense has occurred, the committee discusses their thoughts on the quality of the student work. Once all members agree, the student is granted a Ph.D.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the
Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information
For additional information about the Ph.D in Education program, please see the doctoral student handbook (http://www.soe.vcu.edu/files/2016/01/PhDHandbook2017.pdf).

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following represent the minimum requirements for admission:

1. Master’s degree in an appropriate discipline
2. Three letters of recommendation addressing the student’s potential for graduate study in education
3. Student’s written statement concerning career interests
4. Transcripts of all previous college work
5. A personal interview and writing sample (may be requested)
6. Professional vitae/resume
7. Satisfactory scores on the GRE

Please see doctoral admissions information on the School of Education website for details.

Degree requirements
In addition to the VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 48-54 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in three courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Externship requirement: Students must complete an approved externship.
4. Examination requirements: Students must pass both a qualifying examination early in the program and a comprehensive examination near the end of the program.
5. Dissertation requirements: Students must complete and defend a research dissertation.

Program contact
Education, Doctor of Philosophy (Ph.D.) with a concentration in sport leadership

Program goal

The sport leadership concentration is designed for students to research, comprehend and interpret contemporary literature as it relates to leadership in the sport industry and to extend knowledge and understanding of leadership in that industry. Students will have the opportunity to integrate theory and practice in the specific areas of economics, finance, marketing, management, communications and sociology of sport. Upon completion of the doctoral course work and dissertation, students will be prepared for higher education positions in sport management/administration and/or sport leadership programs across the U.S.

Student learning outcomes

1. Apply skills in external setting (externship component): Students will demonstrate their knowledge and skills in a professional placement in a school, agency or corporate setting. The faculty adviser and the externship site supervisor work together to evaluate the student.

2. Develop research knowledge and skills (research component): Students will acquire the prerequisite skills essential to designing, conducting and interpreting qualitative and quantitative design research. Students will demonstrate this knowledge and skill set on a qualifying examination, which is independently evaluated by at least two faculty members. To address inter-rater reliability, if the two faculty members disagree on the student’s level of knowledge, a third faculty member is called in to evaluate the student’s responses on the qualifying examination. This exam is also graded “blindly,” meaning that the evaluator does not know which student he or she is evaluating.

3. Develop in-depth knowledge in one area of study (concentration component): Students will demonstrate in-depth knowledge and skills in an area of study that is congruent with their current or projected career goals. Content will differ according to chosen concentration.

4. Complete an original research study (dissertation component): Students will design, implement, analyze and defend an original research study. Once a student passes the prospectus hearing, he or she will collect and analyze the data and finish writing the last two chapters of their dissertation. Students have a committee of a minimum of four faculty members. Typically, this consists of a chair, a methodologist, a subject-matter expert and an expert outside of the School of Education. Each committee member independently reviews the student’s work. Once the dissertation defense has occurred, the committee discusses their thoughts on the quality of the student work. Once members approve, the student is granted a Ph.D.

Department of Counseling and Special Education

Kaprea F. Johnson, Ph.D.
Associate professor and interim chair

LaRon A. Scott, Ed.D.
Associate professor and interim co-chair

The Department of Counseling and Special Education blends top-tier, accredited programs in counselor education and special education and disability policy to create a unique, interdisciplinary academic environment for students and faculty. The department's primary mission is to prepare graduates to be leaders, ready to make a difference in people's lives. Courses emphasize applicable learning, incorporating the practical tasks and situations students will be faced with on the job.

The nationally recognized faculty members provide guidance and support, allowing students to fully explore their areas of interest. The department provides the tools that help students examine, refine and challenge current methods and scholarship and to use evidence-based research. Learn more by visiting the Department of Counseling and Special Education webpage (http://www.soe.vcu.edu/departmentpages/counseling-and-special-education/).

Admission to this program is under permanent suspension pending closure.

Counselor Education, Master of Education (M.Ed.) with a concentration in college counseling and student affairs

Program goal

The M.Ed. in Counselor Education with a concentration in college counseling and student affairs is a 60-credit-hour program designed to prepare counselors for higher education and community agencies throughout Virginia and the nation. The college counseling and student affairs concentration provides students with the specialized knowledge and skills necessary for employment as student affairs professionals in higher education settings. The program requires a minimum of two years of study to complete.

The faculty makes every effort to assist students in individualizing a graduate program to match their professional needs and interests. However, individualization takes place in an environment of legitimate constraints revolving around institutional, accreditation and licensure requirements. Faculty members view each program as more than simply an aggregate of courses, and students should plan all program work with their faculty advisers.

Student learning outcomes

Professional orientation/professional identity/continuing education

1. Students display knowledge and understanding of the historical and philosophical foundations of the counseling profession, including counselor professional identity, and display necessary skills in applying this knowledge and understanding to professional practice.

2. Students demonstrate the ability to adhere to legal and ethical practice.

3. Students understand the importance of continuing education and are committed to seeking continuing education throughout their careers.

Helping relationships/group work/career development/wellness

1. Students display knowledge and understanding of counseling processes applied to both individuals and groups, including knowledge of how to design, implement and evaluate programs related to academic, career and personal/social development of clients.

2. Students display knowledge and skills related to responding to crises, emergencies and disasters.

3. Students participate in the design, implementation and evaluation of programs that promote wellness, as well as prevention and intervention services.

Human development/wellness

Students display knowledge of theories of learning, personality development, transitions and resilience, and use this information as a basis for facilitating optimal development and wellness.

Social and cultural diversity/social justice and advocacy

1. Students display knowledge and understanding of diversity and equity issues and how these issues impact clients’ academic, personal and career opportunities.

2. Students display multicultural competencies including appropriate sensitivity, skills and advocacy in working with diverse clients.

3. Students display knowledge and understanding of the relationship between counseling programs and academic achievement, including an understanding of factors that promote student success, and work to close the achievement gap among disenfranchised groups.

Assessment

Students display knowledge and understanding of multiple factors that may affect personal, social and academic functioning, and possesses knowledge and skills to identify, evaluate and implement appropriate needs assessments and consequent interventions.

Research

Students display knowledge and understanding of research and evaluation, including understanding of how data are used to inform decisions, and students display skills and professional practices in appropriate collection, analysis and use of data.

Leadership

1. Students display knowledge of issues that affect student affairs practice and demonstrate an understanding of leadership, organization and management practices that help institutions accomplish their missions.

2. Students advocate for policies, programs and services that are equitable and responsive to the unique needs of postsecondary students.

3. Students use and analyze multiple data sources, including institutional data, to make decisions about improving differentiated
student programs and students develop measurable outcomes for student development activities.

4. Students collaborate with the postsecondary community to assist students and use postsecondary community resources to improve student learning and development.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)**

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)**

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the academic regulations section for additional information on graduation requirements. (p. 31)**

**Other information**

Students accepted into the counselor education program must make satisfactory progress toward their degrees. Students who earn unsatisfactory grades and/or exhibit unprofessional conduct may be terminated from the program. More specific information about satisfactory academic progress can be found on this website at satisfactory (p. 25) academic progress (http://bulletin.vcu.edu/graduate/study/general-academic-regulations-graduate-students/satisfactory-academic-progress/).

Apply online at graduate.admissions.vcu.edu (http://www.graduate.vcu.edu).

Counselor Education, Master of Education (M.Ed.) with a concentration in couples and family counseling

Program goal
The M.Ed. in Counselor Education with a concentration in couples and family counseling is a 60-credit-hour program designed to prepare students for careers as counselors in clinics, health care centers, schools and private practice. The program focuses on training to address a range of personal and professional problems faced by individuals, couples and families through a systemic framework. The course sequence meets the educational requirements for both the licensed professional counselor and licensed marriage and family therapist as set by the state of Virginia Department of Health Professions. The couples and family counseling concentration meets the licensure requirements for other states, however certain states have different requirements. It is the responsibility of the student to check with the state licensure board to verify the necessary requirements to be eligible for licensure and to plan on meeting those requirements. The program requires a minimum of two years of study to complete.

The faculty makes every effort to assist students in individualizing a graduate program to match their professional needs and interests. However, individualization takes place in an environment of legitimate constraints revolving around institutional, accreditation and licensure requirements. Faculty members view each program as more than simply an aggregate of courses, and students should plan all program work with their faculty advisers.

Student learning outcomes
Professional orientation/professional identity/continuing education
1. Students display knowledge and understanding of the historical and philosophical foundations of the counseling profession, including counselor professional identity, and display necessary skills in applying this knowledge and understanding to professional practice.
2. Students demonstrate the ability to adhere to legal and ethical practice.
3. Students understand the importance of continuing education and are committed to seeking continuing education throughout their careers.

Helping relationships/group work/career development/wellness
1. Students display knowledge and understanding of counseling processes applied to individuals, couples, families and groups, including knowledge of how to design, implement and evaluate programs related to academic, career and personal/social development of clients.
2. Students display knowledge and skills related to responding to crises, emergencies and disasters.
3. Students participate in the design, implementation and evaluation of programs that promote wellness, as well as prevention and intervention services.

Human development/wellness
Students display knowledge of theories of learning, personality development, transitions and resilience, and use this information as a basis for facilitating optimal development and wellness.

Social and cultural diversity/social justice and advocacy
1. Students display knowledge and understanding of diversity and equity issues and how these issues impact clients’ couple and family functioning, as well as academic, personal and career opportunities.
2. Students display multicultural competencies including appropriate sensitivity, skills and advocacy in working with diverse clients.
3. Students display knowledge and understanding of the relationship between counseling programs and family systems, including an understanding of factors that promote family wellness, and work to promote equity in relational health and family functioning among disenfranchised groups.

Assessment
Students display knowledge and understanding of multiple factors that may affect personal, social and academic functioning, and possesses knowledge and skills to identify, evaluate and implement appropriate needs assessments and consequent interventions.
Research
Students display knowledge and understanding of research and evaluation, including understanding of how data are used to inform decisions, and students display skills and professional practices in appropriate collection, analysis and use of data.

For couples and family counseling concentration
1. Students display knowledge of the family systems models that guide the practice of couple and family counseling and demonstrate the ability to conceptualize, articulate and implement interventions from a systems perspective that fosters family wellness.
2. Students display knowledge and understanding of the role of systems on individual and family development and strategies to enhance family wellness.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

Other information
Students accepted into the counselor education program must make satisfactory progress toward their degrees. Students who earn unsatisfactory grades and/or exhibit unprofessional conduct may be terminated from the program. More specific information about satisfactory academic progress (p. 25) can be found on this website.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

In addition to the general admission requirements of the VCU Graduate School (http://bulletin.vcu.edu/graduate/study/admission-graduate-study/admission-requirements/), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor’s degree in an appropriate discipline
2. Three letters of recommendation addressing the student’s potential for graduate study in education
3. Student’s written statement concerning career interests
4. Transcripts of all previous college work
5. Personal interview (may be required)
6. Satisfactory scores on the GRE or MAT

Degree requirements
In addition to general VCU Graduate School graduation requirements, students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 60 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Internship requirements: Students must complete an approved internship.
4. Testing requirements: Students must provide an acceptable score on a comprehensive program examination.

Research
Counselor Education, Master of Education (M.Ed.) with a concentration in school counseling

Program goal
The M.Ed. in Counselor Education with a concentration in school counseling is a 60-credit-hour program designed to prepare counselors for elementary, middle and high schools. The school counseling concentration leads to school counseling licensure and preparation for advanced graduate work at the post-master's level. The program requires a minimum of two years of study to complete.

The faculty makes every effort to assist students in individualizing a graduate program to match their professional needs and interests. However, individualization takes place in an environment of legitimate constraints revolving around institutional, accreditation and licensure requirements. Faculty members view each program as more than simply an aggregate of courses, and students should plan all program work with their faculty advisers.

For students who already have a master's degree in education, the 36 credit hours of program core courses in the school counseling concentration also will lead to recommendation for licensure as a school counselor. Students who wish to gain this licensure must meet with the department chair and file a plan of study. Although students holding master's degrees do not apply for admission to the graduate program, they must file the appropriate plan of study in order to qualify for the VCU-approved program of study. No course work taken more than seven years prior to applying for licensure as a school counselor will count toward meeting VCU's approved program course equivalents.

Student learning outcomes

Professional orientation/professional identity/continuing education
1. Students display knowledge and understanding of the historical and philosophical foundations of the counseling profession, including counselor professional identity, and display necessary skills in applying this knowledge and understanding to professional practice.
2. Students demonstrate the ability to adhere to legal and ethical practice.
3. Students understand the importance of continuing education and are committed to seeking continuing education throughout their careers.

Helping relationships/group work/career development/wellness
1. Students display knowledge and understanding of counseling processes applied to both individuals and groups including knowledge of how to design, implement and evaluate programs related to academic, career and personal/social development of clients.
2. Students display knowledge and skills related to responding to crises, emergencies and disasters.
3. Students participate in the design, implementation and evaluation of programs that promote wellness, as well as prevention and intervention services.

Human development/wellness
Students display knowledge of theories of learning, personality development, transitions and resilience, and use this information as a basis for facilitating optimal development and wellness.

Social and cultural diversity/social justice and advocacy
1. Students display knowledge and understanding of diversity and equity issues and how these issues impact clients’ academic, personal and career opportunities.
2. Students display multicultural competencies including appropriate sensitivity, skills and advocacy in working with diverse clients.
3. Students display knowledge and understanding of the relationship between counseling programs and academic achievement, including an understanding of factors that promote student success, and work to close the achievement gap among disenfranchised groups.

Assessment
Students display knowledge and understanding of multiple factors that may affect personal, social and academic functioning, and possesses
knowledge and skills to identify, evaluate and implement appropriate needs assessments and consequent interventions.

Research
Students display knowledge and understanding of research and evaluation, including understanding of how data are used to inform decisions, and students display skills and professional practices in appropriate collection, analysis and use of data.

For school counseling concentration
1. Students display knowledge of the professional models that guide the practice of school counseling and demonstrate the ability to articulate, model and advocate for appropriate school counselor duties and programs.
2. Students display knowledge and understanding of the role of family-school-community collaboration on student development and strategies to enhance collaboration.

Leadership
Students display knowledge and understanding of leadership models and of the school counselor’s role in school leadership; students display appropriate skills and dispositions for working in a leadership capacity in school counseling.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. Disability Leadership, Certificate in (Post-baccalaureate graduate certificate)

Program goal
The Certificate in Disability Leadership is a 12-hour certificate program designed to prepare health professionals, special educators and other professionals in related disciplines in the field of childhood neurodevelopmental disabilities to be leaders in the health care system. The program provides a 12- to 24-month curriculum of didactic and Web-based courses, interactive seminars, clinical and community-based practica, a family mentorship experience and planned grassroots- and systems-level policy activities. To be eligible for admission, a student must be accepted into the Virginia Leadership Education in Neurodevelopmental Disabilities program. Va-LEND is a collaboration among the School of Education (Partnership for People with Disabilities), the VCU School of Medicine (Department of Pediatrics) and the Virginia Department of Health (Title V Program). The LEND curriculum emphasizes all aspects of neurodevelopmental and related disabilities, the social environment (including ethnic and cultural issues), the interdisciplinary approach (systems of care), leadership (advocacy and public policy as well as administration) and research. Following completion of the program, the trainees will be able to serve as leaders in the field of child health and neurodevelopmental disabilities.

Student learning outcomes
1. Students will demonstrate an understanding of the nature and range of neurodevelopmental disabilities.
2. Students will demonstrate an understanding of the team approach to serving individuals with neurodevelopmental disabilities and their families.
3. Students will demonstrate an understanding of community services and resources available to individuals with neurodevelopmental disabilities and their families.
4. Students will demonstrate an understanding of their role as advocates for individuals with neurodevelopmental disabilities and their families.
5. Students will be involved in a leadership role with an organization serving individuals with neurodevelopmental disabilities and their families.

Education, Doctor of Philosophy (Ph.D.) with a concentration in counselor education and supervision

Program goal
The counselor education and supervision concentration is designed to prepare experienced, research-oriented master's-level counselors for academic positions focused on research, service, teaching and counselor education. Doctoral students will integrate theory, research and practice in areas of counselor supervision and training, counselor education and teaching, advanced counseling, diversity and multiculturalism, leadership, advocacy, and social justice.

Student learning outcomes

1. Develop research knowledge and skills (research component):
   Students will acquire the prerequisite skills essential to designing, conducting and interpreting qualitative and quantitative design research. Students will demonstrate this knowledge and skill set on a qualifying examination, which is independently evaluated by at
least two faculty members. To address inter-rater reliability, if the two faculty members disagree on the student’s level of knowledge, a third faculty member is called in to evaluate the student’s responses on the qualifying examination.

2. Develop in-depth knowledge in one area of study (concentration component): Students will demonstrate in-depth knowledge and skills in an area of study that is congruent with their current or projected career goals. Content will differ according to chosen concentration.

3. Apply skills in external setting (externship component): Students will demonstrate their knowledge and skills in a professional placement in a school, agency or corporate setting. The faculty adviser and the externship site supervisor work together to evaluate the student.

4. Complete an original research study (dissertation component): Students will design, implement, analyze and defend an original research study. Once a student passes the prospectus hearing, he or she will collect and analyze the data and finish writing the last two chapters of their dissertation. Students have a committee of a minimum of four faculty members. Typically this consists of a chair, a methodologist, a subject-matter expert and an expert outside of the School of Education. Each committee member independently reviews the student’s work. Once the dissertation defense has occurred, the committee discusses their thoughts on the quality of the student work. Once all members agree, the student is granted a Ph.D.

---

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. Master’s degree from a CACREP-accredited program or related discipline
2. Three letters of recommendation addressing the student’s potential for graduate study in education
3. Student’s written statement concerning career interests
4. Transcripts of all previous college work
5. A personal interview and writing sample (may be requested)
6. Professional vitae/resume
7. Satisfactory scores on the GRE

**Degree requirements**

In addition to the VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 48-54 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in three courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Externship requirement: Students must complete an approved externship.
4. Examination requirements: Students must pass both a qualifying examination early in the program and a comprehensive examination near the end of the program.

5. Dissertation requirements: Students must complete and defend a research dissertation.

### Education, Doctor of Philosophy (Ph.D.) with a concentration in special education and disability leadership

### Program goal

The special education and disability leadership concentration is designed primarily for individuals employed in leadership positions in the field of special education. Emphasis in this concentration is placed on developing in-depth knowledge about topics as they pertain to personnel development, research, issues and policies in special education.

### Student learning outcomes

1. **Apply skills in external setting (externship component):** Students will demonstrate their knowledge and skills in a professional placement in a school, agency or corporate setting. The faculty adviser and the externship site supervisor work together to evaluate the student.

2. **Develop research knowledge and skills (research component):** Students will acquire the prerequisite skills essential to designing, conducting and interpreting qualitative and quantitative design research. Students will demonstrate this knowledge and skill set on a qualifying examination, which is independently evaluated by at least two faculty members. To address inter-rater reliability, if the two faculty members disagree on the student’s level of knowledge, a third faculty member is called in to evaluate the student’s responses on the qualifying examination. This exam is also graded “blindly,” meaning that the evaluator does not know which student he or she is evaluating.

3. **Develop in-depth knowledge in one area of study (concentration component):** Students will demonstrate in-depth knowledge and skills in an area of study that is congruent with their current or projected career goals. Content will differ according to chosen concentration.

4. **Complete an original research study (dissertation component):** Students will design, implement, analyze and defend an original research study. Once a student passes the prospectus hearing, he or she will collect and analyze the data and finish writing the last two chapters of their dissertation. Students have a committee of a minimum of four faculty members. Typically, this consists of a chair, a methodologist, a subject-matter expert and an expert outside of the School of Education. Each committee member independently reviews the student’s work. Once the dissertation defense has occurred, the committee discusses their thoughts on the quality of the student work. Once members approve, the student is granted a Ph.D.

### VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and
on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information

For additional information about the Ph.D. in Education program, please see the doctoral student handbook (http://www.soe.vcu.edu/files/2016/01/Ph.DHandbook2017.pdf).

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following represent the minimum requirements for admission:

1. Master’s degree in an appropriate discipline
2. Three letters of recommendation addressing the student’s potential for graduate study in education
3. Student’s written statement concerning career interests
4. Transcripts of all previous college work
5. A personal interview and writing sample (may be requested
6. Professional vitae/resume
7. Satisfactory scores on the GRE

Please see doctoral admissions information on the School of Education website for details.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 48-54 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in three courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Externship requirement: Students must complete an approved externship in teaching, research and service policy.
4. Examination requirements: Students must pass both a qualifying examination early in the program and a comprehensive examination near the end of the program.
5. Dissertation requirements: Students must complete and defend a research dissertation.

Program contact
Special Education, Master of Education (M.Ed.) with a concentration in early childhood

Program goal

The Master of Education in Special Education program prepares graduates for work in one of three areas: early childhood, severe disabilities or general education. Applicants who do not already hold a teaching license must meet both licensure and degree requirements prior to the awarding of the Master of Education degree unless exempted as a professional from another discipline. Teacher candidates should plan carefully with their adviser to ensure that the appropriate courses and experiences are completed. Successful completion of the degree program leads to endorsement in early childhood special education, severe disabilities or special education-general education.

The Master of Education in Special Education program with an early childhood concentration is a sequentially planned series of courses and clinical experiences designed to prepare individuals to work with young children, from birth through age 5, with developmental disabilities and their families. The courses are delivered using a blend of online and face-to-face formats. The program is learner-centered, innovative, interactive and collaborative. Through online discussions and face-to-face meetings with faculty members, community partners, student peers and program graduates, the ECSE teacher candidates have multiple opportunities to engage in interactive, proactive and dynamic dialogues.

Successful completion of the degree program qualifies candidates for teacher licensure with endorsement in early childhood special education by the Virginia Department of Education and initial early intervention certification. Candidates are prepared to intervene with infants and young children representing a wide range of abilities, including those at risk for developmental delays. As a result of training, candidates will be prepared to serve children and families in diverse and high-need communities in a variety of early intervention roles. The program can be completed in five semesters of full-time study or six semesters of part-time study.

In addition to course work, candidates create an electronic portfolio to showcase their knowledge, skills and dispositions in the special education early childhood curriculum.

Student learning outcomes

1. Demonstrate content knowledge in special education: Candidates demonstrate content knowledge in special education as evidenced by the final portfolio and case-study paper.
2. Effectively plan instruction: Candidates demonstrate that they can effectively plan classroom-based instruction or activities for other roles as special educators as evidenced by the UDL/collaboration unit plan.
3. Effectively apply knowledge, skills and dispositions (clinical experience): Candidates demonstrate knowledge, skills and dispositions are applied effectively in practice as evidenced by the clinical evaluation continuum.
4. Effect on student learning: Candidates demonstrate effects on student learning as evidenced by the unit plan with curriculum-based measure – secondary.
5. Candidates demonstrate CEC standards proficiency: Candidates further demonstrate proficiency on CEC competencies as evidenced by the assessing a child/IEP assignment, the multicultural poster and paper, and the functional behavior assessment/behavior intervention plan.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)
Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor’s degree in an appropriate discipline
2. Three letters of recommendation addressing the student’s potential for graduate study in education
3. Student’s written statement concerning career interests
4. Transcripts of all previous college work

Additionally, there are several tests that students must pass for admission to teacher preparation, admission to student teaching and licensure in Virginia. Students should consult the Student Services Center (http://www.soe.vcu.edu/student-services-center/) section on the School of Education website for current testing requirements.

Admission to clinical experiences in schools requires a background check and fingerprinting.

**Degree requirements**

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 37 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.

**Program website**: soe.vcu.edu/academics/masters-programs/med-special-education (https://soe.vcu.edu/academics/masters-programs/med-special-education/)

**Special Education, Master of Education (M.Ed.) with a concentration in general education**

**Program goal**

The Master of Education in Special Education program prepares graduates for work in one of three areas: early childhood, severe disabilities or general education. Applicants who do not already hold a teaching license must meet both licensure and degree requirements prior to the awarding of the Master of Education degree unless exempted as a professional from another discipline. Students should plan carefully with their adviser to ensure that the appropriate courses and experiences are completed. Successful completion of the degree program leads to endorsement in early childhood special education, severe disabilities or general curriculum.

The Master of Education in Special Education general education concentration, which can lead to an endorsement in the special
education general curriculum, is designed to prepare graduates with the professional knowledge and skills needed to work in a variety of settings.

1. General education classrooms (where children with special needs are being collaboratively taught)
2. Resource, modified resource or collaborative resource rooms
3. Self-contained settings or classrooms in varied urban, suburban or rural areas
4. Residential programs
5. Various community environments

Special training is provided in teaching reading and language, behavior management, and the use of interactive strategies that teach positive social skills. Candidates are prepared to work with students in completing a variety of transitions, such as from special education to the general education classroom or from high school to employment and independent living.

Through course work, the general education concentration will encompasses broad concepts of education, research, development, related disciplines and special education to build a foundation of professional knowledge and understanding. Specialized courses develop the intensive diagnostic, remedial, decision-making and consultative skills and understandings required of a professional in a special education-general education setting, including the ability to recognize educational and social problems, to formulate effective individualized instructional interventions using a variety of methodologies and modifications, to incorporate accommodations and transitions into program plans and to consult productively with appropriate personnel in the development of maximum educational opportunities for students with high-incidence disabilities. In addition to course work, candidates will create an electronic portfolio that will showcase their knowledge, skills and dispositions in the special education general curriculum.

The program offers candidates the opportunity to complete clinical placements in their own classroom or school with approval from VCU faculty and supervision by trained personnel. Placement opportunities for clinical experiences include a range of public and private schools and mental health programs that allow graduate students to select field experiences that are consistent with their professional goals. Previous teaching experience is valued, but not required. Students will have the opportunity to complete a practicum in addition to the externship. When students complete the program, they are eligible for licensure by the Virginia Department of Education with an endorsement to teach students enrolled in special education, general curriculum in grades K-12. Candidates are offered the option of taking a full-time or an on-the-job externship for a semester.

**Student learning outcomes**

1. Demonstrate content knowledge in special education: Candidates demonstrate content knowledge in special education as evidenced by the final portfolio and case-study paper.
2. Effectively plan instruction: Candidates demonstrate that they can effectively plan classroom-based instruction or activities for other roles as special educators as evidenced by the UDL/collaboration unit plan.
3. Effectively apply knowledge, skills and dispositions (clinical experience): Candidates demonstrate knowledge, skills and dispositions are applied effectively in practice as evidenced by the clinical evaluation continuum.
4. Effect on student learning: Candidates demonstrate effects on student learning as evidenced by the unit plan with curriculum-based measure – secondary.
5. Demonstrate CEC standards proficiency: Candidates further demonstrate proficiency on CEC competencies as evidenced by the assessing a child/IEP assignment, the multicultural poster and paper, and the functional behavior assessment/behavior intervention plan.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.grad.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Special Education, Master of Education (M.Ed.) with a concentration in severe disabilities

Program goal

The Master of Education in Special Education program prepares graduates for work in one of three areas: early childhood, severe disabilities or general education. Applicants who do not already hold a teaching license must meet both licensure and degree requirements prior to the awarding of the Master of Education degree unless exempted as a professional from another discipline. Students should plan carefully with their adviser to ensure that the appropriate courses and experiences are completed.

The Master of Education in Special Education severe disabilities concentration is designed to prepare teachers to work with students in grades K-12 in public school settings. Throughout the program, emphasis
is placed on person-centered planning, school and community inclusion, transdisciplinary teamwork and the role of the family. Successful completion of the degree program leads to licensure endorsement in special education, adapted curriculum K-12.

Courses address physical and medical management issues, functional assessment strategies, longitudinal curriculum planning, systematic instruction, augmentative and alternative communication systems, assistive technology, transition from school to adulthood, positive behavioral supports and the special needs of students with physical, sensory and health-related disabilities, including autism spectrum disorder.

All core courses are offered through the Virginia Consortium for Teacher Preparation in Special Education Adapted Curriculum: Supporting Students with Severe Disabilities and Autism. Core courses are accessed through VCU. Students enrolled in the program complete a field-based externship in their school (if they currently serve students with severe disabilities) or in one of the many public schools in the Richmond area. A total of six credit hours of externship experience is spread throughout the course of study and is designed to meet the students’ needs for professional development.

All candidates are required to submit a final portfolio as the capstone requirement of the program. Successful completion of the 42-credit-hour program results in eligibility for Virginia endorsement in special education, adapted curriculum in addition to the Master of Education degree.

**Student learning outcomes**

1. Demonstrate content knowledge in special education: Candidates demonstrate content knowledge in special education as evidenced by the final portfolio and the disability case-study paper.
2. Effectively plan instruction: Candidates demonstrate that they can effectively plan classroom-based instruction or activities for other roles as special educators as evidenced by the intervention program plan with data.
3. Effectively apply knowledge, skills and dispositions (clinical experience): Candidates demonstrate knowledge, skills and dispositions are applied effectively in practice as evidenced by the clinical evaluation continuum.
4. Effect on student learning: Candidates demonstrate effects on student learning as evidenced by the unit plan with the transition IEP
5. Candidates demonstrate CEC standards proficiency: Candidates further demonstrate proficiency on CEC competencies as evidenced by the functional behavior assessment/behavior intervention plan, expanded present level of performance, low-tech device, teamwork project and physical management plan with assistive technology assignments.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Successful completion of SEDP 630 if candidate does not hold eligibility for a Virginia provisional special education teaching license

Successful completion of portfolio requirement

**Total Hours**: 42

**Total graduate credit hours required (minimum)**: 42

**Program contact**

Communications and Enrollment Management

Email: soeinfo@vcu.edu

Phone: (804) 827-2670

**Coordinator contact**

Meera Mehtaji, Ph.D.

Assistant professor, Department of Counseling and Special Education

Email: mehtajimr@vcu.edu

Phone: (804) 828-1332

**Program website**: soe.vcu.edu/academics/masters-programs/med-special-education (https://soe.vcu.edu/academics/masters-programs/med-special-education/)

**Special Education K-12 Teaching, Certificate in (Post-baccalaureate graduate certificate)**

The Certificate in Special Education K-12 Teaching will prepare provisionally licensed special education teachers to become fully licensed special education teachers who work with children with learning disabilities, emotional disturbance and mild to moderate intellectual disability. Students will be prepared to recognize a child’s educational and social problems, to formulate effective individualized instruction, and to consult with parents, teachers and administrators to incorporate accommodations and transitions into the child’s educational program. Graduates will be prepared to teach reading and language, behavior management, and social skills to students.

**Student learning outcomes**

Upon program completion, graduates will demonstrate the following knowledge and skills:

1. Apply evidence-based practices, professional knowledge and skills in inclusive classrooms with students with high-incidence disabilities
2. Design individualized assessments, unit and lesson plans, and make data-based decisions that will support the development of students with high-incidence disabilities
3. Integrate reading and language, behavior management, and the use of interactive strategies that teach social skills to students with high-incidence disabilities
4. Report and use formal and informal assessments techniques to deliver opportunities for students to transition into schools, programs and communities.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu/).

Students applying for the special education K-12 teaching certificate must:

- Be employed by a Virginia public or nonpublic school as a special educator in special education-general curriculum K-12 and have the recommendation of the employing educational agency.

Degree requirements

In addition to the VCU Graduate School graduation requirements (http://bulletin.vcu.edu/graduate/study/general-academic-regulations-graduate-students/graduation-requirements/), students are required to complete all required course work.

1. Credit hour requirements: Students are required to complete a minimum of 27 credit hours.
2. Grade requirements: Courses that have not earned a minimum grade of C cannot be used to satisfy degree requirements. Students must maintain a minimum 3.0 GPA in order to meet satisfactory academic progress requirements and be eligible for financial aid.
3. Student teaching requirements: Students must successfully complete an approved student teaching experience.

Department of Educational Leadership
Whitney S. Newcomb, Ph.D.
Professor and interim chair

The mission of the Department of Educational Leadership is to prepare school leaders who are able to translate authentic research on school leadership and society into quality practice.

The department offers two M.Ed. programs, a certificate program and two doctoral programs. The M.Ed. in Educational Leadership with a concentration in administration and supervision and the post-master’s Certificate in Educational Leadership lead to endorsement in administration and supervision by the Virginia Department of Education. The M.Ed. in Educational Leadership is a program in leadership studies designed to prepare those wishing to study educational leadership but do not wish to seek endorsement in school administration and supervision.

The department offers an educational leadership concentration in the Ph.D. in Education, designed to prepare those who wish to focus on educational leadership, including careers as faculty members in higher education. The department oversees the Ed.D. in Leadership, a program for those wishing to study leadership and remain in leadership positions in educational organizations.

For more information consult the department’s website. (http://www.soe.vcu.edu/departmentpages/educational-leadership/)

- Education, Doctor of Philosophy (Ph.D.) with a concentration in educational leadership, policy and justice (p. 514)
- Educational Leadership, Master of Education (M.Ed.) with a concentration in administration and supervision (p. 517)
- Educational Leadership, Master of Education (M.Ed.) with a concentration in leadership studies (p. 519)
- Leadership, Doctor of Education (Ed.D.) (p. 520)
- Educational Leadership, Certificate in (Post-master’s certificate) (p. 516)

Education, Doctor of Philosophy (Ph.D.) with a concentration in educational leadership, policy and justice

Program goal
The educational leadership, policy and justice concentration is designed to cultivate educational scholars and leaders who will advance scholarship, policy and practice related to equity and social justice. Drawing on an interdisciplinary study of leadership and policy, the program promotes an understanding of the many societal and organizational impediments to equal educational opportunity. This concentration is directed not only toward identifying and analyzing those injustices, but also toward imagining, researching and creating more equitable, inclusive schools, organizations and societies through leadership and policy. The dissertation is a rigorous culminating tool for research, advocacy and change within educational organizations and endeavors. Graduates will be prepared to lead for equity in K-12 organizations, higher education, research and policy think tanks or local, state and federal policymaking institutions.

Student learning outcomes
1. Complete an original research study: dissertation component – Students will design, implement, analyze and defend an original research study. Once a student passes the prospectus hearing, he or she will collect and analyze the data and finish writing the last two chapters of their dissertation. Students have a committee of a minimum of four faculty members. Typically, this consists of a chair, a methodologist, a subject-matter expert and an expert outside of the School of Education. Each committee member independently reviews the student’s work. Once the dissertation defense has occurred, the committee discusses their thoughts on the quality of the student work. Once members agree, and other requirements are met, the student is granted a Ph.D.

2. Apply skills in external setting: externship component – Students will demonstrate their knowledge and skills in a professional placement in a school, agency or corporate setting. The faculty adviser and the externship site supervisor work together to evaluate the student.

3. Develop research knowledge and skills: research component – Students will acquire the prerequisite skills essential to designing, conducting and interpreting qualitative and quantitative design research. Students will demonstrate this knowledge and skill set on a qualifying examination, which is independently evaluated by at least two faculty members. To address inter-rater reliability, if the two faculty members disagree on the student’s level of knowledge, a third faculty member is called in to evaluate the student’s responses on the qualifying examination. This exam is also graded “blindly,” meaning that the evaluator does not know which student he or she is evaluating.

4. Develop in-depth knowledge in one area of study: concentration component – Students will demonstrate in-depth knowledge and skills in an area of study that is congruent with their current or projected career goals. Content will differ according to chosen concentration.
VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following represent the minimum requirements for admission:

1. Master’s degree in an appropriate discipline
2. Three letters of recommendation addressing the student’s potential for graduate study in education
3. Student’s written statement concerning career interests
4. Transcripts of all previous college work
5. A personal interview and writing sample (may be requested)
6. Professional vitae/resume
7. Satisfactory scores on the GRE

Please see doctoral admissions information on the School of Education website for details.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 48-54 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in three courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Externship requirement: Students must complete an approved externship.
4. Examination requirements: Students must pass both a qualifying examination early in the program and a comprehensive examination near the end of the program.
5. Dissertation requirements: Students must complete and defend a research dissertation.

Educational Leadership, Certificate in (Post-master’s certificate)

Program goal
The post-master’s certificate is a 21-hour program for individuals who have obtained a master’s degree from a regionally accredited college or university; the degree must be in the field of education or in one that meets the requirements to be employed in a position requiring licensure in Virginia. Applicants must have an active renewable educator license and have at least two years of experience in an instructional personnel position that requires licensure in Virginia.

Please visit the Department of Educational Leadership's website for additional information about program and application requirements.

Student learning outcomes
1. Candidates demonstrate content knowledge: Candidates demonstrate content knowledge in educational leadership as evidenced by the School Leaders Licensure Assessment and the school law case study.
2. Design, align, evaluate curriculum, guide learning: Candidates demonstrate the ability to develop a supervisory plan for classroom-based learning as evidenced by the clinical supervision model.
3. Internship/clinical practice: Candidates demonstrate effective applications in internship/clinical practice as evidenced by the on-site supervisor evaluation.
4. Assess application of content: Candidates demonstrate application of content as evidenced by the action research project.
5. Assess management and community relations: Candidates demonstrate organizational management and community relations skills as evidenced by the educational intervention plan.

Educational Leadership, Master of Education (M.Ed.) with a concentration in administration and supervision

Program goal

The administration and supervision concentration of the M.Ed. in Educational Leadership is a 33-credit-hour program that prepares individuals to fill positions as reflective leaders for schools. Applicants must possess an active renewable educator license and are expected to have at least two years of experience in a school setting in an instructional personnel position that requires licensure in Virginia. An end-of-program assessment is required. Individuals must meet technology standards approved by the Virginia Board of Education, and they must supply proof of child abuse and neglect recognition training. Individuals who successfully complete the program are eligible for endorsement as an administrator/supervisor K-12.

Please visit the Department of Educational Leadership's website for additional information about program and application requirements.

Student learning outcomes

1. Content knowledge: Candidates demonstrate content knowledge in educational leadership as evidenced by the School Leaders Licensure Assessment and the school law case study.
2. Develop supervisory plan for learning: Candidates demonstrate the ability to develop a supervisory plan for classroom-based learning as evidenced by the clinical supervision model.
3. Internship/clinical practice: Candidates demonstrate effective applications in internship/clinical practice as evidenced by the on-site supervisor evaluation.
4. Assess ability to support student learning and development: 
Candidates demonstrate ability to support student learning and 
development as evidenced by the leadership to support student 
learning assessment.

5. Assess application of content: Candidates demonstrate application 
of content as evidenced by the action research project.

6. Assess management and community relations: Candidates 
demonstrate organizational management and community relations 
skills as evidenced by the educational intervention plan.

VCU Graduate Bulletin, VCU Graduate School 
and general academic policies and regulations 
for all graduate students in all graduate 
programs

The VCU Graduate Bulletin website documents the official admission and 
academic rules and regulations that govern graduate education for all 
graduate programs at the university. These policies are established by the 
graduate faculty of the university through their elected representatives to 
the University Graduate Council.

It is the responsibility of all graduate students, both on- and off- 
campus, to be familiar with the VCU Graduate Bulletin as well as the 
Graduate School website (http://www.vcu.edu) and academic 
regulations in individual school and department publications and 
on program websites. However, in all cases, the official policies and 
procedures of the University Graduate Council, as published on the VCU 
Graduate Bulletin and Graduate School websites, take precedence over 
individual program policies and guidelines.

Visit the academic regulations section for additional information on

Degree requirements

In addition to general VCU Graduate School graduation requirements 
(p. 31), students are required to complete course work in core and 
elective courses.

1. Credit hour requirements: Students are required to complete a 
   minimum of 33 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses 
   constitutes automatic dismissal from the program. Courses with a 
   grade below C cannot be used to satisfy degree requirements.
3. Internship requirement: Students in the administration and 
   supervision concentration must complete an internship sequence.
4. Testing requirements: Individuals must take the School Leaders 
   Licensure Assessment or any other assessment required by the 
   Virginia Board of Education for endorsement as a school principal/ 
   supervisor K-12.
5. For endorsement, individuals must meet the technology standards 
   approved by the Virginia Board of Education, and they must supply 
   proof of child abuse and neglect recognition training.

**Assessment**

Individuals must take the SLLA or any other assessment required by the Virginia Board of Education for endorsement as a school principal/supervisor K-12. (no credit)

| Total Hours | 33 |

ADMS 670 must be taken in the first semester of enrollment in the program.

ADMS 671 is taken in the next-to-last semester of enrollment in the program.

ADMS 675 is taken in the last semester of enrollment in the program.

The minimum total of graduate credit hours required for this degree is 33.

**Program website:** [soe.vcu.edu/academics/masters-programs/medi-educational-leadership](https://soe.vcu.edu/academics/masters-programs/medi-educational-leadership/)

**Educational Leadership, Master of Education (M.Ed.) with a concentration in leadership studies**

**Program goal**

The leadership studies concentration of the M.Ed. in Educational Leadership is a 30-credit-hour program for individuals who hold or expect to hold leadership positions in educational organizations but who do not wish to obtain the administration/supervision endorsement from the Virginia Department of Education. Applicants are expected to have at least two years of experience in an educational setting. The program includes 15 hours of credit in required courses and 15 hours in a concentrated series of electives chosen with approval of the student’s adviser.

**Student learning outcomes**

1. Content knowledge: Candidates demonstrate content knowledge in educational leadership as evidenced by case study analyses.
2. Develop supervisory plan for learning: Candidates demonstrate the ability to develop a supervisory plan for classroom-based learning as evidenced by the clinical supervision model.
3. Assess ability to support student learning and development: Candidates demonstrate ability to support student learning and development as evidenced by the leadership to support student learning assessment.
4. Assess application of content: Candidates demonstrate application of content as evidenced by the action research project.
5. Assess management and community relations: Candidates demonstrate organizational management and community relations skills as evidenced by the educational intervention plan.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website ([http://www.grad.vcu.edu/](http://www.grad.vcu.edu/)) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)
Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Admission requirements

Degree: Semester(s) of entry: Deadline dates: Test requirements:
M.Ed. Fall May 1 GRE or MAT

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor’s degree in an appropriate discipline
2. Three letters of recommendation addressing the student’s potential for graduate study in education
3. Applicant’s written statement concerning leadership
4. Transcripts of all previous college work
5. Satisfactory scores on the GRE or MAT
6. At least two years of experience in an educational setting

Please visit the Department of Educational Leadership’s auto-advising webpage for program-specific application requirements.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 30 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.

Electives

Any planned, concentrated series of courses from ADLT, ADMS, EDUS, PADM, SEDP and TEDU designed by student or student group and adviser to meet the needs of student or student group 15

Total Hours 30

The minimum total of graduate credit hours required for this degree is 30.

Student learning outcomes

1. Confident and clear communication and presentation skills through formal benchmark presentations
2. Understanding and application of effective leadership, team-building and learning behaviors through team projects
3. Appropriate data-gathering, management and analysis techniques through program evaluation and capstone projects
4. Making of decisions and recommendations based upon data analysis and scholarly research through formal benchmark presentations and capstone projects
5. Scholarly writing skills through technical report writing

Program website: soe.vcu.edu/academics/masters-programs/med-educational-leadership (https://soe.vcu.edu/academics/masters-programs/med-educational-leadership/)

Leadership, Doctor of Education (Ed.D.)

Program goal

The purpose of the Ed.D. in Leadership program is to engage leaders in a variety of learning organizations with practitioner-oriented knowledge and skills, authentic leadership and research experiences, and opportunities for reflection that will enable them to succeed in a variety of organizational leadership positions. Three analytic lenses (equity, accountability and learning theory) guide course work and enable students from diverse backgrounds to consider learning through common perspectives.

Students will examine cases centered on enduring questions in learning and leadership. Questions will be explored through contrasting evidence from a variety of perspectives and contexts.

Program features

The Ed.D. in Leadership is a 48-credit hour, 36-month program. Based upon principles of adult learning, the program has the following features:

1. Competitive admissions
2. Midcareer entry
3. Practitioner-oriented
4. Learning-community based
5. Problem-oriented andragogy and curriculum
6. Two learning communities: general leadership (appropriate for leaders of schools and districts, nonprofits and other learning enterprises) and higher education leadership. Both learning communities are offered in face-to-face and online delivery modalities, depending on the number of admissions each year. Face-to-face learning communities typically meet one evening each week and five Saturdays each semester. Online learning communities meet online with the exception of an initial two-day face-to-face orientation and one face-to-face course each summer (five full Saturdays).
7. Program culminates in a three-semester applied group dissertation (the capstone)

Student learning outcomes

1. Confident and clear communication and presentation skills through formal benchmark presentations
2. Understanding and application of effective leadership, team-building and learning behaviors through team projects
3. Appropriate data-gathering, management and analysis techniques through program evaluation and capstone projects
4. Making of decisions and recommendations based upon data analysis and scholarly research through formal benchmark presentations and capstone projects
5. Scholarly writing skills through technical report writing
6. Academic achievement necessary to be considered for doctoral candidate status, as required by the university by meeting candidacy requirements.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. Master’s degree in an appropriate discipline
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Student’s written statement concerning career interests and philosophy of leading for equity, accountability and learning environments
4. Transcripts of all previous college work
5. Professional vita or resume that addresses colleges or universities attended, educational degrees held, including major/minor, work history in chronological order, beginning with current position, leadership experiences, professional involvement, and awards and honors
6. Evidence of at least three years of successful leadership experience including evidence of leadership accomplishment for each of three areas:
   a. leadership for learning
   b. leadership for equity
   c. leadership for accountability
   (Applicants submit artifacts of evidence in the three areas through a website they develop.)
7. At least a 50th percentile score on the Miller Analogies Test

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 48 credit hours.
2. Grade requirements: Receipt of a grade of C or below in three courses constitutes automatic dismissal from the program: Courses with a grade below C cannot be used to satisfy degree requirements.
3. Capstone requirements: Students must complete and defend a team-based capstone research project.

Department of Foundations of Education
Maike Philipsen, Ph.D.
Professor and interim chair

The Department of Foundations of Education is committed to preparing educators and scholars for critical, reflective and responsible work in education, enhancing the knowledge base in the varied disciplines through research and scholarship, and engaging in service to the broader community.

To fulfill this mission, the department offers multidisciplinary perspectives that are the pillars for School of Education programs, based on the contention that the preparation of effective educational practitioners and scholars requires deep understanding of the broader perspectives that are represented by research and theory in psychological, cultural, philosophical, historical and ethical areas of inquiry. Learn more by visiting the Foundations of Education webpage (http://www.soe.vcu.edu/departmentpages/foundations-of-education/).

- Education, Doctor of Philosophy (Ph.D.) with a concentration in educational psychology (p. 522)
- Education, Doctor of Philosophy (Ph.D.) with a concentration in research, assessment and evaluation (p. 524)

Education, Doctor of Philosophy (Ph.D.) with a concentration in educational psychology

Program goal
The educational psychology concentration is designed to train research-oriented doctoral students who want to promote the success of students in educational environments. Doctoral students will integrate theory and research in the areas of developmental psychology, cognition, social psychology and motivation, assessment, and diversity to better study learning in schools or school-like settings.

Student learning outcomes
1. Complete an original research study (dissertation component): Student will design, implement, analyze and defend an original research study. Once a student passes the prospectus hearing, he or she will collect and analyze the data and finish writing the last two chapters of their dissertation. Students have a committee of a minimum of four faculty members. Typically, this consists of a chair, a methodologist, a subject-matter expert and an expert outside of the School of Education. Each committee member independently reviews the student's work. Once the dissertation defense has occurred, the committee discusses their thoughts on the quality of the student work. Once all members agree, the student is granted a Ph.D.; therefore, inter-rater reliability is extremely high.

2. Apply skills in external setting (externship component): Students will demonstrate their knowledge and skills in a professional placement in a school, agency or corporate setting. The faculty adviser and the externship site supervisor work together to evaluate the student.

3. Develop research knowledge and skills (research component): Students will acquire the prerequisite skills essential to designing, conducting and interpreting qualitative, quantitative and mixed methods design research. Students will demonstrate this knowledge and skill set on a qualifying examination, which is independently evaluated by at least two faculty members. To address inter-rater reliability, if the two faculty members disagree on the student's level of knowledge, a third faculty member is called in to evaluate the student's responses on the qualifying examination. This exam is also graded "blindly," meaning that the evaluator does not know which student he or she is evaluating.

4. Develop in-depth knowledge in one area of study (concentration component): Students will demonstrate in-depth knowledge and skills in an area of study that is congruent with their current or projected career goals. Content will differ according to chosen concentration.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.
It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduates.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following represent the minimum requirements for admission:

1. Baccalaureate or master’s degree in psychology, educational psychology or related discipline
2. Three letters of recommendation addressing the student’s potential for graduate study in education
3. Student’s written statement concerning career interests
4. Transcripts of all previous college work
5. A personal interview and writing sample (may be requested)
6. Professional vitae/resume
7. Satisfactory scores on the GRE

Please see doctoral admissions information on the School of Education website for details.

Degree requirements
In addition to the VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 48-54 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in three courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Externship requirement: Students must complete an approved externship.
4. Examination requirements: Students must pass both a qualifying examination early in the program and a comprehensive examination near the end of the program.
5. Dissertation requirements: Students must complete and defend a research dissertation.

Curriculum requirements
Students admitted with only a baccalaureate degree are required to take an additional 15 credits of 600 level didactic courses in EDUS, PSYC, SEDP, TEDU or another subject, selected in consultation with an adviser.

**Adult Learning, Master of Education (M.Ed.) with a concentration in adult literacy**

**Program goal**

The Master of Education in Adult Learning is a 33-credit hour program of study that prepares individuals for a broad range of positions related to the education of adult learners. Students choose one of three elective concentrations in adult literacy, human resource development, or teaching and learning with technology. Graduates are found in major corporations, higher education, health care organizations, state and federal agencies, nonprofit and community-based organizations and human services agencies. Admission to the program is predicated on the “whole person” concept, taking into account life experience, academic record, references and the reasons for the student’s interest in the program. An interview with the program adviser is recommended prior to admission. Successful applicants will have sufficient prior work experience with adults as learners to enable them to bring relevant work experience into the classroom learning environment.

The program provides a foundation in educational research methods and a strong core of seven courses in the theory and practice of adult learning, including emphasis in development of facilitation skills, as well as the design and delivery of adult learning programs. Upon completion of the foundation and core courses, students choose one of three concentration areas: adult literacy, human resource development (learning in the workplace), or teaching and learning with technology. The last course in the program, a capstone seminar in action learning, reunites students from all three concentrations for a comprehensive synthesis experience as they work in action learning teams to solve a real problem of strategic importance to an organization in the community.

A unique feature of the program is the learning portfolio, maintained in an online journal (blog) format. The learning portfolio, in combination with the capstone seminar, replaces a comprehensive examination requirement. For the portfolio, students write reflective blog entries during each of the core and concentration courses. During the program, selected assignments are posted to the blog to document personal growth and learning over time. At the end of the program, students create a synthesis of their learning in an essay format or through creation of a digital story. The portfolio serves as a demonstration of the graduate’s abilities to a prospective employer and can be added to a student’s resume. Throughout, the program utilizes students’ experiences in working with adults as learners to unite theory with practice and emphasizes 21st-century technologies for teaching and learning.

**Student learning outcomes**

1. Demonstrate the ability to articulate a personal philosophy of adult learning practice that enables students to work effectively as leaders and facilitators to improve adult learning, as evidenced on the final program learning assessment
2. Demonstrate the ability to integrate knowledge of all facets of adult learning to have a significant impact on the practices, culture and learning environments of the organizations in which students work
3. Demonstrate knowledge of the nature, function and scope of adult learning during the capstone experience of the program
4. Demonstrate awareness of the processes of adult learning and development during the capstone experience
5. Acknowledge the influence of technology in adult learning, as evidenced in the final program learning assessment
6. Demonstrate awareness of educational research in the adult learning field, as evidenced on the research on instructional strategy and organizational change strategy analysis rubrics

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

Curriculum and Instruction, Master of Education (M.Ed.) with a concentration in instructional technology

Program goal
The Master of Education in Curriculum and Instruction program is designed to provide professional and cognate experiences for experienced educators seeking to develop additional skills in the use of technology in support of teaching and learning.

Student learning outcomes
1. Demonstrate an understanding of research designs and an ability to read research studies critically
2. Demonstrate an understanding of the historical, philosophical, sociological and ethical foundations of education and the impact that these have on public education
3. Demonstrate an understanding of the use of technology in support of student learning and the instructional process

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:
1. Three letters of recommendation addressing the student's potential for graduate study in education
2. Student's written statement concerning career interests
3. Transcripts of all previous college work
4. Satisfactory scores on the GRE or MAT

Degree requirements
In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.
1. Credit hour requirements: Students are required to complete a minimum of 33 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.

Curriculum requirements
Course Title Hours
EDUS 660 Research Methods in Education 3
EDUS 673 Democracy, Equity and Ethics in Education 3
Select one of the following: 3
EDUS/PSYC 607 Advanced Educational Psychology for Elementary Teachers
Curriculum and Instruction, Master of Education (M.Ed.) with a concentration in online teaching

Student learning outcomes
1. Demonstrate effective electronic communication methods for instruction in the K-12 environment
2. Reflect on current research and standards for online/blended course design/facilitation and articulate a personal philosophy of practice in these areas
3. Demonstrate effective virtual systematic instructional design though the development of a virtual learning environment
4. Demonstrate effective facilitation of virtual instruction including employment of techniques to encourage discussion, development of policies and procedures for digital communications and online conflict moderation, and use of effective virtual tools to improve learning
5. Demonstrate knowledge of effective strategies for assessment and evaluation in online environments through the development of rubrics and alternative assessment tools
6. Demonstrate knowledge of the TPACK framework in designing instruction with appropriate virtual tools
7. Demonstrate knowledge of online time and course management through the development of policies and procedures to assist online learners with these issues, and the development of appropriate materials that reflect effective time and course management by the course facilitator

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.
Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

**Admission requirements**

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. Three letters of recommendation addressing the student's potential for graduate study in education
2. Student's written statement concerning career interests
3. Transcripts of all previous college work
4. Satisfactory scores on the GRE or MAT

**Degree requirements**

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.

**Curriculum and Instruction, Master of Education (M.Ed.) with a concentration in teaching and learning**

**Program goal**

The Master of Education in Curriculum and Instruction program is designed to provide professional and cognate experiences for students who have been admitted to the Master of Teaching program but choose not to complete licensure. Enrollment in the teaching and learning concentration requires recommendation from the student's adviser and approval by the department chair. Content courses within the program are selected in consultation with an adviser.

**Student learning outcomes**

1. Demonstrate an understanding of research designs and an ability to read research studies critically
2. Demonstrate an understanding of the historical, philosophical, sociological and ethical foundations of education and the impact that these have on public education
3. Demonstrate an understanding of the use of technology in support of student learning and the instructional process.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website ([http://www.graduate.vcu.edu/](http://www.graduate.vcu.edu/)) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

**Admission requirements**

This concentration is intended for students who initially pursue a licensure program, but for whom that is no longer appropriate. Admission is by special action approved by the dean. Students may not apply directly to this concentration.

**Degree requirements**

In addition to the VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.

**Education, Doctor of Philosophy (Ph.D.) with a concentration in curriculum, culture and change**

**Program goal**

The curriculum, culture and change concentration offers a rigorous doctoral-level learning experience in curriculum and instruction with...
Student learning outcomes

1. Develop research knowledge and skills (research component): Students will acquire the prerequisite skills essential to designing, conducting and interpreting qualitative and quantitative design research. Students will demonstrate this knowledge and skill set on a qualifying examination, which is independently evaluated by at least two faculty members. To address inter-rater reliability, if the two faculty members disagree on the student’s level of knowledge, a third faculty member is called in to evaluate the student’s responses on the qualifying examination.

2. Develop in-depth knowledge in one area of study (concentration component): Students will demonstrate in-depth knowledge and skills in an area of study that is congruent with their current or projected career goals. Content will differ according to chosen concentration.

3. Apply skills in external setting (externship component): Students will demonstrate their knowledge and skills in a professional placement in a school, agency or corporate setting. The faculty adviser and the externship site supervisor work together to evaluate the student.

4. Complete an original research study (dissertation component): Students will design, implement, analyze and defend an original research study. Once a student passes the prospectus hearing, he or she will collect and analyze the data and finish writing the last two chapters of their dissertation. Students have a committee of a minimum of four faculty members. Typically, this consists of a chair, a methodologist, a subject-matter expert and an expert outside of the School of Education. Each committee member independently reviews the student’s work. Once the dissertation defense has occurred, the committee discusses their thoughts on the quality of the student work. Once members agree, the student is granted a Ph.D.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.grad.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

**Admission requirements**

**Degree:** Ph.D.  
**Semester(s) of entry:** Summer or fall  
**Deadline dates:** Jan 15  
**Test requirements:** GRE

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following represent the minimum requirements for admission:

1. Master’s degree in curriculum and instruction, teaching and learning, educational philosophy or related discipline  
2. Three letters of recommendation addressing the student’s potential for graduate study in education  
3. Student’s written statement concerning career interests and goals  
4. Transcripts of all previous college work  
5. A personal interview and writing sample (may be requested)  
6. Professional vitae/resume  
7. Satisfactory scores on the GRE

Please see doctoral admissions information on the School of Education website for details.

**Degree requirements**

In addition to the VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 48-54 credit hours depending on concentration.  
2. Grade requirements: Receipt of a grade of C or below in three courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.  
3. Externship requirement: Students must complete an approved externship.  
4. Examination requirements: Students must pass both a qualifying examination early in the program and a comprehensive examination near the end of the program.  
5. Dissertation requirements: Students must complete and defend a research dissertation.

**Education, Doctor of Philosophy (Ph.D.) with a concentration in urban services leadership**

**Program goal**

The urban services leadership concentration is designed to prepare future researchers, faculty and practitioners for leadership roles in academic, government (local, state, national and international) and community based for-profit and non-profit organizations. Doctoral students will utilize a multidisciplinary approach to develop a broad understanding of the critical issues and challenges in adult learning and subsequently apply that understanding to the planning, implementation and evaluation of adult learning and educational programs and initiatives.

Applicants are expected to have experience working with adult learners in organizational, community, government, higher education, health care or nonprofit settings, or within the community in roles as faculty, faculty developers, trainers, human resource development and organizational development professionals, adult literacy educators, or other roles in which they are actively involved in the teaching and training of adult learners.

**Student learning outcomes**

1. Apply skills in external setting (externship component): Students will demonstrate their knowledge and skills in a professional placement...
in a school, agency or corporate setting. The faculty adviser and the externship site supervisor work together to evaluate the student.

2. Develop research knowledge and skills (research component): Students will acquire the prerequisite skills essential to designing, conducting and interpreting qualitative and quantitative design research. Students will demonstrate this knowledge and skill set on a qualifying examination, which is independently evaluated by at least two faculty members. To address inter-rater reliability, if the two faculty members disagree on the student’s level of knowledge, a third faculty member is called in to evaluate the student’s responses on the qualifying examination.

3. Develop in-depth knowledge in one area of study (concentration component): Students will demonstrate in-depth knowledge and skills in an area of study that is congruent with their current or projected career goals. Content will differ according to chosen concentration.

4. Complete an original research study (dissertation component): Students will design, implement, analyze and defend an original research study. Once a student passes the prospectus hearing, he or she will collect and analyze the data and finish writing the last two chapters of their dissertation. Students have a committee of a minimum of four faculty members. Typically, this consists of a chair, a methodologist, a subject-matter expert and an expert outside of the School of Education. Each committee member independently reviews the student’s work. Once the dissertation defense has occurred, the committee discusses their thoughts on the quality of the student work. Once members agree, the student is granted a Ph.D.

---

**Instructional Technology, Certificate in (Post-baccalaureate graduate certificate)**

**Program goal**

The post-baccalaureate Certificate in Instructional Technology prepares educators to use technology effectively in their schools and to provide instructional leadership and technical support to other educators who use computer technology. Designed for teachers, resource persons and administrators at all grade levels (K-12), the sequence in instructional technology offers a unique opportunity to develop comprehensive knowledge and experience in the educational applications of computers and related technologies. The primary purpose of this certificate program is to meet the growing need for highly qualified core curriculum teachers, instructional technology support teachers and associated administrative personnel. The program requires six three-credit-hour courses. In addition, prerequisites for the program require that students must be licensed K-12 teachers or administrators with a minimum of two years of classroom experience who have a basic knowledge of instructional media. The program is committed to providing access to technology so that hands-on experience is offered in every class and participants produce instructional material that can be immediately integrated into the classroom.

**Student learning outcomes**

1. Demonstrate the necessary knowledge and skills to facilitate effective learning experiences using technology
2. Demonstrate their skills in visual arts
3. Demonstrate successful searching techniques
4. Produce and edit video for education
5. Set up online instructional modules incorporating various communication and digital activities for students
6. Present at a conference and be able to prepare a professional development class in technology

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduated.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)
Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Applicants must meet all general admission requirements of the VCU Graduate School (p. 35).

Degree requirements
In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 18 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.

Medical Education, Certificate in (Post-baccalaureate graduate certificate)

Program goal
The post-baccalaureate graduate Certificate in Medical Education is a 12-credit-hour program designed for faculty in the School of Medicine at Virginia Commonwealth University to enhance depth and breadth of faculty expertise in curriculum design and adult learning strategies for teaching, as well as to foster development of a cadre of academic leaders who can model best practices in teaching undergraduate, clinical and graduate programs.

Student learning outcomes
1. Demonstrate the ability to articulate a personal philosophy of practice that enables them to facilitate adult learning in medical education and engage in critically reflective practice as an educator
2. Demonstrate the ability to integrate knowledge of adult learning for teaching in medical education to function as educational leaders who model best practices and serve as role models for trainees
3. Demonstrate knowledge of assessment and evaluation strategies that align with goals and objectives and instructional strategies within a curriculum
4. Adopt one or more instructional methods for actively engaging learners in a discovery or inquiry process that incorporates small-group or team-based learning strategies
5. Demonstrate familiarity with a variety of digital media technologies appropriate for use in preclinical and clinical teaching situations
6. Become familiar with the scholarship of teaching and learning by developing a research agenda for inquiry into student and trainee learning to advance the practice of teaching in medicine by making research findings public
VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor’s degree in an appropriate discipline
2. Three letters of recommendation addressing the student’s potential for graduate study in education
3. Student’s written statement concerning career interests
4. Transcripts of all previous college work

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 12 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.

Online Teaching for K-12 Educators, Certificate in (Post-baccalaureate graduate certificate)

Program goals

The post-baccalaureate graduate Certificate in Online Teaching for K-12 Educators is a 17-credit-hour certificate designed to prepare candidates to develop and facilitate effective online instruction in K-12 environments. The goals for the certificate are:

1. Expand on participants’ current teaching expertise in instructional strategies, curriculum design, and assessment and evaluation to adapt to fully online and hybrid teaching environments
2. Foster the development of instructional leaders who can model and articulate best practices in online teaching within K-12 environments

Student learning outcomes

1. Demonstrate effective electronic communication methods for instruction in the K-12 environment
2. Reflect on current research and standards for online/blended course design/facilitation and articulate a personal philosophy of practice in these areas
3. Demonstrate effective virtual systematic instructional design through the development of a virtual learning environment
4. Demonstrate effective facilitation of virtual instruction, including employment of techniques to encourage discussion, development of policies and procedures for digital communications and online conflict moderation, and use of effective virtual tools to improve learning
5. Demonstrate knowledge of effective strategies for assessment and evaluations in online environments through the development of rubrics and alternative assessment tools
6. Demonstrate knowledge of TPACK framework in designing instruction with appropriate virtual tools
7. Demonstrate knowledge of online time and course management through the development of policies and procedures to assist online learners with these issues and the development of appropriate materials that reflect effective time and course management by the course facilitator

Graduate School website

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Reading Specialist, Certificate in (Post-master’s certificate)

Program goal
The certificate program is designed for students who wish to gain state licensure as a reading specialist in kindergarten through high school settings. Applicants are required to have at least three years of teaching experience in a reading-related field setting if they want to be recommended to the Department of Education for endorsement as a reading specialist in Virginia.

All requirements for admission to graduate school apply to applicants for the Post-master’s Certificate in Reading Specialist. All state department requirements for reading specialist (specifically the 12 hours of graduate or undergraduate work in selected areas) must be met.

Students are required to earn a minimum of 24 graduate hours beyond their current master’s degree, including the required reading courses, an approved reading selective and an elective in the School of Education that has been approved by the adviser. Advisers will recommend selective courses based upon student experience and goals. During the last semester of course work, students must complete a reading portfolio documenting their work in the program and related work experiences. Candidates must receive a passing score on the Reading for Virginia Educators Assessment as a graduation requirement.

Persons completing the program are expected to demonstrate:

1. An understanding of the reading language learning process
2. The ability to critique, adapt and model use of a variety of reading instructional strategies, methods and programs
3. Expertise in developing and providing for continuous assessment of an individual and groups
4. Ability to implement schoolwide developmental, creative and intervention reading/language arts programs
5. Ability to understand and apply theory to practice within a variety of cultural contexts

Student learning outcomes

1. Demonstrate content knowledge in reading education: Candidates demonstrate content knowledge in reading education as evidenced by the Reading for Virginia Educators: Reading Specialist Assessment scores and the philosophy of literacy paper.
2. Effectively plan instruction: Candidates demonstrate that they can effectively plan reading and literacy instruction, or fulfill other professional responsibilities in reading education as evidenced by the organizing and implementing reading programs assessment.
3. Effectively apply knowledge, skills and dispositions: Candidates demonstrate knowledge, skills and dispositions are applied effectively in practice as evidenced by the internship evaluation.
4. Demonstrate effect on student learning: Candidates demonstrate effects on student learning and provision of supportive learning environments for student learning as evidenced by the internship progress report.
5. Demonstrate ILA standards proficiency: Candidates further demonstrate proficiency on ILA competencies as evidenced by the portfolio assessment and the externship action research report and presentation assessment.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

**Program website:** soe.vcu.edu/academics/post-masters-certificates/ reading-specialist (https://soe.vcu.edu/academics/post-masters-certificates/reading-specialist/)

**Reading, Master of Education (M.Ed.)**

**Program goal**

The Master of Education in Reading program is designed to provide experienced teachers who are prospective reading specialists with a program of sequential and integrated experiences in areas of the reading curriculum ranging from preschool to adult levels. Students will gain an understanding of the developmental and diagnostic processes involved in teaching reading and the language arts and will become familiar with the resource and supervisory functions that are part of the specialist role. Prior to graduation, students must complete a reading portfolio documenting their work in the program and related work experiences, and they must pass the Reading for Virginia Educators Assessment. The M.Ed. in Reading is an approved program (K-12) for students who meet Virginia State Department of Education requirements. The reading specialist endorsement also requires completion of three years of teaching in a reading-related field.

**Student learning outcomes**

1. Demonstrate content knowledge in reading education: Candidates demonstrate content knowledge in reading education as evidenced by the Reading for Virginia Educators: Reading Specialist Assessment scores and philosophy of literacy paper.
2. Effectively plan instruction: Candidates demonstrate that they can effectively plan reading and literacy instruction or fulfill other professional responsibilities in reading education as evidenced by the organizing and implementing reading programs assessment.
3. Effectively apply knowledge, skills and dispositions: Candidates demonstrate knowledge, skills and dispositions are applied effectively in practice as evidenced by the internship evaluation.
4. Demonstrate effect on student learning: Candidates demonstrate effects on student learning and provision of supportive learning environments for student learning as evidenced by the internship progress report.
5. Demonstrate ILA standards proficiency: Candidates further demonstrate proficiency on ILA competencies as evidenced by the portfolio assessment and the externship action research report and presentation assessment.

### Reading, Master of Education (M.Ed.) with a concentration in K-12 reading specialist

#### Program goal

The K-12 reading specialist concentration in the Master of Education in Reading program is designed to provide experienced teachers who are prospective reading specialists with a program of sequential and integrated experiences in areas of the reading curriculum ranging from preschool to adult levels. Students will gain an understanding of the developmental and diagnostic processes involved in teaching reading and the language arts and will become familiar with the resource and supervisory functions that are part of the specialist role. Prior to graduation, students must complete a reading portfolio documenting their work in the program and related work experiences and pass the Reading for Virginia Educators Assessment. The M.Ed. in Reading is an approved program (K-12) for students who meet Virginia State Department of Education requirements. The reading specialist endorsement also requires completion of three years of teaching in a reading-related field.

A cooperative agreement has been established with Virginia State University to permit selected, qualified students to complete the M.Ed. in Reading program. Up to 12 credit hours from an approved list may be transferred from the cooperating institution. Interested students should contact the Department of Teaching and Learning.

#### Student learning outcomes

1. Demonstrate content knowledge in reading education: Candidates demonstrate content knowledge in reading education as evidenced by the Reading for Virginia Educators: Reading Specialist Assessment scores and philosophy of literacy paper.
2. Effectively plan instruction: Candidates demonstrate that they can effectively plan reading and literacy instruction or fulfill other professional responsibilities in reading education as evidenced by the organizing and implementing reading programs assessment.
3. Effectively apply knowledge, skills and dispositions: Candidates demonstrate knowledge, skills and dispositions are applied effectively in practice as evidenced by the internship evaluation.
4. Demonstrate effect on student learning: Candidates demonstrate effects on student learning and provision of supportive learning environments for student learning as evidenced by the internship progress report.
5. Demonstrate ILA standards proficiency: Candidates further demonstrate proficiency on ILA competencies as evidenced by the
portfolio assessment and the externship action research report and presentation assessment.

**Reading, Master of Education (M.Ed.) with a concentration in K-12 reading specialist**

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor's degree in an appropriate discipline
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Student's written statement concerning career interests
4. Transcripts of all previous college work
5. Satisfactory scores on the GRE or MAT

**Degree requirements**

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Testing requirements: Students in the K-12 reading specialist concentration must present passing scores on state mandated licensure/endorsement assessments.

**Reading, Master of Education (M.Ed.) with a concentration in reading with TESOL/adult**

**Program goal**

Students who are interested in teaching English as a second language to adults may develop their knowledge and skills in the adult concentration of the TESOL track in the M.Ed. in Reading. Those who are interested in pursuing an endorsement in teaching English as a second language in the adult setting must already have their K-12 initial licensure and adult education endorsement. The following are prerequisites to the concentration: LING 390/ENGL 390/ANTH 390 and six credit hours of foreign language. Students who pursue this concentration will not be endorsed as a K-12 reading specialist.

**Student learning outcomes**

1. Demonstrate foundational knowledge needed to support ELLs literacy learning
2. Effectively plan lessons that attend to linguistic proficiency of learners in various settings
3. Create assessments that assess ELL competency in communication and content learning
4. Demonstrate a disposition of tolerance and appreciation for linguistic and cultural diversity

Teaching English to Speakers of Other Languages, Certificate in (Post-baccalaureate graduate certificate)

Program goal
This program is designed to prepare professionals to work with K-12 students for whom English is not their native language. The course sequence meets the Virginia Department of Education requirements for endorsement in ESL. Note that endorsement requires that individuals have an active teaching license in Virginia.

Student learning outcomes
1. Demonstrate foundational knowledge needed to support ESL students’ literacy learning
2. Effectively plan lessons that attend to linguistic proficiency of learners in various settings
3. Create assessments that assess ESL student competency in communication and content learning
4. Demonstrate a disposition of tolerance and appreciation for linguistic and cultural diversity
5. Demonstrate a range of teaching strategies and approaches that lead to ESL student learning

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

</tbody>
</table>

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor’s degree in an appropriate discipline including education, social work, psychology or human services
2. Three letters of recommendation addressing the student’s potential for graduate study in education
3. Student’s written statement concerning career interests
4. Transcripts of all previous college work
Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 18 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Prerequisite or corequisite requirements: Students must have taken a class in linguistics and six hours of a modern foreign language.

Curriculum requirements

As prerequisites or corequisites to the certificate program, students must have taken three credit hours of a modern foreign language, which may have been taken at the undergraduate or graduate level. The certificate program consists of 18 credit hours of graduate course work as follows:

<table>
<thead>
<tr>

Program website: soe.vcu.edu/academics/certificates/tesol (https://soe.vcu.edu/academics/certificates/tesol/)

Teaching, Certificate in (Post-baccalaureate graduate certificate) with a concentration in biology education

Program goal

The post-baccalaureate Certificate in Teaching program is designed for students who have earned bachelor’s degrees in fields other than education, who wish to become teachers in secondary schools in one or more subjects and for whom a master’s degree is not a priority (applicants already may have earned a master’s degree or wish to earn a master’s degree in a specialized area of education later). Applicants must have a major or its equivalent in the subject they wish to teach.

Students are required to complete a minimum of 24 hours beyond the bachelor’s level, including the courses listed below. Equivalent courses taken within the past five years may transfer; however, a minimum of 27 credit hours, including clinical experiences, must be taken at VCU after admission to the program.

Student learning outcomes

Persons completing the program are expected, among other attributes, to:

1. Understand human development and learning theory appropriate to the age group they will teach
2. Demonstrate knowledge of the subjects they will teach
3. Develop an understanding of purposes for education and a defensible philosophical approach toward teaching
4. Acquire awareness of the diversity of the school-age population in cultural background and styles of learning
5. Demonstrate an ability to plan and implement effective teaching
6. Measure student learning in ways that lead to sustained development and learning

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduated.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.
Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Special requirements
- Admission to clinical experiences in schools requires a background check and fingerprinting.

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor's degree with a major, or equivalent, in biology
2. Three letters of recommendation addressing the student’s potential for graduate study in education
3. Student's written statement concerning career interests
4. Transcripts of all previous college work
5. Satisfactory scores on the GRE or MAT

There are several tests that students must pass for admission to teacher preparation, admission to student teaching and licensure in Virginia. Students should consult the Student Services Center (http://www.soe.vcu.edu/student-services-center/) section on the School of Education website for current testing requirements.

Degree requirements
In addition to the VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Student teaching requirements: Students must successfully complete approved student teaching experience.

Curriculum requirements

1. Additional testing requirement: Students must pass Praxis II, where applicable, for licensure.

Teaching, Certificate in (Post-baccalaureate graduate certificate) with a concentration in chemistry education

Program goal
The post-baccalaureate Certificate in Teaching program is designed for students who have earned bachelor's degrees in fields other than
education, who wish to become teachers in secondary schools in one or more subjects and for whom a master's degree is not a priority. This program is for applicants who may already have earned a master's degree or wish to earn a master's degree in a specialized area of education later. Applicants must have a major or its equivalent in the subject they wish to teach.

Students are required to complete a minimum of 24 hours beyond the bachelor's level, including the courses listed below. Equivalent courses taken within the past five years may transfer; however, a minimum of 27 credit hours, including clinical experiences, must be taken at VCU after admission to the program.

**Student learning outcomes**

Persons completing the program are expected, among other attributes, to:

1. Understand human development and learning theory appropriate to the age group they will teach
2. Demonstrate knowledge of the subjects they will teach
3. Develop an understanding of purposes for education and a defensible philosophical approach toward teaching
4. Acquire awareness of the diversity of the school-age population in cultural background and styles of learning
5. Demonstrate an ability to plan and implement effective teaching
6. Measure student learning in ways that lead to sustained development and learning

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)
Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (http://www.granduate.admissions.vcu.edu).

Program website: soe.vcu.edu/academics/certificates/teaching (https://soe.vcu.edu/academics/certificates/teaching/)

Teaching, Certificate in (Post-baccalaureate graduate certificate) with a concentration in physics education

Program goal
The post-baccalaureate Certificate in Teaching program is designed for students who have earned bachelor's degrees in fields other than education, who wish to become teachers in secondary schools in one or more subjects and for whom a master's degree is not a priority. This program is for applicants who may already have earned a master's degree or wish to earn a master's degree in a specialized area of education later. Applicants must have a major or its equivalent in the subject they wish to teach.

Students are required to complete a minimum of 24 hours beyond the bachelor’s level, including the courses listed below. Equivalent courses taken within the past five years may transfer; however, a minimum of 27 credit hours, including clinical experiences, must be taken at VCU after admission to the program.

Student learning outcomes
Persons completing the program are expected, among other attributes, to:

1. Understand human development and learning theory appropriate to the age group they will teach
2. Demonstrate knowledge of the subjects they will teach
3. Develop an understanding of purposes for education and a defensible philosophical approach toward teaching
4. Acquire awareness of the diversity of the school-age population in cultural background and styles of learning
5. Demonstrate an ability to plan and implement effective teaching
6. Measure student learning in ways that lead to sustained development and learning

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

</tbody>
</table>

Special requirements
- Admission to clinical experiences in schools requires a background check and fingerprinting.
In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor’s degree with a major, or equivalent, in physics
2. Three letters of recommendation addressing the student’s potential for graduate study in education
3. Student’s written statement concerning career interests
4. Transcripts of all previous college work
5. Satisfactory scores on the GRE or MAT

There are several tests that students must pass for admission to teacher preparation, admission to student teaching and licensure in Virginia. Students should consult the Student Services Center (http://www.soe.vcu.edu/student-services-center/) section on the School of Education website for current testing requirements.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33 credit hours depending on concentration. Note that three credit hours are taken at the undergraduate level.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Student teaching requirements: Students must successfully complete approved student teaching experience.
4. Additional testing requirement: Students must pass Praxis II, where applicable, for licensure.

Teaching, Master of (M.T.) with a concentration in biology education

Program goal

The Master of Teaching curricula are designed to incorporate eligibility for initial teaching licensure in Virginia in early and elementary, or secondary education (biology, chemistry, earth science, English, history, history and social studies, mathematics or physics).

The approved curricula include undergraduate qualifying courses as well. Individuals pursuing the extended program are awarded undergraduate and graduate degrees simultaneously; baccalaureate degree recipients who meet the admission criteria also may pursue the Master of Teaching degree program, including the qualifying courses. The combined baccalaureate and Master of Teaching program requires a minimum of 153-154 hours, at least 33 of which must be at the graduate level.

Secondary education

The Master of Teaching program includes curricula that lead to endorsement in one of the following disciplines: biology, chemistry, drama, earth science, English, history/social studies, mathematics or physics.

In order to enroll in the program, students must apply and be accepted to both the Extended Teacher Preparation Program and the Graduate School. Admission information for the Extended Teacher Preparation Program (p. 487) is available in this bulletin.

Student teaching requirements

All students pursuing a secondary education endorsement within the Master of Teaching program will student teach in the spring semester. To do so, students must take and pass the Virginia Communication and Literacy Assessment and their subject-specific Praxis II exams before the fall semester of the academic year in which they will student teach.
Student learning outcomes

Science education

1. Demonstrate content knowledge in science: Candidates demonstrate content knowledge in science as evidenced by the Praxis II scores.
2. Demonstrate conceptual content knowledge: Candidates demonstrate knowledge of the conceptual science to be taught and related fields, and that they are well-prepared in the breadth of knowledge needed to teach in their fields of licensure as evidenced by GPA in major courses.
3. Effectively plan classroom-based instruction: Candidates demonstrate the ability to plan effective classroom-based instruction and design assessments, consistent with the goals of the National Science Education Standards as evidenced by the unit plan assessment.
4. Effectively apply knowledge, skills and dispositions during student teaching: Candidates demonstrate knowledge, skills and dispositions are applied effectively in practice as evidenced by the clinical evaluation.
5. Demonstrate effects on student learning: Candidates demonstrate positive effects on student learning of major concepts, principles, theories, laws; the unifying concepts of science; the nature of science; the practice of inquiry (including student engagement in inquiry); analysis of issues related to science and technology; and the impact of science on themselves and their community as evidenced by the assessing student learning portion of the clinical evaluation.
7. Knowledge of research and investigation in science: Candidates demonstrate knowledge of research and investigation in science and understand multiple forms of scientific inquiry; can design, conduct and report research in their field; and can use mathematics and appropriate technology to collect, process and explain data as evidenced by the student-generated research assessment.
8. Knowledge of the contextual content of science: Candidates demonstrate knowledge of the contextual content of science and have a strong understanding of the socially relevant issues, social context, history, philosophy and applications of science as evidenced by the nature of science reflection assignment.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduated.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Teaching, Master of (M.T.) with a concentration in early and elementary education

Program goal

The Master of Teaching curricula are designed to incorporate eligibility for initial teaching licensure in Virginia in early and elementary, or secondary education (biology, chemistry, earth science, English, history, history and social studies, mathematics or physics).

The approved curricula include undergraduate qualifying courses as well. Individuals pursuing the extended program are awarded undergraduate and graduate degrees simultaneously; baccalaureate degree recipients...
who meet the admission criteria also may pursue the Master of Teaching degree program, including the qualifying courses. The combined baccalaureate and Master of Teaching program requires a minimum of 153-154 hours, at least 33 of which must be at the graduate level.

Early and elementary education
Freshman students bound for the Master of Teaching program with a concentration in early and elementary education are required to enroll in the Bachelor of Interdisciplinary Studies with a liberal studies for early and elementary education major. This program offers liberal studies curriculum designed through an interdisciplinary collaboration among professors in the College of Humanities and Sciences and the School of Education in consultation with successful area teachers. It targets core knowledge across the four major subject areas represented in Virginia’s Standards of Learning (mathematics, sciences, social sciences and language arts/communication) while also providing a university-level skill set and knowledge base. Throughout the undergraduate program, contact with area schools and young learners is programmed into service and experiential learning venues.

Transfer students intending to be elementary teachers (and completing the Master of Teaching with a concentration in early and elementary education) are required to meet with advisers for the LSEE major prior to registering for courses. Advisers will evaluate all courses successfully completed outside of the LSEE major prescribed curriculum (from VCU or elsewhere) to determine their transferability to the LSEE major.

LSEE majors are encouraged to select at least one minor in order to deepen knowledge and appreciation of a subject area. Philosophy, religious studies, African American studies and international studies have relevance in their understanding of human investigation of knowledge, human behavior and world cultures. A minor in a science area such as environmental studies may be more employable because of school and societal concerns about our planet and its preservation. In selecting the humanities and sciences minor, the choice should be based on the student’s interest and perceived relevance.

Consult with the appropriate professional studies adviser for additional information regarding professional studies and liberal arts requirements.

Student teaching requirements
All students pursuing a secondary education endorsement within the Master of Teaching program will student teach in the spring semester.

To do so, students must take and pass the Virginia Communication and Literacy Assessment and their subject-specific Praxis II exams before the fall semester of the academic year in which they will student teach. Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Student learning outcomes
Early and elementary education
1. Master content knowledge: Candidates demonstrate content knowledge in the disciplines to be taught in an elementary classroom as evidenced by performance on Praxis II and the liberal arts equivalency GPA.
2. Demonstrate ability to plan instruction: Candidates demonstrate that they can effectively plan classroom-based instruction as evidenced by the read-aloud lesson plan.
3. Demonstrate application of knowledge, skills and dispositions: Candidates effectively use skills in practice as evidenced by the clinical evaluation continuum assessment during internship.
4. Demonstrate effect on student learning: Candidates demonstrate effect on student learning as evidenced by success on the practicum B lesson plans in math, science and social studies.
5. Demonstrate success on developmental project: Candidates will demonstrate competence in developing unit lesson plans as evidenced by the TEDU 414 unit plan.
6. Demonstrate success on activity project: Candidates will demonstrate competence in developing student activity plans by success on the health and PE movement experience activity project.
7. Demonstrate ability to integrate the arts in lessons: Candidates will demonstrate that they know, understand and use basic communication in the arts, can analyze art from structural, historical and cultural perspectives, and have an informed acquaintance with art from varied cultural and historical periods. Further, candidates will demonstrate that they are able to integrate art in a basic content lesson by success on the learning center notebook project.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduation.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to
graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

</table>

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor's degree with a major, or equivalent, in the subject the student wishes to teach (for secondary) or an appropriate liberal arts major (for early/elementary) (Students in the five-year extended program must be pursuing an appropriate bachelor's degree.)
2. Three letters of recommendation addressing the student’s potential for graduate study in education
3. Student's written statement concerning career interests
4. Transcripts of all previous college work
5. Satisfactory scores on the GRE or MAT

Additionally, there are several tests that students must pass for admission to teacher preparation, admission to student teaching and licensure in Virginia. Students should consult the Student Services Center (http://www.soe.vcu.edu/student-services-center/) section on the School of Education website for current testing requirements.

Admission to clinical experiences in schools requires a background check and fingerprinting.

**Degree requirements**

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33-34 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Student teaching requirements: Students must successfully complete approved student teaching experience. Note: Students must complete all undergraduate courses before student teaching.
4. Additional testing requirement: Students must pass Praxis II, where applicable, for licensure.

**Curriculum requirements**

**Program requirements – mathematics and statistical reasoning**

The general education requirement is three to six credit hours; the early childhood/elementary education program requirement is six credit hours, including three credit hours in mathematics at the college algebra level or higher and three credit hours in a statistics course typically taught by a college department of mathematics. Choosing among these courses is recommended:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>

Program website: soe.vcu.edu/academics/masters-programs/master-of-teaching (https://soe.vcu.edu/academics/masters-programs/master-of-teaching/)

Teaching, Master of (M.T.) with a concentration in earth science education

Program goal

The Master of Teaching curricula are designed to incorporate eligibility for initial teaching licensure in Virginia in early and elementary, or secondary education (biology, chemistry, earth science, English, history, history and social studies, mathematics or physics).

The approved curricula include undergraduate qualifying courses as well. Individuals pursuing the extended program are awarded undergraduate and graduate degrees simultaneously; baccalaureate degree recipients who meet the admission criteria also may pursue the Master of Teaching degree program, including the qualifying courses. The combined baccalaureate and Master of Teaching program requires a minimum of 153-154 hours, at least 33 of which must be at the graduate level.

Secondary education

The Master of Teaching program includes curricula that lead to endorsement in one of the following disciplines: biology, chemistry, drama, earth science, English, history/social studies, mathematics or physics.

In order to enroll in the program, students must apply and be accepted to both the Extended Teacher Preparation Program and the Graduate School. Admission information for the Extended Teacher Preparation Program (p. 487) is available in this bulletin.

Student teaching requirements

All students pursuing a secondary education endorsement within the Master of Teaching program will student teach in the spring semester. To do so, students must take and pass the Virginia Communication and Literacy Assessment and their subject-specific Praxis II exams before the fall semester of the academic year in which they will student teach.

Student learning outcomes

Science education

1. Demonstrate content knowledge in science: Candidates demonstrate content knowledge in science as evidenced by the Praxis II scores.
2. Demonstrate conceptual content knowledge: Candidates demonstrate knowledge of the conceptual science to be taught and related fields, and that they are well-prepared in the breadth of knowledge needed to teach in their fields of licensure as evidenced by GPA in major courses.
3. Effectively plan classroom-based instruction: Candidates demonstrate the ability to plan effective classroom-based instruction and design assessments, consistent with the goals of the National Science Education Standards as evidenced by the unit plan assessment.
4. Effectively apply knowledge, skills and dispositions: Candidates demonstrate knowledge, skills and dispositions are applied effectively in practice during student teaching, as evidenced by the clinical evaluation.
5. Demonstrate effects on student learning: Candidates demonstrate positive effects on student learning of major concepts, principles, theories, laws; the unifying concepts of science, the nature of science, the practice of inquiry (including student engagement in inquiry), analysis of issues related to science and technology, and the
impact of science on themselves and their community as evidenced by the assessing student learning portion of the clinical evaluation.

7. Knowledge of research and investigation in science: Candidates demonstrate knowledge of research and investigation in science and understand multiple forms of scientific inquiry; can design, conduct and report research in their field; and can use mathematics and appropriate technology to collect, process and explain data as evidenced by the student-generated research assessment.

8. Knowledge of the contextual content of science: Candidates demonstrate knowledge of the contextual content of science and have a strong understanding of the socially relevant issues, social context, history, philosophy and applications of science as evidenced by the nature of science reflection assignment.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.gradschool.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section for additional information on academic regulations for graduate students.** (p. 17)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the academic regulations section for additional information on degree candidacy requirements.** (p. 26)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the academic regulations section for additional information on graduation requirements.** (p. 31)

**Apply online at** graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor's degree with a major, or equivalent, in the subject the student wishes to teach (for secondary) or an appropriate liberal arts major (for early/elementary) (Students in the five-year extended program must be pursuing an appropriate bachelor's degree.)
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Student's written statement concerning career interests
4. Transcripts of all previous college work
5. Satisfactory scores on the GRE or MAT

Additionally, there are several tests that students must pass for admission to teacher preparation, admission to student teaching and licensure in Virginia. Students should consult the Student Services Center (http://www.soec.vcu.edu/student-services-center/) section on the School of Education website for current testing requirements.

Admission to clinical experiences in schools requires a background check and fingerprinting.

**Degree requirements**

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33-34 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Student teaching requirements: Students must successfully complete approved student teaching experience. Note: Students must complete all undergraduate courses before student teaching.
4. Additional testing requirement: Students must pass Praxis II, where applicable, for licensure.

### Teaching, Master of (M.T.) with a concentration in English education

#### Program goal

The Master of Teaching curricula are designed to incorporate eligibility for initial teaching licensure in Virginia in early and elementary, or secondary education (biology, chemistry, earth science, English, history, history and social studies, mathematics or physics).

The approved curricula include undergraduate qualifying courses as well. Individuals pursuing the extended program are awarded undergraduate and graduate degrees simultaneously; baccalaureate degree recipients who meet the admission criteria also may pursue the Master of Teaching degree program, including the qualifying courses. The combined baccalaureate and Master of Teaching program requires a minimum of 153-154 hours, at least 33 of which must be at the graduate level.

#### Secondary education

The Master of Teaching program includes curricula that lead to endorsement in one of the following disciplines: biology, chemistry, drama, earth science, English, history/social studies, mathematics or physics.

In order to enroll in the program, students must apply and be accepted to both the Extended Teacher Preparation Program and the Graduate School. Admission information for the Extended Teacher Preparation Program (p. 487) is available in this bulletin.

#### Student teaching requirements

All students pursuing a secondary education endorsement within the Master of Teaching program will student teach in the spring semester. To do so, students must take and pass the Virginia Communication and Literacy Assessment and their subject-specific Praxis II exams before the fall semester of the academic year in which they will student teach.

#### Student learning outcomes

**English education**

1. Demonstrate content knowledge in the English: Candidates demonstrate content knowledge in the English language arts as evidenced by Praxis II scores and the undergraduate transcript analysis.
2. Demonstrate ability to plan instruction: Candidates demonstrate that they can effectively plan classroom-based instructions evidenced by the lesson plan assessment, lesson plan portion of the portfolio and the clinical evaluation continuum.
3. Demonstrate knowledge, skills and dispositions: Candidates demonstrate that knowledge, skills and dispositions are applied effectively in practice as evidenced by the clinical evaluation continuum assessment during internship.
4. Demonstrate effect on student learning: Candidates demonstrate effect on student learning as evidenced by success on the lesson plan portion of the portfolio.
5. Demonstrate NCTE standards proficiency: Candidates further demonstrate proficiency on NCTE competencies as evidenced by the dispositions assessment.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. Teaching, Master of (M.T.) with a concentration in history/social studies education

Program goal

The Master of Teaching curricula are designed to incorporate eligibility for initial teaching licensure in Virginia in early and elementary, or secondary education (biology, chemistry, earth science, English, history, history and social studies, mathematics or physics).

The approved curricula include undergraduate qualifying courses as well. Individuals pursuing the extended program are awarded undergraduate and graduate degrees simultaneously; baccalaureate degree recipients who meet the admission criteria also may pursue the Master of Teaching degree program, including the qualifying courses. The combined baccalaureate and Master of Teaching program requires a minimum of 153-154 hours, at least 33 of which must be at the graduate level.

Secondary education

The Master of Teaching program includes curricula that lead to endorsement in one of the following disciplines: biology, chemistry, drama, earth science, English, history/social studies, mathematics or physics.

In order to enroll in the program, students must apply and be accepted to both the Extended Teacher Preparation Program and the Graduate School. Admission information for the Extended Teacher Preparation Program (p. 487) is available in this bulletin.

Student teaching requirements

All students pursuing a secondary education endorsement within the Master of Teaching program will student teach in the spring semester. To do so, students must take and pass the Virginia Communication and Literacy Assessment and their subject-specific Praxis II exams before the fall semester of the academic year in which they will student teach.

Student learning outcomes

History/social studies education

1. Demonstrate content knowledge in social studies: Candidates demonstrate content knowledge in social studies as evidenced by the Praxis II scores and unit plan assessment in TEDU 547.
2. Effectively plan classroom-based instruction: Candidates demonstrate that they can effectively plan classroom-based instruction as evidenced by the lesson plan assessments in TEDU 547 and TEDU 681.
3. Effectively apply knowledge, skills and dispositions during student teaching: Candidates demonstrate that knowledge, skills and dispositions are applied effectively in practice as evidenced by clinical evaluations.
4. Demonstrate effects on student learning: Candidates demonstrate effects on student learning as evidenced by the portfolio: student work, reflections, case study and rubric for student teaching.
5. Candidates demonstrate National Council for the Social Studies standards proficiency: Candidates demonstrate proficiency on NCSS competencies as evidenced by the unit plan assessment in TEDU 547. This objective addresses NCATE Standard 1 – “Candidate Knowledge, Skills and Dispositions.”

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the
Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor's degree with a major, or equivalent, in the subject the student wishes to teach (for secondary) or an appropriate liberal arts major (for early/elementary) (Students in the five-year extended program must be pursuing an appropriate bachelor's degree.)

2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Student's written statement concerning career interests
4. Transcripts of all previous college work
5. Satisfactory scores on the GRE or MAT

Additionally, there are several tests that students must pass for admission to teacher preparation, admission to student teaching and licensure in Virginia. Students should consult the Student Services Center (http://www.soe.vcu.edu/student-services-center/) section on the School of Education website for current testing requirements.

Admission to clinical experiences in schools requires a background check and fingerprinting.

Degree requirements
In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33-34 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Student teaching requirements: Students must successfully complete approved student teaching experience. Note: Students must complete all undergraduate courses before student teaching.
4. Additional testing requirement: Students must pass Praxis II, where applicable, for licensure.

The minimum total of graduate credit hours required for this degree is 33.

### Teaching, Master of (M.T.) with a concentration in mathematics education

#### Program goal

The Master of Teaching curricula are designed to incorporate eligibility for initial teaching licensure in Virginia in early and elementary, or secondary education (biology, chemistry, earth science, English, history, history and social studies, mathematics or physics).

The approved curricula include undergraduate qualifying courses as well. Individuals pursuing the extended program are awarded undergraduate and graduate degrees simultaneously; baccalaureate degree recipients who meet the admission criteria also may pursue the Master of Teaching degree program, including the qualifying courses. The combined baccalaureate and Master of Teaching program requires a minimum of 153-154 hours, at least 33 of which must be at the graduate level.

#### Secondary education

The Master of Teaching program includes curricula that lead to endorsement in one of the following disciplines: biology, chemistry, drama, earth science, English, history/social studies, mathematics or physics.

In order to enroll in the program, students must apply and be accepted to both the Extended Teacher Preparation Program and the Graduate School. Admission information for the Extended Teacher Preparation Program (p. 487) is available in this bulletin.

#### Student teaching requirements

All students pursuing a secondary education endorsement within the Master of Teaching program will student teach in the spring semester. To do so, students must take and pass the Virginia Communication and Literacy Assessment and their subject-specific Praxis II exams before the fall semester of the academic year in which they will student teach.

#### Student learning outcomes

**Mathematics education**

1. Demonstrate content knowledge in mathematics: Candidates demonstrate content knowledge in mathematics as evidenced by the Praxis II scores and undergraduate mathematics GPAs. This objective addresses NCATE Standard 1 – “Candidate Knowledge, Skills and Dispositions:"
2. Effectively plan classroom-based instruction: Candidates demonstrate that they can effectively plan classroom-based instruction as evidenced by the unit-lesson plans, student handouts, assessments and video tape portions of the portfolio assessment.
3. Effectively apply knowledge, skills and dispositions during student teaching: Candidates demonstrate that knowledge, skills and dispositions are applied effectively in practice as evidenced by clinical evaluations.
4. Demonstrate effects on student learning: Candidates demonstrate effects on student learning as evidenced by lesson plan portion of the portfolio assessment and the clinical evaluation continuum.
5. Demonstrate National Council of Teachers of Mathematics standards proficiency. Candidates further demonstrate proficiency on NCTM competencies as evidenced by the technology lesson plans and the problem-solving lesson plans.
VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Teaching, Master of (M.T.) with a concentration in physics education

Program goal

The Master of Teaching curricula are designed to incorporate eligibility for initial teaching licensure in Virginia in early and elementary, or secondary education (biology, chemistry, earth science, English, history, history and social studies, mathematics or physics).

The approved curricula include undergraduate qualifying courses as well. Individuals pursuing the extended program are awarded undergraduate and graduate degrees simultaneously; baccalaureate degree recipients who meet the admission criteria also may pursue the Master of Teaching degree program, including the qualifying courses. The combined baccalaureate and Master of Teaching program requires a minimum of 153-154 hours, at least 33 of which must be at the graduate level.

Secondary education

The Master of Teaching program includes curricula that lead to endorsement in one of the following disciplines: biology, chemistry, drama, earth science, English, history/social studies, mathematics or physics.

In order to enroll in the program, students must apply and be accepted to both the Extended Teacher Preparation Program and the Graduate School. Admission information for the Extended Teacher Preparation Program (p. 487) is available in this bulletin.

Student teaching requirements

All students pursuing a secondary education endorsement within the Master of Teaching program will student teach in the spring semester. To do so, students must take and pass the Virginia Communication and Literacy Assessment and their subject-specific Praxis II exams before the fall semester of the academic year in which they will student teach.

Student learning outcomes

Science education

1. Demonstrate content knowledge in science: Candidates demonstrate content knowledge in science as evidenced by the Praxis II scores.
2. Demonstrate conceptual content knowledge: Candidates demonstrate knowledge of the conceptual science to be taught and related fields, and that they are well-prepared in the breadth of knowledge needed to teach in their fields of licensure as evidenced by GPA in major courses.
3. Effectively plan classroom-based instruction: Candidates demonstrate the ability to plan effective classroom-based instruction and design assessments, consistent with goals of the National Science Education Standards as evidenced by the unit plan assessment.
4. Effectively apply knowledge, skills and dispositions during student teaching: Candidates demonstrate knowledge, skills and dispositions are applied effectively in practice as evidenced by the clinical evaluation.
5. Demonstrate effects on student learning: Candidates demonstrate positive effects on student learning of major concepts, principles, theories, laws; the unifying concepts of science; the nature of science; the practice of inquiry (including student engagement in inquiry); analysis of issues related to science and technology; and the
impact of science on themselves and their community as evidenced by the assessing student learning portion of the clinical evaluation.

7. Knowledge of research and investigation in science: Candidates demonstrate knowledge of research and investigation in science and understand multiple forms of scientific inquiry; can design, conduct and report research in their field; and can use mathematics and appropriate technology to collect, process and explain data as evidenced by the student-generated research assessment.

8. Knowledge of the contextual content of science: Candidates demonstrate knowledge of the contextual content of science and have a strong understanding of the socially relevant issues, social context, history, philosophy and applications of science as evidenced by the nature of science reflection assignment.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

Teaching, Master of (M.T.) with a concentration in teaching health and physical education

Program goal

The Master of Teaching curricula are designed to incorporate eligibility for initial teaching licensure in Virginia in early and elementary, secondary education (biology, chemistry, earth science, English, history, history and social studies, mathematics or physics) or health and physical education.

The approved curricula include undergraduate qualifying courses as well. Individuals pursuing the extended program are awarded undergraduate and graduate degrees simultaneously; baccalaureate degree recipients who meet the admission criteria also may pursue the Master of Teaching degree program, including the qualifying courses. The combined baccalaureate and Master of Teaching program requires a minimum of 153-154 hours, at least 33 of which must be at the graduate level.

Health and physical education

The Master of Teaching program with a concentration in teaching health and physical education provides advanced course work in the application of health and movement science principles to health and physical education pedagogy. Students seeking an M.T. with the teaching health and physical education concentration are required to complete the Bachelor of Science in Health, Physical Education and Exercise Science. Students with an undergraduate degree in health and physical education or related degrees are encouraged to meet with an adviser prior to applying to graduate school.

Student teaching requirements

All students pursuing a secondary education endorsement within the Master of Teaching program will student teach in the spring semester. To do so, students must take and pass the Virginia Communication and Literacy Assessment and their subject-specific Praxis II exams before the fall semester of the academic year in which they will student teach.

Student learning outcomes

Health and physical education

1. Demonstrate content knowledge in health and physical education: Candidates demonstrate content knowledge in health and physical education as evidenced by Praxis II scores and the undergraduate transcript analysis.
2. Demonstrate ability to plan instruction: Candidates demonstrate that they can effectively plan classroom-based instructions evidenced by
the lesson plan assessment, lesson plan portion of the portfolio and the clinical evaluation continuum.
3. Demonstrate that knowledge, skills and dispositions are applied effectively in practice as evidenced by the clinical evaluation continuum assessment during internship.
4. Demonstrate effect on student learning: Candidates demonstrate effect on student learning as evidenced by success on the lesson plan portion of the portfolio.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

Students should consult the Student Services Center (http://www.soe.vcu.edu/student-services-center/) section on the School of Education website for current testing requirements.

Admission to clinical experiences in schools requires a background check and fingerprinting.

**Degree requirements**

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33-34 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Student teaching requirements: Students must successfully complete approved student teaching experience. Note: Students must complete all undergraduate courses before student teaching.
4. Additional testing requirement: Students must pass Praxis II, where applicable, for licensure.

**Curriculum requirements**

The undergraduate program requires a minimum of 120 credit hours. To view undergraduate requirements, please see the program page for B.S. in Health, Physical Education and Exercise Science with a concentration in exercise science.

L. DOUGLAS WILDER SCHOOL OF GOVERNMENT AND PUBLIC AFFAIRS

The L. Douglas Wilder School of Government and Public Affairs is a creative, interdisciplinary grouping of programs in the social sciences and professional arenas that provides students with the knowledge, skills and experience necessary for success in public service.

The Wilder School brings together faculty from multiple disciplines that share a common interest in public affairs. The faculty includes individuals with strong research and analytical skills and with substantive expertise in fields such as criminal justice, economics, homeland security, public administration, urban planning and community development. These faculty members are committed to producing cutting-edge research and public service that can bridge the gap between theory and practice and to providing high quality, innovative and nationally competitive degree programs for students.

To achieve this mission, the Wilder School actively fosters and promotes a wide range of endeavors, including the establishment of interdisciplinary undergraduate and graduate programs that develop close ties with other related university programs. The Wilder School is an intellectually exciting place committed to having a genuine impact on public policy and providing an intellectually stimulating education for future public affairs professionals who share in school's commitment.

Urban and regional planning (master's degree)
Planning Accreditation Board

Program offerings

The school offers a variety of educational opportunities. Students may pursue three undergraduate programs and an additional three minors. Graduate programs provide options for full-time students and for practicing professionals interested in enhancing their skills or engaging in graduate-level work on a part-time basis. Current graduate offerings include nationally recognized master's programs and eight graduate-level certificates, as well as a doctoral degree program. Wilder School programs include:

Baccalaureate degrees
Bachelor of Science in Criminal Justice
Bachelor of Arts in Homeland Security and Emergency Preparedness
Bachelor of Science in Urban and Regional Studies

Minors
Criminal justice
Homeland security and emergency preparedness
Urban and regional studies

Post-baccalaureate graduate certificates
Certificate in Criminal Justice
Certificate in Gender Violence Intervention
Certificate in Geographic Information Systems
Certificate in Homeland Security and Emergency Preparedness
Certificate in Nonprofit Management
Certificate in Public Management
Certificate in Sustainability Planning
Certificate in Urban Revitalization

Master's degrees
Master of Arts in Homeland Security and Emergency Preparedness
Master of Public Administration
Master of Science in Criminal Justice
Master of Urban and Regional Planning

Doctoral degree
Ph.D. in Public Policy and Administration

The school also offers two dual degree programs with the University of Richmond's T.C. Williams Law School. Through these programs students can simultaneously obtain a law degree (J.D.) and either the Master of Public Administration or the Master of Urban and Regional Planning.
Service-learning and internship opportunities

Shajuana Isom-Payne
Director of student success

The educational experience at the L. Douglas Wilder School of Government and Public Affairs extends far beyond the classroom. Many students take advantage of service-learning (http://www.wilder.vcu.edu/service/servicelearning/) and internship (https://wilder.vcu.edu/students/student-success/internships/) opportunities, gaining valuable work experience and enhancing their resumes as they contribute in meaningful ways to governmental departments and agencies, legislative offices, nonprofit institutions, community initiatives, and businesses throughout Richmond.

Exceptionally qualified graduate students in the criminal justice, homeland security and emergency preparedness, public administration, and urban and regional planning programs are selected to be Wilder Graduate Scholars (https://wilder.vcu.edu/students/student-success/graduate-fellowship/) who undertake yearlong placements in which they benefit from professional work experience and financial support.

At the Wilder School, service is a tradition that is supported and cultivated by a faculty that reflects a tremendous commitment to community-based research. Each semester, VCU faculty offer a diverse selection of credit-bearing service-learning courses that provide students with the privilege of developing hands-on experience within their academic fields while engaging in meaningful projects that benefit local communities.

Guidelines for internships (https://wilder.vcu.edu/students/student-success/internships/) are available on the Wilder School website.

Graduate information

Admission

Admission to programs of the L. Douglas Wilder School of Government and Public Affairs is available to qualified students on a rolling admissions basis. Since the demand for admission to some programs is high and space availability is limited, students are encouraged to apply well in advance of their proposed admission dates.

As outlined below, admission requirements vary by academic program. No application packet will be considered by the relevant program admissions committee until all the required materials have been submitted by the applicant.

Application forms and instructions for applying to all graduate programs are available on the Graduate School website (http://www.graduate.vcu.edu).

Admission to a master’s program from the certificate programs

The courses in the graduate Certificate in Criminal Justice program are the same as the master’s courses and, with minimum grades of B and upon acceptance into the master’s degree program, are fully transferable to the Master of Science in Criminal Justice program.

The courses that constitute the homeland security and emergency preparedness graduate certificate represent the foundation for the HSEP master’s degree. Completion of the HSEP certificate with a minimum grade of B in each course guarantees admission to the HSEP master’s and waives the standardized test requirement; applicants are still required to follow the standard application process. All courses in the certificate can be applied to the HSEP master’s degree.

The graduate Certificate in Public Management and the graduate Certificate in Nonprofit Management are designed for persons in professional positions who require a limited number of courses in contemporary management theory and skills. However, if a student later decides to pursue the M.P.A. degree, successfully completed certificate courses may be applied toward the degree. Successful completion of either certificate does not guarantee admission into the M.P.A. degree program.

All courses from the certificate programs in urban revitalization, geographic information systems or sustainability planning may be applied to meet the requirement of the Master of Urban and Regional Planning degree. However, successful completion of any certificate program does not guarantee admission into the M.U.R.P. degree program.

Provisional admission

In rare cases, applicants who do not meet the requirements for full admission may be accepted provisionally upon recommendation of the program’s admissions committee. The conditions for earning full admission are provided by the program and include an assessment of academic performance after a specific number of hours or courses are completed. Provisionally admitted students may not withdraw from any courses or receive an incomplete during the provisional period. Students with extenuating circumstances may request an exception to this policy.

Provisional admission does not constitute a waiver of the requirement to submit a standardized test score if required by the program.

Re-admission after dismissal

If a student is dismissed from the VCU Wilder School, the student must wait a minimum of one year before applying for re-admission. Dismissed students will not be admitted to any other Wilder School graduate program for a period of one year after dismissal.

Continuous enrollment requirements and expectations

To remain in good standing, students must maintain continuous registration for each fall and spring semester (except for approved leaves of absence) until they have completed all requirements. Students who fail to register for two consecutive semesters (summer sessions included) will be dropped automatically from the program and must reapply for admission in order to continue. Exceptions to this policy will be made on an individual basis by petition. Students who reapply after having been dropped for failure to register continuously will be evaluated under the bulletin requirements in effect at the time of readmittance.

A minimum GPA of 3.0 on a 4.0 scale must be maintained. Compliance with other university regulations also is required.

Student appeals

Appeals for exceptions to policies must be made in writing to the Graduate Student Services and Advising office. Refer to the Wilder School website for contact information.

Students may submit an appeal to request a retroactive drop or withdrawal from a class or from all classes taken in a specific semester.
Part-time students

Since the school schedules many of its courses in the late afternoon or evening, its programs accommodate both full- and part-time students. Students also may take advantage of courses offered in the summer. Thus it is possible for a part-time student taking six credit hours per semester to finish the master’s degree in four years or less.

Nondegree-seeking students

Nondegree-seeking students must have an undergraduate degree from an accredited institution and the written approval of the instructor prior to registering for any graduate-level course. Nondegree-seeking students can take no more than six credit hours without authorization from the appropriate program coordinator.

Financial aid information

Information and application forms for financial aid may be secured from the VCU Office of Financial Aid, Harris Hall, 1015 Floyd Ave., First Floor, Box 843026, Richmond, VA 23284-3026. The L. Douglas Wilder School of Government and Public Affairs also offers a limited amount of financial assistance. Individuals interested in such assistance are urged to apply by March 30. Financial assistance available through the school includes:

- **Graduate teaching assistant positions** – Duties involve helping with the instruction of courses. The level of support varies according to the work level, financial need and scholarship.
- **Research assistant positions** – The stipend and number of positions depend upon the level of sponsored research carried out by the school each year.
- **Tuition fellowships** – There are a limited number of tuition fellowships for full-time students within the three master’s degree programs.
- **T. Edward Temple Memorial Scholarship Award** – This award of approximately $500 per year is given to an outstanding graduate student in the Master of Urban and Regional Planning program each year.
- **The Senator Edward E. Willey Scholarship, the Virginia City Management Association/University Dr. T. Edward Temple Scholarship and the Leigh E. Grosenick Scholarship** – These scholarships are available to outstanding students in the Master of Public Administration program. Preference for these three scholarships is given to those who plan public careers in Virginia.
- **Internships** – Paid, on-the-job internships are widely available in the Richmond area and elsewhere and are encouraged. VCU graduates also have been successful in obtaining presidential management internships in the federal government, state-government professional positions and local government positions.

Transfer credit

With the consent of the admission committee or program coordinator, a maximum of six semester hours of appropriate graduate credit may be transferred and applied toward the Master of Science in Criminal Justice, the Master of Arts in Homeland Security and Emergency Preparedness, the Master of Public Administration or the Master of Urban and Regional Planning. These hours will not have been credited toward another degree.

Schoolwide master’s-level requirements

In addition to the program-specific requirements of the Master of Public Administration, the Master of Science in Criminal Justice and the Master of Urban and Regional Planning as outlined elsewhere in this bulletin, the Wilder School requires all master’s-level graduate degree-seeking students to acquire competence in four broad areas:

1. Research methods
2. Planning and/or policy analysis
3. Public administration
4. Ethics

Competence can be demonstrated by completion of the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Research methods</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td>URSP/CJ/GVPA/PADM 623</td>
<td>Research Methods for Government and Public Affairs</td>
<td>3</td>
</tr>
<tr>
<td><strong>Planning/policy analysis</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Select one of the following:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>PADM/GVPA 625</td>
<td>Public Policy Analysis</td>
<td>3</td>
</tr>
<tr>
<td>URSP/GVPA 632</td>
<td>Planning Theory and Processes</td>
<td></td>
</tr>
<tr>
<td><strong>Public administration</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td>PADM/GVPA 601</td>
<td>Principles of Public Administration</td>
<td>3</td>
</tr>
<tr>
<td><strong>Ethics</strong></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Select one of the following options:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>Option A:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>PADM/GVPA/PHIL 683</td>
<td>Administrative Ethics</td>
<td></td>
</tr>
<tr>
<td>Option B:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>A program-specific course through which ethical issues are imbedded and discussed within a public sector context. Such courses would include:</td>
<td></td>
<td></td>
</tr>
<tr>
<td>CRJS 550</td>
<td>Professional Ethics and Liability</td>
<td></td>
</tr>
<tr>
<td>PADM 661</td>
<td>Nonprofit Law, Governance and Ethics</td>
<td></td>
</tr>
<tr>
<td>PADM 689</td>
<td>Seminar in Public Administration: Integration of Theory and Practice</td>
<td></td>
</tr>
<tr>
<td>URSP/GVPA 632</td>
<td>Planning Theory and Processes</td>
<td></td>
</tr>
<tr>
<td>URSP 635</td>
<td>Legal and Legislative Foundations of Planning</td>
<td></td>
</tr>
</tbody>
</table>

Selection of courses to meet these competency requirements will be made by the student in consultation with his/her academic adviser. While each graduate of the Wilder School must demonstrate competence in each of the areas outlined above, substitutions for the specific courses may be made with the written approval of the appropriate graduate program coordinator.

Criminal Justice, Certificate in (Post-baccalaureate graduate certificate)

Program goal

The Certificate in Criminal Justice is a post-baccalaureate graduate program designed to help facilitate career advancement in the criminal justice and/or criminology field. The program seeks to develop critical-
thinking skills among the students through the use of current criminal justice and criminological topics, reports and research findings.

This certificate program offers specialization for individuals interested or involved in law enforcement, corrections, juvenile justice or the courts. It combines survey and theory courses with research, management and policy courses on the justice system. The courses in the certificate program are the same as the master's courses. With minimum grades of B and upon acceptance into the master's degree program, these courses are fully transferable to the Master of Science (M.S.) in Criminal Justice degree program.

**Student learning outcomes**

1. Apply the principles of criminal justice — landmark laws, principles of justice, structured decision-making and review of policies, procedures and decisions — to dilemmas in the field of criminal justice.
2. Apply the principles of ethical thought to dilemmas in the field, involving law, police, courts and corrections, taken from past court cases and classic literature.
3. Review and analyze the theories of criminology to develop approaches to crime prevention programs.
4. Use research methodology to construct, design and evaluate policies and programs in criminal justice.
5. Assess current implementation of criminal justice policies, laws and procedures in the creation of laws, their enforcement and application by the courts as race, class and gender affect them.
6. Integrate knowledge of criminological theory, law and methodology to pose and solve questions of crime and justice.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

The Post-baccalaureate Certificate in Criminal Justice program offers an abbreviated graduate-level course sequence of 15 credit hours for individuals with an academic and/or professional background in criminal justice. Applicants must meet all general admission requirements of the VCU Graduate School. (p. 35)

**Degree requirements**

In addition to general VCU Graduate School graduation requirements (p. 31), five courses are required for the certificate, as specified in the list that follows. To receive the certificate, the student must achieve a B average in the five courses and earn no more than one C grade.

Criminal Justice, Master of Science (M.S.)

Program goal
The M.S. degree program in criminal justice assists in broadening and refining the understanding of criminal justice and criminological issues to facilitate career success and advancement. The goal of the program is to develop critical-thinking skills among the students through the use of current criminal justice and criminological topics, reports and research findings.

Student learning outcomes
1. Apply the principles of criminal justice — landmark laws, principles of justice, structured decision-making and review of policies, procedures and decisions — to dilemmas in the field of criminal justice.
2. Apply the principles of ethical thought to dilemmas in the field, involving law, police, courts and corrections, taken from past court cases and classic literature.
3. Review and analyze the theories of criminology to develop approaches to crime prevention programs.
4. Use research methodology to construct, design and evaluate policies and programs in criminal justice.
5. Assess current implementation of criminal justice policies, laws and procedures in the creation of laws, their enforcement and application by the courts as race, class and gender affect them.
6. Integrate knowledge of criminological theory, law and methodology to pose and solve questions of crime and justice.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Admission requirements

| Degree: M.S. | Semester(s) of entry: Fall | Deadline dates: Apr 1 (Mar 1 for financial aid) | Test requirements: GRE, LSAT or GMAT |

| Special requirements
- These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester. Please contact the program chair with specific application questions.

In addition to the general admission requirements of the VCU Graduate School (p. 35), admission to the Master of Science in Criminal Justice also will be based on:
1. An undergraduate GPA that exceeds 2.7 overall
2. A satisfactory score on the graduate standardized test (GRE, LSAT or GMAT)
3. Previous evidence of ability to perform graduate-level work (where applicable)
4. Professional experience in criminal justice (where applicable)

The courses in the post-baccalaureate graduate Certificate in Criminal Justice program are the same as the master’s courses. With minimum grades of B and, upon acceptance into the master’s degree program, courses from the certificate program are fully transferable to the Master of Science in Criminal Justice degree program.

Degree requirements
In addition to the general VCU Graduate School graduation requirements (http://bulletin.vcu.edu/graduate/study/general-academic-regulations-graduate-students/graduation-requirements/), the Master of Science in Criminal Justice requires a minimum of 30 graduate credit hours of course work, with a minimum overall grade-point average of 3.0. Students who do not have at least one year of professional-level experience are encouraged to take a three-credit-hour internship as part of the 30 semester hours.

To complete the M.S. curriculum, students must submit a portfolio of their work before they graduate. Contact the program director for format and submission details.

A maximum of nine semester hours of graduate credit from an accredited institution may be transferred and applied toward the master's degree. All transfer requests require the approval of the graduate program coordinator and the Graduate School and may not have been counted toward another degree.

Gender Violence Intervention, Certificate in (Post-baccalaureate graduate certificate)

Program mission
The graduate Certificate in Gender Violence Intervention is designed to prepare individuals for positions related to understanding, studying, responding to and preventing sexual and domestic violence in a variety of communities and settings. It provides specialized study in gender violence and can be earned on its own, or in conjunction with another graduate degree in the Wilder School of Government and Public Affairs or the School of Social Work.

Program goals
1. The program will guide students in the development of strong academic understanding related to gender violence intervention.
2. The program will guide students in the development of skills in applying academic concepts to the practice of gender violence intervention.

Student learning outcomes
1. Academic understanding
   a. Students will have knowledge of common types of gender violence.
   b. Students will have knowledge of theoretical perspectives of gender violence.
   c. Students will have knowledge of gender violence policies.
2. Skills
   a. Students will have the ability to demonstrate methods of applying concepts to problems, practice and policy.
   b. Students will demonstrate professional behaviors and boundaries while working in GVI settings and with diverse populations.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

Applicants must meet all general admission requirements of the VCU Graduate School (p. 35).

Students with a B.A. or B.S. degree are eligible for admission into the certificate program. Relevant course work or practical experience will be considered in evaluating admission and substitution of courses. No more than six hours of substitution or equivalency credit will be granted. An overall GPA of 3.0 is required to receive the certificate, and no more than one grade of C may be earned in the certificate program curriculum.

**Degree requirements**

In addition to general VCU Graduate School graduation requirements (p. 31), a total of 15 graduate credit hours is required to earn the Certificate in Gender Violence Intervention. Five courses are required, including an internship (three credit hours) that offers the opportunity for involvement in all phases of work in this field.

Total Hours: 15

The minimum total of graduate credit hours required for this certificate is 15.

Students pursuing the Certificate in Gender Violence Intervention have an opportunity to combine their studies with a Master of Social Work (p. 798).

The combined Master of Social Work and Certificate in Gender Violence Intervention is a coordinated effort among the L. Douglas Wilder School of Government and Public Affairs, the School of Social Work and community advocates working in the area of sexual and domestic violence.

**Application process**

Apply online at VCU Graduate Admissions. For additional information, contact:

Elizabeth Cramer, Ph.D.
Professor, School of Social Work
ecramer@vcu.edu
Phone: (804) 828-9029

Sarah Jane Brubaker, Ph.D.
Director, Gender Violence Intervention Program
sbrubaker@vcu.edu
Phone: (804) 827-2400

**Graduate program director**

Sarah Jane Brubaker, Ph.D.
Associate professor
Email: sbrubaker@vcu.edu
Phone: (804) 827-2400

**Additional contact**

Denia A. Lee-Hing, Ed.D.
Director of graduate studies

**Program website:** [wilder.vcu.edu/academic/certificate/intervention.html](http://www.wilder.vcu.edu/academic/certificate/intervention.html)
Social Work, Master of (M.S.W.)/Gender Violence Intervention, Certificate in (Post-baccalaureate graduate certificate) [dual degree]

The dual degree Master of Social Work and Certificate in Gender Violence Intervention program is a collaborative effort among the L. Douglas Wilder School of Public Affairs, the School of Social Work and community advocates working in the area of sexual and domestic violence. The certificate requires a total of 15 credit hours.

To enroll in the Certificate in Gender Violence Intervention simultaneously with the M.S.W., students must complete a graduate application for the certificate program and pay the required fee to Graduate Admissions; however, no supporting information is required for students who are already enrolled in good standing in the M.S.W. program.

Applicants will need to complete an online admission application and select from the drop down menu "GVI Certificate." Applicants then pay the application fee and attach an essay on why they wish to be in the program. Students should also indicate on the right-hand side of the admission application that they are currently in the M.S.W. program, which will alert the admissions office that the application can be sent directly to the program chair for an admissions decision.

Please arrange for references, resume/CV and transcripts already on file from the M.S.W. program to be added to the application by contacting the Graduate Admissions office. Students should indicate in the "Comments" section of the application form that they are already enrolled in the M.S.W. program.

Additional information may be obtained from Virginia Commonwealth University, School of Social Work, Box 842027, Richmond, VA 23284-2027, Attention: Elizabeth Cramer, Ph.D., [ecramer@vcu.edu; (804) 828-9027], Certificate in Gender Violence Intervention Adviser. Detailed information about the Certificate in Gender Violence Intervention is available from Sarah Jane Brubaker, Ph.D., Wilder School [sbrubaker@vcu.edu; (804) 827-2400]. Certificate courses can be completed after M.S.W. degree requirements have been completed as long as there is continuous enrollment. All M.S.W. students interested in the certificate should consult the certificate adviser when they choose their field placements to ensure that at least one placement is conducted in a setting that addresses gender violence.

See the individual program pages (http://bulletin.vcu.edu/graduate/school-government-public-affairs/gender-violence-intervention-certificate/) for specific admission requirements, application deadlines, program goals, student learning outcomes, degree requirements and graduation requirements for the M.S.W. and Certificate in Gender Violence Intervention programs.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Geographic Information Systems, Certificate in (Post-baccalaureate graduate certificate)

Program goal

The graduate Certificate in Geographic Information Systems emphasizes the core functions and applications of GIS. It provides specialized training in the operations and techniques related to the creation, analysis,
modeling, visualization, interpretation and management of geographic information.

The certificate program is designed to meet the educational needs of both traditional and nontraditional students. The GIS program prepares traditional students to utilize GIS in their major areas of study. Nontraditional students can also take advantage of the certificate program to learn and/or upgrade GIS knowledge and skills that are applicable and important to their professions.

**Student learning outcomes**

1. Students should display evidence of having developed a multidisciplinary understanding of urban life.
2. Students will demonstrate an understanding of, and a willingness to act in accordance with, the ethics and values of the professional.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines. 

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

**Admission requirements**

<table>
<thead>
<tr>
<th>Degree</th>
<th>Semester(s) of entry:</th>
<th>Deadline dates:</th>
<th>Test requirements:</th>
</tr>

<tbody>
<tr>
<td>Certificate</td>
<td>Fall</td>
<td>Apr 1 (Mar 1 for financial aid)</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Spring</td>
<td>Oct 1</td>
<td></td>
</tr>
</tbody>
</table>

**Special requirements**

- Only applicants with prior GIS training, course work or work experience are considered for spring admissions. Other applicants should apply for fall admission due to course sequencing and prerequisites.
- These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester.

In addition to the general admission requirements of the VCU Graduate School (p. 35), the prerequisites and general criteria of eligibility for admission to the GIS certificate program include:

1. Completion of an official application form
2. Three letters of reference
3. Letter of intent describing interest in applying for the Certificate in Geographic Information Systems
4. An official transcript showing successful completion of baccalaureate degree or its equivalent from an accredited college or university with a minimum grade point average of 2.7 (out of 4.0) in the last 60 hours of undergraduate study

At any time, students in the GIS certificate program may apply for admission into the Master of Urban and Regional Planning, the Master of Public Administration or the Master of Science in Criminal Justice degree programs. If accepted into a master’s program, students may then transfer credits earned in the GIS certificate program toward partial fulfillment of the master’s degree.

**Degree requirements**

The Certificate in Geographic Information Systems can be completed in one academic year. In addition to general VCU Graduate School graduation requirements (p. 31), students must complete 12 graduate credit hours of GIS course work that includes two required and two elective courses with a minimum grade-point average of 3.0 (out of 4.0).

Homeland Security and Emergency Preparedness, Certificate in (Post-baccalaureate graduate certificate)

Program goal

This certificate program complements a student's other fields of interest in public and government affairs. The curriculum focuses upon international and domestic security and preparedness issues related to terrorist threats, such as the 9/11 attack, and natural disasters, such as Hurricane Katrina. Since the attacks of Sept. 11, 2001, homeland security and emergency preparedness has become a critical aspect of governmental policy at the federal, state and local levels, as well as within the private sector. The L. Douglas Wilder School of Government and Public Affairs believes that a stable and productive evolution of public and private sector policies in this area can only be achieved if academe recognizes and accepts its role in developing scholars, professional policy analysts and informed governmental decision makers.

Student learning outcomes

Students will achieve comprehension of the theory and practice of homeland security and emergency preparedness and be able to analyze policy and synthesize information.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.
Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

</tbody>
</table>

Special requirements
• Admission applications that do not have a decision will automatically carry over to the next semester for consideration.

Applicants must meet all general admission requirements of the VCU Graduate School. (p. 35)

Degree requirements
In addition to general VCU Graduate School graduation requirements (p. 31), the graduate certificate program requires 15 credit hours, comprising five three-credit-hour graduate courses delivered through a combination of online technology and one on-campus session (three days) as described below. The courses offered in the certificate program are the same as those taken by students in the master’s program. With minimum grades of B and upon acceptance into the master’s program, these courses are fully transferable to the Master of Arts in Homeland Security and Emergency Preparedness degree program.

Online study
Web-based course delivery in an asynchronous format is designed around each course’s own Blackboard site.

Homeland Security and Emergency Preparedness, Master of Arts (M.A.)

Program goal
The Master of Arts in Homeland Security and Emergency Preparedness degree program is designed in the broadest interdisciplinary sense. Students will learn theoretical and practical knowledge that will prepare them for private or public sector employment in the expanding area of homeland security and emergency preparedness and/or further study in numerous areas of public policy. The curriculum focuses upon international and domestic security and preparedness issues related to terrorist threats, such as the 9/11 attack, and natural disasters, such as Hurricane Katrina. Since the attacks of Sept. 11, 2001, homeland security and emergency preparedness has become a critical aspect of governmental policy at the federal, state and local levels as well as within the private sector. The L. Douglas Wilder School of Government and Public Affairs believes that a stable and productive evolution of public and private sector policies in this area can only be achieved if academe recognizes and accepts its role in developing scholars, professional policy analysts and informed governmental decision makers.
The master's degree is an online, distance-learning program. VCU’s program takes a broad interdisciplinary approach to preparedness that will give students the ability to see the larger organizational, social, political, ethical and economic aspects of disaster studies, in addition to the policy-making and implementation aspects. The scholarly study of homeland security and emergency preparedness rests at the intersection of national defense, emergency management, law enforcement and policy management. With expertise in criminal justice, geography, government (local, state, federal and foreign), international affairs, policy planning and public administration, the Wilder School is particularly well-suited for such a program. Its location in the state capital and situated just 90 minutes from the nation's capital also provides easy access to homeland security institutions and practitioners.

Student learning outcomes
1. Students will achieve comprehension of the theory and practice of homeland security and emergency preparedness and be able to analyze policy and synthesize information in five key areas: risk and vulnerability analysis, strategic planning dilemmas of disasters and disaster preparedness, cybersecurity, institutional coordination, and intelligence operations and legal/constitutional aspects.
2. Students will develop advanced skills in expository writing and oral presentation.
3. Students will achieve comprehension of the theoretical and practical principles of emergency preparedness for both natural disasters and terrorist incidents and be able to analyze key topics related to natural disasters, emergency planning, terrorism and counterterrorism.
4. Students will perform research, policy analysis and risk assessment using several methodological and theoretical approaches to homeland security and emergency preparedness.
5. Students will also be able to evaluate scholarly and practitioner analyses of homeland security and emergency preparedness.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Admission requirements

<table>
<thead>
<tr>
<th>Degree:</th>
<th>Semester(s) of entry:</th>
<th>Deadline dates:</th>
<th>Test requirements:</th>
</tr>
</thead>
<tbody>
<tr>
<td>M.A.</td>
<td>Fall</td>
<td>Apr 1 (Mar 1 for financial aid)</td>
<td>GRE, GMAT, MAT or LSAT</td>
</tr>
<tr>
<td></td>
<td>Spring</td>
<td>October 1</td>
<td></td>
</tr>
</tbody>
</table>

Special requirements
- These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester.

In addition to the general admission requirements of the VCU Graduate School (p. 35), selection is made on the basis of prior academic performance, professional accomplishments and other indicators of the ability to pursue graduate studies and a professional career in a field related to homeland security and emergency preparedness. The application for admission requires:

1. A transcript documenting the completion of a bachelor’s degree
2. Three letters of reference (including both academic and professional references if possible)
3. A current resume
4. Satisfactory standardized test score (GRE, GMAT, MAT, LSAT)
5. A minimum 2.7 GPA (on a 4.0 scale) in the last 60 semester hours of undergraduate work

Students not meeting these requirements who have demonstrated advanced competency on a professional basis may be admitted to the program provisionally. The provisional period shall consist of the first
nine hours of designated graduate work in which all grades must be no
less than B. Provisional admission does not constitute a waiver of the
requirement related to a standardized test.

Degree requirements

In addition to general VCU Graduate School graduation requirements
(p. 31), students must complete a minimum of 36 graduate credit hours
with a cumulative minimum GPA of 3.0.

Off-campus study

Web-based course delivery is designed around each course’s own web-
based site utilizing the Blackboard education system, which provides the
following:

1. Course syllabus
2. Course reference materials and links to supporting websites
3. Course lectures
4. Faculty-student and student-student communications via weekly
discussion topics
5. Student writing assignments

Participation in online discussions is mandatory and will count for
a significant percentage of each student’s grades. Written work is
submitted, evaluated and returned to students via the Blackboard
education system assignment function.

Student learning outcomes

1. To understand the nonprofit sector’s relationship to the for-profit and
government sectors
2. To know how to build a fundraising and donor communication plan
model
3. To understand how to budget and evaluate the financial management
practices of nonprofit organizations
4. To have the skills to analyze and implement laws impacting nonprofit
organizations and their governance

Nonprofit Management, Certificate in
(Post-baccalaureate graduate certificate)

Program goal

The program mission is to empower community leaders with the
knowledge, theory, research and real-world applications needed to
creatively solve public issues and shape public policy. The program
equips current and future executives, boards, staff and volunteers to lead,
govern and manage nonprofit organizations collaboratively, thoughtfully
and ethically.

In the graduate Certificate in Nonprofit Management program, students
gain knowledge and skills in nonprofit governance, management,
fundraising, and program development and evaluation that they will need
to become leaders and change agents in this rapidly growing sector. The
school welcomes degree applicants from any undergraduate major, as
entry- and top-level employees in nonprofit organizations have a wide
range of backgrounds, including the sciences and humanities, social
sciences, and technology. Courses are scheduled in the evening and on
weekends with the working professional in mind.

VCU Graduate Bulletin, VCU Graduate School
and general academic policies and regulations
for all graduate students in all graduate
programs

The VCU Graduate Bulletin website documents the official admission and
academic rules and regulations that govern graduate education for all
graduate programs at the university. These policies are established by the
graduate faculty of the university through their elected representatives to
the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-
campus, to be familiar with the VCU Graduate Bulletin as well as the
Graduate School website (http://www.graduat.vcu.edu/) and academic
regulations in individual school and department publications and
on program websites. However, in all cases, the official policies and
procedures of the University Graduate Council, as published on the VCU

Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

**Special requirements**

- Students who achieve a minimum GPA of 3.6 in certificate course work in the L. Douglas Wilder School of Government and Public Affairs are eligible to apply to the Master of Public Administration program, provided they do so before the completion of the certificate. The student must still formally apply and be admitted to the M.P.A. program. A 3.6 GPA in certificate work does not guarantee admission to the M.P.A. program.

In addition to the general admission requirements of the VCU Graduate School (p. 35), admission to the certificate program requires the same procedure used in applying to the M.P.A., except that a standardized examination is not required.

**Degree requirements**

In addition to general VCU Graduate School graduation requirements (p. 31), the certificate requires a total of 15 graduate credit hours, comprising four courses in the graduate public administration program and one elective. The elective may be from the public administration curriculum or from elsewhere within the school or university.

Social Work, Master of (M.S.W.)/Nonprofit Management, Certificate in (Post-baccalaureate graduate certificate) [dual degree]

Through a cooperative arrangement with the L. Douglas Wilder School of Government and Public Affairs, Master of Social Work students pursuing the concentration in administration, planning and policy practice may simultaneously earn the post-baccalaureate graduate certificate in nonprofit management offered by the L. Douglas Wilder School of Government and Public Affairs. Visit the Wilder School (https://wilder.vcu.edu/programs/public-administration/)’s page for more information.

Application process
To earn the Certificate in Nonprofit Management simultaneously with the M.S.W., it is necessary to complete a graduate admissions application for the certificate program; however, no supporting documents are required for students who are already enrolled in good standing in the M.S.W. degree program.

Certificate requirements for M.S.W. students
Social work students enrolled in the SWAPPP concentration are required to complete three nonprofit courses: PADM 656, PADM 659 and PADM 661. Two social work SWAPPP courses are substituted for six credit hours of the certificate’s 15 credit-hour requirement. One of these courses is SLWK 712. The second course may be SLWK 711 or SLWK 713.

Social work students enrolled in the clinical practice concentration are required to complete four nonprofit courses (PADM 650, PADM 656, PADM 659 and PADM 661) and one elective. Two social work courses, SLWK 602 and SLWK 606 (six credits), may substitute for PADM 650 (three credits).

Note: M.S.W. students pursuing the clinical practice concentration must complete the entire 15 credit hours required for the Certificate in Nonprofit Management. Any six of the PADM nonprofit credit hours will satisfy the M.S.W. elective requirement for either concentration.

See the individual program pages for specific admission requirements, application deadlines, program goals, student learning outcomes, degree requirements and graduation requirements for the stand-alone M.S.W. and Certificate in Nonprofit Management programs.

Public Administration, Master of (M.P.A.)

Program accreditation
National Association of Schools of Public Affairs and Administration

Program goals
The Master of Public Administration program’s mission supports a “generalist” conception of public administration. This seems quite appropriate as the students come from diverse academic and employment backgrounds and find jobs in a wide variety of government and nonprofit organizations.

The program’s mission includes the following goals:
1. Prepare professional public managers, public officials and citizens to meet the challenges of public service in both government and nonprofit sectors
2. Advance the state of knowledge in the field of public administration through scholarly research and publications
3. Serve the profession and local, state, federal and international communities by extending faculty expertise and intellectual resources

Student learning outcomes
1. Students will participate in and contribute to the policy process.
2. Students will lead and manage in public governance.
3. Students will analyze, synthesize, think critically, solve problems and make decisions.
4. Students will articulate and apply a public service perspective.
5. Students will communicate and interact productively with a diverse and changing workforce and citizenry.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the

Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

</tbody>
</table>

Special requirements

- These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester. Please contact the program chair with specific application questions.
performance, professional accomplishments and other indicators of the ability to pursue graduate studies and a professional career in public management successfully. Specifically, the application for admission requires a transcript documenting the completion of a bachelor's degree, three letters of reference (including both academic and professional references if possible), a current resume and a satisfactory standardized test score (GRE, GMAT, MAT or LSAT). Students submitting LSAT scores must have taken an undergraduate math course (algebra, statistics or finite mathematics) and passed with a minimum grade of C.

No applicant will be considered for admission to the M.P.A. program within two years of having been terminated from the program or of having been rejected for admission to the program.

**Degree requirements**

The Master of Public Administration program is designed to meet the graduate educational needs of pre-service and in-service professionals for careers in public management and analysis in the public and nonprofit sectors. The degree requires a minimum of 36 graduate credit hours (39 credit hours for students with less than one year of experience in the public or nonprofit sector). In addition to the general VCU Graduate School graduation requirements (p. 31), M.P.A. students must meet the following requirements:

1. Students must complete a minimum of 36 graduate credit hours, as approved, with an overall minimum GPA of 3.0. Students who do not have at least one year of professional-level experience in the public sector or in a nonprofit agency are required to earn three additional hours of credit in a public service practicum/internship (for a total of 39 graduate credit hours for the degree).
2. Students may have no more than two C grades to graduate. Students who earn a D or F in a course will be dismissed from the program.
3. Students who are required to take the practicum/internship will usually do so during the summer between the first and second years or during the last semester of course work. The practicum must include a minimum of 300 hours as required by the National Association of Schools of Public Affairs and Administration. The scheduling of the practicum will be flexible enough to accommodate the needs of those students who pursue the degree on a part-time basis. Each practicum will be negotiated between VCU and the host agency, including the scope of work to be performed by the student, the type and extent of supervision, both within the agency and from the university, and the stipend. A learning contract will be executed among the department, the agency and the student. A written student project is required to complete the internship.
4. All students are required to complete the courses in the core curriculum unless competence in the subject matter can be demonstrated on the basis of previous experience or coursework. Course work that is waived must be replaced by approved substitutions in order to meet the minimum 36 (or 39) graduate credit hours required for the degree.

**Public Administration, Master of (M.P.A.), accelerated Bachelor of Arts in Political Science (B.A.) to master’s**

**Program accreditation**

National Association of Schools of Public Affairs and Administration

**Apply online at** graduate.admissions.vcu.edu (http://wwwgraduate.admissions.vcu.edu).

This program permits selected students to earn the B.A. and M.P.A. in a minimum of five years by taking certain master's-level courses during the senior year of their undergraduate program. The program is restricted to students with strong credentials and a clear interest in careers in the public or nonprofit sector. To be eligible, students must have completed 90 credit hours of undergraduate course work and have an overall GPA.
of 3.0, with a GPA of 3.3 in political science courses. The accelerated program is limited to students majoring in political science who have a minimum of 9 credit hours in political science courses.

To be considered for acceptance into the program and before enrolling in 600-level M.P.A. courses, students must complete the application to graduate study; submit standardized test scores and supply the supporting information required for admission. Upon being accepted into the accelerated program, students must meet the same standards of performance as a graduate student that are described in detail in the satisfactory academic progress (p. 25) section of the Graduate Bulletin, must maintain a 3.0 GPA and must satisfactorily complete all of the requirements for the degree, as stated in this bulletin. Guidance to students admitted to the accelerated program is provided by the public administration program director. Students should contact the M.P.A. graduate director for more information about admission procedures.

To graduate with a bachelor's degree, a student must complete 120 credit hours of course work. Of these credits, 33 must be in political science. Of the 33 political science credit hours, the following 15 are required:

<table>
<thead>
<tr>

</tr>
<tr>
<td>Total Hours</td>
<td></td>
<td>15</td>
</tr>
</tbody>
</table>

Students enrolled in the accelerated program may take up to six credits of graduate public administration courses in each of the final two semesters of their undergraduate course work. These courses are shared credit hours with the graduate program, meaning that they will be applied toward the undergraduate degree requirement and the graduate degree requirement. A maximum of 12 credit hours may be taken prior to the completion of the baccalaureate degree. The bachelor's degree will be awarded when the student has completed all requirements for the undergraduate degree, which may include the 12 graduate public administration credit hours.

The graduate courses that may be taken in the public administration program once a student is admitted to the accelerated program are as follows:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>PADM/GVPA 601</td>

Public Administration, Master of (M.P.A.)/Juris Doctor (J.D.) from the University of Richmond [dual degree]

Program accreditation
National Association of Schools of Public Affairs and Administration

A cooperative arrangement with the University of Richmond School of Law makes it possible for students to receive a law degree from the University of Richmond and the Master of Public Administration from VCU. The dual degree program is designed to provide its graduates with competency in both public administration and law. This competency is applicable to areas of practice drawing upon knowledge and skills from each of these fields. The program brings together persons interested in both the broader aspects of public policy and government affairs and the law. It also brings together two fields that require complementary knowledge and skills that may be directed toward solving problems that are associated with the affairs of the government and nonprofit sectors. This integration of education in public administration and law draws on the contributions that each discipline can make to a professional knowledge base for practice in both fields.

Apply online at graduate.admissions.vcu.edu (http://www.gradaute.admissions.vcu.edu).

Application process
Interested students must apply separately for and be admitted to the T.C. Williams School of Law at the University of Richmond and the Master of Public Administration program at VCU. Students who are accepted into the dual degree program are permitted to apply 12 credit hours of work in the M.P.A. degree program toward meeting the graduation requirements in the T.C. Williams School of Law and up to 12 credit hours of work in the University of Richmond law school toward meeting the graduation requirements for the M.P.A. This credit application enables participants in the dual degree program to complete the requirements for the J.D. and the M.P.A. in an estimated four years of full-time course work. Applicants for this program are required to meet all admission and academic standards of the T.C. Williams School of Law of the University of Richmond, the VCU Graduate School and the M.P.A. program.

Graduate program director
Myung H. Jin, Ph.D.
Associate professor and program chair
Public Management, Certificate in (Post-baccalaureate graduate certificate)

Program goal
The graduate certificate in public management is a program designed to enable practitioners in government and nonprofit organizations to acquire knowledge and skills in public administration without pursuing a full master's degree.

Student learning outcomes
1. Students will participate in and contribute to the policy process.
2. Students will lead and manage in public governance.
3. Students will articulate and apply a public service perspective.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Special requirements
- Students who achieve a minimum GPA of 3.6 in certificate course work in the L. Douglas Wilder School of Government and Public Affairs are eligible to apply to the Master of Public Administration program, provided they do so before the completion of the certificate. The student must still formally apply and be admitted to the M.P.A. program. A 3.6 GPA in certificate work does not guarantee admission to the M.P.A. program.

In addition to the general admission requirements of the VCU Graduate School (p. 35), admission to the certificate program requires the same procedure in applying to the M.P.A., except that a standardized examination is not required.

Degree requirements
In addition to general VCU Graduate School graduation requirements (p. 31), the certificate requires a total of 18 hours of graduate credit hours involving a mix of required and elective courses. The courses are the same as those offered to M.P.A. students.

Public Policy and Administration, Doctor of Philosophy (Ph.D.)

Program Mission
The mission of the Ph.D. in Public Policy and Administration program is to provide students with the knowledge and skills that will enable them to conduct original and scholarly research in academic institutions, governmental agencies and public policy research institutions. The purpose of the program is to prepare students for scholarly and leadership roles in government, universities, research organizations and other settings where knowledge and research skills in public policy and administration are needed. The doctoral program is committed to accomplishing this mission by creating an intellectually vibrant atmosphere for scholarship involving an active faculty from a broad spectrum of academic disciplines and substantial interaction with government agencies and community groups.

Program Goals
1. Enable students to develop expertise in a particular area of public policy
2. Enable students to apply their knowledge and skills in order to conduct original and scholarly research
Student learning outcomes

1. Students will be able to expertly apply public policy theories, integrating relevant ideas, concepts and approaches from the humanities, social sciences, law and public administration to policy analysis, formulation and implementation.
2. Students will be able to demonstrate mastery of a particular area of public policy.
3. Students will be able to formulate appropriate research questions related to public policy and apply methodological knowledge to develop an appropriate research design for a research proposal.
4. Students will be able to conduct original and scholarly research on public policy issues.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

<tbody>
<tr>
<td>Ph.D.</td>
<td>Fall</td>
<td>Dec 15 for assistantships (Jan 30 final date for admission consideration)</td>
<td>GRE, GMAT, MAT or LSAT; international applicants TOEFL</td>
</tr>
</tbody>
</table>

Special requirements

- Master's degree, J.D. or M.D. from an accredited university. Graduate assistantships are only awarded for fall admission. For students wishing to be considered for a limited number of fellowships, materials must be received no later than Dec. 15. Spring admissions are considered exceptions and will be considered on a case-by-case basis.

Admission is open to qualified persons without regard to age, physical disability, national origin, race, religion or gender. Admission is competitive. The admission process is intended to assure a reasonable fit between the student's professional and research interests and faculty expertise. Consequently, otherwise qualified applicants may be denied admission.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants to the program must hold a master's degree or a recognized post-baccalaureate degree in one of the professions such as law or medicine from an accredited institution of higher education. A standardized test score, fewer than five years old, is required. Accepted examinations include the Graduate Record Examination, the Graduate Management Admissions Test, the Miller Analogies Test and the Law School Admissions Test and the Test of English as a Foreign Language for international students. Professional experience is not required, but is considered desirable.

In order to apply for admission to the Ph.D. in Public Policy and Administration program, prospective students must submit:

1. A VCU application for graduate study
2. Transcripts from all previous colleges or universities
3. Scores from a standardized examination (GRE, GMAT, MAT or LSAT and TOEFL for international students)
4. Three letters of reference
5. A personal statement describing reasons for applying to the program
6. A current professional resume
Admission standards
Applicants are evaluated based on the entire admission package; however, the following provides some guidelines for a competitive application.

1. Cumulative minimum GPA of 3.6 (on a four-point scale) or equivalent for graduate-level work
2. Standardized examination scores less than five years old (GRE preferred)
3. Three references – a minimum of one academic recommendation attesting to the applicant’s ability to succeed in doctoral-level work
4. Personal statement, resume, curriculum vitae that:
   a. Clearly articulates the applicant’s academic research interests whereby a decision can be made as to the applicant’s “fit” with the program
   b. Shows a clear indication of a faculty match and expertise for the applicant’s research interests
   c. Displays enthusiasm for the field of public policy and administration
   d. Is well-written and error-free
5. All students admitted to the program must have completed prior to admission, or are required to complete during the first year, the following graduate-level courses (or their equivalents):
   b. Statistics (equivalent of PADM 624)
   c. Public policy, economics or administration/management

The primary admission deadline is Jan. 30 for enrollment to begin the following fall semester; however, materials must be received no later than Dec. 15 from those students wishing to be considered for assistantships. A small number of special admissions may be offered (Oct. 15 application deadline) for entry the following spring semester; however, these are considered on a case-by-case basis. Assistantships are only offered to those offered full-time admission in the fall. Applicants who wish to be considered for the Oct. 15 deadline must include a letter requesting and justifying early admission. If the request for early consideration is not accepted, the application will be held over to the Jan. 30 application deadline for consideration for the following fall admission.

While VCU Graduate School policy allows up to six credit hours of course work to be taken as a nondegree-seeking student prior to formal admission, taking such courses in no way guarantees admission to the program. Also, transfer credit hours are only considered for elective courses. Core courses must be taken at VCU.

Application information is available from the L. Douglas Wilder School of Government and Public Affairs Office of Graduate Advising or the Graduate Admissions Office. International applicant information and materials are available from International Admissions (http://international.admissions.vcu.edu).

Degree requirements
The doctoral program is structured around a core curriculum and four areas of concentration. The curriculum is designed to provide a sound intellectual foundation for the pursuit of scholarly research in areas of public policy, urban and regional policy, public administration and criminal justice policy. Students will select a concentration after the first year of study and after passing the comprehensive examination.

In addition to general VCU Graduate School graduation requirements (p. 31), students take a minimum of 45 graduate credit hours of course work and dissertation research in addition to any prerequisites that might be necessary. Six of these courses are part of the core, and at least four are concentration courses. The remaining two electives are to be taken outside the concentration with additional methodology courses highly recommended. Required courses generally will be available on an evening or weekend schedule.

Course work in the Ph.D. program has a strong orientation toward research, both applied and theoretical. Where appropriate, course work may be linked to funded university projects or to external agency-based analytical work. Courses emphasize research, writing and presentation skills.

All students must take a comprehensive qualifying examination on the core course requirements and a written or oral comprehensive examination in the concentration and must be approved by the VCU Graduate School for degree candidacy before beginning work on their dissertations.

</table>

Concentration courses
All students will select a concentration after the first year of study and after passing the comprehensive examination. They will take four courses in one of the concentrations (criminal justice policy, public administration, public policy, or urban and regional policy). Courses will be selected from a list designated by the concentration committee for each area. The concentration committee will approve the program of study for each student in the concentration.

Electives outside concentration
Students will take at least two elective courses outside the concentration. Students may take courses at the 500-level or higher from other Ph.D. concentration areas (as listed under each concentration) and other programs such as homeland security, criminal justice, public administration, and urban and regional planning within the Wilder School. Alternately, students may choose two elective courses from other VCU graduate programs with the approval of the Ph.D. director.

Dissertation research
PPAD 898 | Dissertation Research (minimum)                          | 9     |

Total Hours 45
The minimum total of graduate credit hours required for this degree is 45.
Qualifying examinations
After completing all of the core courses in the Ph.D. program, each student takes a comprehensive qualifying examination on the core. The examination is designed to evaluate the mastery students have achieved over the body of knowledge represented by the core. It is intended to measure the ability of students to organize, integrate and creatively apply the knowledge in the field to important problems. Although organized around the courses in the core, the examination is not restricted to material covered in those courses. It is expected that doctoral students will read well beyond the confines of individual courses.

In order to continue in the program, students must attempt the qualifying examination no later than the next regular semester following the completion of the core course requirements. They must pass the exam by the end of the second regular semester after completing the core course requirements. A student may attempt the examination twice. Examinations are offered twice per year.

A student also must take a written or oral comprehensive examination in the concentration. The concentration faculty will determine the form of the examination. A student may attempt the examination twice. Each student must pass this second examination before defending a dissertation proposal.

Dissertation
After completing all course work for the concentration and passing both qualifying examinations, students must prepare a dissertation involving original research that contributes to the body of knowledge in the field. A committee approved by the associate dean of the Wilder School supervises the dissertation work. The chair of the committee must be appointed as graduate faculty and be a core or affiliate faculty member of the Ph.D. program.

The first formal step in the dissertation process is the development and defense of a dissertation prospectus that frames the problem to be studied, provides background on the problem, presents a review of relevant literature and justifies the methodology to be used. The defense of the prospectus as well as the completed dissertation must be presented orally and be approved by the dissertation committee. The dissertation defense is conducted in a forum open to other students and faculty members.

Student learning outcomes
1. Students will be able to expertly apply public policy theories, integrating relevant ideas, concepts and approaches from the humanities, social sciences, law and public administration to policy analysis, formulation and implementation.
2. Students will be able to demonstrate mastery of a particular area of public policy.
3. Students will be able to formulate appropriate research questions related to public policy and apply methodological knowledge to develop an appropriate research design for a research proposal.
4. Students will be able to conduct original and scholarly research on public policy issues.

Public Policy and Administration, Doctor of Philosophy (Ph.D.) with a concentration in criminal justice policy

Program mission
The mission of the Ph.D. in Public Policy and Administration program is to provide students with the knowledge and skills that will enable them to conduct original and scholarly research in academic institutions, governmental agencies and public policy research institutions. The purpose of the program is to prepare students for scholarly and leadership roles in government, universities, research organizations and other settings where knowledge and research skills in public policy and administration are needed. The doctoral program is committed to accomplishing this mission by creating an intellectually vibrant atmosphere for scholarship involving an active faculty from a broad spectrum of academic disciplines and substantial interaction with government agencies and community groups.

Program goals
1. Enable students to develop expertise in a particular area of public policy
2. Enable students to apply their knowledge and skills in order to conduct original and scholarly research

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. Public Policy and Administration, Doctor of Philosophy (Ph.D.) with a concentration in public administration

Program mission
The mission of the Ph.D. in Public Policy and Administration program is to provide students with the knowledge and skills that will enable them to conduct original and scholarly research in academic institutions, governmental agencies and public policy research institutions. The purpose of the program is to prepare students for scholarly and leadership roles in government, universities, research organizations and other settings where knowledge and research skills in public policy and administration are needed. The doctoral program is committed to accomplishing this mission by creating an intellectually vibrant atmosphere for scholarship involving an active faculty from a broad spectrum of academic disciplines and substantial interaction with government agencies and community groups.

Program goals
1. Enable students to develop expertise in a particular area of public policy
2. Enable students to apply their knowledge and skills in order to conduct original and scholarly research

Student learning outcomes
1. Students will be able to expertly apply public policy theories, integrating relevant ideas, concepts and approaches from the humanities, social sciences, law and public administration to policy analysis, formulation and implementation.
2. Students will be able to demonstrate mastery of a particular area of public policy.
3. Students will be able to formulate appropriate research questions related to public policy and apply methodological knowledge to develop an appropriate research design for a research proposal.
4. Students will be able to conduct original and scholarly research on public policy issues.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu.

Admission requirements

<thead>
<tr>
<th>Degree</th>
<th>Semester(s) of entry</th>
<th>Deadline dates</th>
<th>Test requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ph.D.</td>
<td>Fall</td>
<td>Dec 15 for assistantships (Jan 30 final date for admission consideration)</td>
<td>GRE, GMAT, MAT or LSAT; international applicants TOEFL</td>
</tr>
</tbody>
</table>

Special requirements

- Master’s degree, J.D. or M.D. from an accredited university. Graduate assistantships are only awarded for fall admission. For students wishing to be considered for a limited number of fellowships, materials must be received no later than Dec. 15. Spring admissions
are considered exceptions and will be considered on a case-by-case basis.

Admission is open to qualified persons without regard to age, physical disability, national origin, race, religion or gender. Admission is competitive. The admission process is intended to assure a reasonable fit between the student's professional and research interests and faculty expertise. Consequently, otherwise qualified applicants may be denied admission.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants to the program must hold a master's degree or a recognized post-baccalaureate degree in one of the professions such as law or medicine from an accredited institution of higher education. A standardized test score, fewer than five years old, is required. Accepted examinations include the Graduate Record Examination, the Graduate Management Admissions Test, the Miller Analogies Test and the Law School Admissions Test and the Test of English as a Foreign Language for international students. Professional experience is not required, but is considered desirable.

In order to apply for admission to the Ph.D. in Public Policy and Administration program, prospective students must submit:

1. A VCU application for graduate study
2. Transcripts from all previous colleges or universities
3. Scores from a standardized examination (GRE, GMAT, MAT or LSAT and TOEFL for international students)
4. Three letters of reference
5. A personal statement describing reasons for applying to the program
6. A current professional resume

**Admission standards**

Applicants are evaluated based on the entire admission package; however, the following provides some guidelines for a competitive application.

1. Cumulative minimum GPA of 3.6 (on a four-point scale) or equivalent for graduate-level work
2. Standardized examination scores less than five years old (GRE preferred)
3. Three references – a minimum of one academic recommendation attesting to the applicant’s ability to succeed in doctoral-level work
4. Personal statement, resume, curriculum vitae that:
   a. Clearly articulates the applicant’s academic research interests whereby a decision can be made as to the applicant’s “fit” with the program
   b. Shows a clear indication of a faculty match and expertise for the applicant’s research interests
   c. Displays enthusiasm for the field of public policy and administration
   d. Is well-written and error-free
5. All students admitted to the program must have completed prior to admission, or are required to complete during the first year, the following graduate-level courses (or their equivalents):
   b. Statistics (equivalent of PADM 624)
   c. Public policy, economics or administration/management

The primary admission deadline is Jan. 30 for enrollment to begin the following fall semester; however, materials must be received no later than Dec. 15 from those students wishing to be considered for assistantships. A small number of special admissions may be offered (Oct. 15 application deadline) for entry the following spring semester; however, these are considered on a case-by-case basis. Assistantships are only offered to those offered full-time admission in the fall. Applicants who wish to be considered for the Oct. 15 deadline must include a letter requesting and justifying early admission. If the request for early consideration is not accepted, the application will be held over to the Jan. 30 application deadline for consideration for the following fall admission.

While VCU Graduate School policy allows up to six credit hours of course work to be taken as a nondegree-seeking student prior to formal admission, taking such courses in no way guarantees admission to the program. Also, transfer credit hours are only considered for elective courses. Core courses must be taken at VCU.

Application information is available from the L. Douglas Wilder School of Government and Public Affairs Office of Graduate Advising or the Graduate Admissions Office. International applicant information and materials are available from International Admissions (http://international.admissions.vcu.edu).

**Degree requirements**

The doctoral program is structured around a core curriculum and four areas of concentration. The curriculum is designed to provide a sound intellectual foundation for the pursuit of scholarly research in areas of public policy, urban and regional policy, public administration and criminal justice policy. Students will select a concentration after the first year of study and after passing the comprehensive examination.

In addition to general VCU Graduate School graduation requirements (p. 31), students take a minimum of 45 graduate credit hours of course work and dissertation research in addition to any prerequisites that might be necessary. Five of these courses are part of the core, and at least four are concentration courses. The remaining two electives are to be taken outside the concentration with additional methodology courses highly recommended. Required courses generally will be available on an evening or weekend schedule.

Course work in the Ph.D. program has a strong orientation toward research, both applied and theoretical. Where appropriate, course work may be linked to funded university projects or to external agency-based analytical work. Courses emphasize research, writing and presentation skills.

All students must take a comprehensive qualifying examination on the core course requirements and a written or oral comprehensive examination in the concentration and must be approved by the VCU Graduate School for degree candidacy before beginning work on their dissertations.

**Curriculum requirements**

<td>3</td>
</tr>
</tbody>
</table>
After completing all of the core courses in the Ph.D. program, each student takes a comprehensive qualifying examination on the core. The examination is designed to evaluate the mastery students have achieved over the body of knowledge represented by the core. It is intended to measure the ability of students to organize, integrate and creatively apply the knowledge in the field to important problems. Although organized around the courses in the core, the examination is not restricted to material covered in those courses. It is expected that doctoral students will read well beyond the confines of individual courses.

In order to continue in the program, students must attempt the qualifying examination no later than the next regular semester following the completion of the core course requirements. They must pass the exam by the end of the second regular semester after completing the core course requirements. A student may attempt the examination twice. Examinations are offered twice per year.

A student also must take a written or oral comprehensive examination in the concentration. The concentration faculty will determine the form of the examination. A student may attempt the examination twice. Each student must pass this second examination before defending a dissertation proposal.

Dissertation

After completing all course work for the concentration and passing both qualifying examinations, students must prepare a dissertation involving original research that contributes to the body of knowledge in the field. A committee approved by the associate dean of the Wilder School supervises the dissertation work. The chair of the committee must be appointed as graduate faculty and be a core or affiliate faculty member of the Ph.D. program.

The first formal step in the dissertation process is the development and defense of a dissertation prospectus that frames the problem to be studied, provides background on the problem, presents a review of relevant literature and justifies the methodology to be used. The defense of the prospectus as well as the completed dissertation must be presented orally and be approved by the dissertation committee. The dissertation defense is conducted in a forum open to other students and faculty.

Public Policy and Administration, Doctor of Philosophy (Ph.D.) with a concentration in urban and regional policy

Program mission

The mission of the Ph.D. in Public Policy and Administration program is to provide students with the knowledge and skills that will enable them to conduct original and scholarly research in academic institutions, governmental agencies and public policy research institutions. The purpose of the program is to prepare students for scholarly and leadership roles in government, universities, research organizations and other settings where knowledge and research skills in public policy and administration are needed. The doctoral program is committed to accomplishing this mission by creating an intellectually vibrant atmosphere for scholarship involving an active faculty from a broad spectrum of academic disciplines and substantial interaction with government agencies and community groups.

Program goals

1. Enable students to develop expertise in a particular area of public policy
2. Enable students to apply their knowledge and skills in order to conduct original and scholarly research

Student learning outcomes

1. Students will be able to expertly apply public policy theories, integrating relevant ideas, concepts and approaches from the humanities, social sciences, law and public administration to policy analysis, formulation and implementation.
2. Students will be able to demonstrate mastery of a particular area of public policy.
3. Students will be able to formulate appropriate research questions related to public policy and apply methodological knowledge to develop an appropriate research design for a research proposal.
4. Students will be able to conduct original and scholarly research on public policy issues.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.
It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.grad.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.vcu.edu).

Admission is open to qualified persons without regard to age, physical disability, national origin, race, religion or gender. Admission is competitive. The admission process is intended to assure a reasonable fit between the student's professional and research interests and faculty expertise. Consequently, otherwise qualified applicants may be denied admission.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants to the program must hold a master's degree or a recognized post-baccalaureate degree in one of the professions such as law or medicine from an accredited institution of higher education. A standardized test score, fewer than five years old, is required. Accepted examinations include the Graduate Record Examination, the Graduate Management Admissions Test, the Miller Analogies Test and the Law School Admissions Test and the Test of English as a Foreign Language for international students. Professional experience is not required, but is considered desirable.

In order to apply for admission to the Ph.D. in Public Policy and Administration program, prospective students must submit:

1. A VCU application for graduate study
2. Transcripts from all previous colleges or universities
3. Scores from a standardized examination (GRE, GMAT, MAT or LSAT and TOEFL for international students)
4. Three letters of reference
5. A personal statement describing reasons for applying to the program
6. A current professional resume

Admission standards

Applicants are evaluated based on the entire admission package; however, the following provides some guidelines for a competitive application.

1. Cumulative minimum GPA of 3.6 (on a four-point scale) or equivalent for graduate-level work
2. Standardized examination scores less than five years old (GRE preferred)
3. Three references – a minimum of one academic recommendation attesting to the applicant's ability to succeed in doctoral-level work
4. Personal statement, resume, curriculum vitae that:
   a. Clearly articulates the applicant’s academic research interests whereby a decision can be made as to the applicant’s “fit” with the program
   b. Shows a clear indication of a faculty match and expertise for the applicant’s research interests
   c. Displays enthusiasm for the field of public policy and administration
   d. Is well-written and error-free
5. All students admitted to the program must have completed prior to admission, or are required to complete during the first year, the following graduate-level courses (or their equivalents):
   b. Statistics (equivalent of PADM 624)
   c. Public policy, economics or administration/management

The primary admission deadline is Jan. 30 for enrollment to begin the following fall semester; however, materials must be received no later than Dec. 15 from those students wishing to be considered for assistantships.

Special requirements

• Master’s degree, J.D. or M.D. from an accredited university. Graduate assistantships are only awarded for fall admission. For students wishing to be considered for a limited number of fellowships, materials must be received no later than Dec. 15. Spring admissions are considered exceptions and will be considered on a case-by-case basis.
A small number of special admissions may be offered (Oct. 15 application deadline) for entry the following spring semester; however, these are considered on a case-by-case basis. Assistantships are only offered to those offered full-time admission in the fall. Applicants who wish to be considered for the Oct. 15 deadline must include a letter requesting and justifying early admission. If the request for early consideration is not accepted, the application will be held over to the Jan. 30 application deadline for consideration for the following fall admission.

While VCU Graduate School policy allows up to six credit hours of course work to be taken as a nondegree-seeking student prior to formal admission, taking such courses in no way guarantees admission to the program. Also, transfer credit hours are only considered for elective courses. Core courses must be taken at VCU.

Application information is available from the L. Douglas Wilder School of Government and Public Affairs Office of Graduate Advising or the Graduate Admissions Office. International applicant information and materials are available from International Admissions (http://international.admissions.vcu.edu).

**Degree requirements**

The doctoral program is structured around a core curriculum and four areas of concentration. The curriculum is designed to provide a sound intellectual foundation for the pursuit of scholarly research in areas of public policy, urban and regional policy, public administration and criminal justice policy. Students will select a concentration after the first year of study and after passing the comprehensive examination.

In addition to general VCU Graduate School graduation requirements (p. 31), students take a minimum of 45 graduate credit hours of course work and dissertation research in addition to any prerequisites that might be necessary. Five of these courses are part of the core, and at least four are concentration courses. The remaining two electives are to be taken outside the concentration with additional methodology courses highly recommended. Required courses generally will be available on an evening or weekend schedule.

Course work in the Ph.D. program has a strong orientation toward research, both applied and theoretical. Where appropriate, course work may be linked to funded university projects or to external agency-based analytical work. Courses emphasize research, writing and presentation skills.

All students must take a comprehensive qualifying examination on the core course requirements and a written or oral comprehensive examination in the concentration and must be approved by the VCU Graduate School for degree candidacy before beginning work on their dissertations.

**Curriculum requirements**

| PPAD 780  | Synthesizing Seminar in Public Policy            | 3     |
| PPAD 716  | Public Policy Economics                          | 3     |
| PPAD 750  | Seminar in Urban Policy                          | 3     |

Select six credits from the following concentration electives: 6

| URSP 637  | Planning Theory and Processes                    |       |
| URSP 643  | Housing Policy                                   |       |
| URSP 651  | Transportation Policy and Planning               |       |
| URSP 655  | Environmental Policy and Planning                |       |
| URSP 664  | Urban Economic Development Policy                |       |
| URSP 672  | Food Systems, Rural Development and Landscape Conservation |       |
| URSP 681  | International Urban Policy and Planning          |       |

**Electives outside concentration**

Students will take at least two elective courses outside the concentration. Students may take courses at the 500-level or higher from other Ph.D. concentration areas (as listed under each concentration) and other programs such as homeland security, criminal justice, public administration, and urban and regional planning within the Wilder School. Alternately, students may choose two elective courses from other VCU graduate programs with the approval of the Ph.D. director.

**Dissertation research**

| PPAD 898  | Dissertation Research (minimum)                 | 9     |

**Total Hours**

45

The minimum total of graduate credit hours required for this degree is **45**.

**Qualifying examinations**

After completing all of the core courses in the Ph.D. program, each student takes a comprehensive qualifying examination on the core. The examination is designed to evaluate the mastery students have achieved over the body of knowledge represented by the core. It is intended to measure the ability of students to organize, integrate and creatively apply the knowledge in the field to important problems. Although organized around the courses in the core, the examination is not restricted to material covered in those courses. It is expected that doctoral students will read well beyond the confines of individual courses.

In order to continue in the program, students must attempt the qualifying examination no later than the next regular semester following the completion of the core course requirements. They must pass the exam by the end of the second regular semester after completing the core course requirements. A student may attempt the examination twice. Examinations are offered twice per year.

A student also must take a written or oral comprehensive examination in the concentration. The concentration faculty will determine the form of the examination. A student may attempt the examination twice. Each student must pass this second examination before defending a dissertation proposal.

**Dissertation**

After completing all course work for the concentration and passing both qualifying examinations, students must prepare a dissertation involving original research that contributes to the body of knowledge in the field. A committee approved by the associate dean of the Wilder...
School supervises the dissertation work. The chair of the committee must be appointed as graduate faculty and be a core or affiliate faculty member of the Ph.D. program.

The first formal step in the dissertation process is the development and defense of a dissertation prospectus that frames the problem to be studied, provides background on the problem, presents a review of relevant literature and justifies the methodology to be used. The defense of the prospectus as well as the completed dissertation must be presented orally and be approved by the dissertation committee. The dissertation defense is conducted in a forum open to other students and faculty.

Sustainability Planning, Certificate in (Post-baccalaureate graduate certificate)

Program mission
The mission of the Certificate in Sustainability Planning is to provide students with a better understanding of society’s land use and natural resource systems, with a particular emphasis on the factors that contribute to or constrain their level of sustainability. The program aims to give students the knowledge and skills needed to identify and address barriers to sustainability and to formulate strategies to create more sustainable practices, systems and institutions. Using a holistic and integrated approach, the program emphasizes the interdependence of sociocultural, biophysical and political-economic dimensions of sustainability, especially as they relate to urban or other subnational regions.

An important theme of the program is that sustainability planning is primarily about influencing humans and their activities by modifying organizational structures, economic policies and legislative frameworks. Therefore, of paramount importance are topics normally associated with the social sciences, such as urban and regional planning, economics, political science and human geography. However, sustainability is an interdisciplinary science, and thus students must also examine topics typically linked to the biophysical sciences, such as ecology and geomorphology.

Students will acquire knowledge and skills that complement backgrounds in engineering, environmental and social sciences, business or other fields.

Program goals
1. Provide students with a better understanding of the sociocultural, biophysical and political-economic dimensions of the key problems faced by society with regard to natural resources and the environment — particularly in the context of urban and other subnational regions.
2. Develop students’ insights on the underlying causes of these problems and on the political-economic and sociocultural factors that constrain the ability to address them more effectively.
3. Help students acquire the analytical and professional skills needed to identify and address barriers to sustainability and to formulate strategies to develop more sustainable lifestyles, systems and institutions.

Student learning outcomes
1. Students will develop a well-rounded knowledge of sustainability, with particular emphasis on the following elements:
   a. Factors influencing sustainability at the individual, household, community, regional, national and international scale
   b. Balancing environmental, economic and social objectives in decision-making
   c. The relationship between the built and natural environments and their effects on human health and well-being
   d. Linkages among consumptions/lifestyle patterns, technology, regional carrying capacity and sustainability
   e. Political-economic influences on land/resource use, community design, transportation and other human systems
   f. Energy and natural resource efficiency and conservation
   g. Renewable resource use, environmental management and landscape/habitat protection
   h. Environmental remediation

2. Students will be able to communicate clearly and effectively, using a variety of methods, to enhance the collaborative and public nature of their work.
3. Students will acquire the analytical and research skills needed to investigate a sustainability-related problem and develop strategies for addressing it.
4. Students will acquire organizational skills and knowledge of management practices frequently employed within planning and related fields.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.
Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu/).

Admission requirements

Special requirements
- These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester.

In addition to the general admission requirements of the VCU Graduate School (p. 35), the prerequisites and general criteria of eligibility for admission to the sustainability planning certificate program include:

1. Completion of an official application form
2. Three letters of reference
3. Letter of intent describing interest in applying for the Certificate in Sustainability Planning
4. An official transcript showing successful completion of a baccalaureate degree or its equivalent from an accredited college or university with a minimum grade point average of 2.7 (out of 4.0) in the last 60 hours of undergraduate study

All courses in the graduate Certificate in Sustainability Planning may be applied to meet the requirement of the Master of Urban and Regional Planning degree. However, successful completion of the certificate does not guarantee admission into the M.U.R.P. degree program.

Curriculum requirements
The mission of the Certificate in Sustainability Planning is to provide students with a better understanding of society's land use and natural resource systems, with a particular emphasis on the factors that contribute to or constrain their level of sustainability. The three core courses will provide subject matter knowledge on sustainable community development, natural resources management, and environmental policy and planning. In addition, students must take one course that focuses on socioeconomic sustainability to gain knowledge on the social equity aspect of sustainability planning. The remaining electives will provide an opportunity for more in-depth knowledge and training in specific subfields within sustainability (e.g., energy, land use or food systems) or disciplines to which a sustainability approach can be applied, such as housing policy.

1

With approval from the program director, other 500- and 600-level courses offered within and beyond the Wilder School can fulfill the sustainability application electives requirements. The program director will review substitution requests to maintain a commitment to the specialization and general intent of the certificate.

The minimum total of graduate credit hours required for this certificate is 18.

Graduate program director
Damian Pitt, Ph.D.
Associate professor and program chair
Email: dpitt@vcu.edu
Professional Planning Practices. The goals for the program are to:

1. Create a diverse learning environment that cultivates engagement of diverse participants — both students and faculty — in the program.
2. Prepare students to be effective practitioners in a variety of planning-related organizations, especially in mature communities and regions, with competence in the preparation, presentation and implementation of professional plans and in doing planning-related work.
3. Produce scholarship that increases knowledge and understanding of sustainability and planning support systems as well as the development of innovative methodological approaches and solutions to address issues related to sustainable community development.
4. Provide useful planning services to mature communities and regions, in cooperation with private and public planners, as appropriate.

Student learning outcomes

1. Students will apply knowledge of planning and other related fields to real-world or theoretical settings.
2. Students will pose and solve urban planning problems.
3. Students will communicate effectively for professional contexts.
4. Students will lead effectively.
5. Students will apply the values and ethics of professional planning to their planning practices.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduated.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (http://graduate.admissions.vcu.edu).

Admission requirements

<table>
<thead>
<tr>
<th>Degree:</th>
<th>Semester(s) of entry:</th>
<th>Deadline dates:</th>

</tr>
</thead>
<tbody>
<tr>
<td>M.U.R.P.</td>
<td>Fall</td>
<td>Apr 1 (Mar 1 for assistantship consideration or financial aid)</td>
<td></td>
</tr>
</tbody>
</table>

Special requirements

- These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient
time for processing. Any application submitted too late for current semester processing will be considered for the following semester.

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following specifications apply:

1. Students must have a minimum 2.7 GPA (on a 4.0 scale) in their last 60 semester hours of undergraduate work. In addition, a minimum GPA of 3.0 must have been maintained in their undergraduate majors.

2. Students not meeting these requirements may be admitted to the program on a provisional basis. The provisional period shall consist of the first nine to 12 hours of designated graduate work in which all grades must be no less than B. Provisional admission does not constitute a waiver of the requirement related to a standardized test.

3. Generally, at least two of the three letters of reference should come from former faculty.

All courses in the post-baccalaureate graduate Certificate in Urban Revitalization and the post-baccalaureate graduate Certificate in Geographic Information Systems may be applied to meet the requirement of the Master of Urban and Regional Planning degree. However, successful completion of either certificate does not guarantee admission into the M.U.R.P. degree program.

**Degree requirements**

In addition to general VCU Graduate School graduation requirements (p. 31), students in the M.U.R.P. degree program must:

1. Complete a minimum of 48 graduate credit hours plus an internship (not for credit). A core of required courses accounts for 24 of these credit hours. A capstone requirement accounts for three or six of the required 48 credit hours. The remaining 18 or 21 credit hours are electives. A minimum overall GPA of 3.0 (on a 4.0 scale) is required for receipt of the M.U.R.P. degree. In addition, students must receive a minimum grade of B for all core and capstone courses.

2. Complete either a six-credit thesis (URSP 764) or prepare a three-credit professional plan project through the professional plan course (URSP 762). Program administrators request permission to utilize the grade of PR, in addition to normal letter grades (A, B, C, D or F) in URSP 762. This will allow students the ability to work on their plans over a more extended period of time, if necessary.

In selecting their elective courses, students may (1) opt for exposure to a wide array of planning-related subject matter (the generalist or comprehensive approach), (2) select one of the areas of specialization defined by the department's faculty (see the list that follows) or (3) develop an individualized program, focusing on one or more self-defined topics. Regardless of the approach selected, students are expected to meet regularly with their faculty advisers for discussion of their courses of study in relation to their career plans.

The following faculty-defined areas of specialization are offered by the department:

1. Community revitalization
2. Environmental planning
3. Metropolitan planning

**The minimum total of graduate credit hours required for this degree is 48.**
With the approval of the program chair, other appropriate graduate courses may be applied as electives.

Concentrations
If a student chooses to pursue a specific concentration, the concentration courses and corresponding credit hours will take the place of electives in the above list.

Internship
The internship is designed to give students practical experience in planning-related activities in an institutional context. Normally, the internship is taken during the summer between the first and second year or during the second year. Many opportunities for internship positions, as well as part- and full-time jobs in planning at all levels of government, exist within the Richmond area. Upon request, the internship requirement may be waived for students with substantial planning-related professional experience.

Urban and Regional Planning, Master of (M.U.R.P.) with a concentration in community revitalization

Program accreditation
Planning Accreditation Board

Program goals
The Master of Urban and Regional Planning degree program envisions a better future by enhancing the quality of life in mature communities and regions, particularly in Virginia, but also elsewhere in the United States and abroad, through strong planning education, high-quality scholarship and professional planning practices. The goals for the program are to:

1. Create a diverse learning environment that cultivates engagement of diverse participants — both students and faculty — in the program.
2. Prepare students to be effective practitioners in a variety of planning-related organizations, especially in mature communities and regions, with competence in the preparation, presentation and implementation of professional plans and in doing planning-related work.
3. Produce scholarship that increases knowledge and understanding of sustainability and planning support systems as well as the development of innovative methodological approaches and solutions to address issues related to sustainable community development.
4. Provide useful planning services to mature communities and regions, in cooperation with private and public planners, as appropriate.
Student learning outcomes
1. Students will apply knowledge of planning and other related fields to real-world or theoretical settings.
2. Students will pose and solve urban planning problems.
3. Students will communicate effectively for professional contexts.
4. Students will lead effectively.
5. Students will apply the values and ethics of professional planning to their planning practices.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester.

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following specifications apply:
1. Students must have a minimum 2.7 GPA (on a 4.0 scale) in their last 60 semester hours of undergraduate work. In addition, a minimum GPA of 3.0 must have been maintained in their undergraduate majors.
2. Students not meeting these requirements may be admitted to the program on a provisional basis. The provisional period shall consist of the first nine to 12 hours of designated graduate work in which all grades must be no less than B. Provisional admission does not constitute a waiver of the requirement related to a standardized test.
3. Generally, at least two of the three letters of reference should come from former faculty.

All courses in the post-baccalaureate graduate Certificate in Urban Revitalization and the post-baccalaureate graduate Certificate in Geographic Information Systems may be applied to meet the requirement of the Master of Urban and Regional Planning degree. However, successful completion of either certificate does not guarantee admission into the M.U.R.P. degree program.

Degree requirements
In addition to general VCU Graduate School graduation requirements (p. 31), students in the M.U.R.P. degree program must:
1. Complete a minimum of 48 graduate credit hours plus an internship (not for credit). A core of required courses accounts for 24 of these credit hours. A capstone requirement accounts for three or six of the required 48 credit hours. The remaining 18 or 21 credit hours consist of concentration requirements and electives. A minimum overall GPA of 3.0 (on a 4.0 scale) is required for receipt of the M.U.R.P. degree. In addition, students must receive a minimum grade of B for all core and capstone courses.
2. Complete either a six-credit thesis (URSP 764) or prepare a three-credit professional plan project through the professional plan course (URSP 762). Program administrators request permission to utilize the grade of PR, in addition to normal letter grades (A, B, C, D or F) in URSP 762. This will allow students the ability to work on their plans over a more extended period of time, if necessary.

Apply online at graduate.admissions.vcu.edu (http://graduate.admissions.vcu.edu).
In selecting their elective courses, students may (1) opt for exposure to a wide array of planning-related subject matter (the generalist or comprehensive approach), (2) select one of the areas of specialization defined by the department’s faculty (see the list that follows) or (3) develop an individualized program, focusing on one or more self-defined topics. Regardless of the approach selected, students are expected to meet regularly with their faculty advisers for discussion of their courses of study in relation to their career plans.

The following faculty-defined areas of specialization are offered by the department:

1. Community revitalization
2. Environmental planning
3. Metropolitan planning

URSP 681 International Urban Policy and Planning
URSP 691 Topics in Urban and Regional Planning
URSP 794 Planning Practicum Seminar
URSP 797 Directed Research

Total Hours 9

With the approval of the program chair, other appropriate courses may be applied as electives.

**Intership**

The internship is designed to give students practical experience in planning-related activities in an institutional context. Normally, the internship is taken during the summer between the first and second year or during the second year. Many opportunities for internship positions, as well as part- and full-time jobs in planning at all levels of government, exist within the Richmond area. Upon request, the internship requirement may be waived for students with substantial planning-related professional experience.

**Urban and Regional Planning, Master of (M.U.R.P.) with a concentration in environmental planning**

**Program goals**

The Master of Urban and Regional Planning degree program envisions a better future by enhancing the quality of life in mature communities and regions, particularly in Virginia, but also elsewhere in the United States and abroad, through strong planning education, high-quality scholarship and professional planning practices. The goals for the program are to:

1. Create a diverse learning environment that cultivates engagement of diverse participants — both students and faculty — in the program.
2. Prepare students to be effective practitioners in a variety of planning-related organizations, especially in mature communities and regions, with competence in the preparation, presentation and implementation of professional plans and in doing planning-related work.
3. Produce scholarship that increases knowledge and understanding of sustainability and planning support systems as well as the development of innovative methodological approaches and solutions to address issues related to sustainable community development.
4. Provide useful planning services to mature communities and regions, in cooperation with private and public planners, as appropriate.

**Student learning outcomes**

1. Students will apply knowledge of planning and other related fields to real-world or theoretical settings.
2. Students will pose and solve urban planning problems.
3. Students will communicate effectively for professional contexts.
4. Students will lead effectively.
5. Students will apply the values and ethics of professional planning to their planning practices.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduatedepartment.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s
faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (http://graduate.admissions.vcu.edu).

<td></td>
</tr>
</tbody>
</table>

**Special requirements**

- These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester.

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following specifications apply:

1. Students must have a minimum 2.7 GPA (on a 4.0 scale) in their last 60 semester hours of undergraduate work. In addition, a minimum GPA of 3.0 must have been maintained in their undergraduate majors.
2. Students not meeting these requirements may be admitted to the program on a provisional basis. The provisional period shall consist of the first nine to 12 hours of designated graduate work in which all grades must be no less than B. Provisional admission does not constitute a waiver of the requirement related to a standardized test.
3. Generally, at least two of the three letters of reference should come from former faculty.

All courses in the post-baccalaureate graduate Certificate in Urban Revitalization and the post-baccalaureate graduate Certificate in Geographic Information Systems may be applied to meet the requirement of the Master of Urban and Regional Planning degree. However, successful completion of either certificate does not guarantee admission into the M.U.R.P. degree program.

**Degree requirements**

In addition to general VCU Graduate School graduation requirements (p. 31), students in the M.U.R.P. degree program must:

1. Complete a minimum of 48 graduate credit hours plus an internship (not for credit). A core of required courses accounts for 24 of these credit hours. A capstone requirement accounts for three or six of the required 48 credit hours. The remaining 18 or 21 credit hours consist of concentration requirements and electives. A minimum overall GPA of 3.0 (on a 4.0 scale) is required for receipt of the M.U.R.P. degree. In addition, students must receive a minimum grade of B for all core and capstone courses.
2. Complete either a six-credit thesis (URSP 764) or prepare a three-credit professional plan project through the professional plan course (URSP 762). Program administrators request permission to utilize the grade of PR, in addition to normal letter grades (A, B, C, D or F) in URSP 762. This will allow students the ability to work on their plans over a more extended period of time, if necessary.

In selecting their elective courses, students may (1) opt for exposure to a wide array of planning-related subject matter (the generalist or comprehensive approach), (2) select one of the areas of specialization defined by the department’s faculty (see the list that follows) or (3) develop an individualized program, focusing on one or more self-defined topics. Regardless of the approach selected, students are expected to meet regularly with their faculty advisers for discussion of their courses of study in relation to their career plans.

The following faculty-defined areas of specialization are offered by the department:

1. Community revitalization
2. Environmental planning
3. Metropolitan planning

Urban and Regional Planning, Master of (M.U.R.P.) with a concentration in metropolitan planning

Program accreditation
Planning Accreditation Board

Program goals
The Master of Urban and Regional Planning degree program envisions a better future by enhancing the quality of life in mature communities and regions, particularly in Virginia, but also elsewhere in the United States and abroad, through strong planning education, high-quality scholarship and professional planning practices. The goals for the program are to:

1. Create a diverse learning environment that cultivates engagement of diverse participants — both students and faculty — in the program.
2. Prepare students to be effective practitioners in a variety of planning-related organizations, especially in mature communities and regions, with competence in the preparation, presentation and implementation of professional plans and in doing planning-related work.
3. Produce scholarship that increases knowledge and understanding of sustainability and planning support systems as well as the development of innovative methodological approaches and solutions to address issues related to sustainable community development.
4. Provide useful planning services to mature communities and regions, in cooperation with private and public planners, as appropriate.

Student learning outcomes
1. Students will apply knowledge of planning and other related fields to real-world or theoretical settings.
2. Students will pose and solve urban planning problems.
3. Students will communicate effectively for professional contexts.
4. Students will lead effectively.
5. Students will apply the values and ethics of professional planning to their planning practices.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (http://graduate.admissions.vcu.edu).

Special requirements

- These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester.

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following specifications apply.

1. Students must have a minimum 2.7 GPA (on a 4.0 scale) in their last 60 semester hours of undergraduate work. In addition, a minimum GPA of 3.0 must have been maintained in their undergraduate majors.
2. Students not meeting these requirements may be admitted to the program on a provisional basis. The provisional period shall consist
of the first nine to 12 hours of designated graduate work in which all grades must be no less than B. Provisional admission does not constitute a waiver of the requirement related to a standardized test.

3. Generally, at least two of the three letters of reference should come from former faculty.

All courses in the post-baccalaureate graduate Certificate in Urban Revitalization and the post-baccalaureate graduate Certificate in Geographic Information Systems may be applied to meet the requirement of the Master of Urban and Regional Planning degree. However, successful completion of either certificate does not guarantee admission into the M.U.R.P. degree program.

**Degree requirements**

In addition to general VCU Graduate School graduation requirements (p. 31), students in the M.U.R.P. degree program must:

1. Complete a minimum of 48 graduate credit hours plus an internship (not for credit). A core of required courses accounts for 24 of these credit hours. A capstone requirement accounts for three or six of the required 48 credit hours. The remaining 18 or 21 credit hours consist of concentration requirements and electives. A minimum overall GPA of 3.0 (on a 4.0 scale) is required for receipt of the M.U.R.P. degree. In addition, students must receive a minimum grade of B for all core and capstone courses.

2. Complete either a six-credit thesis (URSP 764) or prepare a three-credit professional plan project through the professional plan course (URSP 762). Program administrators request permission to utilize the grade of PR, in addition to normal letter grades (A, B, C, D or F) in URSP 762. This will allow students the ability to work on their plans over a more extended period of time, if necessary.

In selecting their elective courses, students may (1) opt for exposure to a wide array of planning-related subject matter (the generalist or comprehensive approach), (2) select one of the areas of specialization defined by the department’s faculty (see the list that follows) or (3) develop an individualized program, focusing on one or more self-defined topics. Regardless of the approach selected, students are expected to meet regularly with their faculty advisers for discussion of their courses of study in relation to their career plans.

The following faculty-defined areas of specialization are offered by the department:

1. Community revitalization
2. Environmental planning
3. Metropolitan planning

Select six or nine credit hours (depending on selected capstone option) from the following:

1

2
URSP 517  Historic Preservation in Planning
URSP 520  Park Planning
URSP 521  Introduction to Geographic Information Systems
URSP 525  Site Planning and Graphics
URSP 541  Urban Public Policy-making Processes
URSP 545  Sustainable Energy Policy and Planning
URSP 567  The American Suburb
URSP 591  Special Topics in Urban and Regional Studies and Planning
URSP 605  Urban Planning History
URSP 611  Principles of Urban Design
URSP 621  Introduction to Geographic Information Systems
URSP 625  Spatial Database Management and GIS Modeling
URSP 626  Transportation Analytics and Modeling
URSP 627  GIS Applications in Urban Design
URSP/PADM 630  Strategic Planning and Management in the Public Sector
URSP 637  Sustainable Community Development
URSP 641  Citizen Participation and Negotiation
URSP 643  Housing Policy
URSP 647  Adaptive Reuse of Buildings
URSP 650  Natural Resources and Environmental Planning
URSP 652  Environmental Analysis
URSP 653  Transportation Projects
URSP/ENVS/BIOL 654  Environmental Remote Sensing
URSP 655  Environmental Policy and Planning
URSP 658  Transportation Finance
URSP 659  Transportation Project Development and Evaluation
URSP 664  Urban Economic Development Policy
URSP 666  Urban Commercial Revitalization
URSP 672  Food Systems, Rural Development and Landscape Conservation
URSP 681  International Urban Policy and Planning
URSP 691  Topics in Urban and Regional Planning
URSP 794  Planning Practicum Seminar
URSP 797  Directed Research

With the approval of the program chair, other appropriate courses may be applied as electives.

Internship
The internship is designed to give students practical experience in planning-related activities in an institutional context. Normally, the internship is taken during the summer between the first and second year or during the second year. Many opportunities for internship positions, as well as part- and full-time jobs in planning at all levels of government, exist within the Richmond area. Upon request, the internship requirement may be waived for students with substantial planning-related professional experience.

Urban and Regional Planning, Master of (M.U.R.P.)/Juris Doctor (J.D.) with the University of Richmond [dual degree]

Program accreditation
Planning Accreditation Board

A cooperative arrangement with the University of Richmond School of Law makes it possible for students to receive a law degree (J.D.) and an urban and regional planning degree (M.U.R.P.) in four years rather than the five years ordinarily required.

The purpose of the program is to integrate the two professional curricula and to provide the expertise necessary to apply legal analytical skills and planning methods and analysis to urban and regional policy issues and problems. The dual degree program is designed to equip graduates for a variety of professional positions, including staff for legislative committees and government agencies and commissions, government legal staff, private consulting, neighborhood advocacy, directorships of planning and related agencies and executive aides to elected officials.

Refer to individual program pages for admission requirements, application deadlines, program goals, student learning outcomes, degree requirements, curriculum requirements and graduation requirements specific to the separate programs and concentrations.

Apply online at graduate.admissions.vcu.edu (http://graduate.admissions.vcu.edu).

Application process
Interested students must apply separately for and be admitted to the University of Richmond School of Law and the Master of Urban and Regional Planning program at VCU. Students will spend the entire first year in either the University of Richmond School of Law or the L. Douglas Wilder School of Government and Public Affairs, and the second year in the program not selected the first year. Twelve credit hours of the planning program will be applied toward meeting the graduation requirements of the law school, and 12 credit hours in the law school will be applied toward meeting requirements of the M.U.R.P. program.
Upon admission to the dual degree program, every student will be assigned an adviser in each program who will assist in planning a course of study that will include all of the required courses in each program plus such elective courses that will best serve the interests of the individual student.

Students deciding not to complete the dual degree program must meet all of the regular requirements of either the J.D. or M.U.R.P. to receive the degree of their choice.

Urban Revitalization, Certificate in (Post-baccalaureate graduate certificate)

Program accreditation
Planning Accreditation Board

Program goal
The Certificate in Urban Revitalization provides specialized training in the techniques and processes of city and neighborhood revitalization. Topics include adaptive reuse of buildings, historic preservation, real estate market analysis and the role of private-public partnerships in financing development projects. The certificate is useful for midcareer professionals who wish to learn new skills to expand their career options. It also is useful for recent college graduates who desire advanced training beyond the baccalaureate level and accelerated entry into the job market.

At any time, students in the certificate program may apply for admission into the Master of Urban and Regional Planning program and, if accepted, may transfer the certificate credits toward partial fulfillment of the master’s degree requirements.

Student learning outcomes
1. Students should display evidence of having developed a multidisciplinary understanding of urban life.
2. Students will demonstrate an understanding of, and a willingness to act in accordance with, the ethics and values of the professional.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (http://graduate.admissions.vcu.edu).

</tr>
</tbody>
</table>

Special requirements

- These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester.

In addition to the general admission requirements of the VCU Graduate School (p. 35), the prerequisites and general criteria of eligibility for admission to the urban revitalization certificate program include:

1. Completion of an official application form
2. Three letters of reference
3. Letter of intent describing interest in applying for the Certificate in Urban Revitalization
4. An official transcript showing successful completion of a baccalaureate degree or its equivalent from an accredited college or university with a minimum grade point average of 2.7 (out of 4.0) in the last 60 hours of undergraduate study
5. Demonstration of professional experience in planning or work related to the certificate program (The experience requirement may be waived for candidates who demonstrate professional promise.)

All courses in the graduate Certificate in Urban Revitalization may be applied to meet the requirement of the Master of Urban and Regional Planning degree. However, successful completion of the certificate does not guarantee admission into the M.U.R.P. degree program.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), the Certificate in Urban Revitalization program requires 18 graduate credit hours of course work, which blends instruction in planning, urban design, economics and finance.

The School of Medicine opened on Nov. 5, 1838, as the medical department of Hampden-Sydney College, and became the Medical College of Virginia in 1854. Full-time clinical faculty members were first appointed in 1928, and improved facilities became available between 1936 and 1941 with the completion of the 600-bed West Hospital, A. D. Williams Clinic and Hunton Hall dormitory, located on the current site of the Main Hospital building. Growth in faculty, students and facilities continued after World War II, leading to the development of today's academic health center.

Hospital facilities on the MCV Campus include both in-patient and out-patient facilities. MCV Hospitals of the VCU Health System is licensed for 902 beds. In addition, the hospital at the McGuire Veterans Affairs Medical Center (600 beds) provides excellent patient care, training and research opportunities for the School of Medicine through its affiliation programs.

In the School of Medicine, advanced degree programs are coordinated through the Office of the Associate Dean for Graduate Education, who acts for the dean on all issues related to administration of advanced degree programs. Each advanced-degree program is represented by a faculty member who serves as director for graduate programs. Directors are appointed either by the chair of the department offering graduate degrees or, in the case of interdisciplinary programs, by the dean in consultation with the chairs of participating departments. The directors of graduate programs act on behalf of the programs and hold the responsibility and authority to represent the respective department(s) and their faculty to the school.

Mission statement
The mission of the VCU School of Medicine is to provide pre-eminent education to physicians and scientists in order to improve the quality of health care for humanity. Through innovative, scholarly activity and a diverse educational context, the school seeks to create and apply new knowledge and to provide and continuously improve systems of medical and science education. Furthermore, the mission includes the development of more effective health care practices to address the needs of diverse populations and to provide distinguished leadership in the advancement of medicine and science.

The primary aim of the School of Medicine is to provide an academic environment appropriate for the education of its students, including undergraduate medical students, advanced-degree (graduate) students and graduate physician house officers, as well as continuing education directed toward the needs of practicing physicians. In the classroom, laboratory, clinic and hospital, the faculty and students are brought together in teaching-learning experiences that promote scientific scholarship and personal growth in knowledge and professional skills applicable to careers in a diverse workplace environment.

The School of Medicine and its faculty have vested responsibilities for the advancement of knowledge through research and for service to the community through application of skills in biomedical knowledge, health care leadership and patient care. Therefore, the school shares with teaching the interdependent and almost inseparable objectives of research and service.

The School of Medicine is located on the MCV Campus of VCU.

For comprehensive information on the School of Medicine departments, programs and faculty, please visit the school website (http://www.medschool.vcu.edu).

Faculty and facilities
The School of Medicine consists of 700 full-time faculty, including affiliates, assisted by 630 residents and fellows and more than 700 clinical voluntary faculty. Programs of instruction and research are conducted on campus, at the McGuire VA Medical Center and at affiliated hospitals in an effort to expose the students to the variety of clinical disorders encountered in the eastern U.S. The School of Medicine has established a geographically separate campus at the Inova Fairfax Hospital. Each year, 24 third-year students take all their clinical clerkships at Inova Fairfax Hospital. Their fourth year elective program also is based at the Inova Fairfax Hospital.

Health policies
Virginia Commonwealth University School of Medicine requires that all medical students carry active health insurance. Health insurance benefits must be equal to or greater than those provided by the university health carrier. In addition, it is required that all students complete required immunizations within six months of matriculation and have repeat tuberculosis screening performed prior to the third-year clerkships. For details related to these policies, please visit the school's website (http://www.medschool.vcu.edu/).

The School of Medicine requires that all students enrolled in the graduate academic programs administered by the school hold active health insurance coverage. This requirement applies to students at all degree categories: doctoral, master's and certificate. Compliance is monitored by administrative offices of the school and departments. Failure to comply with this requirement is grounds for dismissal.

Graduate programs
A complete listing of advanced degree programs including links to departments, programs, contact information and application requirements can be found on the School of Medicine website (http://www.medschool.vcu.edu/audience/prospective/).

Graduate programs offering doctoral (Ph.D.) training in the School of Medicine include:

• Biochemistry
• Biostatistics
• Epidemiology
• Healthcare policy and research
• Human genetics
• Medical physics
• Microbiology and immunology
• Neuroscience
• Pharmacology and toxicology
• Physiology
• Social and behavioral sciences

Programs offering master's-level training include:

• Addiction studies
• Anatomy and neurobiology
• Biochemistry
• Genetic counseling
• Human genetics
• Medical physics
• Microbiology and immunology
• Neuroscience
• Pharmacology and toxicology
Application and admission to graduate programs

1. The purpose of admission requirements and procedures is to ensure selection of competent students whose motivation, ability, education and character qualify them for graduate study in preparation for a career in science.

2. The following credentials constitute an application and should be sent to the VCU Office of Admissions as described on the Graduate Admissions website.
   a. Application for admission including the Application for Virginia in-state tuition
   b. Payment for the application fee
   c. Official transcripts of all undergraduate and graduate work sent directly from college or university registrars to the Graduate School
   d. Letters of recommendation from three present or former teachers or others the applicant believes to be qualified to evaluate fitness to engage in graduate study for the degree in the field of choice
   e. A personal statement from the applicant summarizing motivation, education and aims in pursuing graduate study
   f. Verbal, quantitative and analytical portions of the Graduate Record Examination (required) (Medical College Admission Test or Dental Aptitude Test may be acceptable in lieu of the GRE for selected programs.)
   g. Transcripts from all institutions of higher learning attended
   h. Program expectations for performance on the Test of English as a Foreign Language or IELTS examination for international applicants for whom English is not the native language (Please note that required academic record documents submitted in the native language must be accompanied by an official English translation. Please see the Admissions website for detailed information.)

3. Acceptance of an applicant is based upon the recommendation of the director of graduate programs of the relevant program.

While most students matriculate in the fall semester, arrangements may be made to initiate graduate work at other times during the academic year.

Ph.D. programs

Advanced graduate study leading to a Doctor of Philosophy degree is offered in the departments of Anatomy and Neurobiology, Biochemistry and Molecular Biology, Biostatistics, Family Medicine and Population Health (Epidemiology Division), Healthcare Policy and Research, Human and Molecular Genetics, Radiation Oncology (medical physics), Microbiology and Immunology, Pharmacology and Toxicology, Physiology and Biophysics, and Social and Behavioral Health, as well as an interdisciplinary neuroscience degree and molecular biology and genetics curricula in a number of disciplines.

General requirements for graduate degrees

1. All full-time graduate students are expected to register for a minimum of 15 credit hours for the fall and spring semesters and three credit hours for the summer session. This requirement includes research. As an example, when students are registered for 10 credits in formal courses, they are expected to undertake five credits of research under the direction of their adviser or any approved faculty member. Research courses shall be graded as S (satisfactory), U (unsatisfactory) or F (fail). Registration for one credit hour is permitted only with prior permission.

2. Students enrolled in all Master of Science and doctoral programs are required to receive training in the responsible conduct of research in accord with federal guidelines.

3. Students are required to remain in good academic standing through the course of their degree program. Unsatisfactory student performance includes:
   a. The assignment of a grade of U, D or F in any course
   b. Failure to maintain a cumulative GPA of 3.0 or greater
   c. Failure to pass the written or oral comprehensive examination
   d. Failure to pass the final examination

A student whose performance is unsatisfactory must obtain the approval of the MCV Campus graduate committee to gain permission for continuing in the graduate program. The committee elicits the recommendation of the department/program (as represented by the director of graduate studies of the appropriate program) and, as appropriate, the student’s adviser in making a determination. Unsatisfactory performance also constitutes grounds for the termination of financial assistance to the student.

4. Students may not take the comprehensive examination for the Ph.D. degree if their overall GPA is less than 3.0 or if the GPA for courses within the major department is below 3.0. Students may not take the final oral examination for the M.S. or Ph.D. degree if their overall GPA is below 3.0. The examining body for the administration of the
comprehensive examinations and the final examination is the student advisory committee. For the oral comprehensive examination for Ph.D. students and the final examinations for M.S. students, the body is supplemented by the addition of a representative of the MCV Campus graduate committee who chairs the examining body. The representative must be a member of the graduate faculty and is appointed by the chair of the MCV Campus graduate committee. The representative holds the responsibility for compliance with protocols appropriate to the examination, including the equitable treatment of the candidate.

5. Copies of the thesis/dissertation consistent with university standards shall be provided to the members of the student’s advisory committee three weeks or more before the date of the defense of the thesis/dissertation. Following acceptance of the thesis/dissertation defense schedule by the committee, the student must submit a copy of the thesis/dissertation and a request for scheduling of the final examination to the chair of the MCV Campus graduate committee a minimum of 10 working days in advance of the examination date. After passing the final examination, it shall be the responsibility of the candidate to present to the dean’s office the approved original thesis/dissertation plus the minimum required number of copies (three for M.S., four for Ph.D.) in final form suitable for binding. In consultation with the office staff, the candidate shall be responsible for the binding and the processing of the thesis through VCU Libraries and for the payment of all charges for these services.

6. A degree is granted only after all requirements have been fulfilled, including payment of all fees to the university, and after submission of the copies of the thesis for binding.

7. VCU currently requires registration for a defined credit hour level during both the didactic and research phases of advanced degree training. For programs requiring the preparation of a thesis or dissertation, there is therefore no obligatory linkage between the accumulation of credit hours and an expectation that a degree be awarded.

As a guide to monitoring the timely completion of the degree within the present enrollment framework, the accumulation of 80 credit hours for a M.S. degree and 180 credit hours for a Ph.D. degree can be taken as a reasonable measure. These credit hour totals refer to degree programs requiring the preparation of a thesis or dissertation. Unless explicitly stated, the figures cited above apply to Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) programs offered by the School of Medicine.

**Change in academic program**

A student in good standing who is nearing the completion of their degree program may wish to be considered for admission to a more advanced degree administered by the School of Medicine. On more rare occasions, a student may wish to leave (withdraw) from the program in which he/she is currently enrolled and join another program at the same academic level in the School of Medicine.

In all cases the student seeking the change shall submit a hard-copy version of the VCU Application for Graduate School to the Office of Graduate Education in the School of Medicine. The one-page application must be accompanied by a letter written by the student providing the rationale for the change and the program into which the student is seeking admission. The Office of Graduate Education will review the application and the record of the student and then alert the department to the interest of the student if deemed appropriate. Students who are not making satisfactory academic progress (i.e. a student who is not in good academic standing) in a given program would not be considered candidates for a program change. In the absence of prior approval from the Office of the Dean, neither an “application” by a student directly to a program nor the “acceptance” of a student by a program will be valid. Neither students nor programs may initiate admission to a program in the School of Medicine in the absence of the approval by the Office of Graduate Education acting in consultation with the MCV Campus graduate committee.

The above applies to all changes in program (e.g. certificate level to master’s, master’s to Ph.D., program change at the same degree level).

**The student adviser and advisory committee**

Students receive guidance and counsel from the director of graduate programs for the appropriate program prior to appointment of the permanent adviser. The permanent adviser holds the primary responsibility for monitoring the development of the student in the program and providing the appropriate guidance and counsel essential to the scholarly development of the student.

An advisory committee, appointed shortly after the permanent adviser is appointed, serves as both an examining and consultative body, functioning to assist the development of the student. Committee members hold a special responsibility as a source of counsel for each student.

To fulfill these objectives, committee membership must avoid the existence or appearance of conflict of interest.

A conflict of interest is a set of circumstances that increases a risk that the judgment or actions regarding a primary interest will be or may appear to be unduly influenced by a secondary interest. In the case of service as a member of a student advisory committee, the primary interest is the independent evaluation of the performance of the student, the counsel provided to the student and adviser in the planning and implementation of the scholarly project, and the counsel provided to student and adviser to ensure satisfactory academic progress and an appropriate relationship between adviser and student. Secondary interests include personal or professional relationships with the adviser which could compromise or be seen to compromise the fulfillment of the primary interest of the individual as a member of the student advisory committee.

An individual having a formal personal relationship with the adviser can provide the appearance of a conflict of interest compromising the wholly independent participation of the individual as a committee member. Similarly, the presence of multiple members of a laboratory “team,” accentuated in cases where there is employer-employee relationship of the “team” members, can raise concerns with respect to a potential conflict of interest. In addition, a committee composed largely of members of a single research operation replicates the counsel already available in group meetings and is not fully consistent with the purpose and objectives of committee appointments.

The advisory committee architecture exists for multiple reasons. The guidelines for committee composition are intended to provide a balance between expertise in a disciplinary area coupled with an interdisciplinary perspective to enrich the contributions of the committee to the evolution of the scholarly work to the benefit of student and adviser. The committee provides the framework for the “inter-rater reliability” of the evaluation of the student performance and development in achieving the degree of scholarly independence consistent with the awarding of the degree. The independence of the “raters” in establishing a collective judgment with
respect to student performance is central to the quality of the system and the perception of the evaluation process as equitable and not capricious.

For the above reasons the faculty of the School of Medicine shall avoid the proposed appointment to a student advisory committee individuals who have a personal relationship with the adviser or are members of the laboratory/research group of the adviser. The concerns articulated above also apply to the relationship of a student to an adviser. A familial or personal relationship between the two holds the potential for the perception of or actual conflict of interest with respect to the responsibility of the adviser to evaluate the performance of the student. If such a relationship exists, appointment as an adviser shall be avoided.

1. Each student shall have an adviser and an advisory committee.
2. Appointment of the adviser:
   a. The initial adviser will be the director of the graduate program or his/her designee prior to appointment of the permanent adviser.
   b. A permanent adviser shall be appointed from the graduate faculty by the chair of the MCV Campus graduate committee upon recommendation of the chair of the student's major department. Appointment should be made no later than the beginning of the fall semester following matriculation. A change in the permanent adviser may be made by the chair of the MCV Campus graduate committee upon recommendation of the chair of the major department.
3. Duties of the adviser:
   a. The adviser shall, with the student's advisory committee, have responsibility for guiding the student's academic program.
   b. The adviser shall develop a plan for the student's didactic program with the student.
   c. The adviser shall, on the basis of the proposed didactic and scholarly program for the student, identify members of the faculty to comprise the student's advisory committee and elicit their agreement to serve, the adviser serving as the chair of the committee.
   d. The adviser shall supervise the student's research work and dissertation preparation and be one of the examiners of the dissertation (Ph.D.).
   e. At the close of the spring semester, the adviser shall submit to the program director or the chair of the MCV Campus graduate committee a report covering the progress of the student. Copies of the report should be provided to the student and the membership of the student advisory committee by the adviser.
4. The student's advisory committee:
   a. The student's advisory committee shall be appointed no later than the end of the fall semester of the second year after matriculation by the chair of the MCV Campus graduate committee, upon recommendation of the student's adviser, review by the graduate program director and recommendation of the chair of the department of the permanent adviser. Appointment of the student advisory committee must be done within three months of the appointment of the permanent adviser and prior to the administration of comprehensive (or final) examinations. The composition of the advisory committee shall be such that significant areas of the student's scholarly program are represented in the expertise of the faculty members.
      i. The committee for the Ph.D. candidate shall consist of a minimum of five members as follows: the student's adviser; two other members of the graduate faculty of the department/program in which the student is enrolled; and at least two other members of the graduate faculty from departments other than the one in which the student is enrolled (where feasible, from two different departments).
      ii. A faculty member who is not a member of the graduate faculty may be appointed to a student advisory committee if approved by the MCV Campus graduate committee.
      iii. The student adviser is identified as the chair of the student advisory committee.
   b. Duties of the student's advisory committee:
      i. The advisory committee functions as an advisory body to ensure that timely progress toward degree completion is being achieved, as an examining body participating as appropriate for the intended degree in written qualifying examinations and conducting the oral qualifying examination and final examination, and as a consultative body to provide scholarly counsel.
      ii. The student's advisory committee shall work with the student's adviser in guiding the student's graduate program and shall meet at least annually. It is strongly recommended that the advisory committee meet with the student prior to administration of the comprehensive examination(s) by the committee.
      iii. The student's advisory committee shall recommend and approve a degree program (including foreign language if applicable) for the student as soon as it is practical. The proposed program should be filed with the chair of the MCV Campus graduate committee no later than the third semester of study.
      iv. The student's advisory committee shall conduct the oral comprehensive and final examination.

Doctor of Philosophy
1. A minimum of 30 credit hours exclusive of research credits is generally required. In practice, a minimum of four years of study, including research, is necessary to complete all requirements.
2. For all Ph.D. programs, a period of residence of at least two consecutive semesters is required. In the context of Ph.D. training, "residence" refers to full-time enrollment, equivalent to enrollment of nine or more credit hours in a given academic term. The School of Medicine recommends that doctoral students maintain "residency" status for one academic year (fall and spring semesters), usually during the initial year of study. This recommendation is to ensure that the didactic component of training is not prolonged. Students should register in each academic term as a means of ensuring that timely progress toward degree completion is achieved. The specific requirements for residency will be detailed by the individual programs. A time limit of seven calendar years, beginning at the time of first registration, is placed on work to be credited toward the Doctor of Philosophy degree.

Admission to candidacy
The development of the individual as an independent research scientist is a critical component of the Ph.D. degree. The potential for such development is assessed on the basis of both mastery of subject matter and research competency as judged in the context of written and oral examinations administered at the level of department or program. Students are admitted to candidacy by the dean on the basis of completing examinations as required and the recommendation of
the faculty adviser, student advisory committee and graduate program director.

Individual development plan

In order to assist trainees and advisers in the efficient completion of degree training and considered identification of a strategy for career development once the degree has been awarded, all graduate students will be required to create an individual development plan. The IDP will have two components, both of which are critical to the achievement of a successful career outcome.

The first component will address the action plan for the research project over the next 12-month period. This should take a form analogous to the “Specific Aims” section of an NIH grant proposal, identifying key experimental objectives. In addition, objectives in professional development (e.g. attendance at a national meeting, delivery of a seminar) are also identified. The student adviser works with the student to develop this component of the IDP. The IDP is then used as a resource for consideration and comment by the student advisory committee in the annual meeting with the student.

The second component of the IDP will explore the long-term “career objectives” of the student. Career objectives must look beyond a period of postdoctoral training. The nature of this component of the plan will vary widely depending on the individual. For the individual who has identified a particular career position, the IDP might, for example, seek to gain a more complete understanding of the requirements of such a position or the identification of “soft” skills critical to success in the position. If undecided, the individual might explore the variety of career options for which the biomedical science degree can serve as a foundation. While the student’s research adviser can play a role in developing this component of the plan, students should be encouraged to identify a mentor who can provide critical, concrete and confidential counsel to the student.

The use of the career planning tool distributed by the American Association for the Advancement of Science as “myIDP” to both guide the creation of a plan and convert entries into a report format is strongly recommended. A copy of the IDP will be submitted to the graduate program director in June of each year. The plans will be forwarded to the School of Medicine Office of Graduate Education. A record of the receipt of the IDP is placed in the student file.

Progress to degree completion

The timely completion of advanced degrees is in the best interests of the student. In order to ensure that impediments to degree completion are addressed at an early stage the Office of Graduate Education in the School of Medicine houses a record of the meetings of the student advisory committee in GradTrak. On an annual basis, programs will provide to the Office of Graduate Education a record of the date(s) on which the student advisory committee has met, a copy of the minutes of the meeting and/or the memorandum provided to the student describing the progress made to degree completion, along with the expression of compliments, concerns and corrective action as appropriate. A copy of the IDP prepared by the student accompanies the report of the actions of the student advisory committee meeting.

While recognizing that the research enterprise is subject to unknowns including unanticipated problems in the successful conduct of experiments, the duration of training should not be unduly extended as a consequence. The adviser and student advisory committee have a responsibility to ensure that the scope of the research project is such that a doctoral degree can be completed in five to six years. The student advisory committee plays a central role to ensure that the treatment of the student is equitable and that the student displays appropriate effort, commitment and development.

Advisers have an obligation to ensure that in circumstances where student performance is not deemed to be satisfactory, the presence of the potential problem is communicated to the student advisory committee and the program director. The interests of the adviser and student are best served when the evaluation of the situation is made with multiple inputs. In cases where a problem does exist, communication of the substandard performance, along with a course and timeline for remediation, should be formally communicated to the student as soon as possible. Documenting the existence of problem areas should not await the end of a semester or be delayed until a scheduled assessment is to take place.

If the student has not completed all degree requirements at the end of 15 semesters (inclusive of summer terms) of study, the adviser will provide specific information on the timeline for completion of the degree and submit to the student advisory committee and the graduate program director (with a copy forwarded to the Office of Graduate Education) for review and action if warranted.

Comprehensive examinations

In order to advance to doctoral candidacy, the student must pass both written and oral comprehensive examinations. The written examination(s) generally focus(es) on the subject matter deemed critical as a foundation in the particular program. The written examination is largely based on material covered in required course work and its application to theoretical and practical problems. The oral examination, which follows successful completion of the written examination(s), is administered to assess the ability of the candidate to integrate information and display an appropriate mastery of problem-solving capabilities.

1. To advance to candidacy, the student shall take written and oral examinations designed to determine the potential of the individual for development as an independent research scientist. Advancement to candidacy should preferably take place prior to initiating the third academic year in the program. The written examination is administered by the student’s department/program. In the event of failure of the written comprehensive examination, the student, with the approval of the MCV Campus graduate committee, may be permitted to repeat the written examination.

2. After passing the written examination(s), the student is eligible for the oral examination. The oral examination is conducted by the student’s advisory committee and is chaired by a graduate faculty member representing the MCV Campus graduate committee who serves as a voting member of the examining committee. The oral examination is to be administered no later than six months after passing the written examination. (Departments/programs may require a shorter interval.)

3. The oral examination is scheduled through the Office of Graduate Education. An announcement of the candidate’s name, department/program and the time and place of the examination shall be posted at least 10 working days in advance of the examination. If a written document prepared by the candidate is a component of the examination, the document shall be provided to the members of the examining committee at least 10 working days in advance of the examination. The oral comprehensive examination is open to all members of the faculty. Faculty members in attendance may ask questions of the candidate, but their questions shall not be presented until after the advisory committee has completed its questions. Faculty members other than those on the advisory committee shall
Dissertation research

1. The student must conduct a substantial original investigation under the supervision of the permanent adviser and prepare a dissertation reporting the results of this research and analyzing its significance in relation to existing scientific knowledge.

2. The body of experimental work to be incorporated into the dissertation is subject to the approval of the membership of the student advisory committee. The advisory committee should, therefore, be formally consulted as the research project nears completion to ensure that there is agreement with respect to the material deemed necessary and sufficient for incorporation into the dissertation. Such consultation will normally occur in the form of a meeting of the advisory committee with the student. The faculty adviser has a responsibility to advise the student when the meeting of the advisory committee for this purpose should take place.

3. The dissertation is prepared in an acceptable form and style with the counsel of the faculty adviser. The faculty adviser determines when the dissertation document can serve as the basis for the final oral examination (or dissertation defense). With the approval of the faculty adviser, the final oral examination by the advisory committee is scheduled and the dissertation document is distributed to the advisory committee. Distribution of the dissertation document to the advisory committee will usually occur at least 10 working days in advance of the final oral examination. The Office of Graduate Education is informed of the scheduling of the final oral examination 10 working days in advance of the examination. The Office of Graduate Education will then post an announcement of the final oral examination to include the name and department of the candidate together with the title of the dissertation and the day, place and time of the final oral examination.

4. The final oral examination is conducted by the student advisory committee at a specified time and place, chaired by the faculty adviser and open to all members of the faculty. The subject matter of the examination is limited to the content of the candidate’s dissertation and related areas. A favorable vote of the advisory committee with no more than one negative vote shall be required to indicate that the candidate has passed the final oral examination. All advisory committee members must vote. The outcome of the final oral examination is reported to the Office of Graduate Education. If the examination is not passed, the student advisory committee must recommend a course of action for the student. The committee might, for example, recommend that a re-examination be scheduled, or that a major revision of the dissertation (including added data collection and/or analysis) be required prior to rescheduling of the examination, or that the student be terminated from the program or other action as deemed appropriate by the committee. A majority of the committee membership must concur in the recommended course of action. The recommendation must be communicated in writing to the appropriate graduate program director for approval within five working days of the examination. The program, acting through the graduate program director, shall accept the recommendation of the committee or determine an alternative within an additional five working days. The course of action approved by the program will be communicated in writing to the student by the graduate program director. The graduate program director shall inform the Office of Graduate Education of the School of Medicine in writing as to the action taken.

If a re-examination is the recommended course of action, a representative of the MCV Campus graduate committee will be appointed to serve as the chair of the examining committee.

5. The student advisory committee approves the dissertation document as acceptable following the final oral examination. Approval of the dissertation as acceptable is indicated by the signature of all members of the advisory committee on the signature page of the dissertation. Approval of the dissertation by the advisory committee must be unanimous.

Termination of enrollment

The university reserves the right to terminate the enrollment of any student for unlawful, disorderly or immoral conduct or for persistent failure to fulfill the purposes for which he or she was matriculated.

A student enrolled in a graduate program under the supervision of the MCV Campus graduate committee may be dismissed from the school in which he is enrolled for failure to meet academic requirements prescribed by his school or failure to exhibit the attitudes and skills deemed necessary to function within his chosen scientific discipline.

Any action by a graduate student in a program under the supervision of the MCV Campus graduate committee considered to be unprofessional conduct shall constitute cause for disciplinary action.

Unprofessional conduct includes, but is not limited to:

1. Fraud or deceit in gaining admission to the university, i.e., false or obviously misleading representations on the admission application
2. An act that violates the established legal standards regarding conduct of one person toward society (i.e., stealing, lying, cheating and slander)
3. Conviction of a felony involving moral turpitude
4. Plagiarism or other scientific misconduct

Master’s programs

Advanced graduate study leading to the Master of Science degree is offered in the departments of Anatomy and Neurobiology, Biochemistry and Molecular Biology, Biostatistics, Human and Molecular Genetics, Microbiology and Immunology, Pharmacology and Toxicology, and Physiology and Biophysics. The Department of Family Medicine and Population Health, through the Division of Epidemiology, offers the Master of Public Health degree; the Department of Human and Molecular Genetics offers the Master of Science degree in genetic counseling; and the Department of Radiation Oncology administers the Master of Science degree in medical physics.

General requirements for graduate degrees

1. All full-time graduate students are expected to register for a minimum of five credit hours for the fall and spring semesters and six credit hours for the summer session. This requirement includes research. As an example, when students are registered for 10 credits in formal courses, they are expected to undertake five credits of
research under the direction of their adviser or any approved faculty member. Research courses shall be graded as S (satisfactory), U (unsatisfactory) or F (fail). Registration for one credit hour is permitted only with prior permission.

2. Students are required to remain in good academic standing through the course of their degree program. Unsatisfactory student performance includes:
   a. The assignment of a grade of U, D or F in any course
   b. Failure to maintain a minimum cumulative GPA of 2.5
   c. Failure to pass the written or oral comprehensive examination
   d. Failure to pass the final examination

   A student whose performance is unsatisfactory must obtain the approval of the MCV Campus graduate committee to gain permission for continuing in the graduate program. The committee elicits the recommendation of the department/program (as represented by the director of graduate studies of the appropriate program) and, as appropriate, the student's adviser in making a determination. Unsatisfactory performance also constitutes grounds for the termination of financial assistance to the student.

3. Students may not take the comprehensive examination for the Ph.D. degree if their overall GPA is less than 2.5 or if the GPA for courses within the major department is below 3.0. Students may not take the final oral examination for the M.S. or Ph.D. degree if their overall GPA is below 3.0. The examining body for the administration of the comprehensive examinations and the final examination is the student advisory committee. For the oral comprehensive examination for Ph.D. students and the final examinations for M.S. students, the body is supplemented by the addition of a representative of the MCV Campus graduate committee who chairs the examining body. The representative must be a member of the graduate faculty and is appointed by the chair of the MCV Campus graduate committee. The representative holds the responsibility for compliance with protocols appropriate to the examination, including the equitable treatment of the candidate.

4. Copies of the thesis/dissertation consistent with university standards shall be provided to the members of the student’s advisory committee three weeks or more before the date of the defense of the thesis/dissertation. Following acceptance of the thesis/dissertation defense schedule by the committee, the student must submit a copy of the thesis/dissertation and a request for scheduling of the final examination to the chair of the MCV Campus graduate committee a minimum of 10 working days in advance of the examination date. After passing the final examination, it shall be the responsibility of the candidate to present to the dean’s office the approved original thesis/dissertation plus the minimum required number of copies (three for M.S., four for Ph.D.) in final form suitable for binding. In consultation with the office staff, the candidate shall be responsible for the binding and the processing of the thesis through VCU Libraries and for the payment of all charges for these services.

5. A degree is granted only after all requirements have been fulfilled, including payment of all fees to the university, and after submission of the copies of the thesis for binding.

6. VCU currently requires registration for a defined credit hour level during both the didactic and research phases of advanced degree training. For programs requiring the preparation of a thesis or dissertation, there is therefore no obligatory linkage between the accumulation of credit hours and an expectation that a degree be awarded.

As a guide to monitoring the timely completion of the degree within the present enrollment framework, the accumulation of 80 credit hours for a M.S. degree and 180 credit hours for a Ph.D. degree can be taken as a reasonable measure. These credit hour totals refer to degree programs requiring the preparation of a thesis or dissertation. Unless explicitly stated, the figures cited above apply to Master of Science and Doctor of Philosophy programs offered by the School of Medicine.

**Change in academic program**

A student in good standing who is nearing the completion of their degree program may wish to be considered for admission to a more advanced degree administered by the School of Medicine. On more rare occasions, a student may wish to leave (withdraw) from the program in which he/she is currently enrolled and join another program at the same academic level in the School of Medicine.

In all cases the student seeking the change shall submit a hard-copy version of the VCU Application for Graduate School to the Office of Graduate Education in the School of Medicine. The one-page application must be accompanied by a letter written by the student providing the rationale for the change and the program into which the student is seeking admission. The Office of Graduate Education will review the application and the record of the student and then alert the department to the interest of the student if deemed appropriate. Students who are not making satisfactory academic progress (i.e. a student who is not in good academic standing) in a given program would not be considered candidates for a program change. In the absence of prior approval from the Office of the Dean, neither an “application” by a student directly to a program nor the “acceptance” of a student by a program will be valid. Neither students nor programs may initiate admission to a program in the School of Medicine in the absence of the approval by the Office of Graduate Education acting in consultation with the MCV Campus graduate committee.

The above applies to all changes in program (e.g. certificate level to master’s, master’s to Ph.D., program change at the same degree level).

**The student adviser and advisory committee**

Students receive guidance and counsel from the director of graduate programs for the appropriate program prior to appointment of the permanent adviser. The permanent adviser holds the primary responsibility for monitoring the development of the student in the program and providing the appropriate guidance and counsel essential to the scholarly development of the student.

An advisory committee, appointed shortly after the permanent adviser is appointed, serves as both an examining and consultative body, functioning to assist the development of the student. Committee members hold a special responsibility as a source of counsel for each student.

To fulfill these objectives, committee membership must avoid the existence or appearance of conflict of interest.

A conflict of interest is a set of circumstances that increases a risk that the judgment or actions regarding a primary interest will be or may appear to be unduly influenced by a secondary interest. In the case of service as a member of a student advisory committee, the primary interest is the independent evaluation of the performance of the student, the counsel provided to the student and adviser in the planning and implementation of the scholarly project, and the counsel provided to
student and adviser to ensure satisfactory academic progress and an appropriate relationship between adviser and student. Secondary interests include personal or professional relationships with the adviser which could compromise or be seen to compromise the fulfillment of the primary interest of the individual as a member of the student advisory committee.

An individual having a formal personal relationship with the adviser can provide the appearance of a conflict of interest compromising the wholly independent participation of the individual as a committee member. Similarly, the presence of multiple members of a laboratory “team,” accentuated in cases where there is employer-employee relationship of the “team” members, can raise concerns with respect to a potential conflict of interest. In addition, a committee composed largely of members of a single research operation replicates the counsel already available in group meetings and is not fully consistent with the purpose and objectives of committee appointments.

The advisory committee architecture exists for multiple reasons. The guidelines for committee composition are intended to provide a balance between expertise in a disciplinary area coupled with an interdisciplinary perspective to enrich the contributions of the committee to the evolution of the scholarly work to the benefit of student and adviser. The committee provides the framework for the “inter-rater reliability” of the evaluation of the student performance and development in achieving the degree of scholarly independence consistent with the awarding of the degree. The independence of the “raters” in establishing a collective judgment with respect to student performance is central to the quality of the system and the perception of the evaluation process as equitable and not capricious.

For the above reasons the faculty of the School of Medicine shall avoid the proposed appointment to a student advisory committee individuals who have a personal relationship with the adviser or are members of the laboratory/research group of the adviser.

1. Each student shall have an adviser and an advisory committee.
2. Appointment of the adviser
   a. The initial adviser will be the director of the graduate program or his/her designee prior to appointment of the permanent adviser.
   b. A permanent adviser shall be appointed from the graduate faculty by the chair of the MCV Campus graduate committee upon recommendation of the chair of the student's major department. Appointment should be made no later than the beginning of the fall semester following matriculation. A change in the permanent adviser may be made by the chair of the MCV Campus graduate committee upon recommendation of the chair of the major department.
3. Duties of the adviser
   a. The adviser shall, with the student’s advisory committee, have responsibility for guiding the student’s academic program.
   b. The adviser shall develop a plan for the student’s didactic program with the student.
   c. The adviser shall, on the basis of the proposed didactic and scholarly program for the student, identify members of the faculty to comprise the student’s advisory committee and elicit their agreement to serve, the adviser serving as the chair of the committee.
   d. The adviser shall supervise the student’s research work and thesis preparation and be one of the examiners of the thesis (M.S.).
   e. At the close of the spring semester, the adviser shall submit to the program director or the chair of the MCV Campus graduate committee a report covering the progress of the student. Copies of the report should be provided to the student and the membership of the student advisory committee by the adviser.
4. The student’s advisory committee
   a. The student’s advisory committee shall be appointed no later than the end of the fall semester of the second year after matriculation by the chair of the MCV Campus graduate committee, upon recommendation of the student’s adviser, review by the graduate program director and recommendation of the chair of the department of the permanent adviser. Appointment of the student advisory committee must be done within three months of the appointment of the permanent adviser and prior to the administration of comprehensive (or final) examinations. The composition of the advisory committee shall be such that significant areas of the student’s scholarly program are represented in the expertise of the faculty members.
      i. The committee for the M.S. candidate shall consist of a minimum of three members as follows: the student’s adviser (who serves as chair of the committee); one other member of the graduate faculty of the department/program in which the student is enrolled; and one other member of the graduate faculty from a department other than the one in which the student is enrolled.
      ii. A faculty member who is not a member of the graduate faculty may be appointed to a student advisory committee if approved by the MCV Campus graduate committee. Appointment is made by the dean of the Graduate School.
   b. Duties of the student’s advisory committee:
      i. The advisory committee functions as an advisory body to ensure that timely progress toward degree completion is being achieved, as an examining body participating as appropriate for the intended degree in written qualifying examinations and conducting the oral qualifying examination and final examination, and as a consultative body to provide scholarly counsel.
      ii. The student’s advisory committee shall work with the student’s adviser in guiding the student’s graduate program and shall meet at least annually. It is strongly recommended that the advisory committee meet with the student prior to administration of the comprehensive examination(s) by the committee.
      iii. The student’s advisory committee shall recommend and approve a degree program (including foreign language if applicable) for the student as soon as it is practical. The proposed program should be filed with the chair of the MCV Campus graduate committee no later than the third semester of study.
      iv. The student’s advisory committee shall conduct the oral comprehensive and final examination.

Master of Science

1. A minimum of 24 semester course hours is required, exclusive of research credits. In practice, it is found that two years of study are usually necessary to complete the requirements. A time limit of five calendar years, beginning at the time of first registration, is placed on work to be credited toward the Master of Science degree. Generally a maximum of one-third of the hours required for a master’s degree may be transferred from another VCU program or outside institution and applied toward the degree upon recommendation of the student’s
6. The student advisory committee approves the thesis document as acceptable after the final oral examination has been successfully completed. Approval of the thesis as acceptable is indicated by the signature of all members of the advisory committee on the signature page of the thesis. Approval of the thesis by the advisory committee must be unanimous. A thesis is not required for completion of the Master of Genetic Counseling program. In lieu of the thesis, students in this program are required to successfully pass comprehensive oral and written examinations.

Master of Public Health

The M.P.H. degree is a generalist program that allows students to focus on research or public health practice through course electives. A minimum of four semesters of full-time study (45 credit hours) is necessary to complete the degree requirements. All M.P.H. students are required to conduct a scientific investigation on a topic relevant to human and public health. The research project is conducted under the guidance of a faculty adviser and a preceptor with expertise in the topic area. The student must prepare a report of the research and give an oral presentation to the department.

Termination of enrollment

The university reserves the right to terminate the enrollment of any student for unlawful, disorderly or immoral conduct or for persistent failure to fulfill the purposes for which he or she was matriculated.

A student enrolled in a graduate program under the supervision of the MCV Campus graduate committee may be dismissed from the school in which he is enrolled for failure to meet academic requirements prescribed by his school or failure to exhibit the attitudes and skills deemed necessary to function within his chosen scientific discipline.

Any action by a graduate student in a program under the supervision of the MCV Campus graduate committee considered to be unprofessional conduct shall constitute cause for disciplinary action.

Unprofessional conduct includes, but is not limited to:

1. Fraud or deceit in gaining admission to the university, i.e., false or obviously misleading representations on the admission application
2. An act that violates the established legal standards regarding conduct of one person toward society (i.e., stealing, lying, cheating and slander)
3. Conviction of a felony involving moral turpitude
4. Plagiarism or other scientific misconduct

School of Medicine graduate programs committee

The School of Medicine graduate programs committee is chaired by the associate dean for graduate education and has representatives from all School of Medicine graduate programs. The committee is responsible for vetting changes to graduate courses, graduate curricula and graduate programs as well as for recommending dean-level actions on the proposed changes. The committee provides representatives to the University Graduate Council.

Monitoring satisfactory academic progress

The School of Medicine employs an electronic system given the trivial name “GradTrak” as a means of consolidating student records and the achievement of milestones in the progress to degree completion in a convenient and appropriately accessible format. Nomination and approvals of the permanent adviser and student advisory committee members are performed in this system as are the announcements of the scheduling of comprehensive and final program examinations and their outcomes. The system incorporates the continuing record of the student transcript and provides a repository for the archiving of documents associated with the matriculation of the individual as well as
progress reports and other relevant documents. Access to the electronic student file is password-protected and restricted to faculty with program oversight or participation on the student advisory committee.

**School of Medicine Registrar**

The School of Medicine houses a registrar’s office to meet the needs of physician trainees and alumni. Visit the School of Medicine website (http://www.medschool.vcu.edu/studentaffairs/registrar/) for more information on the office.

**Criminal background checks**

All applicants to the VCU School of Medicine who receive an acceptance will have a criminal background check performed by Certiphi Screening Inc. If there is a positive finding the applicant will be notified by Certiphi first; this will allow the applicant to make corrections to the report and verify the information. If there is no change in status Certiphi will then notify VCU of their positive findings. VCU’s criminal background committee will meet to discuss the applicant’s Certiphi report to determine if acceptance is to be withdrawn. The school encourages full disclosure at all times on the AMCAS and supplemental applications, as dishonesty will impact the committee’s decision. If an applicant has a legal finding or institutional action against them after the supplemental application is submitted they should notify the school’s admissions office immediately. Once an applicant is matriculated, full disclosure is also required throughout the student’s time in medical school. Criminal background checks are repeated for all students at the end of the second year and for specific program participations throughout medical school.

**Addiction Studies, Certificate in (Post-baccalaureate graduate certificate) with a concentration in advanced international addiction studies**

VCU, King’s College London and the University of Adelaide collaborate to offer a fully online Certificate in Addiction Studies available to students around the globe. No on-campus attendance is required, and students receive a degree from all three participating universities.

**Program mission**

The mission of the addiction studies certificate with a concentration in advanced international addiction studies is to offer students around the world an in-depth, evidence-based, multidimensional and cross-cultural understanding of both essential and advanced topics in the field of addiction studies, including biological, psychological and public health perspectives on the etiology and treatment of addiction and evidence-based addiction policy. This will be accomplished through distance-learning technologies.

**Program goals**

1. Knowledge of field of addiction science: Students in the program will develop an in-depth knowledge of the field of addiction science to enhance their ability to succeed in a variety of addiction-related settings.
2. Ability to synthesize and apply advanced addiction-related knowledge: Students of the program will be able to synthesize and apply advanced addiction-related knowledge, including comparative international perspectives and approaches, to address key issues related to the treatment or prevention of addiction.
3. Understanding and application of experimental results from addiction-related research: Students will develop the ability to interpret experimental approaches and results, and apply them to address key questions in addiction science and policy, as well as conceptualize the translation from research to policy, treatment or prevention.
4. Communication skills related to addiction: Students will develop skills in communicating both core knowledge of addiction as well as the interpretation of research findings in a variety of formats.

**Student learning outcomes**

1. Written communication skills: The candidate will use effective written communication skills to present information related to addiction causes, interventions, treatments and policies using appropriate vocabulary, figures, tables and citations.
2. Advanced knowledge of addiction science: The student will demonstrate an advanced level of knowledge of the current elements of addiction science.
3. Familiarity and understanding of research: Students will demonstrate an advanced level of fluency with the research literature, become familiar with research methods used in addiction science and demonstrate the ability to evaluate and critique publications.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.
Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 31), students are required to successfully complete 24 credit hours in the six required graduate courses.

Addiction Studies, Certificate in (Post-baccalaureate graduate certificate) with a concentration in intermediate international addiction studies

VCU, King’s College London and the University of Adelaide collaborate to offer students the opportunity to complete a fully online program of study to obtain a Certificate in Addiction Studies conferred by all three universities.

Program mission

The mission of the addiction studies certificate with a concentration in intermediate international addiction studies is to offer students around the world an in-depth, evidence-based, multidimensional and cross-cultural understanding of essential topics in the field of addiction studies, including biological, psychological and public health perspectives on the etiology and treatment of addiction and evidence-based addiction policy. This will be accomplished through distance-learning technologies.
Program goals
1. Knowledge of field of addiction science: Students in the program will develop an in-depth knowledge of the field of addiction science to enhance their ability to succeed in a variety of addiction-related settings.
2. Ability to synthesize and apply advanced addiction-related knowledge: Students of the program will be able to synthesize and apply advanced addiction-related knowledge, including comparative international perspectives and approaches, to address key issues related to the treatment or prevention of addiction.
3. Understanding and application of experimental results from addiction-related research: Students will develop the ability to interpret experimental approaches and results, and apply them to address key questions in addiction science and policy, as well as conceptualize the translation from research to policy, treatment or prevention.
4. Communication skills related to addiction: Students will develop skills in communicating both core knowledge of addiction as well as the interpretation of research findings in a variety of formats.

Student learning outcomes
1. Written communication skills: The candidate will use effective written communication skills to present information related to addiction causes, interventions, treatments and policies using appropriate vocabulary, figures, tables and citations.
2. Advanced knowledge of addiction science: The student will demonstrate an advanced level of knowledge of the current elements of addiction science.
3. Familiarity and understanding of research: Students will demonstrate an advanced level of fluency with the research literature, become familiar with research methods used in addiction science and demonstrate the ability to evaluate and critique publications.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Application requirements
Degree: Semester(s) of entry: Deadline dates: Test requirements:
Certificate Fall Jul 1 TOEFL

Prospective students should apply through the VCU graduate admissions portal at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu). Application to all three participating universities is accomplished through submission of the VCU graduate application. Once accepted, students are enrolled in all three universities and have access to the resources associated with all three schools. No on-campus classroom time is required to complete the degree.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must:
1. Have qualified in a related discipline for an honors degree (level 2A or 1) or a bachelor’s degree from a recognized tertiary institution in the U.S. Any applicant who does not meet this criterion should have (in addition to an honors or bachelor’s degree) significant professional work experience and approval of the program committee.
2. Have a high level of proficiency in English, demonstrated by completion of a university qualification studied in the English language, or by meeting one of the following English language requirements: an IELTS score of 7.0, a TOEFL score of 600 (paper-based) or 260 (computer-based), or grade C or above in GCSE English.

Students who are enrolled in the Certificate in Addiction Studies intermediate concentration and are maintaining a minimum GPA of 3.0 may elect to change their concentration to the advanced concentration at any time during their enrollment with the permission of the program director. Students will be awarded only one certificate, however, which will reflect their highest level of attainment.
Students who have completed the Certificate in Addiction Studies intermediate concentration may also, after a period away from study, choose to apply for the advanced concentration addiction studies certificate. Students wishing to continue their studies through this mechanism may count the earlier courses toward the advanced concentration, as long as they meet all admission requirements of the Graduate School and pending surrender of the lower-level credential before being awarded the more-advanced credential. Courses taken more than four years prior to the time of the student’s application will not be considered transferable and will need to be repeated.

Students completing either concentration in the Certificate in Addiction Studies may apply to the Master of Science in Addiction Studies program, also known as the International Programme in Addiction Studies and, if accepted, have their courses count toward that degree as long as they meet all admission requirements of the Graduate School. Courses taken more than four years prior to enrollment in the M.S. program will not be considered current and must be repeated.

**Degree requirements**

In addition to the general VCU Graduate School graduation requirements (p. 31), students are required to successfully complete 12 credit hours in the three required graduate courses.

**Curriculum requirements**

(804) 828-8019

Program website: ipas.vcu.edu (http://ipas.vcu.edu/)

**Addiction Studies, Master of Science (M.S.)**

VCU, King’s College London and the University of Adelaide collaborate to offer students the opportunity to complete a fully online program of study to obtain a Master of Science in Addiction Studies conferred by all three universities.

**Program goal**

The mission of the International Program in Addiction Studies leading to a Master of Science in Addiction Studies degree is to offer students cross-cultural exposure to the critical prevention, treatment, research and policy issues facing the field. Through a collaboration arrangement including VCU, King’s College London and the University of Adelaide in Australia, students complete a program of study using distance-learning technologies to obtain the degree. The program is designed to prepare students for local, national and international policy positions, prevention/treatment program management and other leadership positions in the addictions field. This program will speed the dissemination of the latest international addictions-related knowledge, especially to remote locations around the world, and help students compare international perspectives and translate this knowledge into more effective prevention and treatment practices and evidence-based policies within their own countries.

Students in the program will:

1. Demonstrate a detailed knowledge of the field of addiction science (including comparative international policies and practices) to prepare them for leadership roles in a variety of settings (including addiction research, policy and treatment venues).
2. Be able to synthesize and apply addiction-related knowledge, including comparative international perspectives and approaches, to address key issues related to the advancement of addiction science.
3. Develop the ability to design, implement and interpret experimental approaches which address key questions in addiction science.
4. Communicate both core knowledge of addiction as well as experimental design, result and interpretation in a variety of formats.

**Student learning outcomes**

1. Integrated knowledge of addiction science: The student will demonstrate an appropriate level of knowledge of the current elements of addiction science as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publication.
2. Problem-solving skills: Students will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in addiction research and practice, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
3. Research design: Students will demonstrate the achievement of an appropriate level of competence in the ability to appraise, develop and implement research studies.
4. Written communication skills: The candidate will use effective written communication skills to present information related to addiction causes, interventions, treatments and policies using appropriate vocabulary, figures, tables and citations.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as
published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must form formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

Other information
School of Medicine graduate program policies
The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on master’s programs is available elsewhere in this chapter of the Graduate Bulletin.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Admission requirements
Degree: Semester(s) of entry: Deadline dates: Test requirements:
M.S. Fall Jul 1 TOEFL

Prospective students should apply through the VCU graduate admissions portal at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu). Application to all three participating universities is accomplished through submission of the VCU graduate application. Once accepted, students are enrolled in all three universities and have access to the resources associated with all three schools. No on-campus classroom time is required to complete the degree.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must:

1. Have qualified in a related discipline for an honors degree (level 2A or 1) or a bachelor’s degree from a recognized tertiary institution in the U.S. Any applicant who does not meet this criterion should have (in addition to an honors or bachelor’s degree) significant professional work experience and approval of the program committee.
2. Have a high level of proficiency in English, demonstrated by completion of a university qualification studied in the English language, or by meeting one of the following English language requirements: an IELTS score of 7.0, a TOEFL score of 600 (paper-based) or 260 (computer-based), or minimum grade C in GCSE English.

Degree requirements
In addition to the general VCU Graduate School graduation requirements (p. 31), students are required to successfully complete a minimum of 36 credit hours, which can be done either full time (12 months) or part time (24 months). Six of the required credit hours are assigned to a final research project examining a relevant addictions-related topic. VCU, King’s College London and the University of Adelaide confer degrees jointly through a single diploma.

Anatomy and Neurobiology, Master of Science (M.S.)

Program mission
The M.S. in Anatomy and Neurobiology program offers a two-year graduate curriculum of formal instructional activities and research training mentored by the members of the faculty leading to the terminal M.S. degree. The program prepares students for technical careers in neurobiological research laboratories in academic, private and government institutions. The program also provides a strong foundation for students who choose to continue onto doctoral training.

This is a research-oriented degree program comprised of graduate course work and supervised research leading to a master’s thesis. The M.S.
program involves approximately one year of course work and a research thesis performed under the supervision of a faculty adviser.

**Program goals**

1. The program is designed to provide students with the skills required to advance to positions as bioscience researchers, trainers and technicians in a broad spectrum of positions. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation/experimentation in bioscience.

2. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified.

3. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences. The program will prepare students to secure positions in their chosen career goals (medical school, doctoral studies, employment in academic or private laboratories).

**Student learning outcomes**

1. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments.

2. Communication skills: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids. The candidate will also demonstrate the achievement of an appropriate level of written communication skills with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations.

3. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems.

4. General knowledge of neurobiology and biosciences: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of neurobiology and the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications.

5. Employment or acceptance to advanced degree program: Degree candidates will secure positions in their chosen career goals (medical school, doctoral studies, employment in academic or private laboratories).

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

**Other information**

**School of Medicine graduate program policies**

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on master’s programs is available elsewhere in this chapter of the Graduate Bulletin.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).
Admission requirements

**Degree:** Master of Science (M.S.)
**Semester(s) of entry:** Fall preferred
**Application deadline:** Applications received prior to Jan 15, given priority consideration
**Test requirements:** GRE, MCAT or DAT TOEFL if international

**Special requirements**
- Domestic students apply through the Graduate Admissions office (http://graduate.admissions.vcu.edu/); international students apply through International Admissions (http://international.admissions.vcu.edu/).

In addition to the general admission requirements of the VCU Graduate School (p. 35), successful applicants will typically have the following credentials:

1. Baccalaureate degree or its equivalent at the time of enrollment with a minimum overall GPA of 3.2
2. Combined GRE scores of at least 300 for the verbal plus quantitative (1200 based on the previous scale) and 4.0 analytical score
3. Test of English as a Foreign Language examination with a minimum score of 100 (IBT), 250 (CBT) or 600 (PBT), or 6.5 on the IELTS for foreign applicants who do not use English as their native language

Although there are no absolute course requirements for admission, fundamental knowledge of general and organic chemistry and biology are considered necessary to pursue advanced studies, and upper-level courses in molecular and cellular biology are desirable. Previous research experience or demonstration of a serious interest in a research-oriented career is also desirable. A personal statement describing the applicant's research experience and interests, as well as letters of reference from previous supervisors, are necessary and helpful in determining an applicant's suitability for this curriculum. Official transcripts of all graduate and undergraduate records must be mailed from the college or university registrar.

**Degree requirements**

In addition to general VCU Graduate School graduation requirements (p. 31), students must complete a minimum of 66 graduate credit hours. A minimum cumulative GPA of 3.0 must be maintained. Students must receive a minimum grade of B for all required courses.

A student who receives a grade of C in a required course shall repeat the course. A second grade of C in a required course shall result in dismissal from the program.

There is no expectation of the time required to complete the master's degree; usually two years of study are necessary to complete the requirements. At the appropriate time in their research, students will prepare a thesis and schedule a final oral defense of the thesis. The final oral examination (defense of the thesis) will cover the subject of the candidate's dissertation and related basic science course work.

The minimum total of graduate credit hours required for this degree is 66.

**Typical plan of study**

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

Student learning outcomes

1. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.

2. General knowledge of sciences: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications, as measured by rubric.

3. Communication skills: Degree candidates will demonstrate that an appropriate level of oral, written and visual communication skills have been acquired.
   a. Oral communication skills: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
   b. Written communication skills: Degree candidates will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.

4. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www_graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

A master’s student in the MBG curriculum must prepare a formal written research plan and make an oral presentation of their thesis research proposal and progress report to their graduate advisory committee prior to the beginning of the second year of residency. The student’s knowledge in the area of the proposed research, current research accomplishments and the feasibility of the proposed research project will be evaluated by the GAC. Successful completion of this review is required for continuance in the program and constitutes admission to candidacy.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)
Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on master’s programs is available elsewhere in this chapter of the Graduate Bulletin.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Special requirements

- Applications for the program should be submitted to Molecular Biology and Genetics – M.S. selected from the drop-down menu of programs of the VCU online graduate application form. The degree awarded will be a Master of Science in Anatomy and Neurobiology.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must have earned or expect to earn a baccalaureate or equivalent degree, and must have demonstrated a superior knowledge of biology, chemistry, physics and mathematics. Laboratory experience is also strongly recommended. The Graduate Record Examination is required, as are letters of recommendation and a letter summarizing the applicant’s background. International applicants who do not use English as their native language must take the Test of English as a Foreign Language examination.

Basic science, research-intensive, non-thesis curriculum for medical students

Individuals who are participants in medical training (the Doctor of Medicine program) at VCU may be eligible for enrollment in a research-intensive, non-thesis graduate curriculum. This basic science option builds on the core of disciplinary material embedded in the first two years of training in the medical school curriculum. Additional exposure is provided to specialized areas in basic science disciplines in concert with an intensive research experience leading to the preparation of a report in the form of a manuscript suitable for publication. The program is designed to be completed within 12 to 15 months. Subject matter related to the core material and/or suitable elective courses taken in the didactic phase of medical training correspond to a minimum of the equivalent of 24 graduate credit hours. The equivalent of 12 credit hours may be applied to the M.S. degree program in which the student is enrolled in accordance with Graduate School policy. Medical students interested in the basic science option should contact the M.S. graduate program director for additional information.

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 31), the interdisciplinary master’s curriculum in molecular biology and genetics requires a minimum of 48 credit hours, at least half of which must be course work restricted to graduate students. The curriculum includes 19 credit hours of required core course work and 29 additional credit hours of required course work, directed research and research seminar course work, and additional approved course work, as listed below. M.S. candidates must pass a final oral examination. A written thesis approved by the student’s graduate advisory committee completes the requirements leading to the M.S. degree.

Students may take additional course work with the approval of their graduate program directors.

The minimum total of graduate credit hours required for this degree is 48.

Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

Graduate program director

Gail E. Christie, Ph.D.
Professor, Department of Microbiology and Immunology
christie@vcu.edu
(804) 828-9093

Program website: vcu.edu/mbg (http://www.vcu.edu/mbg/)

Biochemistry, Doctor of Philosophy (Ph.D.)

Program goal

The Ph.D. program in biochemistry prepares students for research-oriented careers as independent scientists in academia, government and biotechnology. The core of this degree program is an original independent research project under the supervision of a faculty adviser. The Department of Biochemistry and Molecular Biology has research efforts of international stature in several areas, including cellular and molecular signaling, tumor biology, structural biology, eukaryotic molecular biology, lipid and membrane biochemistry and molecular genetics, using state-of-the-art approaches in enzymology, genomics, proteomics and lipidomics.

While emphasizing independent research in biochemistry and molecular biology and training in the responsible conduct of research, the program also provides a background of courses designed to match the needs and interests of each student. The program is designed to provide students with the skills required to advance to positions as bioscience researchers/trainers in a broad spectrum of positions. The program provides a framework for the progressive development of a mastery of the current state of the subject matter of biochemistry, cell and molecular biology, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in bioscience.

The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

Student learning outcomes

1. Oral communication skills: The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids.

2. Written communication skills: The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations.

3. Experimental design: The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments.

4. Problem-solving skills: The candidate will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems.

5. General knowledge of science: The candidate will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications.

V CU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and
on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

**Other information**

**School of Medicine graduate program policies**

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on doctoral programs is available elsewhere in this chapter of the Graduate Bulletin.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

**Admission requirements**

<table>
<thead>
<tr>
<th>Degree:</th>
<th>Semester(s) of entry:</th>
<th>Deadline dates:</th>
<th>Test requirements:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ph.D.</td>
<td>Fall</td>
<td>Applications received prior to Jan 15 given priority consideration</td>
<td>GRE, MCAT or DAT</td>
</tr>
</tbody>
</table>

**Special requirements**

- MCAT or DAT acceptable in lieu of GRE for combined professional/academic degree programs.

- Applications for the program must be submitted to the Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D. selected from the drop-down menu of programs on the VCU online application form.

In addition to the general admission requirements of the VCU Graduate School (p. 35), successful applicants will typically have the following credentials:

1. A baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. Current GRE scores (taken within the past five years), with scores at the 75th percentile or greater preferred
3. TOEFL scores of 600 (pBT), 250 (cBT) or 100 (iBT) for individuals for whom English is a second language; or 6.5 on the IELTS (To report GRE or TOEFL score, use VCU Code 5570.)
4. A personal statement that includes: long-term career goals to assess reasons behind the application; how a Ph.D. in biomedical science helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration
5. Three letters of recommendation that speak to the scientific competency and experience of the applicant
6. The equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g. cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology, biophysics, etc.)

Students who plan to eventually work toward the Ph.D. degree in biochemistry at VCU should apply directly to the Ph.D. program and forego the master’s degree. However, applicants who are unsure if they want to earn a Ph.D. and desire experience in biomedical research before making this decision will be well-served by the M.S. program. Outstanding performance in the M.S. program can help students gain admittance to a doctoral program at VCU or elsewhere. Master’s students who wish to gain admission to the Ph.D. program should submit the following documents to the graduate program director: (1) a letter making this request, which should include justification for the request, career goals, the name of a proposed Ph.D. adviser and a brief description of proposed Ph.D. research project, (2) VCU graduate transcript and (3) a letter of support from proposed Ph.D. adviser. Additional admissions requirements include (1) a grade of A in BIOC 691 (section 904: Critical Scientific Thinking), (2) a grade of A in BIOC 505 (laboratory rotation), (3) a final score in the top 50 percent of scores in BIOC 503 and BIOC 504 and (4) minimum GRE scores of 158 (verbal), 158 (quantitative) and 4.0 (analytical).

**Degree requirements**

In addition to the general VCU Graduate School graduation requirements (http://bulletin.vcu.edu/graduate/study/general-academic-regulations-graduate-students/graduation-requirements/), students must complete a minimum of 60 graduate credit hours.

Ph.D. students are expected to enroll as full-time graduate students. During the first year, students pursue research rotations; take formal course work and become familiar with current research topics through seminars, discussion groups and lectures by distinguished scientists. By the end of the first year, students choose a faculty adviser and begin dissertation research. Following completion of the research project and defense of the doctoral dissertation, graduates are equipped to participate in virtually any area of current biomedical research in the most prestigious laboratories.
Training in the responsible conduct of research

All Ph.D. students are required to complete the following training in the responsible conduct of research:

1. OVPR 601, OVPR 602 or OVPR 603
2. Collaborative Investigator Training Initiative: an online course that provides training in human subjects research. The course must be completed during the fall semester of year two. Students must submit the certificate of completion before starting the spring semester of year two. Consult the following link to access the course: research.vcu.edu/human_research/citi_requirements.htm (http://www.research.vcu.edu/human_research/citi_requirements.htm)
3. Animal research training: Students are required to complete an online training course for the conduct of animal subjects research. The training must be completed during the fall semester of year two. Students must submit the certificate of completion before starting the spring semester of year two. Access and guidance for the course is available through the “Animal Research” link on the Office of Research and Innovation website (https://research.vcu.edu/).

After year four, students may select a journal club offered by any department in the School of Medicine.

Students register for a combination of directed research and elective credit hours to amass a minimum of 60 total credit hours.

A minimum of 4 credits for all variable courses

The minimum total of graduate credit hours required for this degree is 60.

Recommended electives

Students select courses from this list, with guidance from their advisers and committees. Ph.D. students must enroll full-time (minimum nine credits) to be eligible for a stipend. Some graduate courses listed above may be taken after the comprehensive examination. Most of this course work should be taken during the first two years of the program. Students are encouraged to take additional courses that relate to their personal research projects.

Students should refer to their program websites and talk with their graduate program directors and advisers for information about typical plans of study and registration requirements.

Graduate program director
Tomasz K. Kordula, Ph.D.
Professor, Department of Biochemistry and Molecular Biology
tkordula@vcu.edu
(804) 828-0771

Program website: biochemistry.vcu.edu (http://www.biochemistry.vcu.edu/)
Biochemistry, Doctor of Philosophy (Ph.D.) with a concentration in molecular biology and genetics

Program goals

The molecular biology and genetics curriculum is an integrated interdisciplinary program of study that builds on the graduate programs of participating departments in the School of Medicine. The doctoral curriculum is designed to be an intensive course of study that will provide students with the skills required to advance to research-oriented careers in biotechnology.

1. The curriculum includes core, specialization and elective courses. Electives drawn from various departments allow individual specialization.

2. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation. The program relates this framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified.

3. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

4. The final three semesters include a research project conducted under the guidance of a selected faculty mentor and culminates in the presentation and defense of a master's thesis.

Participating faculty are associated not only with programs and departments within the School of Medicine, but also with the VCU Massey Cancer Center, the Phillips Institute for Oral and Craniofacial Molecular Biology (School of Dentistry), the Institute of Structural Biology and Drug Discovery (School of Pharmacy) and the VCU Center for the Study of Biological Complexity (VCU Life Sciences).

The interdisciplinary approach to the solution of biological problems provided by this training is designed to develop in students the flexibility and problem-solving skills necessary for success in a variety of scientific career opportunities or further graduate study.

Student learning outcomes

1. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.

2. General knowledge of sciences: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications, as measured by rubric.

3. Communication skills: Degree candidates will demonstrate that an appropriate level of oral, written and visual communication skills have been acquired.

4. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.gradschool.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.
Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on doctoral programs is available elsewhere in this chapter of the Graduate Bulletin.

5. Three letters of recommendation that speak to the scientific competency and experience of the applicant
6. The equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g. cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology, biophysics, etc.)
7. Laboratory experience – strongly recommended

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 31), students must complete a minimum of 41 graduate credit hours.

During the first year, students pursue research rotations, take formal course work and become familiar with current research topics through seminars, discussion groups and lectures by distinguished scientists. By the end of the first year, students choose a faculty adviser and begin dissertation research. Prior to the beginning of the third year of study, students should successfully pass written and oral candidacy examinations. Following completion of the research project and defense of the doctoral dissertation, graduates are equipped to participate in a broad range of current biomedical research areas.

The minimum total of graduate credit hours required for this degree is 41.

Typical plan of study

Many students often take more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a student or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors and advisers for information about typical plans of study and registration requirements.

Graduate program director
Gail E. Christie, Ph.D.
Professor, Department of Microbiology and Immunology
christie@vcu.edu
(804) 828-9093

Program website: vcu.edu/mbg (http://www.vcu.edu/mbg/)

Biochemistry, Master of Science (M.S.)

Program goal
The M.S. program in biochemistry prepares students for research-oriented careers in academia, government and biotechnology. The core of this degree program is an original independent research project under the supervision of a faculty adviser. The Department of Biochemistry and Molecular Biology has research efforts of international stature in several areas, including cellular and molecular signaling, tumor biology, structural biology, eukaryotic molecular biology, lipid and membrane biochemistry and molecular genetics, using state-of-the-art approaches in enzymology, genomics, proteomics and lipidomics.

While emphasizing independent research in biochemistry and molecular biology and training in the responsible conduct of research, the program also provides a background of courses designed to match the needs and interests of each student. The program is designed to provide students with the skills required to advance to positions as biotechnology researchers/trainers in a broad spectrum of positions. The program provides a framework for the progressive development of a mastery of the current state of the subject matter of biochemistry, cell and molecular biology, as well as an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in biocience.

The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified. In addition, the program will develop skills in the various means of communicating both the core of biocience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

Student learning outcomes

1. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments.
2. Oral communication skills: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids.
3. Written communication skills: Degree candidates will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations.
4. General knowledge of science: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications.
5. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in biocience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.gradschool.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)
Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information
School of Medicine graduate program policies
The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on master's programs is available elsewhere in this chapter of the Graduate Bulletin.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Admission requirements

<table>
<thead>
<tr>
<th>Degree:</th>
<th>Semester(s) of entry:</th>
<th>Deadline dates:</th>
<th>Test requirements:</th>
</tr>
</thead>
</table>
| M.S.         | Fall preferred        | Applications accepted through DAT June; priority given to early applicants | GRE, MCAT or OVPR 602 or OVPR 603

Special requirements
- MCAT or DAT acceptable in lieu of GRE for combined professional/academic degree programs.

Applicants to the Master of Science in Biochemistry program must meet all general admission requirements of the VCU Graduate School (p. 35). In addition, applicants must meet the following requirements.

1. Organic chemistry (with a minimum grade of B)
2. Undergraduate biochemistry (not required but recommended)
3. Laboratory experience

Degree requirements
In addition to the general VCU Graduate School graduation requirements (p. 31), students in the M.S. in Biochemistry program must complete a minimum of 30 credit hours, including at least 24 didactic credits hours (exclusive of research credit hours).

Students in the M.S. program in biochemistry take courses designed for graduate students with an emphasis on research design and experimentation. During the first year of study, students pursue research rotations, take formal course work and become familiar with current research topics through seminars, discussion groups and lectures by distinguished scientists. By the end of the first year, students choose a faculty adviser and begin thesis research. Following completion of the research project and defense of the master's thesis, graduates are equipped to participate in virtually any area of current biomedical research in the most prestigious laboratories. For more detailed information on the program, see the departmental website (https://biochemistry.vcu.edu/Education/masters.html).

M.S. students register for BIOC 651 and BIOC 690 for the duration of their tenure in the program. The core set of courses may be supplemented with elective courses offered by the Department of Biochemistry and Molecular Biology or other departments. Students are encouraged to take additional courses that relate to their personal projects. Electives may include courses in techniques in molecular biology and genetics, bioinformatics, statistics, immunology, microbiology, molecular genetics, mammalian physiology and advanced organic and physical chemistry, among others.

Training in the responsible conduct of research
All M.S. students are required to complete the following training in the responsible conduct of research:

1. OVPR 601, OVPR 602 or OVPR 603
2. Collaborative Investigator Training Initiative: an online course that provides training in human subjects research. The course must be completed during the fall semester of year two. Students must submit the certificate of completion before starting the spring semester of year two. See the CITI requirements and access the course (https://research.vcu.edu/human_research/citi_requirements.htm) on the Office of Innovation and Research website.
3. Animal research training: Students are required to complete an online training course for the conduct of animal subjects research. The training must be completed during the fall semester of year two. Students must submit the certificate of completion before starting the spring semester of year two. Access and guidance for the course is available through the "Animal Research" link on the Office of Research and Innovation website.

**Total Hours** 30

1. Taken each fall and spring semester throughout the program; minimum of one credit for each course.

2. Take one or both courses for a total of two credits.

3. Electives are suggested, but not required. Additional credits may be taken in BIOC 651 and/or BIOC 690 to reach 30-credit minimum program requirement.

The minimum total of graduate credit hours required for this degree is 30.

## Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

### Biostatistics, Doctor of Philosophy (Ph.D.)

#### Program goal

The mission of the VCU Department of Biostatistics is to improve human health through methodological research, the education of graduate students and health science researchers in biostatistical methods and applications, and collaborative health sciences research. Faculty members conduct methodological research motivated by collaborative alliances, which in turn contributes to and enhances the department's educational mission. By focusing on the integration of methodological and collaborative research, students develop strong biostatistical and communication skills, enabling them to assume leadership positions in academia, government and industry.

#### Student learning outcomes

This training program is designed to help students achieve the following learning outcomes:

1. The successful candidate will understand the modern and advanced literature of biostatistical concepts, ideas and methods, to which the candidate will contribute by developing new (or extending existing) biostatistical methods through scholarly peer-reviewed publications.

2. The successful candidate will demonstrate the ability to effectively collaborate with both biostatistical and health science researchers, specifically with respect to planning and designing research studies and also in analyzing data from a broad spectrum of research questions.

3. The successful candidate will develop fluency in several computational languages, will exhibit proficiency in standard computational and analytic procedures and will demonstrate the ability to computationally solve new and complex problems.

4. The successful candidate will display exceptional written and oral communication skills in terms of explaining biostatistical concepts, methods and results to both biostatistical and non-biostatistical health sciences researchers.

#### VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate
School website and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

Other information
School of Medicine graduate program policies
The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on doctoral programs is available elsewhere in this chapter of the Graduate Bulletin.

<td>GRE</td>
</tr>
</tbody>
</table>

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must complete the verbal, quantitative and analytical writing sections of the Graduate Record Exam. The following mathematics courses or their equivalents are required for admission: MATH 307, MATH 310, STAT 309 and STAT 212. MATH 507 and an additional graduate-level math analysis course are recommended for students interested in completing the Ph.D. program.

Degree requirements
In addition to the general VCU Graduate School graduation requirements (p. 31), Ph.D. students must complete a minimum total of 78 credit hours (59 didactic hours, plus eight hours each of seminar and consulting, and at least three credit hours of research). More specifically, required courses include BIOS 513, BIOS 514, BIOS 524, BIOS 553, BIOS 554, BIOS 571, BIOS 572, BIOS 573, BIOS 615, BIOS 631, BIOS 647 and one of OVPR 601, OVPR 602 or OVPR 603. Students must take at least 18 credits of additional BIOS, STAT or MATH courses, with at least two being BIOS courses and at least two being at the 600 level, and one graduate-level non-BIOS, STAT or MATH course. Ph.D. students must also take eight semesters each of BIOS 516 and BIOS 690. In addition, Ph.D. students will participate in the summer student training program at least twice and present at the Biostatistics Student Research Symposium each fall.

Qualifying exam
Students pursuing the Ph.D. degree must pass a two-part qualifying examination administered after completion of their first-year courses. Part A (the theoretical examination) covers material from the following first-year courses: BIOS 513, BIOS 514, BIOS 553 and BIOS 554. Part B (the applied examination) covers material from the following first-year courses: BIOS 524, BIOS 571, BIOS 572 and BIOS 573.

Each part of the exam is graded as pass or fail. A student must pass both Part A and Part B of the qualifying exam at the Ph.D. level to continue in the Ph.D. program. A student who does not pass either Part A or Part B of the qualifying examination at the Ph.D. level will have one opportunity to retake that part of the qualifying examination.

Dissertation proposal defense
Students pursuing the Ph.D. degree who have passed the qualifying exam must pass a defense of their dissertation proposal that will consist of both written and oral components. For the written component of the dissertation proposal defense the student will produce a detailed report and description of the proposed research plan. For the oral component of the dissertation proposal defense the student will present the dissertation proposal to their dissertation committee and respond to any feedback or questions.

The proposal defense will be scheduled as soon as the student is ready after passing both parts of the qualifying examination. This could be as early as Year 2, with students required to defend before December of their fourth year.

Each part of the exam is graded as pass or fail. A student must pass both Part A and Part B of the dissertation proposal defense to continue toward their final dissertation defense. A student who does not pass both Part A and Part B of the dissertation proposal defense may choose to complete the requirements for an M.S. degree.

Admission to candidacy
A student must pass both parts A and B of their qualifying examination, must identify a dissertation adviser and committee and must pass both the written and oral components of the dissertation proposal defense before they can be admitted to candidacy.
Biostatistics, Doctor of Philosophy (Ph.D.) with a concentration in genomic biostatistics

Dissertation
A comprehensive dissertation reporting the results of original research is required for the Ph.D. degree.

Final examination
All Ph.D. candidates must defend their dissertations at a final oral examination. A public presentation will precede a Ph.D. defense closed to all but the student’s committee. Questions are restricted to the topic of the dissertation for the Ph.D. candidate.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must complete the verbal, quantitative and analytical writing sections of the Graduate Record Exam. The following mathematics courses or their equivalents are required for admission: MATH 307, MATH 310, STAT 309 and STAT 212. MATH 507 and an additional graduate-level math analysis course are recommended for students interested in completing the Ph.D. program.

Degree requirements
In addition to the general VCU Graduate School graduation requirements (p. 31), Ph.D. students in the genomic biostatistics concentration will complete a minimum of 78 graduate credit hours (59 didactic credit hours plus eight hours of consulting and seminar, and at least three credit hours of research). More specifically, required courses include: BIOS 513, BIOS 514, BIOS 524, BIOS 553, BIOS 554, BIOS 567, BIOS 571, BIOS 572, BIOS 573, BIOS 615, BIOS 632, BIOS 647, BIOS 668, BNFO 540 (or BIOL 540) and one of OVPR 601, OVPR 602 or OVPR 603. In addition, students will take one of BIOS 667 or BIOS 691, and at least nine credits of other graduate-level BIOS, STAT, MATH or BNFO courses. Ph.D. students must take eight semesters each of BIOS 516 and BIOS 690.
Ph.D. students will also participate in the summer student research program at least twice and present at the Biostatistics Student Research Symposium each fall.

Qualifying exam

Students pursuing the Ph.D. degree must pass a two-part qualifying examination administered after completion of their first-year courses. Part A (the theoretical examination) covers material from the following first-year courses: BIOS 513, BIOS 514, BIOS 553 and BIOS 554. Part B (the applied examination) covers material from the following first-year courses: BIOS 524, BIOS 571, BIOS 572 and BIOS 573.

Each part of the exam is graded as pass or fail. A student must pass both Part A and Part B of the qualifying exam at the Ph.D. level to continue in the Ph.D. program. A student who does not pass either Part A or Part B of the qualifying examination at the Ph.D. level will have one opportunity to retake that part of the qualifying examination.

Dissertation proposal defense

Students pursuing the Ph.D. degree who have passed the qualifying exam must pass a defense of their dissertation proposal that will consist of both written and oral components. For the written component of the dissertation proposal defense the student will produce a detailed report and description of the proposed research plan. For the oral component of the dissertation proposal defense the student will present the dissertation proposal to their dissertation committee and respond to any feedback or questions.

The proposal defense will be scheduled as soon as the student is ready after passing both parts of the qualifying examination. This could be as early as Year 2, with students required to defend before December of their fourth year.

Each part of the exam is graded as pass or fail. A student must pass both Part A and Part B of the dissertation proposal defense to continue toward their final dissertation defense. A student who does not pass both Part A and Part B of the dissertation proposal defense may choose to complete the requirements for an M.S. degree.

Admission to candidacy

A student must pass both parts A and B of their qualifying examination, must identify a dissertation adviser and committee and must pass both the written and oral components of the dissertation proposal defense before they can be admitted to candidacy.

Dissertation

A comprehensive dissertation reporting the results of original research related to genomics topics is required for the Ph.D. with a concentration in genomic biostatistics. It is expected that the dissertation will make use of some high-throughput genomic technology as an application for the methodological development.

Final examination

All Ph.D. candidates must defend their dissertations at a final oral examination. A public presentation will precede a Ph.D. defense closed to all but the student’s committee. Questions are restricted to the topic of the dissertation for the Ph.D. candidate.

**Total Hours**: 9
The minimum total of graduate credit hours required for this degree is 78.

**Typical plan of study**

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a student or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

**Graduate program director**
Roy T. Sabo, Ph.D.
Associate professor, Department of Biostatistics
roy.sabo@vcuhealth.org
(804) 828-3047

**Additional contact** (admissions and prospective students)
Russell M. Boyle
Assistant professor, Department of Biostatistics, and associate program director
russell.boyle@vcuhealth.org
(804) 827-2049

**Program website:** biostatistics.vcu.edu (http://www.biostatistics.vcu.edu/)

**Biostatistics, Master of Science (M.S.)**

**Program goal**

The mission of the VCU Department of Biostatistics is to improve human health through methodological research, the education of graduate students and health science researchers in biostatistical methods and applications, and collaborative health sciences research. Faculty members conduct methodological research motivated by collaborative alliances, which in turn contributes to and enhances the department’s educational mission. By focusing on the integration of methodological and collaborative research, students develop strong biostatistical and communication skills, enabling them to assume leadership positions in academia, government and industry.

**Student learning outcomes**

This training program is designed to be completed in 18 months (four semesters: fall, spring, summer, fall) and will help students achieve the following learning outcomes:

1. The successful candidate will understand the modern and advanced literature of biostatistical concepts, ideas and methodologies.
2. The successful candidate will demonstrate the ability to effectively collaborate with both biostatistical and health science researchers, specifically with respect to planning and designing research studies, and also in analyzing data from a broad spectrum of research questions.
3. The successful candidate will develop fluency in several computational languages, will exhibit proficiency in standard computation and analytic procedures, and will demonstrate the ability to computationally solve new and complex problems.
4. The successful candidate will display exceptional written and oral communication skills in terms of explaining biostatistical concepts, methods and results to both biostatistical and non-biostatistical health sciences researchers.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.
Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

Other information
School of Medicine graduate program policies
The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on master’s programs is available elsewhere in this chapter of the Graduate Bulletin.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Admission requirements

<table>
<thead>
<tr>
<th>Degree:</th>
<th>Semester(s) of entry:</th>
<th>Deadline dates:</th>
<th>Test requirements:</th>
</tr>
</thead>
<tbody>
<tr>
<td>M.S.</td>
<td>Fall preferred</td>
<td>Applications received prior to Jan 15 given priority consideration</td>
<td>GRE</td>
</tr>
</tbody>
</table>

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants for the M.S. in Biostatistics must complete the verbal, quantitative and analytical writing sections of the Graduate Record Exam.

Additionally, the following mathematics courses or their equivalents are required for admission:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 307</td>
<td>Multivariate Calculus</td>
<td>4</td>
</tr>
<tr>
<td>MATH 310</td>

<td>3</td>
</tr>
<tr>
<td>STAT 212</td>
<td>Concepts of Statistics</td>
<td>3</td>
</tr>
<tr>
<td>STAT 309</td>
<td>Introduction to Probability Theory</td>
<td>3</td>
</tr>
</tbody>
</table>

Although not required, prior course work in additional mathematics, statistics or computer science is helpful.

Degree requirements
In addition to the general VCU Graduate School graduation requirements (p. 31), M.S. students must complete a minimum total of 42 graduate credit hours of course work. Students are required to take BIOS 512 or BIOS 513, BIOS 524, BIOS 553, BIOS 554, BIOS 571, BIOS 572 and BIOS 573, and four other 500- or 600-level BIOS, STAT, MATH or BNFO courses. M.S. students must take four credit hours of BIOS 516 and three credit hours of BIOS 690. M.S. students interested in applying to the Ph.D. program in biostatistics (with no concentration or with a concentration in genomic biostatistics) are strongly encouraged to take both BIOS 513 and BIOS 514, participate in the Summer Student Training Program and present at the Biostatistics Student Research Symposium.

Qualifying exam
Students pursuing the M.S. degree must pass a qualifying examination administered after completion of their first-year courses. This applied examination covers material from the following first-year courses: BIOS 524, BIOS 571, BIOS 572 and BIOS 573. This examination is graded as pass or fail. A student must pass the qualifying examination at the M.S. level to continue in the M.S. program. A student who does not pass the qualifying examination at the M.S. level will have one opportunity to retake that part of the qualifying examination. Students interested in applying to the Ph.D. program in biostatistics (with no concentration or with a concentration in genomic biostatistics) are strongly encouraged to also take the theoretical component of the qualifying examination covering material from the following first-year courses: BIOS 513, BIOS 514, BIOS 553 and BIOS 554. These students must pass both the applied and theoretical qualifying examinations at the Ph.D. level in order to be considered in the Ph.D. program.

Thesis
There is no thesis requirement for the M.S. program.

In addition to the general admission requirements of the VCU Graduate School (p. 35), students applying to the clinical research and biostatistics concentration must hold the M.D., D.D.S., Ph.D., D.P.H., D.O., Pharm.D. or an equivalent health professional terminal degree from an accredited college or university. Applicants with international M.D. degrees are considered on an individual basis. The applicant must have a minimum undergraduate GPA of 3.00. Applicants must also submit a letter detailing career goals and how the M.S. in Biostatistics with a concentration in clinical research and biostatistics applies to those goals, as well as at least three letters of recommendation.

Degree requirements
In addition to the general VCU Graduate School graduation requirements (p. 31), M.S. in Biostatistics, clinical research and biostatistics concentration students must complete a minimum total of 34 graduate credit hours. This includes 17 credit hours of core course work, 12 credit hours of elective courses and at least five credit hours of directed independent research.

Students in the clinical research and biostatistics concentration must complete a research project, culminating in an academic manuscript submitted for publication. A research advisory committee must be formed to direct the student's research project. The research advisory committee must consist of two clinicians familiar with the student's area of research and a faculty member of the Department of Biostatistics. The student is be primarily responsible for the conceptualization, design, conduct, analysis and interpretation of the research project.

Final examination
Clinical research and biostatistics concentration students do not defend their research projects at a final oral examination.

**Program website:** biostatistics.vcu.edu (http://www.biostatistics.vcu.edu/)

**Biostatistics, Master of Science (M.S.) with a concentration in genomic biostatistics**

**Program goal**

The mission of the VCU Department of Biostatistics is to improve human health through methodological research, the education of graduate students and health science researchers in biostatistical methods and applications, and collaborative health sciences research. Faculty members conduct methodological research motivated by collaborative alliances, which in turn contributes to and enhances the department’s educational mission. By focusing on the integration of methodological and collaborative research, students develop strong biostatistical and communication skills, enabling them to assume leadership positions in academia, government and industry.

**Student learning outcomes**

This training program is designed to be completed in 18 months (four semesters: fall, spring, summer, fall) and will help students achieve the following learning outcomes:

1. The successful candidate will understand the modern and advanced literature of biostatistical and genomics concepts, ideas and methods.
2. The successful candidate will demonstrate the ability to effectively collaborate with both biostatistical, genomics and health science researchers, specifically with respect to planning and designing research studies, and also in analyzing data from a broad spectrum of research questions.
3. The successful candidate will develop fluency in several computational languages, will exhibit proficiency in standard computational and analytic procedures, and will demonstrate the ability to computationally solve new and complex problems.
4. The successful candidate will display exceptional written and oral communication skills in terms of explaining biostatistical and genomics concepts, methods and results to both biostatistical and non-biostatistical health sciences researchers.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.
Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

</tr>
<tr>
<td>STAT 212</td>
<td>Concepts of Statistics</td>
<td>3</td>
</tr>
<tr>
<td>STAT 309</td>
<td>Introduction to Probability Theory</td>
<td>3</td>
</tr>
</tbody>
</table>

Although not required, prior course work in additional mathematics, statistics or computer science is helpful.

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 31), M.S. students will complete a minimum total of 42 credit hours of course work. Required courses include BIOS 512 or BIOS 513, BIOS 524, BIOS 553, BIOS 554, BIOS 567, BIOS 571, BIOS 572, BIOS 573, BIOL 540 or BNFO 540, at least one of BIOS 632, BIOS 667, BIOS 668 and BIOS 691 (the latter when the topic is systems biology or statistical genetics/genetic epidemiology), and one other 500- or 600-level BIOS, STAT, MATH or BNFO course. M.S. students must take four credit hours of BIOS 516 and three credit hours of BIOS 690. M.S. students interested in applying to the Ph.D. program in biostatistics (with no concentration or with a concentration in genomic biostatistics) are strongly encouraged to take both BIOS 513 and BIOS 514, participate in the Summer Student Training Program, and present at the Biostatistics Student Research Symposium.

Qualifying exam

Students pursuing the M.S. degree must pass a qualifying examination administered after completion of their first-year courses. This applied examination covers material from the following first-year courses: BIOS 524, BIOS 571, BIOS 572 and BIOS 573. This examination is graded as pass or fail. A student must pass the qualifying examination at the M.S. level to continue in the M.S. program. A student who does not pass the qualifying examination at the M.S. level will have one opportunity to retake the examination. Students interested in applying to the Ph.D. program in biostatistics (with no concentration or with a concentration in genomic biostatistics) are strongly encouraged to also take the theoretical component of the qualifying examination covering material from the following first-year courses: BIOS 513, BIOS 514, BIOS 553 and BIOS 554. These students must pass both the applied and theoretical qualifying examinations at the Ph.D. level in order to be considered in the Ph.D. program.

Thesis

There is no thesis requirement in the M.S. program.

The minimum total of graduate credit hours required for this degree is 42.

Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

Graduate program director
Roy T. Sabo, Ph.D.
Associate professor, Department of Biostatistics
roy.sabo@vcuhealth.org
(804) 828-3047

Additional contact (admissions and prospective students)
Russell M. Boyle
Assistant professor, Department of Biostatistics, and associate program director
russell.boyle@vcuhealth.org
(804) 827-2049

Program website: biostatistics.vcu.edu (http://www.biostatistics.vcu.edu/)

Epidemiology, Doctor of Philosophy (Ph.D.)

Program mission

The mission of the Ph.D. program in epidemiology is to educate and train students to become independent, competent and self-directed research scientists so they can conduct outstanding clinical and population-based research. Students will learn methods for studying disease etiology and prevention in populations and evaluating interventions, diagnostic tests and treatment efficacy; they will implement such methods in an independent research study under the mentorship of an experienced epidemiology researcher.

Program goals

1. Critical foundation skills: The program is designed to provide students with the critical skills required to advance to positions as epidemiological researchers/trainers in a broad spectrum of positions.
2. Mastery and application of science: The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of epidemiology and ability to synthesize this information and apply this foundation to the identification of key areas of investigation/experimentation in bioscience.
3. Communication: Students will develop skills in the various means of communicating both the core of epidemiological knowledge and the expression of epidemiological methodology, research design, results and interpretation to a variety of potential audiences.

Student learning outcomes

Students in the doctoral program in epidemiology will develop competencies in the following areas, as described below.

1. Integrated knowledge of epidemiology: Students will demonstrate an appropriate level of knowledge of theories of disease causation as well as bias in epidemiologic research and demonstrate in-depth understanding of one or more substantive theories related to research. Students will be able to appropriately link theoretical frameworks to the design, conduct and interpretation of epidemiologic research and demonstrate familiarity with the research literature and the ability to evaluate and critique publications appropriate to an independent research scientist.
2. Problem-solving skills: Students will be able to appropriately apply epidemiologic and statistical methods for research needs, demonstrating proficiency in selecting the appropriate measures of association for the research at hand and correctly implementing analytic techniques, including addressing issues such as confounding and effect modification. Students will be able to evaluate and interpret results, explaining relationships between determinant(s) and outcome(s) under study.
3. Research design: Students will construct and develop novel epidemiologic research questions, demonstrating proficiency in selecting the most appropriate study designs such that bias is minimized and efficiency maximized. Students will understand the required elements to estimate sample size, know how to identify and minimize bias and confounders through study design and analysis, and demonstrate knowledge of the impact of measurement issues on study validity.
4. Written communication skills: Students will demonstrate proficiency in scientific writing, including manuscript development, grant writing and writing for multiple audiences, including lay audiences and policy-makers. Students will demonstrate an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information, including the use of figures, tables and citations.
5. Oral communication skills: Students will demonstrate effective oral communication skills across disciplines, framing questions appropriately and implementing active listening skills in delivering oral presentations to professional audiences, lecturing to students or leading discussions. Students will appropriately use audio/visual

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for degree candidacy, if applicable, by a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on doctoral programs is available elsewhere in this chapter of the Graduate Bulletin.

Special requirements

- Applicants must hold a master's degree, preferably in public health or a related field, and provide test scores as detailed below. Applicants must provide all required materials as described herein and in the VCU Admissions graduate application checklist.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must meet the following minimum qualifications.

1. Prior degree: Master’s degree in public health (M.P.H.) or equivalent M.S. degree, (e.g., sociology, biology, mathematics) with a minimum GPA of 3.0
2. GRE: Current GRE test results (taken within the past five years) with scores at or above the 75th percentile preferred in all components of the exam (e.g., minimum scores of 159 quantitative, 157 verbal and 4.5 analytical writing)
3. TOEFL: For non-native speakers of English, recommended minimum scores of either 100IBT, 600 PBT or IELTS scores of 6.5 (academic band score)
4. Personal statement: Applicants must include a personal statement that indicates their reasons for pursuing a doctoral degree in epidemiology, their particular areas of research focus or study, the departmental faculty advisers with whom the students would prefer to work, and career goals upon graduation.
5. Reference letters: Students must submit three letters of recommendation from three individuals who can assess the applicant’s qualifications for graduate school. Letters from past professors or faculty advisers are most appropriate.
6. Current CV or resume: Students must submit a current CV or resume.

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 31), students will be required to complete a minimum of 61 graduate credit hours as follows:

1. Four core courses focusing on epidemiological methods (12 credit hours)
2. Two core courses focusing on biostatistical theory and methods (six credit hours)
3. Four semesters of journal club (four credit hours)
4. Three courses of methodological electives (nine credit hours)
5. Three courses of substantive area electives, with at least one relating to the biological processes associated with the student's chosen substantive area (nine credit hours)
6. A minimum of two credit hours of practical research skills development
7. At least one course in the responsible conduct of research (one credit hour)
8. At least 18 credit hours of directed dissertation research

Students will also be required to complete the following:

**Practical experience**
1. Teaching experience: All doctoral students are required to serve as a teaching assistant for at least one semester before graduation. The student and her/his adviser discuss which course would be best-suited for the teaching assistantship.
2. Seminar attendance: All students are expected to attend all doctoral level Division of Epidemiology seminars during their tenure in the program. These seminars are generally held every other week during fall and spring semesters. In addition, students must attend any special public health seminars offered collaboratively by the public health departments. These special seminars may occur one to two times each semester.
3. Grant application submission: All students are required to submit at least one grant application related to their dissertation to a federal or nongovernmental funder to gain grantsmanship experience.

**Comprehensive exams**
Comprehensive exams include a written examination that assesses knowledge of completed didactic course work on core epidemiologic and biostatistical methods as well as a tailored substantive section based on the student’s research focus and an oral comprehensive exam based upon the student’s dissertation proposal.

**Dissertation**
1. Upon successful completion of the oral comprehensive examination, students embark upon dissertation work, typically in the last three to four semesters of study.
2. The dissertation must be a hypothesis-based, analytical epidemiology project designed by the student under the supervision of the faculty adviser and advisory committee members as appropriate.
3. Students develop and submit three manuscripts from the dissertation to peer-reviewed journals. Students should have submitted at least one manuscript before their final defense.

Dissertation: Select 18 credits minimum

The minimum total of graduate credit hours required for this degree is 61.

Typical plan of study
Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. A typical plan of study is available on the department's website (https://familymedicine.vcu.edu/epidemiology/phd/).

Graduate program director:
Juan Lu, Ph.D., M.P.H., M.D.
Associate professor, Division of Epidemiology, Department of Family Medicine and Population Health
juan.lu@vcuhealth.org
(804) 828-9786

Additional contact:
Lisa Anderson
Director of educational programs, Division of Epidemiology, Department of Family Medicine and Population Health
lisa.s.anderson@vcuhealth.org
(804) 628-2512

Program website: familymedicine.vcu.edu/epidemiology/phd (http://www.familymedicine.vcu.edu/epidemiology/phd/)

Genetic Counseling, Master of Science (M.S.)

Program accreditation:
Accreditation Council for Genetic Counseling

Program goals:
1. Competency in genetic counseling
2. Eligibility for certification by the American Board of Genetic Counseling
3. Preparation for careers in genetic counseling and human genetics and genomics

Successful candidates will demonstrate competency in all four genetic counseling domains: I – genetic expertise and analysis, II – interpersonal, psychosocial, and counseling skills, III – education and IV – professional development and practice.

**Student learning outcomes**

1. Competency in practice: The candidate should demonstrate development of competency in the responsible practice of genetic counseling. This will be assessed in the clinical setting by certified genetic counselors and medical geneticists. The assessment is based upon the core clinical competencies established by the Accreditation Council for Genetic Counseling. These competencies are documented with written and oral evaluations at the completion of each of the clinical rotations by the rotation supervisor.

2. General knowledge of sciences: The candidate should demonstrate a general knowledge of the elements of the sciences as related to genetic molecular/cellular bioscience and a detailed knowledge of his or her area of research, including an appropriate familiarity with the research literature. The student is evaluated by academic performance, face-to-face and written evaluation of clinical performance in multiple rotations by multiple supervisors and annual written and oral exams.

3. Communication skills: The candidate should demonstrate an appropriate level of oral, written and visual communication skills that have been acquired. This is achieved by evaluations of clinical rotations both written and verbal that are based on the competencies established by the Accreditation Council for Genetic Counseling and the scope of practice as set forth by the National Society of Genetic Counselors.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website and academic regulations in individual school and department websites and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for degree candidacy requirements. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

**Other information**

**School of Medicine graduate program policies**

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on master's programs is available elsewhere in this chapter of the Graduate Bulletin.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

<th>Deadline dates:</th>
<th>Test requirements:</th>
</tr>
</thead>
<tbody>
<tr>
<td>M.S.</td>
<td>Fall</td>
<td>Applications received prior to Jan 15 given priority consideration</td>
<td>GRE within five years of application; international applicants must score 100 or greater on the TOEFL.</td>
</tr>
</tbody>
</table>

In addition to the general admission requirements of the VCU Graduate School (p. 35):

1. Applicants must have successfully completed undergraduate training and hold a baccalaureate degree from an accredited university or college.

2. Applicants must write a personal essay, no longer than two pages, indicating their interest and suitability to the field of genetic counseling.

3. Prerequisites for admission include six credit hours each of biology, chemistry and behavioral science (psychology, anthropology, sociology, religion or philosophy) and three credit hours each of biochemistry, statistics and genetics. It is recommended that all prerequisite courses have been completed within 10 years of application. A prerequisite may be in process at the time of application. A minimum grade of a B must be obtained prior to admission if the course is in progress at the time of acceptance.

Visit the academic regulations section for additional information on admission requirements.
4. Students accepted to the program are generally drawn from applicants with a minimum undergraduate grade-point average of 3.0 (on a 4.0 scale or equivalent), with an average GPA of 3.3 to 3.5 for matriculating students.

5. The Graduate Record Examination is required for admission; there is no MCAT substitution. The GRE should be taken within five years of application submission. Matriculating students generally have GRE verbal scores at or above 153, quantitative scores at or above 144 and a writing performance above a score of 3.5 on the analytical section.

6. Applicants holding an undergraduate degree from foreign institutions must display an acceptable level of English proficiency by achieving a score of 250 on the computer-based TOEFL examination or 600 on the written version.

7. Additionally, successful applicants often have experience with shadowing genetic counselors and medical geneticists, interviewing genetic counselors and exposure to individuals with physical and cognitive disabilities. Exposure to crisis hotlines, support groups and community activities related to individuals with disability and genetic conditions is also helpful.

Note: The department receives an average of 120-150 applications annually. Of those, 40 to 50 are invited for an onsite interview, and eight to 10 students matriculate. The onsite interview is required for all North American applicants.

In the certification cycles from 2011-2016, graduates of the program have a 100 percent pass rate on the ABGC national certification examination.

The program participates in the Association of Genetic Counseling Program Directors program match. Prospective students may see the National Society of Genetic Counselors (http://www.nsgc.org/p/cm/ld/fid=44%23accept/) website and the American Board of Genetic Counseling (http://www.abgc.net/ABGC/AmericanBoardofGeneticCounselors.asp) website for additional information.

Matriculating genetic counseling students are eligible for selection in the VA-LEND certificate in neurodevelopmental disabilities. Information is available at wp.vcu.edu/virginialend (https://rampages.us/virginialend1/).

**Degree requirements**

In addition to the general VCU Graduate School graduation requirements (p. 31), students must complete a minimum total of 60 credit hours. The program is a full-time, on-campus program. (Part-time on-campus options may exist at the discretion of the program director.) There is no online option for degree completion. Students are expected to complete their course work in four semesters (21 consecutive months). To be considered full-time, the VCU School of Medicine requires students to register for 15 credit hours in the fall and spring semesters. Occasionally special circumstances may occur that could require a temporary leave of absence. The VCU Graduate School requires that master’s degrees be completed in a maximum of six years.

In order to be considered in good academic standing, a student must maintain a 3.0 GPA. Students who fail to maintain a 3.0 average are permitted one semester to bring their averages up to the required level.

As part of their course work, students begin clinical rotations in the spring semester of the first year and continue through the summer and both semesters of the second year. Students are required to engage in clinical experiences during the intervening summer. Options exist for summer experiences to occur outside the city of Richmond.

Students must pass a written comprehensive exam at the conclusion of the first two semesters of study and a written and oral comprehensive exam prior to graduation. The oral examination covers clinical competency and research competency.

Students are required to complete a research project during their course of study. The purpose of the research project is to give the student hands-on experience in developing a research question or exploring a professional or program problem, reviewing the literature, and attempting to answer the question or problem. Projects will enhance the student's professional development and represent a strong component of the “portfolio” of experience brought to the job interview process. Projects can range from laboratory to clinical and may include development of educational materials, videotapes or patient protocols. All projects are required to have defined goals and/or hypotheses to be tested. Institutional review board application and review is often required for student research. Publication and professional presentation are strongly encouraged.

Students are encouraged to consider projects in the first semester and to choose a project topic by the second semester. The project proposal is due to the program director by the first of June during the student's first year of study. All project proposals must be in writing and approved by the faculty member with whom the project will be performed and the program director. Some projects will require review by the Office of Research and Innovation for subject protections, and some projects may require that the student seek grant funding or participate on an existing faculty grant. The student is responsible for preparing documents and meeting these research requirements in a timely fashion.

Students must select a primary research adviser and the members of their research committee by the conclusion of the second semester. The committee must have at least one meeting by July 1 of the intervening summer. The research committee must include at least three faculty members with one outside of the department. Additional members may be added if needed for optimal project advising.

The student's supervisors and the genetic counseling program director work together in mentoring the student. Students are provided ongoing written and verbal evaluation regarding their academic and clinical progress.

In addition to participating in course work and counseling rotations, students in the department also participate in a number of community and education programs. These opportunities may include lectures and presentations to local schools and community events, participation in health fairs, School of Medicine-sponsored activities, state of Virginia Genetics Advisory Board meetings, and DNA Day on the Hill in Washington, D.C.

The straddling of the student and professional roles is a lifelong process in the changing field of human genetics and genetic counseling. Graduates of this program will be contributing members of the clinical genetics team of counselors, physicians and basic scientists and contributing members of commercial genetic testing laboratories and the developing field of human genomic medicine.

1 One credit to be taken in the summer semester as noted in the plan of study.

The minimum total of graduate credit hours required for this degree is 60.

### Typical plan of study

Many students may take more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

### Graduate program director
Rachel B. Gannaway, LCGC
r (rachel.gannaway@vcuhealth.org)achel.gannaway@vcuhealth.org
(804) 628-3507

### Additional contacts
Tahnee Causey, LCGC
tahnee.causey@vcuhealth.org
(804) 628-4078

John M. Quillin, Ph.D. LCGC

Director, dual-degree program (M.S. in Genetic Counseling/Ph.D. in Human Genetics)
john.quillin@vcuhealth.org
(804) 628-1925

### Program website
[gen.vcu.edu](https://gen.vcu.edu/)

**Note:** Email is the preferred method of contact. On-site informational meetings with faculty and students may be available depending on the time of the year and faculty/student availability. If applicants desire this opportunity, requests should be made at least six weeks in advance.

## Healthcare Policy and Research, Doctor of Philosophy (Ph.D.)

### Program goal

The doctoral program in healthcare policy and research trains students to understand the economic, political and social factors that affect access to care and the quality and cost of health care. Graduates of this program will have strong methodological and theoretical skills that will prepare them to make important contributions to the fields of health care policy and public health. Their training will enable them to add to scientific knowledge about how health policy, social factors, financing systems, organizational structures, care processes, health technologies and personal behaviors affect health care outcomes.

The program is structured to provide progressive mastery of the design and analysis of health services research. Program graduates will be able to formulate health care policy; to plan, implement and evaluate health programs and policies; and to interpret research findings in ways that are practical and policy-relevant to a variety of audiences. Trainees obtain experience working with colleagues in public health, medicine, psychology and other disciplines and to advance to positions as health policy researchers in academia, government or the private sector.

### Student learning outcomes

1. Content and theory: Students will critically articulate how health policies are developed, implemented and evaluated.
2. Critical and analytical thinking: Students will accurately analyze and synthesize health policy research.
3. Research methods: Students will demonstrate proficiency in designing, conducting and interpreting health policy research.
4. Effective communication: Students will communicate effectively to translate and disseminate research findings for health policy audiences.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website ([http://wwwgraduate.vcu.edu/](http://wwwgraduate.vcu.edu/)) and academic
regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information
Enrolled students may access the program handbook on Blackboard.

School of Medicine graduate program policies
The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on doctoral programs is available elsewhere in this chapter of the Graduate Bulletin.

Apply online at sophas.org (http://www.sophas.org/) and submit a VCU supplemental application following instructions available at sophas.org.

</tbody>
</table>

In addition to the general admission requirements of the VCU Graduate School (p. 31), applicants must meet the following minimum qualifications.

1. A college-level course in calculus with a minimum grade of B is preferred.
2. Applicants must have graduated from an accredited university or its equivalent, with a master's degree in a related discipline (e.g., economics, public health, public policy, health administration, public administration). Applicants must have completed relevant course work (including microeconomics and introductory statistics) or have professional experience in a health-related field (two years minimum) that provides an appropriate background for graduate-level study in healthcare policy and research.
3. Applicants must have taken the Graduate Record Exam within the past five years; scores in the 75th percentile are preferred.
4. Applicants from countries where English is not the primary and official national language must complete one of the following:
   a. English proficiency verification through official TOEFL score 550 or higher
   b. Graduate with a master's degree following two years of study at a U.S. institution
   c. English language proficiency certification through appropriate English training programs at other U.S. institutions, or English language proficiency certification by passing the English Language Proficiency Examination and/or the corresponding English Language Institute courses

VCU policy also requires that prospective students who have studied outside of the U.S. must provide an official WES or ECE external credential evaluation as a required part of the admissions process.

5. Applicants must present three letters of recommendation from individuals who are in a position to judge their ability to engage in interdisciplinary graduate study in healthcare policy and research. At least one recommendation must be from an individual who can comment on the applicant's academic qualifications (e.g., former instructor or adviser).
6. Applicants must provide a written statement of professional intent that includes the proposed area of research and identifies the faculty member(s) with which the applicant is interested in working.
7. Applicants must present a curriculum vitae or resume.
8. A recent writing sample, such as a first author, peer-reviewed publication; a master's thesis; a book chapter; a policy brief or report; or a graduate course paper is required. An undergraduate course paper may be substituted if none of the above is available.
9. Prospective students must be available to interview either in person or teleconference via technology such as Zoom.

Degree requirements
In addition to the general VCU Graduate School graduation requirements (p. 31), a cumulative GPA of 3.0 must be maintained. Students must receive a minimum grade of B for all required courses. A student who receives a grade of C in a required course shall repeat the course. A second grade of C in a required course shall result in dismissal from the program. At the discretion of the HCPR committee, a student who is retaking a required course may still be eligible to take the comprehensive examination and to start the dissertation prior to repeating the course.
At the end of the second year of required course work, students will take a written comprehensive examination designed to evaluate the student’s ability to:

1. Integrate course material
2. Demonstrate critical thinking and evaluation of the literature in healthcare policy and research
3. Demonstrate quantitative analysis skills

After passing the written comprehensive examination, the student will schedule the proposal defense within six months. Following successful defense of the proposal, the student will prepare three manuscripts of publishable quality that will comprise the body of the dissertation and will orally defend the dissertation. It is anticipated that students will complete the program in four to five years. All requirements for the Ph.D. degree must be completed within six years from the date of admission to the degree program. Extensions may be approved in extenuating circumstances.

Total Hours 59

The minimum total of graduate credit hours required for this degree is 59.

### Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, the nature of research being conducted, or the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements. This program has a typical time to degree of four years. For additional information, see the departmental website (http://bulletin.vcu.edu/graduate/school-medicine/healthcare-policy-research-phd/%20http://hbp.vcu.edu/education/phd-healthcarepolicy/).

Phone: (804) 828-5329

**Program website**: hbp.vcu.edu (http://hbp.vcu.edu/)

### Human Genetics, Doctor of Philosophy (Ph.D.)

**Program goal**

The program is designed to provide students with training in human and molecular genetics and with the skills required to advance to positions as researchers and trainers in a broad spectrum of positions in human and molecular genetics. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter in human and molecular genetics and an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in this discipline. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified. In addition, the program will develop skills in the various means of communicating both the core of human and molecular genetics knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

### Student learning outcomes

1. Oral communication skills: The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.

2. Written communication skills: The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.

3. Experimental design: The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental
protocols and to design and develop experiments as measured by rubric.

4. Problem-solving skills: The candidate will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in research in human and molecular genetics, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.

5. Integrated knowledge of human and molecular genetics: The candidate will demonstrate an appropriate level of knowledge of the current elements of human and molecular genetics as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications as measured by rubric.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduated.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

**Other information**

**School of Medicine graduate program policies**

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on doctoral programs is available elsewhere in this chapter of the Graduate Bulletin.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

<table>
<thead>
<tr>
<th>Degree:</th>
<th>Semester(s) of entry:</th>
<th>Deadline dates:</th>
<th>Test requirements:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ph.D.</td>
<td>Fall</td>
<td>Applications received prior to Jan 15</td>
<td>GRE</td>
</tr>
</tbody>
</table>

**Special requirements**

- International applicants must score 100 or greater on the TOEFL.
- MCAT or DAT acceptable in lieu of GRE for combined professional/academic degree programs, but not for dual degree academic programs.
- Applications for the program must be submitted to the Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D. selected from the drop-down menu of programs on the VCU online application form.

In addition to the general admission requirements of the VCU Graduate School (p. 35), successful applicants will typically have the following credentials:

1. A baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. Current GRE scores (taken within the past five years), with scores at the 75th percentile or greater preferred
3. TOEFL scores of 600 (pBT), 250 (cBT) or 100 (iBT) for individuals for whom English is a second language; or 6.5 on the IELTS (To report GRE or TOEFL score, use VCU Code 5570.)
4. Personal statements, which should include: long-term career goals to assess reasons behind the candidate’s application; how a Ph.D. in biomedical science helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration
5. Three letters of recommendation that speak to the scientific competency and experience of the applicant
6. The equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g., cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology, biophysics, etc.)

The Department of Human and Molecular Genetics offers a comprehensive program in graduate study leading to a Doctor of
Philosophy in Human Genetics. The program includes the completion of an original research project under the supervision of a faculty adviser and a background/foundation of courses that prepare students for research-oriented careers in the rapidly expanding field of human genetics. Major areas of study available to Ph.D. students in the program include clinical and molecular cytogenetics, molecular genetics, developmental genetics, cancer genetics, behavior genetics, population and quantitative genetics, genetic epidemiology, clinical genetics and genetic counseling. Once core course work requirements have been completed, the student’s course plan is tailored to meet individual needs with regard to the area of research focus. A concentration in quantitative human genetics is available for those planning a career in this area. For more detailed information on the program visit the program website (https://gen.vcu.edu/graduate-and-training-programs/phd-in-human-genetics/).

**Degree requirements**

In addition to the general VCU Graduate School graduation requirements (p. 31), students must complete a minimum of 86 graduate credit hours. The program requires at least three years of study for students entering with a B.S. or B.A. degree and must be completed within eight years.

The training programs in human and molecular genetics are intended to set the tone for a career and lifelong learning in human and molecular genetics by developing the student’s knowledge of the field and skills in writing, laboratory techniques, critical thinking, data interpretation, study design, literature research and review, and integration of data from multiple disciplines while fostering the student’s development as an independent researcher, laboratory director or teacher. These programs also seek to provide students with a core foundation of knowledge that will equip them to carry out translational research and for later work leading to certification by the American Board of Medical Genetics.

Students working toward the Ph.D. degree in human genetics pass through two stages of graduate study. The first stage consists primarily of course work recommended by the department and the student’s graduate committee; the second stage consists of original research leading to the doctoral dissertation. Ph.D. students are expected to complete the required course work within four semesters and one summer, and they are intended to set the tone of a lifelong research career. In order to be considered in good academic standing, a student must maintain a 3.0 grade point average. The focus then shifts to the student’s development as an independent researcher, laboratory director or teacher. These programs also seek to provide students with a core foundation of knowledge that will equip them to carry out translational research and for later work leading to certification by the American Board of Medical Genetics.

After the second year of study, students will take the Ph.D. candidacy examination. This exam comprises two parts, a departmental comprehensive examination and a written NIH-style application with an oral examination administered by the student's graduate committee. Upon successfully completing the departmental comprehensive and the oral exam, the student is admitted to Ph.D. candidacy. At this point, students are expected to develop and conduct dissertation research projects and to write and defend their dissertations describing their dissertation research.

2. HGEN 690 should be taken every fall and spring semester.

3. HGEN 697 should be taken every semester following the first year of study.

The minimum total of graduate credit hours required for this degree is 86.

**Typical plan of study**

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. The program requires at least three years of study for students entering with a B.S. or B.A. degree and must be completed within eight years. Students complete this degree program on average within five years. Students should refer to their program websites (https://gen.vcu.edu/graduate-and-training-programs/phd-in-human-genetics/curriculum/) and talk with...
their graduate program directors or advisers for information about typical plans of study and registration requirements.

**Graduate program director**

Rita Shiang, Ph.D.
Associate professor, Department of Human and Molecular Genetics
rita.shiang@vcuhealth.org
(804) 628-4083

**Program website:** gen.vcu.edu (http://www.gen.vcu.edu/)

**Human Genetics, Doctor of Philosophy (Ph.D.) with a concentration in molecular biology and genetics**

**Program goals**

The molecular biology and genetics curriculum is an integrated interdisciplinary program of study that builds on the graduate programs of participating departments in the School of Medicine. The doctoral curriculum is designed to be an intensive course of study that will provide students with the skills required to advance to research-oriented careers in biotechnology.

1. The curriculum includes core, specialization and elective courses. Electives drawn from various departments allow individual specialization.

2. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation. The program relates this framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified.

3. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

4. The program centers on a research project conducted under the guidance of a selected faculty mentor and culminates in the presentation and defense of a doctoral dissertation.

Participating faculty are associated not only with programs and departments within the School of Medicine, but also with the VCU Massey Cancer Center, the Philips Institute for Oral and Craniofacial Molecular Biology (School of Dentistry), the Institute of Structural Biology and Drug Discovery (School of Pharmacy) and the VCU Center for the Study of Biological Complexity (VCU Life Sciences).

The interdisciplinary approach to the solution of biological problems provided by this training is designed to develop in students the flexibility and problem-solving skills necessary for success in a variety of scientific career opportunities or further graduate study.

**Student learning outcomes**

1. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.

2. General knowledge of sciences: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications, as measured by rubric.

3. Communication skills: Degree candidates will demonstrate that an appropriate level of oral, written and visual communication skills have been acquired.
   a. Oral communication skills: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
   b. Written communication skills: Degree candidates will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.

4. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on-and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduatedu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section for additional information on academic regulations for graduate students.** (p. 17)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.
Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on doctoral programs is available elsewhere in this chapter of the Graduate Bulletin.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Admission requirements

<table>
<thead>
<tr>
<th>Degree:</th>
<th>Semester(s) of entry:</th>
<th>Deadline dates:</th>
<th>Test requirements:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ph.D.</td>
<td>Fall</td>
<td>Applications received prior to Jan 15 given priority consideration</td>
<td>GRE, MCAT or DAT</td>
</tr>
</tbody>
</table>

Special requirements

- MCAT or DAT acceptable in lieu of GRE for combined professional/academic degree programs
- Applications for the program must be submitted to the Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D. selected from the drop-down menu of programs on the VCU online application form.

In addition to the general admission requirements of the VCU Graduate School (p. 31), successful applicants will typically have the following credentials:

1. A baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. Current GRE scores (taken within the past five years), with scores at the 75th percentile or greater preferred
3. TOEFL scores of 600 (pBT), 250 (cBT) or 100 (iBT) for individuals for whom English is a second language; or 6.5 on the IELTS (To report GRE or TOEFL score, use VCU Code 5570.)
4. Personal statements, which should include: long-term career goals to assess reasons behind the candidate's application; how a Ph.D. in biomedical science helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration
5. Three letters of recommendation that speak to the scientific competency and experience of the applicant
6. The equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g. cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology, biophysics, etc.)
7. Laboratory experience also strongly recommended

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 31), students must complete a minimum of 86 graduate credit hours.

During the first year, students pursue research rotations, take formal course work and become familiar with current research topics through seminars, discussion groups and lectures by distinguished scientists. By the end of the first year, students choose a faculty adviser and begin dissertation research. Prior to the beginning of the third year of study, students should successfully pass written and oral candidacy examinations. Following completion of the research project and defense of the doctoral dissertation, graduates are equipped to participate in a broad range of current biomedical research areas.

</tr>
</tbody>
</table>

The minimum total of graduate credit hours required for this degree is 86.

### Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

### Human Genetics, Doctor of Philosophy (Ph.D.) with a concentration in quantitative human genetics

#### Program goal

The program is designed to provide students with the skills required to advance to positions as researchers and trainers in a broad spectrum of positions in human and molecular genetics. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter in human and molecular genetics and an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in this discipline. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified. In addition, the program will develop skills in the various means of communicating both the core of human and molecular genetics knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

#### Student learning outcomes

1. Oral communication skills: The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.

2. Written communication skills: The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.

3. Experimental design: The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

4. Problem-solving skills: The candidate will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in research in human and molecular genetics, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.

5. Integrated knowledge of human and molecular genetics: The candidate will demonstrate an appropriate level of knowledge of the current elements of human and molecular genetics as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications as measured by rubric.

### VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.gradschool.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

#### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.
Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information
School of Medicine graduate program policies
The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on doctoral programs is available elsewhere in this chapter of the Graduate Bulletin.

Admission requirements

<table>
<thead>
<tr>
<th>Degree: Ph.D.</th>
<th>Semester(s) of entry: Fall</th>
<th>Deadline dates: Applications received prior to Jan 15 given priority consideration</th>
<th>Test requirements: GRE</th>
</tr>
</thead>
</table>

Special requirements

- International applicants must score 100 or greater on the TOEFL.
- MCAT or DAT acceptable in lieu of GRE for combined professional/academic degree programs, but not for dual degree academic programs.
- Applications for the program must be submitted to the Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D. selected from the drop-down menu of programs on the VCU online application form.

In addition to the general admission requirements of the VCU Graduate School (p. 35), successful applicants will typically have the following credentials:

1. A baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. Current GRE scores (taken within the past five years), with scores at the 75th percentile or greater preferred
3. TOEFL scores of 600 (pBT), 250 (cBT) or 100 (iBT) for individuals for whom English is a second language; or 6.5 on the IELTS (To report GRE or TOEFL score, use VCU Code 5570.)
4. Personal statements, which should include: long-term career goals to assess reasons behind the candidate’s application; how a Ph.D. in biomedical science helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration
5. Three letters of recommendation that speak to the scientific competency and experience of the applicant
6. The equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g. cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology, biophysics, etc.)

The Department of Human and Molecular Genetics offers a comprehensive program in graduate study leading to a Doctor of Philosophy in Human Genetics. The program includes the completion of an original research project under the supervision of a faculty adviser and a background/foundation of courses that prepare students for research-oriented careers in the rapidly expanding field of human genetics. Major areas of study available to Ph.D. students in the program include clinical and molecular cytogenetics, molecular genetics, developmental genetics, cancer genetics, behavior genetics, population and quantitative genetics, genetic epidemiology, clinical genetics and genetic counseling. Once core course work requirements have been completed, the student’s course plan is tailored to meet individual needs with regard to the area of research focus. For more detailed information on the program visit the program website (https://gen.vcu.edu/graduate-and-training-programs/ phd-in-human-genetics/).

Degree requirements
In addition to the general VCU Graduate School graduation requirements (p. 31), students must complete a minimum of 86 graduate credit hours. The program requires at least three years of study for students entering with a B.S. or B.A. degree and must be completed within eight years.

The training programs in human and molecular genetics are intended to set the tone for a career and lifelong learning in human and molecular genetics by developing the student’s knowledge of the field and skills in writing, laboratory techniques, critical thinking, data interpretation, study design, literature research and review, and integration of data from multiple disciplines while fostering the student’s development as an independent researcher, laboratory director or teacher. These programs also seek to provide students with a core foundation of knowledge that will equip them to carry out translational research and for later work leading to certification by the American Board of Medical Genetics.

Students working toward the Ph.D. degree in human genetics pass through two stages of graduate study. The first stage consists primarily of course work recommended by the department and the student’s graduate committee; the second stage consists of original research leading to the doctoral dissertation. Ph.D. students are expected to complete the required course work within four semesters and one summer, and they are intended to set the tone of a lifelong research career. In order to be considered in good academic standing, a student must maintain a 3.0 grade point average. The focus then shifts to the student’s development as an independent researcher with emphasis being placed upon the development and execution of an original research project leading to the doctoral dissertation.

After the second year of study, students will take the Ph.D. candidacy examination. This exam comprises two parts, a departmental comprehensive examination and a written NIH-style application with an oral examination administered by the student’s graduate committee.
Upon successfully completing the departmental comprehensive and the oral exam, the student is admitted to Ph.D. candidacy. At this point, students are expected to develop and conduct dissertation research projects and to write and defend their dissertations describing their dissertation research.

Accreditation Council of Genetic Counseling

**Program goal**

Provide training in human and molecular genetics and competency in genetic counseling

The program is designed to provide students with the skills required to advance to positions as researchers and trainers in a broad spectrum of positions in human and molecular genetics. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter in human and molecular genetics and an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in this discipline. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified. In addition, the program will develop skills in the various means of communicating both the core of human and molecular genetics knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

**Eligibility for certification by the American Board of Genetic Counseling**

To prepare individuals for careers in genetic counseling and human genetics, successful candidates will demonstrate competency in all four
Student learning outcomes

1. Oral communication skills: The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric. This is also achieved by evaluations of clinical rotations, both written and verbal, that are based on the competencies established by the American Board of Genetic Counseling and the scope of practice as set forth by the National Society of Genetic Counselors.

2. Written communication skills: The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.

3. Experimental design: The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

4. Problem-solving skills: The candidate will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in research in human and molecular genetics, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.

5. Integrated knowledge of human and molecular genetics: The candidate will demonstrate an appropriate level of knowledge of the current elements of human and molecular genetics as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications as measured by rubric.

6. Competency in practice: The candidate should demonstrate development of competency in the responsible practice of genetic counseling. This will be assessed in the clinical setting by certified genetic counselors and medical geneticists. The assessment is based upon the core clinical competencies established by the Accreditation Council for Genetic Counseling (ACGC). These competencies are documented with written and oral evaluations at the completion of each of the seven clinical rotations by the rotation supervisor.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on master’s programs is available in the Graduate Bulletin at Master’s programs (p. 634); information on doctoral programs can be found at P (http://www.pubapps.vcu.edu/Bulletins/about/?uid=10046&amp;iid=30114/)h.D. programs (p. 630).
To qualify as a dual-degree student in any of the training paradigms which appear in the Bulletin, a student must have evidence of having been simultaneously enrolled in one or more courses of both of the programs constituting the “dual degree” for at least one semester.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

<tr>
<td>Ph.D. and M.S.</td>
<td>Fall</td>
<td>Jan 15</td>
<td>GRE within five years of application (MCAT or DAT is not acceptable in lieu of GRE.)</td>
</tr>
</tbody>
</table>

Special requirements

- Applications for the program must be submitted to the Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D. selected from the drop-down menu of programs on the VCU online application form. The dual degree box on the application must also be checked.
- International applicants must score 100 or greater on the TOEFL.
- It is recommended that all prerequisite courses have been completed within 10 years of application.

Applicants must meet all general admission requirements of the VCU Graduate School (p. 35). In order to be admitted to this dual-degree program, an applicant must apply to and be accepted into both the M.S. and the Ph.D. programs.

Human Genetics, Doctor of Philosophy

Successful applicants will typically have the following credentials:

1. A baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. Current GRE scores (taken within the past five years), with scores at the 75th percentile or greater preferred
3. TOEFL scores of 600 (pBT), 250 (cBT) or 100 (iBT) for individuals for whom English is a second language; or 6.5 on the IELTS (To report GRE or TOEFL score, use VCU Code 5570.)
4. Personal statements, which should include: long-term career goals to assess reasons behind the candidate’s application; how a Ph.D. in biomedical science helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration
5. Three letters of recommendation that speak to the scientific competency and experience of the applicant
6. The equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g. cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology, biophysics, etc.)

The Department of Human and Molecular Genetics offers a comprehensive program in graduate study leading to a Doctor of Philosophy in Human Genetics. The program includes the completion of an original research project under the supervision of a faculty adviser and a background/foundation of courses that prepare students for research-oriented careers in the rapidly expanding field of human genetics. Major areas of study available to Ph.D. students in the program include clinical and molecular cytogenetics, molecular genetics, developmental genetics, cancer genetics, behavior genetics, population and quantitative genetics, genetic epidemiology, clinical genetics and genetic counseling. Once core course work requirements have been completed, the student’s course plan is tailored to meet individual needs with regard to the area of research focus. A concentration in quantitative human genetics is available for those planning a career in this area. For more detailed information on the program visit the department’s website (https://gen.vcu.edu/graduate-and-training-programs/phd-in-human-genetics/).

Genetic Counseling, Master of Science (M.S.)

Applicants should have successfully completed undergraduate training and hold a baccalaureate degree. Prerequisites for admission include six credit hours each of biology, chemistry and behavioral science (psychology, anthropology, sociology, religion and philosophy) and three credit hours each of biochemistry, statistics and genetics. Students accepted to the program are generally drawn from applicants with an undergraduate minimum grade point average of 3.0 (on a 4.0 scale or equivalent), with an average GPA of 3.3 to 3.5 for matriculating students. The Graduate Record Examination is required for admission; VCU does not substitute with the MCAT. Matriculating students generally have GRE verbal scores at or above 153, quantitative scores at or above 144 and a performance above a score of 3.5 on the analytical section. Applicants holding an undergraduate degree from foreign institutions must display an acceptable level of English proficiency by achieving a score of 250 on the computer-based TOEFL examination or 600 on the written version. (The program participates in the Association of Genetic Counseling Program Directors program match. See the National Society of Genetic Counselors website (https://www.nsgc.org/) for additional information.)

Additionally, successful applicants often have experience with shadowing genetic counselors and medical geneticists, interviewing genetic counselors and exposure to individuals with physical and cognitive disabilities. Exposure to crises hotlines, support groups and community activities related to individuals with disability and genetic conditions is also helpful.

In the last five certification cycles (2007 to 2012) VCU graduates have an 86 percent pass rate on the American Board of Genetic Counseling/Accreditation Council of Genetic Counseling national certification examination.

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 31), the Ph.D. degree requires at least three years of study for students entering with a baccalaureate degree and must be completed within eight years. Students in the dual-degree program must complete a minimum of 90 graduate credit hours.

The training programs in human and molecular genetics are intended to set the tone for a career and lifelong learning in human and molecular genetics by developing the student’s knowledge of the field and skills in writing, laboratory techniques, critical thinking, data interpretation, study design, literature research and review, and integration of data from multiple disciplines while fostering the student’s development as an independent researcher, laboratory director or teacher. These programs also seek to provide students with a core foundation of knowledge that will equip them to carry out translational research and for later work leading to certification by the American Board of Medical Genetics.
Students working toward the Ph.D. degree in human genetics pass through two stages of graduate study. The first stage consists primarily of course work recommended by the department and the student's graduate committee; the second stage consists of original research leading to the doctoral dissertation. Ph.D. students are expected to complete the required course work within four semesters and one summer, and they are intended to set the tone of a lifelong research career. In order to be considered in good academic standing, a student must maintain a 3.0 grade point average. The focus then shifts to the student's development as an independent researcher with emphasis being placed upon the development and execution of an original research project leading to the doctoral dissertation.

After the second year of study, students will take the Ph.D. candidacy examination. This exam comprises two parts, a departmental comprehensive examination and a written NIH-style application with an oral examination administered by the student's graduate committee. Upon successfully completing the departmental comprehensive and the oral comprehensive exam, the student is admitted to Ph.D. candidacy. At this point, students are expected to develop and conduct dissertation research projects and to write and defend their dissertations describing their dissertation research.

**Total Hours**: 90

1. M.S. in Genetic Counseling requirement
2. HGEN 614 fulfills this requirement
3. Ph.D. in Human Genetics requirement
4. HGEN 610 should be taken every fall and spring semester beginning the spring term of the first year but not required in the last year of study.
5. HGEN 690 should be taken every fall and spring semester
6. HGEN 697 should be taken every semester following the first year of study
7. This course is divided into two distinct sections — a cytogenetics section and a molecular genetics section. The intent of this rotation is for students to learn the behind-the-scenes wet lab activities that lead to genetic information relevant for clinical counseling. Some dual-degree students may choose a thesis project that specializes in wet lab research, either cytogenetics or molecular genetics. With permission from the adviser and the genetic counseling program director, part or all of this rotation may not be required.

**Electives (optional)**

No electives are required for the dual-degree program. If the student chooses to take electives, however, suggested electives include the following:

<table>

**Total Hours**: 0-3

**The minimum total of graduate credit hours required for this degree is 90.**

### Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted or in the enrollment or funding status of the student. The program requires at least three years of study for students entering with a B.S. or B.A. degree and must be completed within eight years. Students complete these degree programs on average within six years. Students should refer to their program websites (https://gen.vcu.edu/graduate-and-training-programs/dual-degree-program-in-human-genetics–genetic-counseling/) and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

**Graduate program director**

Rita Shiang, Ph.D.

Associate professor, Department of Human and Molecular Genetics

rita.shiang@vcuhealth.org
**Human Genetics, Master of Science (M.S.)**

**Program goal**

The goal of the master’s program in human genetics is to provide training in human and molecular genetics. The program is designed to provide students with the skills required to advance to positions as researchers and trainers in a broad spectrum of positions in human and molecular genetics. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter in human and molecular genetics and an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in this discipline. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified. In addition, students will develop skills in the various means of communicating both the core of human and molecular genetics knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

**Student learning outcomes**

1. **Oral communication skills**: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
2. **Written communication skills**: Degree candidates will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
3. **Experimental design**: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.
4. **Problem-solving skills**: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in research in human and molecular genetics, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
5. **Integrated knowledge of human and molecular genetics**: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of human and molecular genetics as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications as measured by rubric.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

**Other information**

School of Medicine graduate program policies
The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on master's programs is available elsewhere in this chapter of the Graduate Bulletin.

Apply online at graduate.admissions.vcu.edu (http://wwwgraduate.admissions.vcu.edu).

<td>M.S.</td>
<td>Fall</td>
<td>May 1</td>
<td>GRE, MCAT or DAT</td>
</tr>
</tbody>
</table>

**Special requirements**

- International applicants must score 100 or greater on the TOEFL.

In addition to the general admission requirements of the VCU Graduate School (https://vcu-curr.courseleaf.com/graduate/study/admission-graduate-study/admission-requirements/), applicants wishing to specialize in human genetics should have courses in biology, chemistry through organic chemistry, genetics and mathematics through calculus.

**Basic science, research-intensive, non-thesis curriculum for medical students**

Individuals who are participants in medical training (the Doctor of Medicine program) at VCU may be eligible for enrollment in a research-intensive, non-thesis graduate curriculum. This basic science option builds on the core of disciplinary material embedded in the first two years of training in the medical school curriculum. Additional exposure is provided to specialized areas in basic science disciplines in concert with an intensive research experience leading to the preparation of a report in the form of a manuscript suitable for publication. The program is designed to be completed within 12 to 15 months. Subject matter related to the core material and/or suitable elective courses taken in the didactic phase of medical training correspond to a minimum of the equivalent of 24 graduate credit hours. The equivalent of 12 credit hours may be applied to the M.S. degree program in which the student is enrolled in accordance with Graduate School policy. Medical students interested in the basic science option should contact the M.S. graduate program director for additional information.

**Degree requirements**

The Department of Human and Molecular Genetics offers a comprehensive program in graduate study leading to a Master of Science in Human Genetics. The program includes the completion of an original research project under the supervision of a faculty adviser and a background/foundation of courses that prepare students for research-oriented careers in the rapidly expanding field of human genetics. Major areas of study available to master’s students in the program include clinical and molecular cytogenetics, molecular genetics, developmental genetics, cancer genetics, behavior genetics, population and quantitative genetics, genetic epidemiology, clinical genetics and genetic counseling.

In addition to the general VCU Graduate School graduation requirements (p. 31), the M.S. degree requires at least two years of full-time study for students entering with a B.S. or B.A. degree and must be completed within six years. Students must complete a minimum of 59 graduate credit hours. Students may be required to take an additional six hours of directed research after the second spring semester if needed.

Upon completing their thesis research, master’s students must report their results in a thesis that is prepared in an acceptable form and style as detailed by the university Graduate School. A final oral examination is scheduled after the student’s thesis has been approved by the student’s advisory committee. This examination includes the subject matter of course work the student has completed as well as the thesis. It is administered by the student’s graduate advisory committee who will vote on the student’s performance in addition to rating them with regard to the rubrics defined by the School of Medicine.

1 The student and faculty member will design a project that can reasonably be completed in 12 weeks. The student will spend approximately 12 weeks in that laboratory for a minimum of eight hours a week. The student’s performance in the laboratory will serve as the basis for the grade that is received for this course.

2
HGEN 610 should be taken every fall and spring semester beginning the spring term of the first year.

HGEN 690 should be taken every fall and spring semester.

HGEN 697 should be taken every semester following the first year of study.

The minimum total of graduate credit hours required for this degree is 59.

Typical plan of study
The M.S. degree requires at least two years of full-time study for students entering with a B.S. or B.A. degree and must be completed within six years. Students should refer to their program websites (https://gen.vcu.edu/graduate-and-training-programs/ms-in-human-genetics/curriculum/) and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

Graduate program director
Rita Shiang, Ph.D.
Associate professor, Department of Human and Molecular Genetics
rita.shiang@vcuhealth.org
(804) 628-4083

Program website: gen.vcu.edu (https://gen.vcu.edu/)

Human Genetics, Master of Science (M.S.) with a concentration in genomic data science

Program goal
The genomic data science concentration is designed for students interested in the computational aspects of genetics and genomics research. The goal of this concentration is to provide students with training in broadly applicable analytical and computational skills from the emerging field of data science to address important questions in human and molecular genetics. The structure of the M.S. program provides a framework for the progressive development of a mastery of the current state of the subject matter in human and molecular genetics and an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in this discipline. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified. In addition, students will develop skills in the various means of communicating both the core of human and molecular genetics knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

Student learning outcomes
1. Oral communication skills: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
2. Written communication skills: Degree candidates will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
3. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.
4. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in research in human and molecular genetics, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
5. Integrated knowledge of human and molecular genetics: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of human and molecular genetics as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications as measured by rubric.

It is expected that the program should be completed in approximately two to two-and-one-half years.

1. The curriculum includes core, specialization and elective courses. Electives drawn from various departments allow individual specialization.

2. The structure of the program provides a framework for the progressive development of a mastery of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation. The program relates this framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified.

3. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

4. The final three semesters include a research project conducted under the guidance of a selected faculty mentor and culminates in the presentation and defense of a master's thesis.

Participating faculty are associated not only with programs and departments within the School of Medicine, but also with the VCU Massey Cancer Center, the Philips Institute for Oral and Craniofacial Molecular Biology (School of Dentistry), the Institute of Structural Biology and Drug Discovery (School of Pharmacy) and the VCU Center for the Study of Biological Complexity (VCU Life Sciences).

The interdisciplinary approach to the solution of biological problems provided by this training is designed to develop in students the flexibility and problem-solving skills necessary for success in a variety of scientific career opportunities or further graduate study.

**Student learning outcomes**

1. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.

2. General knowledge of sciences: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications, as measured by rubric.

3. Communication skills: Degree candidates will demonstrate that an appropriate level of oral, written and visual communication skills have been acquired.

   a. Oral communication skills: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.

   b. Written communication skills: Degree candidates will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
4. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the VCU Graduate Bulletin website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

A master’s student in the MBG curriculum must prepare a formal written research plan and make an oral presentation of their thesis research proposal and progress report to their graduate advisory committee prior to the beginning of the second year of residency. The student’s knowledge in the area of the proposed research, current research accomplishments and the feasibility of the proposed research project will be evaluated by the GAC. Successful completion of this review is required for continuance in the program and constitutes admission to candidacy.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on master’s programs is available elsewhere in this chapter of the Graduate Bulletin.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Special requirements

- Applications for the program should be submitted to Molecular Biology and Genetics – M.S. selected from the drop-down menu of programs of the VCU online graduate application form. The degree awarded will be a Master of Science in Human Genetics.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must have earned or expect to earn a baccalaureate or equivalent degree, and must have demonstrated a superior knowledge of biology, chemistry, physics and mathematics. Laboratory experience is also strongly recommended. The Graduate Record Examination is required, as are letters of recommendation and a letter summarizing the applicant’s goals. International applicants who do not use English as their native language must take the Test of English as a Foreign Language examination.

Basic science, research-intensive, non-thesis curriculum for medical students

Individuals who are participants in medical training (the Doctor of Medicine program) at VCU may be eligible for enrollment in a research-intensive, non-thesis graduate curriculum. This basic science option builds on the core of disciplinary material embedded in the first two years of training in the medical school curriculum. Additional exposure is provided to specialized areas in basic science disciplines in concert with an intensive research experience leading to the preparation of a report in the form of a manuscript suitable for publication. The program is designed to be completed within 12 to 15 months. Subject matter related to the core material and/or suitable elective courses taken in the didactic phase of medical training correspond to a minimum of the equivalent of 24 graduate credit hours. The equivalent of 12 credit hours may be applied to the M.S. degree program in which the student is enrolled in accordance with Graduate School policy. Medical students interested
in the basic science option should contact the M.S. graduate program
director for additional information.

Degree requirements
In addition to the general VCU Graduate School graduation requirements
(p. 31), the interdisciplinary master's curriculum in molecular biology and
genetics requires a minimum of 48 credit hours, at least half of which
must be course work restricted to graduate students. The curriculum includes
19 credit hours of required core course work and 29 additional
credit hours of required course work, directed research and research
seminar course work, and additional approved course work, as listed
below. M.S. candidates must pass a final oral examination. A written
thesis approved by the student's graduate advisory committee completes
the requirements leading to the M.S. degree.

Students may take additional course work with the approval of their
graduate program directors.

The minimum total of graduate credit hours required for this degree is 48.

Typical plan of study
Many students often end up taking more than the minimum number of
hours required for a degree program. The total number of hours may vary
depending upon the program, nature of research being conducted by
a study or in the enrollment or funding status of the student. Students
should refer to their program websites and talk with their graduate
program directors or advisers for information about typical plans of study
and registration requirements.

Graduate program director

Program website: vcu.edu/mbg (http://www.vcu.edu/mbg/)

Medical Physics, Certificate in (Post-baccalaureate graduate certificate)

Program accreditation
Commission on Accreditation of Medical Physics Educational Programs
(http://campep.org/)

Program goals
The graduate certificate in medical physics offers course work in physics
as it is applied to the diagnosis and treatment of human diseases.
Required course work provides theoretical and practical training in
radiation dosimetry, radiation biology, radiation therapy, imaging and
health physics. The goal of the program is to provide a career path in
medical physics as an alternative to a terminal degree in medical physics.
The program is primarily designed for retraining those who possess a
doctoral degree in physics or a related field.

The mission of the medical physics graduate certificate program is to
serve the Virginia and the nation by helping to meet the demand for
competent medical physicists in the health care delivery setting. The
program is intended for postdoctoral individuals seeking to enhance their
credentials for admission into a medical physics residency position.
Student learning goals
To develop core competency in medical physics by:

1. Obtaining a medical physics knowledge base
2. Enhancing medical physics-specific problem-solving skills
3. Enhancing clinically relevant communication skills

Student learning outcomes
1. Demonstrate satisfactory knowledge of the base of scientific information required to practice clinical medical physics
2. Demonstrate the ability to evaluate and integrate such knowledge into the solution of clinically relevant problems as measured by the course work
3. Demonstrate an appropriate level of skill in the identification of clinical medical physics problems and the design and implementation of appropriate problem-solving methods and solutions as measured by course work
4. Demonstrate appropriate written communication skills suitable for practice in clinical medical physics
5. Demonstrate appropriate oral and visual communication skills suitable for practice in clinical medical physics

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information
School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

</table>

In addition to the general admission requirements of the VCU Graduate School (http://bulletin.vcu.edu/graduate/study/admission-graduate-study/admission-requirements/) and the School of Medicine, students are expected to satisfy the following minimum standards for admission.

1. Students must have a minimum of 30 credit hours in undergraduate physics, physical science or engineering, of which at least 18 credit hours must be from courses higher than introductory level. Background courses should include calculus one and two, linear algebra, differential equations, modern physics, and electricity and magnetism.
2. Applicants must have earned a doctoral degree in physics, engineering or other area of physical science with a minimum GPA of 3.0 on a 4-point scale

### Medical Physics, Doctor of Philosophy (Ph.D.)

**Program accreditation**
Commission on Accreditation of Medical Physics Educational Programs (http://campep.org)

**Program goals**
The Ph.D. in Medical Physics offers students course work and research training in physics as it is applied to the diagnosis and treatment of human diseases. The mission of the doctoral program is to serve the commonwealth of Virginia and the nation by helping to meet the demand for competent medical physicists in both the health care delivery and biomedical research settings. The program will prepare students for careers as independent investigators in the field of medical physics and jointly for careers in university departments, research institutes, laboratories and hospitals as trainee clinical medical physicists.

Research areas include brachytherapy, hyperthermia, image-guided radiation therapy, intensity-modulated radiation therapy, proton therapy, medical imaging technologies, radiomics, image processing and reconstructions, functional imaging, novel treatment device fabrications, robotics, and 4-D treatment technology development.

Professional competency: To develop professional competency in medical physics by providing a framework in which students progressively develop a mastery of the current state of medical physics and an ability to synthesize this information and apply it in research and clinical settings. Additionally, the program aims to develop skills in the various means of communicating both the core of medical physics knowledge and expression of experimental design, results, and interpretation to a variety of potential audiences.

Scientific competency: To develop scientific competency in medical physics by providing a framework by which candidates develop skills to design, conduct and implement theoretical and research which answers identified questions. The research focus may lead to new and/or improved applications of physics for diagnosis and treatment of diseases. In broad terms, candidate research will be directed toward advancing “minimally invasive medicine” through applications of ionizing and non-ionizing radiation.

Katie Goracke
Medical physics education coordinator
kmgoracke@vcu.edu
(804) 628-7780

**Program website:** medicalphysics.vcu.edu (http://www.medicalphysics.vcu.edu)

**Student learning outcomes**

1. Communication skills: The candidate should demonstrate that an appropriate level of oral, written and visual communication skills have been acquired. The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric. The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.

2. Experimental design: The candidate should demonstrate an appropriate level of skill in the theoretical and technical design of experimental procedures and the technical conduct of experimentation related to his or her research. This includes demonstration of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

3. Knowledge of medical physics literature: The candidate should demonstrate a general knowledge of medical physics literature and a more detailed knowledge of his or her area of research, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications as measured by rubric.

4. Problem-solving: The candidate should demonstrate an appropriate level of skill in the identification of meaningful medical physics research problems, including the ability to defend said identifications, and the design and implementation of appropriate problem-solving methods as measured by rubric.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

**Degree candidacy requirements**
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree
candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on doctoral programs is available in the Graduate Bulletin.

Apply online at graduate.admissions.vcu.edu (http://wwwgraduate.admissions.vcu.edu).

Admission requirements

Degree: Semester(s) of entry: Deadline dates: Test requirements:
Ph.D. Fall Jan 15 GRE

In addition to the general admission requirements of the VCU Graduate School (p. 35) and the School of Medicine, students are expected to satisfy the following minimum standards for admission.

1. Students must have a minimum of 30 credit hours in undergraduate physics, physical science or engineering, of which at least 18 credit hours must be at the upper level. Background courses should include calculus one and two, linear algebra, differential equations, modern physics, and electricity and magnetism.
2. Students must submit GRE scores.
3. Applicants must present a minimum GPA of 3.0 on a 4-point scale for the undergraduate degree or most recently completed graduate degree.

Provisional admission may be granted where deficiencies exist. These deficiencies must be removed by the end of the first year of residence, or its part-time equivalent, when the student’s application will be re-examined. Courses that are designed to remove deficiencies will not be accepted for credit hours toward the graduate degree.

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 31), students entering the program with an undergraduate degree are required to earn a minimum of 42 credit hours of graduate medical physics course work. At least 19 credit hours must be earned at the 600 level or higher. Detailed degree requirements are listed below and in the medical physics graduate handbook.

All new Ph.D. students entering the program will be assigned an adviser. After successful completion of courses by the end of first year with a minimum GPA of 3.0, students and advisers will develop a graduate advisory committee. The committee will direct the students in their research and subsequent course selection. Advisers will report once each semester of student enrollment to the program director on the academic progress of their students, will participate in the oral candidacy examinations of students and chair the students’ dissertation defense examinations.

The student is required to successfully complete both written comprehensive and oral candidacy examinations to be granted Ph.D. candidate status. The written comprehensive examination covers core knowledge and applications in medical physics course work, as well as basic concepts in physics, chemistry and biology. The oral candidacy examination, administered by the student’s graduate advisory committee, is based upon a written prospectus describing the proposed dissertation research project. Examiners evaluate the adequacy of the proposed project, the student’s level of understanding of the project and the likelihood that the dissertation research project can be completed successfully.

After being approved for degree candidacy, the student must conduct a substantial original investigation under the supervision of the advisers and must prepare a dissertation reporting the results of the research in the context of existing scientific knowledge. After the dissertation has been completed and unanimously accepted for defense by the graduate advisory committee, the candidate will appear before the committee for an oral dissertation defense. The oral defense examines the candidate’s research, dissertation documentation and underlying fundamental knowledge. Successful completion and defense of the dissertation is required for degree completion.

Medical Physics, Master of Science (M.S.)

Program accreditation
Commission on Accreditation of Medical Physics Educational Programs
(http://campep.org/)

Program goals

The Master of Science in Medical Physics offers students course work and practical clinical training in physics as it is applied to the diagnosis and treatment of human diseases. The mission of the master's program is to serve the commonwealth of Virginia and the nation by helping to meet the demand for competent medical physicists in the health care delivery setting. The program will prepare students for careers as qualified and independent clinical medical physicists. Required course work provides theoretical and practical training in radiation dosimetry, radiation biology, radiation therapy, medical imaging and health physics.

Professional competency. To develop professional competency in medical physics by providing a framework in which students progressively develop mastery of the current state of medical physics and an ability to synthesize this information and apply it in a clinical setting. Additionally, students in the program will develop skills in the various means of communicating the core of medical physics knowledge and clinical applications of that knowledge to a variety of potential audiences.

Clinical competency: To develop clinically competent medical physics graduates by providing a framework in which students progress from didactic knowledge to clinical knowledge and demonstrate application of clinical medical physics principles, practices and procedures.

Student learning outcomes

1. Clinical performance: The candidate should demonstrate an appropriate level of skill in the theoretical, practical and technical conduct of medical physics in the clinical setting. This includes demonstration of an appropriate level of competence in the ability to:
   a. Design and quality assure radiation therapy treatment plans for both brachytherapy and external beam radiation therapy
   b. Quality assure radiation therapy delivery devices
   c. Quality assure radiation therapy treatment charts
   d. Perform calibration and/or beam delivery commissioning measurements as measured by instructor evaluation in compliance with accepted clinical standards

2. Communication skills: The candidate should demonstrate that an appropriate level of oral, written and visual communication skills have been acquired. The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by course work and the quality of the thesis. The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling, chart notation and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by course work and the quality of the thesis.

3. Medical physics knowledge base: The candidate should demonstrate satisfactory knowledge of the base of scientific information required to practice clinical medical physics. This includes general knowledge of medical physics scientific materials, clinical policies and procedures, and translational scientific literature. The student should demonstrate the ability to evaluate and integrate such knowledge into the solution of clinical problems as measured by course work and the quality of the thesis.

4. Problem-solving: The candidate should demonstrate an appropriate level of skill in the identification of clinical medical physics problems and the design and implementation of appropriate problem-solving methods and solutions as measured by course work, annual review and the quality of the thesis.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the
graduate faculty of the university through their elected representatives to
the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-
campus, to be familiar with the VCU Graduate Bulletin as well as the
Graduate School website (http://www.graduat.e.vcu.edu/) and academic
regulations in individual school and department publications and
on program websites. However, in all cases, the official policies and
procedures of the University Graduate Council, as published on the VCU
Graduate Bulletin and Graduate School websites, take precedence over
individual program policies and guidelines.

Visit the academic regulations section for additional information on
academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a
final research project, work of art, thesis or dissertation, must qualify for
continuing master's or doctoral status according to the degree candidacy
requirements of the student's graduate program. Admission to degree
candidacy, if applicable, is a formal statement by the graduate student's
faculty regarding the student's academic achievements and the student's
readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following
degree candidacy policy as published in the VCU Graduate Bulletin for
complete information and instructions.

Visit the academic regulations section for additional information on
degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and
the final semester of matriculation, they must make formal application to
graduate. No degrees will be conferred until the application to graduate
has been finalized.

Graduate students and program directors should refer to the following
graduation requirements as published in the Graduate Bulletin for a
complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on
graduation requirements. (p. 31)

Other information

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs
administratively housed in the school. Information on master's programs
(p. 634) is available in the Graduate Bulletin.

Apply online at graduate.admissions.vcu.edu (http://
www.graduate.admissions.vcu.edu).

Admission requirements

<table>

<th>Deadline dates</th>
<th>Test requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>M.S.</td>
<td>Fall</td>
<td>Jan 15</td>
<td>GRE</td>
</tr>
</tbody>
</table>

In addition to the general admission requirements of the VCU Graduate
School (p. 35) and the School of Medicine, students are expected to
satisfy the following minimum standards for admission.

1. Students must have a minimum of 30 credit hours in undergraduate
physics, physical science or engineering, of which at least 18 credit
hours must be at the upper level. Background courses should include
calculus one and two, linear algebra, differential equations, modern
physics, and electricity and magnetism.

2. Students must submit GRE scores.

3. Applicants must present a minimum GPA of 3.0 on a 4-point scale
for the undergraduate degree or most recently completed graduate
degree.

Provisional admission may be granted where deficiencies exist. These
deficiencies must be removed by the end of the first year of residence,
or its part-time equivalent, when the student's application will be re-
examined. Courses that are designed to remove deficiencies will not be
accepted for credit hours toward the graduate degree.

Degree requirements

In addition to the general VCU Graduate School graduation requirements
(p. 31), students entering the program with an undergraduate degree
are required to earn a minimum of 30 credit hours of graduate medical
physics course work. At least 22 credit hours must be earned at the 600
level or higher. Detailed degree requirements are listed below and in the
medical physics graduate handbook.

All new M.S. students entering the program will be assigned an adviser.
The student and adviser will develop a graduate advisory committee,
which will direct the student in his/her research. Advisers will report
once each semester of student enrollment to the program director on
the academic progress of their students and will administer oral thesis
defense examinations.

The student must conduct an original investigation under the supervision
of his/her adviser and committee, and then must prepare a thesis
reporting the results of the research in the context of existing scientific
knowledge. After the thesis has been completed and unanimously
approved for defense by the committee, the candidate will appear before
the committee for an oral thesis defense examination. The oral thesis
defense examines the candidate's research, thesis documentation and
underlying fundamental knowledge. Successful completion of the thesis
and its defense is required for degree completion.

Total Hours 30

Students will complete two consecutive semesters of clinical rotations (three credit hours each) for a total of six credit hours.

Instead of OVPR 602, students may take either OVPR 601 or OVPR 603

The minimum total of graduate credit hours required for this degree is 30.

Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study, or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

Graduate program director
William Y. Song, Ph.D.

Program website: medicalphysics.vcu.edu (http://www.medicalphysics.vcu.edu)

Medicine, Doctor of (M.D.)/Public Health, Master of (M.P.H.) [dual degree]

Program accreditation
Liaison Committee on Medical Education (M.D.)
Council on Education for Public Health (M.P.H.)

To qualify as a dual degree student in any of the training paradigms which appear in the Bulletin, a student must have evidence of having been simultaneously enrolled in one or more courses of both of the programs constituting the “dual degree” for at least one semester.

Program goal

The Division of Epidemiology in the Department of Family Medicine and Population Health in the School of Medicine offers a program for VCU medical students to obtain a Master of Public Health degree in conjunction with their medical training. The M.D./M.P.H. dual degree program provides an opportunity for medical students who wish to pursue a public health or research career to graduate from medical school trained in both clinical and preventive, population-oriented medicine. Graduates from this program are prepared for positions in preventive medicine, primary care, research, community-based health centers and state and local health departments. To meet degree requirements, students complete a minimum of 36 credit hours of M.P.H. course work that includes:

- 12 credits of core courses
- 12 credits of required courses
- Nine credits of electives
- Three credits of a capstone project

Note that some elective courses may not be available in certain years or may require instructor permission for registration.

The objective of the dual degree program is to provide high quality and in-depth training in public health to qualified medical students. The five-year program includes four years of medical school and one year of study in the M.P.H. program. Students enter the M.P.H. curriculum after the M-3 year. During the M.P.H. year, students take a minimum of 36 credit hours of course work. Students receive three credit hours for successful completion of the "Population Health" course in medical school and take a minimum of one public health elective during the M-4 year to satisfy the public health internship requirement.

Note: Enrollment in the dual degree program requires admission into both the School of Medicine and the Graduate School. Students must successfully complete all required course work to receive both degrees at the end of the five years.

The mission of the M.P.H. program is to engage students in an experiential, learner-centered environment, collaborate with public health partners in Central Virginia to promote health equity and community wellness, and foster lifelong inquiry and discovery in interdisciplinary, translational research that improves human health.

The overall goal of the M.P.H. program is to educate students to become well-grounded in the essential knowledge, skills and attitudes of public health and demonstrate their ability to apply these essentials through course work, internships and the M.P.H. capstone project. This program is designed to provide students with the skills required to advance to positions as public health practitioners in a broad spectrum of positions and settings and who can perform the following:

1. Administer public health programs
2. Collect, analyze and evaluate public health data
3. Plan, implement and evaluate public health interventions
4. Apply results of evaluations and data analyses to policy development as necessary
5. Promote public health through educational campaigns

The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of public health and an ability to synthesize and apply this information to the identification of key areas of practice and research in public health. Students will develop educational competencies outlined by the M.P.H. program. These competencies cover the foundational knowledge necessary for a public health practitioner to both communicate the core of public health knowledge and express the design, results and interpretation of various public health interventions, evaluations, and data collection and analysis efforts to a variety of potential audiences.
Student learning outcomes
Student learning outcomes are monitored by the program faculty and center primarily around competencies for all students. Overall learning outcomes are as follows.

1. Integrated knowledge of public health: Students will demonstrate knowledge of the current elements of public health, at a level assessed by program faculty as competent or higher, according to the program rubric.

2. Demonstration of focused knowledge and skills: Students will demonstrate more detailed knowledge and applied skills in the individual area of scholarship, including familiarity with the research literature and the ability to evaluate and critique publications, at a level assessed by program faculty as competent or higher, according to the program rubric.

3. Development of competencies: Through program course work and applied experiences, students will develop competence in the discipline of public health as demonstrated through annual self-assessment of performance on the M.P.H. program competencies and faculty assessment of (1) student competence in semi-annual student reviews and (2) student performance in the program’s integrated learning experience, the capstone project.

4. Training in appropriate public health skills/knowledge: Through didactic study and two separate applied experiences in professional public health settings, students will gain knowledge and skills required to perform as public health practitioners and/or researchers.

The M.P.H. program trains students to develop educational competencies established by the program’s accrediting body, the Council on Education for Public Health. These competencies may be viewed on the Department of Family Medicine and Population Health website (http://familymedicine.vcu.edu/epidemiology/mph/competencies/).

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduat.e.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information
The M.P.H. program student handbook is available upon request.

School of Medicine graduate program policies
The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on master’s programs is available elsewhere in this chapter of the Graduate Bulletin.

For the M.P.H., apply online at sophas.org (http://www.sophas.org). Submit a VCU supplemental application following the instructions available at sophas.org.

<td>M.D. and M.P.H.</td>
<td>Fall</td>
<td>Applications strongly encouraged by Mar 15</td>
<td>MCAT (acceptable in lieu of GRE scores for this combined professional/academic degree program) TOEFL</td>
</tr>
</tbody>
</table>

Note: Students applying to the dual degree M.D./M.P.H. program should be accepted to the VCU School of Medicine prior to applying to the M.D./M.P.H. Program. Students must apply separately to each program. Applications to the M.P.H. program are made through sophas.org.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must present the following qualifications.

1. Prior degree: Students must hold a bachelor’s degree from an accredited institution, with a minimum GPA of 3.0 on a 4.0 scale in all undergraduate and any other graduate study. Official copies of transcripts for all prior degrees earned must be submitted to the VCU Office of Graduate Admissions.
2. Test scores: The M.P.H. program normally requires GRE scores, but for the combined M.D./M.P.H., students may submit MCAT scores provided for admission to the School of Medicine in lieu of GRE scores.

3. TOEFL: International students must submit TOEFL or IELTS scores. Minimum TOEFL score is 600 (paper-based), 250 (computer-based) or 100 (Internet-based). IELTS minimum score is 7.0. Test score requirements may be waived for international students who have received a medical degree (M.D.) in the U.S. Contact the program coordinator for more information. The PTE is also accepted with a minimum score of 65.

Students must also submit the following materials with their applications:

1. Letters of recommendation from three individuals who can assess applicant qualifications for graduate school; at least one academic reference is required, but two are preferred. Most appropriate are letters from past professors or work supervisors.

2. Current version of curriculum vitae or resume. Include experience and/or education relevant to study in public health.

3. Personal statement addressing the following issues:
   - What applicant plans to do in the first few years after graduation
   - Why VCU's M.P.H. program best fits the student's public health interests
   - Description of applicant's particular areas of interest in public health (e.g., maternal and child health, epidemiology)
   - How an M.P.H. degree will help the applicant achieve her/his career goals
   - Why the applicant wishes to pursue an M.P.H. degree
   - Description of the applicant's career goals

**Degree requirements**

The Master of Public Health program prepares students committed to public health careers in the public, private or nonprofit sectors. Public health works to prevent health problems in populations before these problems occur. The M.P.H. provides a rigorous curriculum to help students develop the analytic and critical reasoning skills to improve population health. The program boasts experiential learning, a highly interactive environment, accessible and approachable faculty and student involvement in important projects.

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to successfully complete minimum of 36 credit hours of formal course work and practicum, a 20-hour community-based learning experience, attendance at 12 public health seminars, and a capstone project. In addition, medical students will complete a public health elective during the M-4 year at a placement approved by the M.P.H. program director, in lieu of the required public health internship.

In addition to general course work, students are required to develop a supervised experience. Students are required to synthesize the literature; analyze, assess or evaluate quantitative or qualitative data; and in general apply theory and integrate knowledge gained and principles in situations that approximate some aspects of professional practice. With this mentored experience, students are able to both broaden their skills and hone their proficiency in a specific area of public health. The major product of this culminating experience is expected to vary depending on the educational goals of the student, but could include one of the following:

1. Manuscript suitable for publication in a peer-reviewed journal
2. Comprehensive disease-related report and analysis
3. Policy analysis report
4. Needs assessment for a specific population
5. Development, implementation, and analysis of target population surveys
6. Program evaluation

At a minimum, the capstone experience will require the integration of multiple major competencies used by a public health professional. In fulfilling the capstone requirement, each candidate must: (a) submit a formal written paper of sufficient depth and rigor and (b) satisfactorily complete a poster presentation of the project chosen as the basis for the written paper at an appropriate venue (e.g., research forum, refereed conference, etc.) approved by the M.P.H. program director.

**Noncurricular program requirements**

In addition to course work, students are required to complete the following noncurricular requirements for the M.P.H. degree:

1. Attendance at 12 public health seminars
2. Twenty hours of community-based service-learning

**M.P.H. curriculum requirements for the dual degree M.D./M.P.H. program**

1. Student may elect to complete 1-3 credits of EPID 694 in summer.
Total graduate credit hours required (minimum) 36

Selected course work completed during the M-1 and M-2 years of study for application toward the M.D. accounts for nine credit hours toward the M.P.H. degree. This includes a substitution of training in population health in the M.D. curriculum for the core epidemiology course, EPID 571. The public health internship requirement is fulfilled through completion of a public health elective in the M-4 year, after the student completes the M.P.H. year. This elective occurs at a public health agency that is approved by the M.P.H. program director.

Microbiology and Immunology, Doctor of Philosophy (Ph.D.)

Program goal

The graduate programs of the Department of Microbiology and Immunology in the School of Medicine include degrees offered at the master's and doctoral levels. These educational programs have as their mission the preparation of individuals for a variety of career objectives in microbiology and immunology. The programs incorporate formal instructional activities and, as appropriate, research training, mentored by the members of the faculty. The M.S. program is distinguished by inclusion of the preparation of the individual to function as a laboratory director or scientific investigator.

The Ph.D. program is designed to provide students with the skills required to advance to positions as bioscience researchers and trainers in a broad spectrum of positions. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in bioscience. The program relates this framework to the development of the ability to design, implement and interpret experimental approaches that address the questions identified.

The Ph.D. program is also designed to develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

Student learning outcomes

1. Oral communication skills: The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.

2. Written communication skills: The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.

3. Experimental design: The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

4. Problem-solving skills: The candidate will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.

5. General knowledge of science: The candidate should demonstrate a general knowledge of the elements of the sciences as related to molecular/cellular bioscience and a detailed knowledge of his or her area of research, including an appropriate familiarity with the research literature.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.
Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information
School of Medicine graduate program policies
The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on doctoral programs is available elsewhere in this chapter of the Graduate Bulletin.

Apply online at graduate.admissions.vcu.edu (http://www.graduate-admissions.vcu.edu).

Admission requirements

<th>Test requirements:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ph.D.</td>
<td>Fall</td>
<td>Applications received prior to Jan 15 given priority consideration</td>
<td>GRE or MCAT</td>
</tr>
</tbody>
</table>

Special requirements

- MCAT acceptable in lieu of GRE for combined professional/academic degree programs
- Applications for the program must be submitted to the Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D. selected from the drop-down menu of programs on the VCU online application form.

In addition to the general admission requirements of the VCU Graduate School (p. 35), successful applicants will typically have the following credentials:

1. A baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. GRE scores greater than 153 for quantitative, 156 for verbal (or combined 1250 on previous scale) and 4.0 analytical scores
3. TOEFL scores of 600 (pBT), 250 (cBT) or 100 (iBT) for individuals for whom English is a second language; or 6.5 on the IELTS (To report GRE or TOEFL score, use VCU Code 5570.)
4. Personal statements, which should include: long-term career goals to assess reasons behind the candidate's application; how a Ph.D. in biomedical science helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration
5. Three letters of recommendation that speak to the scientific competency and experience of the applicant
6. The equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g. cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology, biophysics, etc.)

Degree requirements
In addition to the general VCU Graduate School graduation requirements (p. 31), students must complete a minimum of 58 graduate credit hours. At least six credits must come from didactic 600-level courses.

The Department of Microbiology and Immunology has an outstanding faculty with diverse research interests that include cell and molecular biology, molecular genetics, molecular pathogenesis, bacteriology, immunology, immunotoxicology, virology, parasitology, mycology and oncology. The goal of the graduate program is to prepare students to become creative problem-solvers and leaders in scientific research. The Ph.D. degree is offered, as well as an M.D./Ph.D. degree for medical students interested in academic or research careers.

The research experience is complemented with excellent course offerings, seminar programs, teaching opportunities, presentations at scientific meetings, writing of a grant application and writing of scientific papers. Graduate students acquire a wide range of research experience in the first year through exposure to a variety of research laboratories and investigators. The student chooses a research adviser, undergoes a written and oral examination and then carries out an original independent research project under the direction of the adviser. The project falls under the review of an advisory committee, and a written dissertation is defended in a final oral examination.

A cumulative GPA of 3.0 (with no more than six credit hours of a C grade) is required to continue in the program.

Curriculum requirements

Note: First-year Ph.D. students in the Biomedical Sciences Doctoral Portal must earn a minimum of seven credits of didactic courses in the fall semester in order to be eligible to matriculate into the Department of Microbiology and Immunology without being on academic probation. Three of these credits must come from MICR 505 or MICR 515.

Advanced microbiology and immunology course

Select at least one of the following (satisfies three credits of six-credit 600-level didactic requirement):
MICR 605  Prokaryotic Molecular Genetics
MICR 616  Mechanisms of Viral and Parasite Pathogenesis
MICR 618  Molecular Mechanisms of Bacterial Pathogenesis
MICR 686  Advanced Immunobiology

Journal club
Select one of the following journal club courses for one semester every year (four credits minimum).

MICR 692  Current Topics in Molecular Pathogenesis
MICR 693  Topics in Molecular Biology and Genetics
MICR 694  Current Topics in Immunology

Responsible research and critical thinking
OVPR 601  Scientific Integrity
or OVPR 602  Responsible Scientific Conduct
or OVPR 603  Responsible Conduct of Research

Electives and directed research
Select credits in directed research and additional elective courses from the following list to amass the required minimum of 58 credit hours from the following:

MICR 607  Techniques in Molecular Biology and Genetics
MICR/BNFO 653  Advanced Molecular Genetics: Bioinformatics
MICR 684  Molecular Biology of Cancer
MICR 697  Directed Research in Microbiology

Total Hours 58

1 Offered in alternate years
2 May be repeated with different content to satisfy the six-credit 600-level didactic requirement.

The minimum total of graduate credit hours required for this degree is 58.

Typical plan of study
Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

Microbiology and Immunology, Doctor of Philosophy (Ph.D.) with a concentration in molecular biology and genetics

Program goals
The molecular biology and genetics curriculum is an integrated interdisciplinary program of study that builds on the graduate programs of participating departments in the School of Medicine. The doctoral curriculum is designed to be an intensive course of study that will provide students with the skills required to advance to research-oriented careers in biotechnology.

1. The curriculum includes core, specialization and elective courses. Electives drawn from various departments allow individual specialization.

2. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation. The program relates this framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified.

3. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

4. The program centers on a research project conducted under the guidance of a selected faculty mentor and culminates in the presentation and defense of a doctoral dissertation.

Participating faculty are associated not only with programs and departments within the School of Medicine, but also with the VCU Massey Cancer Center, the Philips Institute for Oral and Craniofacial Molecular Biology (School of Dentistry), the Institute of Structural Biology and Drug Discovery (School of Pharmacy) and the VCU Center for the Study of Biological Complexity (VCU Life Sciences).

The interdisciplinary approach to the solution of biological problems provided by this training is designed to develop in students the flexibility and problem-solving skills necessary for success in a variety of scientific career opportunities or further graduate study.

Student learning outcomes
1. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.

2. General knowledge of sciences: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including
an appropriate familiarity with the research literature and the ability to evaluate and critique publications, as measured by rubric.

3. Communication skills: Degree candidates will demonstrate that an appropriate level of oral, written and visual communication skills have been acquired.
   a. Oral communication skills: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
   b. Written communication skills: Degree candidates will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.

4. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.granduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on doctoral programs is available elsewhere in this chapter of the Graduate Bulletin.

Apply online at graduate.admissions.vcu.edu (http://www.granduate.admissions.vcu.edu).

Admission requirements

Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
--- | --- | --- | --- |
Ph.D. | Fall | Applications received prior to Jan 15 | GRE, MCAT or DAT

Special requirements

- MCAT or DAT acceptable in lieu of GRE for combined professional/academic degree programs
- Applications for the program must be submitted to the Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D. selected from the drop-down menu of programs on the VCU online application form.

In addition to the general admission requirements of the VCU Graduate School (p. 35), successful applicants will typically have the following credentials:

1. A baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. Current GRE scores (taken within the past five years), with scores at the 75th percentile or greater preferred
3. TOEFL scores of 600 (pBT), 250 (cBT) or 100 (iBT) for individuals for whom English is a second language; or 6.5 on the IELTS (To report GRE or TOEFL score, use VCU Code 5570.)
4. Personal statements, which should include: long-term career goals to assess reasons behind the candidate’s application; how a Ph.D. in biomedical science helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration
5. Three letters of recommendation that speak to the scientific competency and experience of the applicant
6. The equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology

703
courses (e.g. cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology, biophysics, etc.)

7. Laboratory experience also strongly recommended

**Degree requirements**

In addition to the general VCU Graduate School graduation requirements (p. 31), students must complete a minimum of 58 graduate credit hours.

During the first year, students pursue research rotations, take formal course work and become familiar with current research topics through seminars, discussion groups and lectures by distinguished scientists. By the end of the first year, students choose a faculty adviser and begin dissertation research. Prior to the beginning of the third year of study, students should successfully pass written and oral candidacy examinations. Following completion of the research project and defense of the doctoral dissertation, graduates are equipped to participate in a broad range of current biomedical research areas.

**Directed research and electives**

Select a variable number of credit hours of the following to amass the required minimum of 58 credit hours.

- MICR 697 Directed Research in Microbiology

**Electives**

The minimum total of graduate credit hours required for this degree is 58.

**Typical plan of study**

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

**Graduate program director**

Gail E. Christie, Ph.D.
Professor, Department of Microbiology and Immunology
c Christie@vcu.edu
(804) 828-9093

**Program website:** vcu.edu/mbg (http://www.vcu.edu/mbg/)

**Microbiology and Immunology, Master of Science (M.S.)**

**Program goals**

The graduate programs of the Department of Microbiology and Immunology in the School of Medicine include degrees offered at the master’s and doctoral levels. These educational programs have as their mission the preparation of individuals for a variety of career objectives in microbiology and immunology. The programs incorporate formal instructional activities and, as appropriate, research training, mentored by the members of the faculty. The M.S. program is distinguished by inclusion of the preparation of the individual to function as a laboratory director or scientific investigator.
1. The program is designed to provide students with the skills required
to advance to positions as bioscience researchers and trainers in a
broad spectrum of positions.

2. The structure of the program provides a framework for the
progressive development of a mastery of the current state of the
subject matter of bioscience, an ability to synthesize this information
and apply this foundation to the identification of key areas of
investigation/experimentation in bioscience.

3. The program relates the above framework to the development of the
ability to design, implement and interpret experimental approaches
which address the questions identified.

4. In addition, the program will develop skills in the various means
of communicating both the core of bioscience knowledge and the
expression of experimental design, results and interpretation to a
variety of potential audiences.

**Student learning outcomes**

1. Problem-solving skills: Degree candidates will demonstrate an
appropriate level of skill in the identification and selection of
meaningful problems to be addressed in bioscience research,
including the ability to defend said identifications and to design and
develop appropriate methods to solve said problems as measured by
rubric.

2. General knowledge of sciences: Degree candidates will demonstrate
an appropriate level of knowledge of the current elements of the
biosciences as related to disciplinary specialization and a more
detailed understanding of the individual area of scholarship, including
an appropriate familiarity with the research literature and the ability
to evaluate and critique publications as measured by rubric.

3. Communication skills: Degree candidates will demonstrate an
appropriate level of oral, written and visual communication skills have
been acquired as measured by rubric.

4. Experimental design: Degree candidates will demonstrate the
achievement of an appropriate level of competence in the ability
to appraise, modify and/or create, and implement experimental
protocols and to design and develop experiments as measured by
rubric.

**VCU Graduate Bulletin, VCU Graduate School
and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and
academic rules and regulations that govern graduate education for all
graduate programs at the university. These policies are established by the
graduate faculty of the university through their elected representatives to
the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-
campus, to be familiar with the VCU Graduate Bulletin as well as the
Graduate School website (http://www.graduate.vcu.edu/) and academic
regulations in individual school and department publications and
on program websites. However, in all cases, the official policies and
procedures of the University Graduate Council, as published on the VCU
Graduate Bulletin and Graduate School websites, take precedence over
individual program policies and guidelines.

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a
final research project, work of art, thesis or dissertation, must qualify for
continuing master’s or doctoral status according to the degree candidacy
requirements of the student’s graduate program. Admission to degree
candidacy, if applicable, is a formal statement by the graduate student’s
faculty regarding the student’s academic achievements and the student’s
readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following
degree candidacy policy as published in the VCU Graduate Bulletin for
complete information and instructions.

**Graduation requirements**

As graduate students approach the end of their academic programs and
the final semester of matriculation, they must make formal application to
graduate. No degrees will be conferred until the application to graduate
has been finalized.

Graduate students and program directors should refer to the following
graduation requirements as published in the Graduate Bulletin for a
complete list of instructions and a graduation checklist.

**Other information**

**School of Medicine graduate program policies**

The School of Medicine provides policies applicable to all programs
administratively housed in the school. Information on master’s
programs is available elsewhere in this chapter of the Graduate Bulletin.

**Admission requirements**

<table>
<thead>
<tr>
<th>Degree:</th>

</tr>
</thead>
<tbody>
<tr>
<td>M.S.</td>
<td>Fall</td>
<td>Applications received prior to Jan 15 given priority consideration</td>
<td>GRE, DAT or MCAT</td>
</tr>
</tbody>
</table>

**Special requirements**

- Successful domestic applicants typically have GRE scores of at least
  156 for verbal reasoning and 153 for quantitative reasoning, 4.0 for
  analytical reasoning; DAT score of 18 or greater; or MCAT score of 26
  or greater. International applicants should display English language
  proficiency by achieving a TOEFL score of 100 (iBT) or higher.
In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must meet the following minimum requirements.

1. Applicants must have earned or expect a baccalaureate or equivalent degree and must have demonstrated a superior knowledge of biology, chemistry, physics and mathematics.
2. Laboratory experience is strongly recommended.
3. The Graduate Record Examination is required, as are letters of recommendation and a letter summarizing the applicant's goals.
4. For combined degree students, the Medical College Admission Test or Dental Aptitude Test is accepted in lieu of the GRE.
5. Foreign applicants who do not use English as their native language must take the Test of English as a Foreign Language examination.

Complete application portfolio reviews will begin in January and will continue through May 1. International students requiring temporary U.S. visas should apply by April 1 for fall matriculation.

Basic science, research-intensive, non-thesis curriculum for medical students

Individuals who are participants in medical training (the Doctor of Medicine program) at VCU may be eligible for enrollment in a research-intensive, non-thesis graduate curriculum. This basic science option builds on the core of disciplinary material embedded in the first two years of training in the medical school curriculum. Additional exposure is provided to specialized areas in basic science disciplines in concert with an intensive research experience leading to the preparation of a report in the form of a manuscript suitable for publication. The program is designed to be completed within 12 to 15 months. Subject matter related to the core material and/or suitable elective courses taken in the didactic phase of medical training correspond to a minimum of the equivalent of 24 graduate credit hours. The equivalent of 12 credit hours may be applied to the M.S. degree program in which the student is enrolled in accordance with Graduate School policy. Medical students interested in the basic science option should contact the M.S. graduate program director for additional information.

Degree requirements

The Department of Microbiology and Immunology has an outstanding faculty with diverse research interests that include cell and molecular biology, molecular genetics, molecular pathogenesis, bacteriology, immunology, immunotoxicology, virology, parasitology, mycology and oncology. The goal of the graduate program is to prepare students to become creative problem-solvers and leaders in scientific research. The Master of Science degree is offered, as well as a Ph.D. and an M.D./Ph.D. degree for medical students interested in academic or research careers.

The research experience is complemented with excellent course offerings, seminar programs, teaching opportunities, presentations at scientific meetings and writing scientific papers. Graduate students acquire a wide range of research experience in the first year through exposure to a variety of research laboratories and investigators. The student chooses a research adviser and then carries out an original, independent research project under the direction of the adviser. The project falls under the review of an advisory committee and a written dissertation is defended in a final oral examination.

M.S. students will select their permanent advisers after three rotations completed during the first year of study. Research projects will be based on ongoing research in laboratories of the selected permanent adviser. A graduate advisory committee will be developed by the student and adviser. The M.S. student and the GAC will formulate a suitable curriculum of study based on the student's area of research interest.

In addition to the general VCU Graduate School graduation requirements (p. 31), students in the M.S. degree program must complete a minimum of 41 credit hours (25 credit hours in didactic formal graduate courses, a minimum of four elective credit hours and a minimum of 12 directed research hours). Additional hours may be completed for successful outcome of the M.S. degree. A cumulative GPA of 3.0 (with no more than six credit hours of a C grade) is required to continue in the program.

An oral defense, consisting of a public presentation of the thesis and a committee meeting to discuss the results, under the direction of the GAC but open to all faculty members, students and staff, shall be scheduled to examine the student's underlying fundamental knowledge of the disciplines encompassed by the student's research. Announcement of the oral defense, including the candidate's name, project title, and the day, place and time of the defense, shall be made at least seven working days in advance of the defense.

Select seven credits from the following: 7
The molecular biology and genetics curriculum is an integrated interdisciplinary program of study that builds on the graduate programs of participating departments in the School of Medicine. The master's curriculum is designed to be an intensive course of study that will provide students with the skills required to advance to research-oriented careers in biotechnology or provide the foundation for further graduate study in biotechnology or provide the foundation for further graduate study.

It is expected that the program should be completed in approximately two to two-and-one-half years.

1. The curriculum includes core, specialization and elective courses. Electives drawn from various departments allow individual specialization.

2. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation. The program relates this framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified.

3. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

4. The final three semesters include a research project conducted under the guidance of a selected faculty mentor and culminates in the presentation and defense of a master’s thesis.

The interdisciplinary approach to the solution of biological problems provided by this training is designed to develop in students the flexibility and problem-solving skills necessary for success in a variety of scientific career opportunities or further graduate study.

**Student learning outcomes**

1. **Problem-solving skills**: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.

2. **General knowledge of sciences**: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications, as measured by rubric.

3. **Communication skills**: Degree candidates will demonstrate that an appropriate level of oral, written and visual communication skills have been acquired.

   a. **Oral communication skills**: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.

   b. **Written communication skills**: Degree candidates will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.

4. **Experimental design**: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.
VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

A master’s student in the MBG curriculum must prepare a formal written research plan and make an oral presentation of their thesis research proposal and progress report to their graduate advisory committee prior to the beginning of the second year of residency. The student’s knowledge in the area of the proposed research, current research accomplishments and the feasibility of the proposed research project will be evaluated by the GAC. Successful completion of this review is required for continuance in the program and constitutes admission to candidacy.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 20)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 26)

Other information

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on master’s programs is available elsewhere in this chapter of the Graduate Bulletin.

</table>

Special requirements

- Applications for the program should be submitted to Molecular Biology and Genetics – M.S. selected from the drop-down menu of programs of the VCU online graduate application form. The degree awarded will be a Master of Science in Microbiology and Immunology.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must have earned or expect to earn a baccalaureate or equivalent degree, and must have demonstrated a superior knowledge of biology, chemistry, physics and mathematics. Laboratory experience is also strongly recommended. The Graduate Record Examination is required, as are letters of recommendation and a letter summarizing the applicant’s goals. International applicants who do not use English as their native language must take the Test of English as a Foreign Language examination.

Basic science, research-intensive, non-thesis curriculum for medical students

Individuals who are participants in medical training (the Doctor of Medicine program) at VCU may be eligible for enrollment in a research-intensive, non-thesis graduate curriculum. This basic science option builds on the core of disciplinary material embedded in the first two years of training in the medical school curriculum. Additional exposure is provided to specialized areas in basic science disciplines in concert with an intensive research experience leading to the preparation of a report in the form of a manuscript suitable for publication. The program is designed to be completed within 12 to 15 months. Subject matter related to the core material and/or suitable elective courses taken in the didactic phase of medical training correspond to a minimum of the equivalent of 24 graduate credit hours. The equivalent of 12 credit hours may be applied to the M.S. degree program in which the student is enrolled in accordance with Graduate School policy. Medical students interested in the basic science option should contact the M.S. graduate program director for additional information.

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 31), the interdisciplinary master’s curriculum in molecular biology and genetics requires a minimum of 48 credit hours, at least half of which
must be course work restricted to graduate students. The curriculum includes 19 credit hours of required core course work and 29 additional credit hours of required course work, directed research and research seminar course work, and additional approved course work, as listed below. M.S. candidates must pass a final oral examination. A written thesis approved by the student’s graduate advisory committee completes the requirements leading to the M.S. degree.

</tbody>
</table>

Select any appropriate graduate-level course offered by the School of Medicine or with the course designations of BIOL, BNO, CHEB, CHEM, CLSE, EGRB, EPID, MEDC.

Students make take additional course work with the approval of their graduate program directors.

The minimum total of graduate credit hours required for this degree is 48.

### Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

**Graduate program director**

Gail E. Christie, Ph.D.
Professor, Department of Microbiology and Immunology
christie@vcu.edu
(804) 828-9093

**Program website:** vcu.edu/mbg (http://www.vcu.edu/mbg/)

### Neuroscience, Doctor of Philosophy (Ph.D.)

#### Program mission

The program offers an interdepartmental, integrated curriculum for graduate study leading to the Ph.D. in Neuroscience. The program prepares students to teach in the neuroscience disciplines at a university or academic health center and is distinguished by its objective to prepare students to function as independent research investigators.

#### Program goals

Upon completion of the Ph.D. in Neuroscience degree program, students will have:

1. Demonstrated a mastery of neuroscience and related bioscience knowledge
2. Developed effective oral, written and electronic communication skills
3. Demonstrated the ability to formulate, design, implement and interpret experimental approaches
4. Reached a level of competency to advance to positions as neuroscience researchers and teachers in a broad spectrum of academic, industrial and government employment venues
5. Successfully obtained employment in a neuroscience-related position

#### Student learning outcomes

1. Acquire the core knowledge of neuroscience: Students will demonstrate acquisition of core knowledge presented in required and elective courses.
2. Demonstrate knowledge of the neuroscience scientific literature: Students will demonstrate the ability to integrate and comprehensively review the scientific literature.
3. Acquire competency in oral communication: Students will prepare and deliver effective seminars and poster presentations.
4. Acquire competency in written communication: Students will generate an original dissertation and written comprehensive exam, as well as prepare and publish high quality scientific manuscripts.

5. Demonstrate the ability to design experiments: Students will evaluate existing scientific knowledge related to their project, identify a scientific question and formulate testable hypotheses.

6. Demonstrate the ability to conduct and interpret experiments: Students design experiments to test their hypotheses, carry out those experiments and interpret their results.

7. Obtain employment upon graduation: Student will successfully obtain employment in a neuroscience-related position upon graduation.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on doctoral programs is available elsewhere in this chapter of the Graduate Bulletin.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Admission requirements

<table>
<thead>
<tr>
<th>Degree:</th>
<th>Semester(s) of entry:</th>
<th>Deadline dates:</th>
<th>Test requirements:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ph.D.</td>
<td>Fall</td>
<td>Applications received prior to Jan 15 given priority consideration</td>
<td>GRE, MCAT or DAT TOEFL if international</td>
</tr>
</tbody>
</table>

Special requirements

- Applications for the program must be submitted to the Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D. selected from the drop-down menu of programs on the VCU online application form.

In addition to the general admission requirements of the VCU Graduate School (p. 35), successful applicants will typically have the following credentials:

1. Baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. GRE > 153 quantitative, 156 verbal (or combined 1,250 on previous scale) and 4.0 analytical scores
3. TOEFL score of 600 (pBT), 250 (cBT) or 100 (iBT; or 6.5 on the IELTS for individuals for whom English is a second language
4. Personal statements, including:
   a. Long-term career goals to assess reasons behind application
   b. How a Ph.D. in biomedical science helps achieve those goals
   c. Initial motivating factors for a career in research
   d. Research experience, including dates, places and duration
5. Equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g. cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology or biophysics)

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 31), students in the Ph.D. program must complete a minimum of 69 graduate credit hours.

Students must maintain a minimum cumulative GPA of 3.0 and must receive a minimum grade of B for all required courses. A student who receives a grade of C in a required course shall repeat the course. A second grade of C in a required course shall result in dismissal from the program.
At the end of the second year of required and elective course work, students will take written and oral comprehensive examinations. The written examination is an open-book written exam which is designed to: (1) assess the student's ability to integrate course material and (2) demonstrate critical thinking and evaluation of the literature in the basic health sciences related to the student’s area of research. This part is based on a question provided to the student by their adviser and graduate advisory committee. The answer should be 25 to 35 pages in length and must represent the student’s unaided work. This section of the exam is graded as pass/fail and must be completed by June 30 of the second year.

After passing the written comprehensive examination, students will schedule the proposal defense within six months. For the proposal defense, students will prepare an NIH-style grant proposal based on their research plans. The proposal will form the basis of the oral candidacy exam. Students are strongly encouraged to submit their proposals for extramural funding (e.g., NIH predoctoral fellowships) where appropriate.

After successful completion of both parts of the written candidacy exam, the student’s graduate advisory committee will administer the oral candidacy examination, which entails an oral defense of the student’s grant proposal as well as the topics covered in part one of the written candidacy exam. The oral candidacy exam covers: (1) course work related to the student’s proposed research; (2) the literature cited in or related to the proposal; and (3) the hypotheses, research techniques and procedures presented in the proposal.

Successful completion of the oral candidacy exam advances the student to candidacy for the doctoral degree. The oral candidacy exam must be completed prior to the beginning of the third year. Beginning with the spring semester the third year in the graduate program, students will devote their full time to conducting research in their advisers’ laboratories. Students also register for neuroscience research seminar and journal club each semester.

At the appropriate time in their research, students will prepare a dissertation and schedule a final oral defense of the thesis. The final oral examination (defense of the dissertation) will be limited to the subject of the candidate’s dissertation and related basic science.

It is anticipated that students will complete the program in four to five years. All requirements for the Ph.D. degree must be completed within eight years from the date of matriculation in the degree program. Extensions may be approved in extenuating circumstances.

Total Hours: 6-8

### Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate
program directors or advisers for information about typical plans of study and registration requirements.

**Graduate program director**
John W. Bigbee, Ph.D.
Professor, Department of Anatomy and Neurobiology
jbigbee@vcu.edu
(804) 828-0948

**Program website:** neuroscience.vcu.edu (http://www.neuroscience.vcu.edu/)

**Pharmacology and Toxicology, Doctor of Philosophy (Ph.D.)**

**Program goal**
The Ph.D. program is designed to provide students with the skills required to advance to positions as bioscience researchers and trainers in a broad spectrum of positions. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in bioscience. The program relates this framework to the development of the ability to design, implement and interpret experimental approaches that address the questions identified. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

**Student learning outcomes**

1. **Oral communication skills:** The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
2. **Written communication skills:** The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
3. **Experimental design:** The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.
4. **Problem-solving skills:** The candidate will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
5. **General knowledge of science:** The candidate should demonstrate a general knowledge of the elements of the sciences as related to molecular/cellular bioscience and a detailed knowledge of his or her area of research, including an appropriate familiarity with the research literature.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.gradient.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

**Degree candidacy requirements**
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

**Graduation requirements**
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

**Other information**
Students wishing to matriculate into the Department of Pharmacology and Toxicology can contact the program director for further advice on course requirements and advising.

School of Medicine graduate program policies
The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on doctoral programs is available elsewhere in this chapter of the Graduate Bulletin.

Apply online at graduate.admissions.vcu.edu (http://www.gradient.admissions.vcu.edu).

Admission requirements

<table>
<thead>

</tr>
</thead>
<tbody>
<tr>
<td>Ph.D.</td>
<td>Fall</td>
<td>Applications received prior to Jan 15 given priority consideration</td>
<td>GRE TOEFL (individuals for whom English is a second language)</td>
</tr>
</tbody>
</table>

Special requirements

- Applications for the program must be submitted to the Biomedical Sciences Doctoral Portal — School of Medicine — Ph.D. selected from the drop-down menu of programs on the VCU online application form.

In addition to the general admission requirements of the VCU Graduate School (p. 35), successful applicants will typically have the following credentials:

1. A baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. Current GRE scores (taken within the past five years), with scores at the 75th percentile or greater preferred
3. TOEFL scores of 600 (pBT), 250 (cBT) or 100 (iBT) for individuals for whom English is a second language; or 6.5 on the IELTS (To report GRE or TOEFL score, use VCU Code 5570.)
4. Personal statements, which should include: long-term career goals to assess reasons behind the candidate's application; how a Ph.D. in biomedical science helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration
5. Three letters of recommendation that speak to the scientific competency and experience of the applicant
6. The equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g. cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology, biophysics, etc.)

Degree requirements

The broad base offered in the PhD. program in pharmacology and toxicology, together with basic training in physiology and biochemistry, provides the background for a successful career in academic institutions, industry or government. The research program of the department is sufficiently broad to provide an adequate basis for entry into a wide variety of interesting areas of modern biology and medicine.

In addition to the general VCU Graduate School graduation requirements (p. 31), students must complete a minimum of 60 graduate credit hours. With few exceptions, Ph.D. students are enrolled in the Biomedical Sciences Doctoral Portal from matriculation until matched with an adviser, usually by the summer semester of the second year. The students are moved into the Ph.D. in Pharmacology and Toxicology major after meeting program requirements. Students customarily complete formal course work in pharmacology and biochemistry during the first year of study. Participation in research also is begun early in the first year. Students interested or committed to pharmacology should take the footnoted courses listed in the curriculum requirements section during the portal period to assure rapid progress toward the degree.

In the third and subsequent years, the majority of the course load is taken as PHTX 697. Advanced electives also may be taken as desired and with the approval of the adviser. Students and faculty participate in a seminar program (PHTX 690) that includes distinguished visiting scientists from the U.S. and abroad. Following completion of a qualifying examination, a degree candidate is required to submit and defend a thesis embracing an original research project conducted under the guidance and supervision of an adviser and an advisory committee. There is no foreign language requirement. The average time necessary to complete the doctoral program in pharmacology and toxicology is four to five years.

# Pharmacology and Toxicology, Doctor of Philosophy (Ph.D.) with a concentration in molecular biology and genetics

## Program goals

The molecular biology and genetics curriculum is an integrated interdisciplinary program of study that builds on the graduate programs of participating departments in the School of Medicine. The doctoral curriculum is designed to be an intensive course of study that will provide students with the skills required to advance to research-oriented careers in biotechnology.

1. The curriculum includes core, specialization and elective courses. Electives drawn from various departments allow individual specialization.
2. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation. The program relates this framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified.
3. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.
4. The program centers on a research project conducted under the guidance of a selected faculty mentor and culminates in the presentation and defense of a doctoral dissertation.

Participating faculty are associated not only with programs and departments within the School of Medicine, but also with the VCU Massey Cancer Center, the Philips Institute for Oral and Craniofacial Molecular Biology (School of Dentistry), the Institute of Structural Biology and Drug Discovery (School of Pharmacy) and the VCU Center for the Study of Biological Complexity (VCU Life Sciences).

The interdisciplinary approach to the solution of biological problems provided by this training is designed to develop in students the flexibility and problem-solving skills necessary for success in a variety of scientific career opportunities or further graduate study.

## Student learning outcomes

1. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
2. General knowledge of sciences: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications, as measured by rubric.
3. Communication skills: Degree candidates will demonstrate that an appropriate level of oral, written and visual communication skills have been acquired.

## Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

Total Hours: 42

The minimum total of graduate credit hours required for this degree is 60.
Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 17)

Other information
School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on doctoral programs is available elsewhere in this chapter of the Graduate Bulletin.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Admission requirements

<tbody>
<tr>
<td>Ph.D.</td>
<td>Fall</td>
<td>Applications received prior to Jan 15 given priority consideration</td>
<td>GRE, MCAT or DAT</td>
</tr>
</tbody>
</table>

Special requirements

- MCAT or DAT acceptable in lieu of GRE for combined professional/academic degree programs
- Applications for the program must be submitted to the Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D. selected from the drop-down menu of programs on the VCU online application form.

In addition to the general admission requirements of the VCU Graduate School (p. 35), successful applicants will typically have the following credentials:

1. A baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. Current GRE scores (taken within the past five years), with scores at the 75th percentile or greater preferred
3. TOEFL scores of 600 (pBT), 250 (cBT) or 100 (IBT) for individuals for whom English is a second language; or 6.5 on the IELTS (To report GRE or TOEFL score, use VCU Code 5570.)
4. Personal statements, which should include: long-term career goals to assess reasons behind the candidate’s application; how a Ph.D. in biomedical science helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration
5. Three letters of recommendation that speak to the scientific competency and experience of the applicant
6. The equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g. cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology, biophysics, etc.)
7. Laboratory experience also strongly recommended

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the academic regulations section of each school’s graduate program policies and guidelines. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

a. Oral communication skills: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.

b. Written communication skills: Degree candidates will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.

4. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

4. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)
Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 31), students must complete a minimum of 60 graduate credit hours.

During the first year, students pursue research rotations, take formal course work and become familiar with current research topics through seminars, discussion groups and lectures by distinguished scientists. By the end of the first year, students choose a faculty adviser and begin dissertation research. Prior to the beginning of the third year of study, students should successfully pass written and oral candidacy examinations. Following completion of the research project and defense of the doctoral dissertation, graduates are equipped to participate in a broad range of current biomedical research areas.

Elective courses

The minimum total of graduate credit hours required for this degree is 60.

Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

Graduate program director

Gail E. Christie, Ph.D.
Professor, Department of Microbiology and Immunology
christie@vcu.edu

Program website: vcu.edu/mbg (http://www.vcu.edu/mbg/)

Pharmacology and Toxicology, Master of Science (M.S.)

Program goal

The graduate program leading to the Master of Science in Pharmacology and Toxicology prepares individuals for a variety of career objectives in biomedical science. These careers include but are not limited to as industrial scientists and scientists in government regulatory agencies. The M.S. program will be of interest to individuals planning on pursuing technical positions in pharmacology or toxicology research or testing; students interested in the health professions, such as medicine or dentistry, who desire additional research training; and those interested in government positions, such as those in regulatory agencies, that require training in pharmacology and toxicology.

The program incorporates formal instructional activity and research training mentored by members of the graduate faculty. The master's
program is distinguished from the Ph.D. degree offered by the department in that the M.S. student is not being prepared for a career as an independent investigator.

**Student learning outcomes**

1. Communication skills: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric. The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.

2. Integrated knowledge of bioscience: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications as measured by rubric.

3. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.

4. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.gradschool.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)**

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)**

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the academic regulations section for additional information on graduation requirements. (p. 31)**

**Other information**

**School of Medicine graduate program policies**

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on master’s programs is available elsewhere in this chapter of the Graduate Bulletin.

<td>GRE (MCAT acceptable in lieu of GRE)</td>
</tr>
</tbody>
</table>

**Special requirements**

- See the departmental website for additional information on the application process.

In addition to the general admission requirements of the VCU Graduate School (p. 35), qualified applicants to the M.S. degree program typically must have:

1. Baccalaureate degrees with a major in fields such as biology, chemistry, biochemistry, pharmacy and related sciences
2. GRE scores of 1100 (verbal plus quantitative) and 3.5 (analytical) or equivalent scores on the new GRE exam
3. Undergraduate GPA of 3.2
4. Some laboratory research experience
Basic science, research-intensive, non-thesis curriculum for medical students

Individuals who are participants in medical training (the Doctor of Medicine program) at VCU may be eligible for enrollment in a research-intensive, non-thesis graduate curriculum. This basic science option builds on the core of disciplinary material embedded in the first two years of training in the medical school curriculum. Additional exposure is provided to specialized areas in basic science disciplines in concert with an intensive research experience leading to the preparation of a report in the form of a manuscript suitable for publication. The program is designed to be completed within 12 to 15 months. Subject matter related to the core material and/or suitable elective courses taken in the didactic phase of medical training correspond to a minimum of the equivalent of 24 graduate credit hours. The equivalent of 12 credit hours may be applied to the M.S. degree program in which the student is enrolled in accordance with Graduate School policy. Medical students interested in the basic science option should contact the M.S. graduate program director for additional information.

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 31), students in the master's program must complete a minimum of 30 graduate credit hours.

The Master of Science in Pharmacology and Toxicology is a research-oriented degree program comprising graduate course work and supervised research leading to a master’s thesis. Students must conduct a substantial original investigation under the supervision of their advisers and must prepare and defend a thesis reporting the results of this research. It is highly recommended that students identify mentors for dissertation research as soon as possible within the first semester to ensure timely progress in their research.

When the thesis has been completed, copies are submitted to the members of the student’s graduate advisory committee. The student’s GAC decides upon the acceptability of the candidate's thesis. If the committee unanimously accepts the thesis for defense, the candidate appears before them for a final oral examination.

M.S. students are required to present a departmental seminar prior to the final oral thesis defense as a requirement for completion of the thesis.

Curriculum requirements

Program website: pharmtox.vcu.edu (https://pharmtox.vcu.edu/)

Pharmacology and Toxicology, Master of Science (M.S.) with a concentration in molecular biology and genetics

Program goals
The molecular biology and genetics curriculum is an integrated interdisciplinary program of study that builds on the graduate programs of participating departments in the School of Medicine. The master's curriculum is designed to be an intensive course of study that will provide students with the skills required to advance to research-oriented careers in biotechnology or provide the foundation for further graduate study toward a Ph.D.

It is expected that the program should be completed in approximately two to two-and-one-half years.

1. The curriculum includes core, specialization and elective courses. Electives drawn from various departments allow individual specialization.
2. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation. The program relates this framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified.
3. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.
4. The final three semesters include a research project conducted under the guidance of a selected faculty mentor and culminates in the presentation and defense of a master’s thesis.

Participating faculty are associated not only with programs and departments within the School of Medicine, but also with the VCU Massey Cancer Center, the Philips Institute for Oral and Craniofacial Molecular Biology (School of Dentistry), the Institute of Structural Biology and Drug Discovery (School of Pharmacy) and the VCU Center for the Study of Biological Complexity (VCU Life Sciences).

The interdisciplinary approach to the solution of biological problems provided by this training is designed to develop in students the flexibility and problem-solving skills necessary for success in a variety of scientific career opportunities or further graduate study.

Student learning outcomes
1. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
2. General knowledge of sciences: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications, as measured by rubric.
3. Communication skills: Degree candidates will demonstrate that an appropriate level of oral, written and visual communication skills have been acquired.
   a. Oral communication skills: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
   b. Written communication skills: Degree candidates will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
4. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the
graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

A master’s student in the MBG curriculum must prepare a formal written research plan and make an oral presentation of their thesis research proposal and progress report to their graduate advisory committee prior to the beginning of the second year of residency. The student’s knowledge in the area of the proposed research, current research accomplishments and the feasibility of the proposed research project will be evaluated by the GAC. Successful completion of this review is required for continuance in the program and constitutes admission to candidacy.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

**Other information**

**School of Medicine graduate program policies**

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on master’s programs is available elsewhere in this chapter of the Graduate Bulletin.

Apply online at [graduate.admissions.vcu.edu](http://www.graduate.admissions.vcu.edu).

</tr>
</tbody>
</table>

**Special requirements**

- Applications for the program should be submitted to Molecular Biology and Genetics – M.S. selected from the drop-down menu of programs of the VCU online graduate application form. The degree awarded will be a Master of Science in Pharmacology and Toxicology.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must have earned or expect to earn a baccalaureate or equivalent degree, and must have demonstrated a superior knowledge of biology, chemistry, physics and mathematics. Laboratory experience is also strongly recommended. The Graduate Record Examination is required, as are letters of recommendation and a letter summarizing the applicant’s goals. International applicants who do not use English as their native language must take the Test of English as a Foreign Language examination.

**Basic science, research-intensive, non-thesis curriculum for medical students**

Individuals who are participants in medical training (the Doctor of Medicine program) at VCU may be eligible for enrollment in a research-intensive, non-thesis graduate curriculum. This basic science option builds on the core of disciplinary material embedded in the first two years of training in the medical school curriculum. Additional exposure is provided to specialized areas in basic science disciplines in concert with an intensive research experience leading to the preparation of a report in the form of a manuscript suitable for publication. The program is designed to be completed within 12 to 15 months. Subject matter related to the core material and/or suitable elective courses taken in the didactic phase of medical training correspond to a minimum of the equivalent of 24 graduate credit hours. The equivalent of 12 credit hours may be applied to the M.S. degree program in which the student is enrolled in accordance with Graduate School policy. Medical students interested in the basic science option should contact the M.S. graduate program director for additional information.

**Degree requirements**

In addition to the general VCU Graduate School graduation requirements (p. 31), the interdisciplinary master’s curriculum in molecular biology and genetics requires a minimum of 48 credit hours, at least half of which must be course work restricted to graduate students. The curriculum includes 19 credit hours of required core course work and 29 additional credit hours of required course work, directed research and research seminar course work, and additional approved course work, as listed below. M.S. candidates must pass a final oral examination. A written thesis approved by the student’s graduate advisory committee completes the requirements leading to the M.S. degree.
The minimum total of graduate credit hours required for this degree is 48.

Typical plan of study
Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

Graduate program director
Gail E. Christie, Ph.D.
Professor, Department of Microbiology and Immunology
christie@vcu.edu
(804) 828-9093

Program website: vcu.edu/mbg (http://www.vcu.edu/mbg/)

Pharmacy, Doctor of (Pharm.D.)/Public Health, Master of (M.P.H.) [dual degree]
To qualify as a dual degree student in any of the training paradigms which appear in the Bulletin, a student must have evidence of having been simultaneously enrolled in one or more courses of both of the programs constituting the "dual degree" for at least one semester.

The School of Pharmacy and the Division of Epidemiology in the Department of Family Medicine and Population Health in VCU's School of Medicine offer a dual degree program through which students earn both Pharm.D. and M.P.H. degrees. This dual degree program offers students the opportunity to achieve a Doctor of Pharmacy while also learning about research and the importance of population health. This five-year program requires students to spend the fourth year of the Pharm.D. program pursuing the M.P.H. degree, after which they transition back to pharmacy for advanced practice experiences.

Students are required to take a minimum of 36 credits in the M.P.H. curriculum. This includes 27 credit hours of core and required courses, a minimum of six credit hours of elective courses and a minimum of three credit hours of a capstone project that examines a relevant public health topic. Note that some elective courses may not be available in certain years or may require instructor permission for registration. The M.P.H. internship requirement will be satisfied by Pharm.D. special advanced practice experiences in community health during the fifth year of the program.

The required M.P.H. capstone project will be completed in a community setting during the P5 year; it will involve a comprehensive project that serves the needs of a professional public health organization and typically involves the development of one or more deliverables. Examples include a disease surveillance project, a needs assessment or program evaluation, or analysis of survey data.

RCO Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all
graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

**Other information**

**School of Medicine graduate program policies**

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on master’s programs is available elsewhere in this chapter of the Graduate Bulletin.

For M.P.H., apply online at sophas.org (http://www.sophas.org/) and complete a VCU supplemental application following instructions available at sophas.org. Pharm.D. applicants follow instructions on the School of Pharmacy website (http://pharmacy.vcu.edu/programs/pharmd/prospective/apply/).

Please review the admission requirements for each stand-alone degree (Master of Public Health and Doctor of Pharmacy) in the VCU Graduate and Professional Bulletins to learn the specific application requirements for each program.

Physiology and Biophysics, Doctor of Philosophy (Ph.D.)

Program goals

1. The program is designed to provide students with the skills required to advance to positions as bioscience researchers and trainers in a broad spectrum of positions.
2. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in bioscience.
3. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified.
4. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

Student learning outcomes

1. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
2. General knowledge of sciences: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications, as measured by rubric.
3. Communication skills: Degree candidates will demonstrate that an appropriate level of oral, written and visual communication skills have been acquired.
   a. Oral communication skills: Degree candidates will demonstrate the achievement of an appropriate level of oral communication
skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.

b. Written communication skills: Degree candidates will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.

4. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

**Other information**

**Department handbook**

Applicants and students may request a handbook with additional information, which is also summarized on the departmental website (physiology.vcu.edu/education/phd). Please feel free to contact the graduate program coordinator with any questions.

**School of Medicine graduate program policies**

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on doctoral programs is available elsewhere in this chapter of the Graduate Bulletin.

Apply online at graduate.admissions.vcu.edu (http://wwwgraduate.admissions.vcu.edu).

**Special requirements**

- Applications for the program must be submitted to the Biomedical Sciences Doctoral Portal — School of Medicine — Ph.D. selected from the drop-down menu of programs on the VCU online application form.

In addition to the general admission requirements of the VCU Graduate School (https://www.vcu.edu/admissions/apply/graduate/), successful applicants will typically have the following credentials:

1. A baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. Current GRE scores (taken within the past five years), with scores at the 75th percentile or greater preferred
3. TOEFL scores of 600 (pBT), 250 (cBT) or 100 (IBT) for individuals for whom English is a second language; or 6.5 on the IELTS (To report GRE or TOEFL score, use VCU Code 5570.)
4. Personal statements, which should include: long-term career goals to assess reasons behind the candidate's application; how a Ph.D. in biomedical science helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration
5. Three letters of recommendation that speak to the scientific competency and experience of the applicant
6. The equivalent of two semesters of general chemistry, two semesters of organic chemistry, two semesters of upper-level biology courses, two semesters of physics and two semesters of college-level mathematics recommended (Example courses: cell biology, molecular
Degree requirements

Graduate study in the Department of Physiology and Biophysics in the School of Medicine is a highly individualized undertaking, of which required course work is only one component. Each student's program is tailored to meet his or her particular interests, with the primary emphasis on developing research skills and the capacity for scholarship.

Opportunities for research experience begin in the first year, when students spend time working in several faculty laboratories of their choice. These lab rotations enable students to examine current faculty research projects and choose their areas of specialization. In the second and subsequent years, increasingly more time is devoted to independent research under the guidance of a faculty adviser. Department-sponsored seminars give students opportunities to discuss their research interests with visiting scientists and many students present their work at national professional meetings.

The Ph.D. program in physiology and biophysics normally takes at least four years to complete. The first two years are devoted mainly to course work. The first year consists primarily of required courses, while the second is geared toward electives and research. On satisfactory completion of two years of course work, students must pass written and oral comprehensive examinations to qualify for degree candidacy. Following admission to candidacy, each student must conduct a substantial original research project, prepare a written dissertation and defend it successfully in an oral examination.

In addition to the general VCU Graduate School graduation requirements (http://bulletin.vcu.edu/academic-regs/grad/graduation-info/), students must complete a minimum of 66 credit hours for the Ph.D., including directed research. Note: Based on the medical curriculum, the following courses are typically waived for M.D./Ph.D. students: BIOC 503, BIOC 504, BIOC 691, IBMS 610, PHIS 501, PHIS 650, PHIS 691 and PHIS 692.

Curriculum requirements

Ph.D. students are expected to acquire teaching experience by serving as teaching assistants for PHIZ 206 for one semester. (Requirement typically is waived for M.D./Ph.D. students who will gain relevant experience during clinical training.)

Total Hours: 66

Neuroscience degree seeking students working in the physiology and biophysics department lab should register for their degree department's directed research course, NEUS 697.

The minimum total of graduate credit hours required for this degree is 66.

Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

Physiology and Biophysics, Master of Science (M.S.)

Program goal
The master’s program in physiology and biophysics is designed to provide students with the skills required to advance to positions as physiology and bioscience researchers and trainers in a broad spectrum of positions. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of physiology and bioscience, as well as an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in bioscience. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified. In addition, students will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

Student learning outcomes
1. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
2. General knowledge of sciences: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications, as measured by rubric.
3. Communication skills: Degree candidates will demonstrate that an appropriate level of oral, written and visual communication skills have been acquired.
   a. Oral communication skills: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
   b. Written communication skills: Degree candidates will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
4. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.vcu.edu/graduate/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student’s academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

Other information
School of Medicine graduate program policies
The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on master's programs is available elsewhere in this chapter of the Graduate Bulletin.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Admission requirements

<table>
<thead>
<tr>
<th>Degree:</th>
<th>Semester(s) of entry:</th>
<th>Deadline dates:</th>
<th>Test requirements:</th>
</tr>
</thead>
<tbody>
<tr>
<td>M.S.</td>
<td>Fall preferred</td>
<td>Apr 1</td>
<td>GRE, MCAT or DAT</td>
</tr>
</tbody>
</table>
In addition to the general admission requirements of the VCU Graduate School (p. 35), successful applicants will typically have the following credentials:

1. Baccalaureate degree or its equivalent at the time of enrollment with a minimum overall GPA of 3.0
2. Combined GRE scores of at least 300 for the verbal plus quantitative (1200 based on the previous scale) and 4.0 analytical score
3. Test of English as a Foreign Language examination with a minimum score of 100 (IBT), 250 (CBT) or 600 (PBT), or 6.5 on the IELTS for foreign applicants who do not use English as their native language

Although there are no absolute course requirements for admission, fundamental knowledge of general and organic chemistry and biology are considered necessary to pursue advanced studies, and upper-level courses in molecular and cellular biology are desirable. Previous research experience or demonstration of a serious interest in a research-oriented career is also desirable. A personal statement describing the applicant’s research experience and interests as well as letters of reference from previous supervisors are helpful in determining an applicant’s suitability for this curriculum. Official transcripts of all graduate and undergraduate records must be mailed from the college or university registrar.

Basic science, research-intensive, non-thesis curriculum for medical students

Individuals who are participants in medical training (the Doctor of Medicine program) at VCU may be eligible for enrollment in a research-intensive, non-thesis graduate curriculum. This basic science option builds on the core of disciplinary material embedded in the first two years of training in the medical school curriculum. Additional exposure is provided to specialized areas in basic science disciplines in concert with an intensive research experience leading to the preparation of a report in the form of a manuscript suitable for publication. The program is designed to be completed within 12 to 15 months. Subject matter related to the core material and/or suitable elective courses taken in the didactic phase of medical training correspond to a minimum of the equivalent of 24 graduate credit hours. The equivalent of 12 credit hours may be applied to the M.S. degree program in which the student is enrolled in accordance with Graduate School policy. Medical students interested in the basic science option should contact the M.S. graduate program director for additional information.

Degree requirements

The Department of Physiology and Biophysics offers courses of study leading to the Master of Science and the Doctor of Philosophy. A combined M.D./Ph.D. degree program is also available through this department and the School of Medicine. It is generally recommended that students intending to pursue careers as professional physiologists should attempt to earn the Ph.D. Work done in partial or complete fulfillment of the requirements for the master’s degree may be applied toward the Ph.D. provided that it is of adequate quality.

Graduate education in physiology and biophysics is a highly individualized enterprise, of which the formal course requirements comprise only a portion. The degree program described here provides an opportunity for apprenticeship in research and, through this, the development of a capacity for scholarship. The essence of this type of education lies in the development of a close relationship between the student and the faculty adviser. The adviser and the student, jointly and with the approval of the department chair and the associate dean of medicine for graduate education, select the student’s graduate advisory committee.

The M.S. degree program includes a first year comprising mainly didactic course work and a second year largely devoted to the completion of an independent research project in a chosen lab. Many applicants who are admitted to this master’s program have successfully completed VCU’s Certificate in Pre-medical Graduate Health Sciences. Since a number of the certificate program’s courses overlap with the first-year didactic requirements or electives of this master’s program, many students start their master’s training in the summer following completion of the certificate program. Additional information may be found on the department’s website (https://physiology.vcu.edu/education/) or applicants may contact the graduate program director.

Writing a thesis based on this work and a successful oral defense of this thesis, as well as completion of the core course work, is essential to earning the degree.

In addition to the general VCU Graduate School graduation requirements (http://bulletin.vcu.edu/academic-regs/grad/graduation-info/), students must complete a minimum of 30 graduate credit hours for the M.S. in Physiology and Biophysics.

Teaching experience

M.S. students also have the opportunity to acquire teaching experience and financial support by serving as teaching assistants for PHIZ 206 for undergraduates. Contact the program coordinator or graduate program director in advance of the beginning of classes for additional information.

**Typical plan of study**

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a student or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

**Graduate program director**
Roland Pittman, Ph.D.
Professor, Department of Physiology and Biophysics
pittman@vcu.edu
(804) 828-9545

**Additional contacts**
Carlos Escalante, Ph.D.
Graduate program assistant director

(804) 628-1202

Christina Kyrus
Graduate program coordinator
cikyrus@vcu.edu
(804) 628-5506

**Program website**: physiology.vcu.edu (http://www.physiology.vcu.edu)

**Pre-medical Graduate Health Sciences, Certificate in (Post-baccalaureate graduate certificate)**

**Program goal**
The pre-medical graduate health sciences certificate program in the School of Medicine provides an advanced level of didactic training in the biomedical sciences to enhance the preparation of students for a variety of career options, particularly professional degree training (i.e. M.D./D.O., D.D.S., M.S. and Ph.D.). The program also provides the opportunity for the development of an informed approach to the admission process in professional and/or advanced degree training to enhance the prospect of advancement.

**Student learning outcomes**

1. Achievement of a threshold competency in the basic health sciences: The candidate will achieve/surpass expectations of a threshold-level competency in the basic health sciences, particularly in areas related to gaining admission to professional and/or higher-level degree programs.

2. MCAT/DAT preparation: The candidate will be prepared to take and/or retake standardized tests. The candidate will achieve a score that fulfills medical or dental school admission requirements.

3. Preparation for career advancement: The candidate who meets the threshold competency objective will display an enhanced level of advancement to higher levels of professional and/or advanced degree training.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

**Other information**

Applying to professional school and advanced graduate degree programs
Students must follow admission guidelines for applications to the M.D./D.O., M.S., D.D.S. and other programs. Completion of the certificate program does not afford a guaranteed admission to professional training programs at VCU. Exceptional performance, 3.5 GPA and a 28 MCAT guarantees an interview at VCU School of Medicine. Similar criteria increase eligibility for an interview at the VCU School of Dentistry.

**Advising:** Students are encouraged to seek opportunities for academic, personal and professional development from the Division for Academic Success, Career Services and the CERT Program Office. For students who choose to take a year off between CERT and professional school, several School of Medicine professors hire students for research positions and area hospitals offer SCRIBE programs that actively recruit VCU graduates. The CERT Program Office can also help identify possibilities.

**Letters of reference:** The CERT program adviser will provide a letter of reference for professional school applications. Students must schedule an appointment to interview with the program adviser for a letter.

**Apply online** at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

### Admission requirements

<td></td>
</tr>
</tbody>
</table>

**Special requirements**

- While there is no official deadline for applying to the certificate program, the school strongly recommends applicants have all materials into the graduate admissions office by July 16 (for fall semester matriculation) or Nov. 15 (for spring semester matriculation) to ensure that the file can be processed in time for the appropriate semester. The program has rolling admissions for a limited number of positions.

Applicants must meet all general admission requirements of the VCU Graduate School (p. 35).

### Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students must complete a minimum of 27 graduate credit hours of course work with a minimum final GPA of 3.0 (4.0 scale). The curriculum is composed of three required courses (15 credit hours) and 12 credit hours of electives spread over two semesters. The curriculum should be completed in one academic year (fall and spring semester).

Required and elective courses are drawn from departments within the School of Medicine: the departments of Anatomy and Neurobiology, Biochemistry and Molecular Biology, Human and Molecular Genetics, Microbiology and Immunology, Pharmacology and Toxicology, and Physiology and Biophysics. All courses are held on the MCV Campus. In addition to the elective courses shown other courses may be applied as electives with the approval of the course director.

## Public Health, Master of (M.P.H.)

**Program accreditation**

Council on Education for Public Health
Program goal
The mission of the VCU M.P.H. program is to engage students in 
an experiential and learner-centered environment, collaborate with 
public health partners in Central Virginia to promote health equity 
and community wellness and foster lifelong inquiry and discovery in 
interdisciplinary, translational research that improves human health.

The overall goal of the M.P.H. program is to educate students to become 
well-grounded in the essential knowledge, skills and attitudes of public 
health and demonstrate their ability to apply these essentials through 
course work, internships and the M.P.H. capstone project. This program 
is designed to provide students with the skills required to advance to 
positions as public health practitioners in a broad spectrum of positions 
and settings and who can perform the following:

1. Administer public health programs 
2. Collect, analyze and evaluate public health data 
3. Plan, implement and evaluate public health interventions 
4. Apply results of evaluations and data analyses to policy development 
as necessary 
5. Promote public health through educational campaigns 

The structure of the program provides a framework for the progressive 
development of a mastery of the current state of the subject matter of 
public health and an ability to synthesize and apply this information to 
the identification of key areas of practice and research in public health. Students will develop educational competencies outlined by the 
M.P.H. program. These competencies cover the foundational knowledge 
necessary for a public health practitioner to both communicate the 
core of public health knowledge and express the design, results and 
interpretation of various public health interventions, evaluations, and data 
collection and analysis efforts to a variety of potential audiences.

Student learning outcomes
Student learning outcomes are monitored by the program faculty and 
center primarily around competencies for all students. Overall learning 
outcomes are as follows.

1. Integrated knowledge of public health: Students will demonstrate 
knowledge of the current elements of public health, at a level 
assessed by program faculty as competent or higher, according to the 
program rubric.
2. Demonstration of focused knowledge and skills: Students will 
demonstrate more detailed knowledge and applied skills in the 
individual area of scholarship, including familiarity with the research 
literature and the ability to evaluate and critique publications, at a 
level assessed by program faculty as competent or higher, according to 
the program rubric.
3. Development of competencies: Through program course work 
and applied experiences, students will develop competence in the 
discipline of public health as demonstrated through annual self-
assessment of performance on the M.P.H. program competencies 
and faculty assessment of (1) student competence in semi-annual 
student reviews and (2) student performance in the program’s 
integrated learning experience, the capstone project.
4. Training in appropriate public health skills/knowledge: Through 
didactic study and two separate applied experiences in professional 
public health settings, students will gain knowledge and skills 
required to perform as public health practitioners and/or researchers.

The M.P.H. program trains students to develop educational competencies 
established by the program’s accrediting body, the Council on 
Education for Public Health. These competencies may be viewed on the 
Department of Family Medicine and Population Health website (http:// 
familymedicine.vcu.edu/epidemiology/mph/competencies/).

VCU Graduate Bulletin, VCU Graduate School 
and general academic policies and regulations 
for all graduate students in all graduate 
programs
The VCU Graduate Bulletin website documents the official admission and 
academic rules and regulations that govern graduate education for all 
graduate programs at the university. These policies are established by the 
granduate faculty of the university through their elected representatives to 
the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-
campus, to be familiar with the VCU Graduate Bulletin as well as the 
Graduate School website (http://www.vcu.edu/) and academic 
regulations in individual school and department publications and 
program websites. However, in all cases, the official policies and 
procedures of the University Graduate Council, as published on the VCU 
Graduate Bulletin and Graduate School websites, take precedence over 
individual program policies and guidelines.

Visit the academic regulations section for additional information on 
academic regulations for graduate students. (p. 17)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a 
final research project, work of art, thesis or dissertation, must qualify for 
continuing master’s or doctoral status according to the degree candidacy 
requirements of the student’s graduate program. Admission to degree 
candidacy, if applicable, is a formal statement by the graduate student’s 
faculty regarding the student’s academic achievements and the student’s 
readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following 
degree candidacy policy as published in the VCU Graduate Bulletin for 
complete information and instructions.

Visit the academic regulations section for additional information on 
degree candidacy requirements. (p. 26)

Graduation requirements
As graduate students approach the end of their academic programs and 
the final semester of matriculation, they must make formal application to 
granduate. No degrees will be conferred until the application to graduate 
has been finalized.

Graduate students and program directors should refer to the following 
graduation requirements as published in the Graduate Bulletin for a 
complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on 
graduation requirements. (p. 31)

Other information
The M.P.H. program student handbook is available upon request.
School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on master's programs is available elsewhere in this chapter of the Graduate Bulletin.

Apply online at sophas.org (http://www.sophas.org/) and submit a VCU supplemental application following instructions available at sophas.org.

Admission requirements

<table>

<th>Test requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>M.P.H.</td>
<td>Fall</td>
<td>Mar 1</td>
<td>GRE, TOEFL or IELTS for international students</td>
</tr>
</tbody>
</table>

In addition to the general admission requirements of the VCU Graduate School (p. 35), to be considered for admission, applicants must meet the following requirements:

1. Prior degree: Students must hold a bachelor's degree from an accredited institution, with a minimum GPA of 3.0 on a 4.0 scale in all undergraduate and any other graduate study. Official copies of transcripts for all prior degrees earned must be submitted to the VCU Office of Graduate Admissions.

2. GRE: Current GRE test results (taken within the past five years), with scores at or above the 75th percentile preferred in all components of the exam (i.e., minimum scores of 159 quantitative, 157 verbal and 4.5 analytical writing).

3. TOEFL: International students must submit TOEFL or IELTS scores. Minimum TOEFL score is 600 (paper-based), 250 (computer-based) or 100 (Internet-based); IELTS minimum score is 7.0. The PTE is also accepted with a minimum score of 65. Test score requirements may be waived for international students who have received a medical degree (M.D.) in the U.S. Contact the program coordinator for more information.

Students must also submit the following materials with their applications:

1. Letters of recommendation from three individuals who can assess applicant qualifications for graduate school; at least one academic reference is required, but two are preferred. Most appropriate are letters from past professors or work supervisors.

2. Current version of curriculum vitae or resume. Include experience and/or education relevant to study in public health.

3. Personal statement covering the following issues in two to five pages:
   a. Description of the applicant's career goals
   b. Why the applicant wishes to pursue an M.P.H. degree
   c. How an M.P.H. degree will help the applicant achieve her/his career goals
   d. Description of applicant's particular areas of interest in public health (e.g., maternal and child health, epidemiology)
   e. Why VCU's M.P.H. program best fits the student's public health interests
   f. What applicant plans to do in the first few years after graduation

Degree requirements

The Master of Public Health program prepares students committed to public health careers in the public, private or nonprofit sectors. Public health works to prevent health problems in populations before these problems occur. The M.P.H. program provides a rigorous curriculum to help students develop analytic and critical-thinking skills to improve population health. The program boasts experiential learning, a highly interactive environment, accessible and approachable faculty and student involvement in significant projects.

In addition to general VCU Graduate School graduation requirements (p. 31), a minimum of 45 credit hours of formal course work is required, including:

1. A practicum in year one
2. An internship, typically conducted in the summer between the first and second year
3. A 20-hour community-based learning experience
4. Attendance at public health seminars in years one and two
5. A capstone project planned and implemented in the second year of the program

The M.P.H. program can be individualized to meet the varied needs and interests of students. The program offers many electives, allowing students to tailor the program to meet educational objectives, and it is flexible enough to accommodate students who enter the program with various backgrounds and experiences. Note that some elective courses may not be available in certain years or may require instructor permission for registration.

</tr>
</tbody>
</table>

The minimum total of graduate credit hours required for this degree is 45.

**Public health internship:** The public health internship is a supervised experience designed to expose M.P.H. students to a real-world public health practice setting, such as a governmental public health agency or nonprofit organization, requiring them to integrate classroom knowledge and skills in practical applications in a professional environment. Each student intern works with a practice site supervisor who assigns tasks, instructs the student in new skills and evaluates the student’s progress. Students work a minimum of 180 hours in a professional public health organization.

**Capstone project:** The culminating work in the M.P.H. program is the capstone project. The project is a practical experience that allows the student to apply what has been learned in the didactic components of the curriculum to a focused project. The goal is to enhance the student’s academic experience through the application of public health concepts and skills in a supervised experience. Students are required to synthesize the literature; analyze, assess or evaluate quantitative or qualitative data; and in general apply theory and integrate knowledge gained and principles in situations that approximate some aspects of professional practice. With this mentored experience, students are able to both broaden their skills and hone their proficiency in a specific area of public health. The major product of this culminating experience is expected to vary depending on the educational goals of the student, but could include one of the following:

1. Manuscript suitable for publication in a peer-reviewed journal
2. Comprehensive disease-related report and analysis
3. Policy analysis report
4. Needs assessment for a specific population
5. Development, implementation and analysis of target population surveys
6. Program evaluation

At a minimum, the capstone experience will require the integration of multiple major competencies used by a public health professional. In fulfilling the capstone requirement, each candidate must: (a) submit a formal written paper of sufficient depth and rigor and (b) satisfactorily complete a poster presentation of the project chosen as the basis for
the written paper at an appropriate venue (e.g., research forum, refereed conference, etc.) approved by the M.P.H. program director.

**Non-didactic program requirements**

In addition to course work, students are required to complete the following noncurricular requirements for the M.P.H. degree:

1. Attendance at 12 public health seminars
2. Twenty hours of community-based service-learning

**Graduate program director**
Juan Lu, Ph.D., M.P.H., M.D.
Associate professor, Division of Epidemiology, Department of Family Medicine and Population Health
juan.lu@vcuhealth.org
(804) 828-9786

**Program website:** epidemiology.vcu.edu/education/mph (http://www.epidemiology.vcu.edu/education/mph/)

---

**Public Health, Master of (M.P.H.)/Social Work, Master of (M.S.W.) [dual degree]**

**Program accreditation**
Council on Education for Public Health (M.P.H.)
Council on Social Work Education (M.S.W.)

To qualify as a dual degree student in any of the training paradigms which appear in the Bulletin, a student must have evidence of having been simultaneously enrolled in one or more courses of both of the programs constituting the "dual degree" for at least one semester.

Through a collaborative program between the VCU School of Social Work and the Division of Epidemiology in the School of Medicine’s Department of Family Medicine and Population Health, students complete a three-year full-time program of study, including summer course work, to obtain the Master of Social Work and Master of Public Health degrees. The purpose of this dual degree program is to prepare graduates to work with individuals, families, groups, communities and/or organizations; advocate for social, health care and economic justice in a diverse and multicultural society; and promote physical and mental health across the life course.

Prospective students are required to apply separately to both programs through the appropriate application portal indicated in the admission requirements section of this Bulletin and must meet both sets of admission requirements. Once admitted to both programs, the student is assigned an adviser from each to develop a plan of study, typically starting with the M.S.W. course work. It is preferable that students apply to both programs at the same time so that the structured dual degree curriculum can be optimally planned. Students in one program may also apply to the second program during the first year of study.

Students are required to complete a minimum of 45 M.S.W. credit hours and a minimum of 36 M.P.H. credit hours, for a total of 81 semester credit hours. In the M.P.H. program, this includes 27 credit hours of core and required courses, a minimum six credit hours of elective courses and a minimum of three credit hours of a capstone project that examines a relevant public health topic. Note that some elective courses may not be available in certain years or may require instructor permission for registration. During the third and last year of study, dual degree students are placed in internships through the School of Social Work that focus on public health; the internship placement is approved by both the M.P.H. program director and the director of the M.S.W. field instruction. With adviser approval, the student may develop a capstone project based on work in this public health/social work placement.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduat.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)
Other information

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on master’s programs is available elsewhere in this chapter of the Graduate Bulletin.

For the M.P.H., apply online at sophas.org (http://www.sophas.org/) and submit a supplemental VCU application following instructions available at sophas.org; for the M.S.W., apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Please review the admission requirements for each stand-alone degree (Master of Public Health and Master of Social Work) in the VCU Graduate Bulletin to learn the specific application requirements for each program.

### Social and Behavioral Sciences, Doctor of Philosophy (Ph.D.)

#### Program goal

Students in the doctoral program in social and behavioral sciences will acquire the skills to become scientists, educators and scientists/administrators in a broad spectrum of positions and settings. Students will gain a progressive mastery of the current state of the subject matter in the social and behavioral sciences, an ability to synthesize the information and apply this foundation to the identification of key areas of investigation/experimentation and the ability to design and interpret studies that address the questions identified. In addition, students will develop the various means of communicating core social and behavioral science knowledge and particular study designs, results and interpretations to a variety of audiences.

#### Student learning outcomes

1. **Analytical thinking:** Students will demonstrate an appropriate level of ability to interpret information relevant to social and behavioral science, to connect rationales to procedures and evidence to findings, to draw reasonable conclusions, and to generate and evaluate alternate explanations.

2. **Integrated knowledge of social and behavioral science:** Students will demonstrate an appropriate level of knowledge of the current elements of the social and behavioral sciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique.

3. **Oral communication skills:** Students will demonstrate the achievement of an appropriate level of skill in the oral communication of social and behavioral science subject matter with respect to content, organization, logical flow, presentation, use of language and incorporation of visual aids in formal and collaborative communication.

4. **Study design:** Students will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement study protocols and to design and develop studies.

### Noncurricular requirements

In addition to course work, students must attend 12 public health seminars and complete 20 hours of community-based service-learning.

**The minimum total of graduate credit hours required for the combined M.P.H./M.S.W. is 81.**

### Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study, or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

5. Written communication skills: Students will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling, vocabulary and use of figures, tables and citations to effectively present social and behavioral science information.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on doctoral programs is available elsewhere in this chapter of the Graduate Bulletin.

Apply online at sophas.org (http://www.sophas.org/) and submit a VCU supplemental application following instructions available at sophas.org.

Special requirements

- M.PH. or equivalent M.A. or M.S. degree

Applicants must meet all general admission requirements of the VCU Graduate School (p. 35).

Degree requirements

The Ph.D. program in social and behavioral sciences, the only one of its kind in Virginia, prepares students to conduct theoretically based research and interventions on the social and behavioral determinants of health and disease. In addition to the general VCU Graduate School graduation requirements (p. 31), a minimum of 54 post-master’s credit hours is required for the doctoral degree, which is expected to involve four years of full-time study.

Any graduate-level courses approved by adviser  6

Total Hours  54

SBHD 692 may be taken if subject matter is appropriate; see adviser for approval.

The minimum total of graduate credit hours required for this degree is 54.

Typical plan of study
Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the nature of research being conducted or the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program director or adviser for information about typical plans of study and registration requirements. This program has a typical time to degree of four years. For additional information, see the departmental website (http://hbp.vcu.edu/education/phd-behavioralhealth/).

Graduate program director
Maria Thomson, Ph.D.
Assistant professor, Department of Health Behavior and Policy
maria.thomson@vcuhealth.org

Additional contact
Kate Grant
Education coordinator
cr. grant@vcuhealth.org
(804) 828-5329

Program website: hbp.vcu.edu (http://hbp.vcu.edu/)

Department of Anatomy and Neurobiology
John Povlishock, Ph.D.
Professor and chair
anatomy.vcu.edu (http://www.anatomy.vcu.edu/)

The Department of Anatomy and Neurobiology offers neuroscience education for Ph.D. students and exciting research opportunities for postdoctoral scientists that span cellular to systems neuroscience. The department houses a large number of the university’s neuroscientists and maintains dynamic research groups in glial cell biology, plasticity, development and circuitry, and central nervous system injury and repair.

• Anatomy and Neurobiology, Master of Science (M.S.) (p. 642)
• Anatomy and Neurobiology, Master of Science (M.S.) with a concentration in molecular biology and genetics (p. 644)

Department of Biochemistry and Molecular Biology
Sarah Speigel, Ph.D.
Professor and chair
biochemistry.vcu.edu (http://www.biochemistry.vcu.edu/)

The Department of Biochemistry and Molecular Biology is home to a community of dedicated scientists, students and postdoctoral fellows who conduct innovative research on biochemical and molecular mechanisms governing cellular processes. The department offers a strong collegial atmosphere where faculty, students, postdoctoral fellows and administrators work together to promote and share in the discovery of fundamental principles governing life processes.

• Biochemistry, Doctor of Philosophy (Ph.D.) (p. 647)
• Biochemistry, Doctor of Philosophy (Ph.D.) with a concentration in molecular biology and genetics (p. 650)
• Biochemistry, Master of Science (M.S.) (p. 652)

Department of Biostatistics
Shumei S. Sun, Ph.D.
Professor and chair
biostatistics.vcu.edu (http://www.biostatistics.vcu.edu/)

The Department of Biostatistics is committed to excellence in providing a graduate training program, conducting multidisciplinary collaborative biomedical research and developing new statistical methods. The department offers M.S. and Ph.D. programs in biostatistics, with concentrations in genomic biostatistics concentration at both levels and an additional concentration in clinical research and biostatistics at the master’s level. The majority of the department's graduate students are supported through collaborative projects and partnerships with industry. The department also has a National Research Service Award pre-doctoral training program funded by the National Institute of Environmental Health Sciences. The purpose of this award is to train students to develop analytic methods for the study of chemical mixtures and analysis of toxicogenomic data. One faculty member also has a regular research grant funded in this area by the NIEHS.

• Biostatistics, Doctor of Philosophy (Ph.D.) (p. 654)
• Biostatistics, Doctor of Philosophy (Ph.D.) with a concentration in genomic biostatistics (p. 656)
• Biostatistics, Master of Science (M.S.) (p. 659)
• Biostatistics, Master of Science (M.S.) with a concentration in clinical research and biostatistics (p. 661)
• Biostatistics, Master of Science (M.S.) with a concentration in genomic biostatistics (p. 663)

Department of Family Medicine and Population Health
Anton J. Kuzel, M.D.
Professor and chair
familymedicine.vcu.edu (http://www.familymedicine.vcu.edu/)

The Department of Family Medicine and Population Health hosts both a robust residency program for family physicians and academic programs
at the graduate level dealing with critical issues in public health. Within
the department, the Division of Epidemiology integrates research,
education and public health service programs. The department offers
a Ph.D. degree in epidemiology along with a fully accredited Master of
Public Health degree. Close ties to the Virginia Department of Health
allow opportunities for students to immerse themselves in experiential
learning with these public health partners. The doctoral training program
in epidemiology cultivates public health scientists equipped to use state-
of-the-art research methods for the purpose of advancing fundamental
knowledge of issues central to the improvement of population health.

- Epidemiology, Doctor of Philosophy (Ph.D.) (p. 665)
- Public Health, Master of (M.P.H.) (p. 730)
- Public Health, Master of (M.P.H./Social Work, Master of (M.S.W.)
  [combined] (p. 734)
- Medicine, Doctor of (M.D.)/Public Health, Master of (M.P.H.)
  [combined] (p. 696)
- Pharmacy, Doctor of (Pharm.D.)/Public Health, Master of (M.P.H.)
  [combined] (p. 721)

Department of Health Behavior and Policy

Vanessa Sheppard, Ph.D.
Professor and chair

hbp.vcu.edu (http://hbp.vcu.edu/)

The Department of Health Behavior and Policy’s mission is to transform
the health landscape through multidisciplinary research, education and
service. The department’s research identifies the behavioral, social,
organizational and policy factors that affect the health of individuals and
populations. Faculty members and students utilize rigorous quantitative
and qualitative methods and engage diverse communities to develop
and evaluate programs and policies designed to promote health, improve
health care delivery and reduce health disparities. Research findings
inform the translation of effective programs and policies into practice.
The department provides training to and promotes excellence in the next
generation of health behavior and policy practitioners, educators and
scientists.

- Healthcare Policy and Research, Doctor of Philosophy (Ph.D.)
  (p. 671)
- Social and Behavioral Sciences, Doctor of Philosophy (Ph.D.)
  (p. 736)

Department of Human and Molecular
Genetics

Paul B. Fisher, Ph.D.
Professor and chair
gen.vcu.edu (http://www.gen.vcu.edu/)

The Department of Human and Molecular Genetics provides multifaceted
research activities focusing on important areas of current medical and
basic research. Our faculty members conduct research and clinical and
educational activities at the VCU Medical Center, the Virginia Institute for
Psychiatric and Behavioral Genetics and the VCU Institute of Molecular
Medicine. Genetic counselors and medical genetics faculty conduct their
outpatient counseling, medical genetics practice and inpatient pediatrics
service at the VCU Medical Center and affiliated outpatient clinics.

- Genetic Counseling, Master of Science (M.S.) (p. 668)
- Human Genetics, Doctor of Philosophy (Ph.D.) (p. 673)
- Human Genetics, Doctor of Philosophy (Ph.D.) with a concentration in
  molecular biology and genetics (p. 676)
- Human Genetics, Doctor of Philosophy (Ph.D.) with a concentration in
  quantitative human genetics (p. 678)
- Human Genetics, Master of Science (M.S.) (p. 684)
- Human Genetics, Master of Science (M.S.) with a concentration in
  molecular biology and genetics (p. 688)
- Human Genetics, Doctor of Philosophy (Ph.D.)/Genetic Counseling,
  Master of Science (M.S.) [dual degree] (p. 680)

Department of Microbiology and
Immunology

Dennis E. Ohman, Ph.D.
Professor and chair

microbiology.vcu.edu (http://microbiology.vcu.edu/)

The Department of Microbiology and Immunology is focused on research,
cutting-edge technologies and educational programs with emphasis
on microbial pathogens, cancer and the host immune defense system,
which protects individuals from disease. The training is rigorous,
emphasizing conceptual and experimental strategies using state-of-the-
art technologies in modern facilities.

Departmental microbiologists study the molecular mechanisms by
which microorganisms (i.e., bacteria, viruses, fungi and parasites)
colonize a host, evade the immune response and cause damage.
Immunologists in the department study the molecular and cellular
mechanisms by which the immune response either defends the host
against pathogens or goes awry, such as with an allergic reaction.
Many of the department’s molecular cell biologists are studying the
fundamentals of cancer and new therapeutic approaches. All conduct
research using the tools of molecular biology, genetics, cell culture,
infection models, transgenic animals and bioinformatics.

A major goal of the department is to train the next generation of research
scientists. Ph.D. students and postdoctoral fellows work alongside
principal investigators to test hypotheses of medical importance.
Laboratory training is supplemented with rigorous course work, seminars,
journal clubs and lab meetings. Most trainees present their research
findings at national and international meetings.

- Microbiology and Immunology, Doctor of Philosophy (Ph.D.) (p. 700)
- Microbiology and Immunology, Doctor of Philosophy (Ph.D.) with a
  concentration in molecular biology and genetics (p. 702)
- Microbiology and Immunology, Master of Science (M.S.) (p. 704)
- Microbiology and Immunology, Master of Science (M.S.) with a
  concentration in molecular biology and genetics (p. 707)

Department of Pathology

Charles V. Clevenger, M.D., Ph.D.
Professor and chair

pathology.vcu.edu (http://www.pathology.vcu.edu/)

The Department of Pathology is a diverse clinical, research and teaching
department within the School of Medicine. The department offers a full
range of pathology services to physicians, researchers and patients
at the VCU Health System, a 780-bed tertiary-care urban teaching hospital dedicated to serving the patients and physicians of central Virginia. The 47 faculty members supervise 14 hospital laboratories including histopathology, neuropathology, cytopathology, autopsy pathology, molecular diagnostics, cytogenetics, hematology, coagulation, microbiology, immunology, clinical chemistry, toxicology and transfusion medicine staffed by more than 350 hospital employees. The department faculty conduct a robust array of research programs in numerous areas and participate in student training through a variety of mechanisms.

Department of Pharmacology and Toxicology

William L. Dewey, Ph.D.
Professor and chair

pharmtox.vcu.edu (https://pharmtox.vcu.edu/)

The Department of Pharmacology and Toxicology is home to a community of researchers, students and faculty who strive to improve the treatment of medical disorders through a better understanding of the pharmacology of agents and by developing safer and more effective drugs. The department has educated alumni who have gone on to distinguished careers in government, academia and the private sector as researchers, educators and consultants. The work these students do at VCU and beyond has the potential to improve the health and well-being of people all over the world.

- Pharmacology and Toxicology, Doctor of Philosophy (Ph.D.) (p. 712)
- Pharmacology and Toxicology, Doctor of Philosophy (Ph.D.) with a concentration in molecular biology and genetics (p. 714)
- Pharmacology and Toxicology, Master of Science (M.S.) (p. 716)
- Pharmacology and Toxicology, Master of Science (M.S.) with a concentration in molecular biology and genetics (p. 719)

Department of Physiology and Biophysics

Clive M. Baumgarten, Ph.D.
Professor and interim chair

physiology.vcu.edu (http://www.physiology.vcu.edu/)

The Department of Physiology and Biophysics brings a long tradition to the study of physiology that spans the entire spectrum from molecules to man. Strong research programs exist in molecular biophysics, cardiovascular and gastrointestinal physiology as well as in chemical senses. Faculty recruitments are ongoing in two areas: structural biology, which aims to understand function in terms of structure, and systems physiology, which aims to elucidate fundamental ways of communication within and between physiological systems. Biophysical approaches serve as the common language used at all levels of scientific inquiry. The department offers a strong collegial atmosphere where faculty, students, postdoctoral fellows and administrators work together to promote and share in the discovery of fundamental principles governing life processes.

- Physiology and Biophysics, Doctor of Philosophy (Ph.D.) (p. 724)
- Physiology and Biophysics, Master of Science (M.S.) (p. 727)

Department of Radiation Oncology

Mitchell Anscher, M.D.
Florence and Hyman Meyers Endowed Chair

The Department of Radiation Oncology is a key unit in the Massey Cancer Center, a National Cancer Institute-designated unit directed to the delivery of effective treatment modalities, research critical to improvement in the treatment of cancer and the education of physicians and scientists who specialize in this critical area. The department includes a Clinical Division, focusing on the delivery of advanced radiotherapy services to patient populations, the Division of Molecular Radiobiology and Targeted Imaging, conducting research to refine the understanding of the cellular response to radiation and the development of functional targeted imaging to enhance therapy, and the Division of Medical Physics, which integrates research into methods to improve radiotherapy with Ph.D. training in medical physics.

- Medical Physics, Doctor of Philosophy (Ph.D.) (p. 692)
- Medical Physics, Master of Science (M.S.) (p. 694)
- Medical Physics, Certificate in (Post-baccalaureate graduate certificate) (p. 690)
**SCHOOL OF NURSING**

The School of Nursing originated in 1893 as part of the University College of Medicine. Since then, the educational program has evolved from a basic diploma program to multiple programs at the baccalaureate-, master’s- and doctoral-degree levels. Additionally, the School of Nursing offers post-master’s certificate programs. The School of Nursing takes pride in its long history of service to the profession of nursing and continues to be a leader in nursing education in Virginia.

**Administration**

1100 East Leigh Street  
Box 980567  
Richmond, Virginia 23298-0567  
Phone: (804) 828-0724  
Fax: (804) 828-7743  
nursing.vcu.edu (http://www.nursing.vcu.edu)

Jean Giddens, Ph.D., RN, FAAN  
Dean

Debra Barksdale, Ph.D., FNP-BC, CNE, FAANP, FAAN  
Professor and associate dean of academic programs

Suzanne Ameriringer, Ph.D., RN  
Professor and interim associate dean for research

Jeannetta Hollins, Ph.D.  
Assistant dean, Office of Student Success

**Accreditation**

The baccalaureate degree in nursing, master’s degree in nursing, post-master’s certificate program and the Doctor of Nursing Practice program at the VCU School of Nursing are accredited by the Commission on Collegiate Nursing Education (http://www.aacn.nche.edu/ccne-accreditation/).

The pre-licensure nursing program is approved by the Virginia Board of Nursing (http://www.dhp.virginia.gov/nursing/).

**Programs**

The School of Nursing offers Bachelor of Science, Master of Science, post-master’s certificate, Doctor of Philosophy and Doctor of Nursing Practice programs. Curricula and admissions information pertaining to all of these programs is available on this website and may be accessed using the program index feature at the top of this page.

Further information may be obtained by visiting the School of Nursing website (http://www.nursing.vcu.edu/) or by writing to Virginia Commonwealth University, School of Nursing, Office of Student Success, Box 980567, Richmond, VA 23298-0567.

**Facilities and resources**

The faculty and administrative offices of the school are housed at 1100 E. Leigh St. Additionally, this building has a nursing clinical resource laboratory and classrooms equipped with a full range of audiovisual equipment. Both graduate and undergraduate courses are also scheduled in other classrooms on campus.

The clinical laboratories for nursing courses are conducted at the VCU Medical Center and in numerous other urban and rural hospitals and health agencies in the area, including community medical centers and state hospitals, public health services, private clinics and offices, and federal and state centers and departments. These facilities provide generalized and specialized inpatient and ambulatory services. Students are given a range of diverse experiences in hospital and community-oriented nursing. Selection of specific facilities for student experience is based upon curricular and advanced-practice certification requirements, the educational needs of the individual student and the services available.

**Financial assistance**

Applications for financial assistance must be filed for all forms of financial assistance. A Free Application for Federal Student Aid may be obtained from the Office of Financial Aid, Virginia Commonwealth University, Richmond, VA 23298-0244 or online at fafsa.ed.gov (https://fafsa.ed.gov).

Financial assistance is available through scholarships, fellowships and assistantships administered by the School of Nursing. Additional information may be found on the school’s website (https://nursing.vcu.edu/admission/scholarships-and-financial-aid/).

**Departments**

**Department of Adult Health and Nursing Systems**

Beth Rodgers, Ph.D., RN, FAAN  
Professor and chair

**Department of Family and Community Health Nursing**

Christine Wynd, Ph.D., RN  
Professor and chair

**Graduate information**

**Nondegree-seeking students**

Students who have not been admitted to a graduate program in nursing may be admitted to individual courses. Permission to register for courses is granted at the discretion of the School of Nursing. Only six credits earned as a nondegree-seeking student can be applied to the master’s degree. Only three credits may be earned by post-master’s students prior to admission.

**Enrollment**

Students may begin study during the fall semester. Students will have an academic adviser appointed and will follow the standard program of study. Once admitted, students are expected to abide by enrollment policies of the Graduate School.
Nursing, Certificate in (Post-master’s certificate) with a concentration in adult-gerontology acute care nurse practitioner

The VCU School of Nursing adult-gerontology acute care nurse practitioner concentration prepares graduates for advanced practice registered nurse roles by developing the knowledge and skills needed to manage acutely ill adults, ranging from adolescents to the elderly, through all phases of their hospitalization. Students learn to manage patients through comprehensive physical and psychosocial assessments, use of decision-making/diagnostic reasoning processes, performance of advanced practice skills and procedures, and implementation of evidence-based treatment strategies. Graduates of the AGACNP concentration are prepared to diagnose and manage complex health problems of adults across the life span, including acute/critical illness and injuries, as well as exacerbations of chronic conditions.

The AGACNP generally works in an acute care setting, often within a multidisciplinary team focused on the provision of evidence-based care to adults who are acutely ill. The sphere of influence of the nurse practitioner is that of the patient.

Graduates of the AGACNP concentration are eligible to apply for certification as an AGACNP by the American Nurses Credentialing Center or the American Association of Critical-Care Nurses.

Program goals
Graduates will achieve advanced nursing practice competencies by demonstrating:

1. Systems and organizational leadership
2. Implementation of advanced nursing practice interventions
3. Effective use of research and technology
4. Systematic evaluation of interventions and outcomes

Student learning outcomes
Graduates will be able to:

1. Demonstrate core competencies in their advanced practice specialties
2. Integrate nursing and related sciences into the delivery of advanced nursing care to diverse populations and systems of health care delivery
3. Apply ethical analysis and clinical reasoning to assess, intervene and evaluate advanced nursing care delivery
4. Understand the implications of social, cultural, economic, policy and organizational systems that impact practice and outcomes
5. Synthesize evidence for practice to determine appropriate application of interventions across diverse populations and settings
6. Use quality processes and improvement science to evaluate care and ensure patient safety for individuals, populations and systems
7. Integrate organizational science and technology to make changes in the care environment to improve health outcomes and practice efficiency

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information
VCU School of Nursing Student Policy and Information handbooks (http://nursing.vcu.edu/about-us/resources/) are located on the school’s website.

Our international and non-native English-speaking students bring different perspectives and new thinking to our nursing programs. To ensure that all incoming student are prepared for the school’s academic rigor, all international applicants and non-native English speaking
applicants without a degree from a U.S. high school, college or university must provide additional information with their applications according to the English language proficiency guidelines on the program admission tab.

Visit the School of Nursing website for program-specific application instructions (http://nursing.vcu.edu/admission/application-instructions/post-masters-certificate/).

### Admission requirements

<table>
<thead>
<tr>
<th>Degree:</th>
<th>Semester(s) of entry:</th>
<th>Deadline dates:</th>
<th>Test requirements:</th>

</thead>
<tbody>
<tr>
<td>Certificate</td>
<td>Spring</td>
<td>Jan 15 (Nov 1 early action deadline; after Jan 15 consideration is given on a space-available basis)</td>
<td></td>
</tr>
</tbody>
</table>

To be considered for admission to the School of Nursing, applicants must:

1. Be eligible for readmission or in good standing at the last college or university attended
2. Meet the general admission requirements of the VCU Graduate School
3. Submit a completed application with all required materials to the School of Nursing
4. Have an earned master’s or doctoral degree in nursing as an advanced practice registered nurse (NP or CNS) from an accredited nursing school (e.g. ACEN, CCNE, CNEA)
5. Have a current, unrestricted R.N. license from a U.S. state or territory at the time admissions application is submitted (Applicants without a R.N. license in the U.S. should consult with the Commission on Graduates of Foreign Nursing Schools (http://www.cgfns.org/) and the Virginia Board of Nursing (https://www.dhp.virginia.gov/nursing/) for the steps needed to obtain a Virginia R.N. license.)
6. Provide additional information with the application according to the English language proficiency guidelines for applicants who are international or non-native English speakers without a degree from a U.S. high school, college or university (Additional information can be found on the ‘Required materials’ tab of the VCU International Admissions website (https://www.vcu.edu/admissions/apply/international/undergraduate-applicants/).)

### Degree requirements

Twenty-five graduate credit hours are required for the post-master’s certificate in nursing with a concentration in adult-gerontology acute care nurse practitioner.

In addition to general VCU Graduate School graduation requirements (p. 31), a candidate for the degree of Certificate in Nursing must be recommended by the faculty and must:

1. Meet academic requirements of the Graduate School
2. Complete all requirements for the prescribed curriculum within six calendar years of the first registration for work to be credited toward the degree
3. Earn a minimum grade of B or pass grade in all nursing courses
4. Earn a minimum cumulative grade-point average of 3.0 on a 4.0 scale in all work presented for graduation
5. Conform to School of Nursing policies in respect to pass/fail grading for course work or thesis study

The degree will be granted only after all requirements have been fulfilled and all fees to the university have been paid. Degrees are not granted in absentia unless written request is made to the dean and permission is granted.

### Curriculum requirements

Students in nurse practitioner certification concentrations are required to have completed advanced health assessment, pharmacotherapeutics and pathophysiology courses. A gap analysis is required to determine specific plan of study.

### Program website

nursing.vcu.edu/programs/post-masters-certificate (http://nursing.vcu.edu/programs/post-masters-certificate/)
Nursing, Certificate in (Post-master’s certificate) with a concentration in adult-gerontology primary care nurse practitioner

The VCU School of Nursing adult-gerontology primary care nurse practitioner concentration prepares graduates for advanced practice registered nurse roles by developing the knowledge and skills needed to diagnose and manage common acute and chronic health problems in adults, ranging from adolescents to the elderly. Students learn to manage patients through comprehensive physical and psychosocial assessments, use of decision-making/diagnostic reasoning processes, performance of advanced practice skills and procedures, and implementation of evidence-based treatment strategies, including health promotion and disease prevention.

The AGPCNP has a practice located in a variety of primary care settings, including college health services, health maintenance organizations, community clinics, long-term care, assisted living, continuing care retirement communities, occupational health settings and private practices.

Graduates of the AGPCNP concentration are eligible to apply for certification as an AGACNP by the American Nurses Credentialing Center or the American Association of Nurse Practitioners.

Program goals
Graduates will achieve advanced nursing practice competencies by demonstrating:

1. Systems and organizational leadership
2. Implementation of advanced nursing practice interventions
3. Effective use of research and technology
4. Systematic evaluation of interventions and outcomes

Student learning outcomes
Graduates will be able to:

1. Demonstrate core competencies in their advanced practice specialties
2. Integrate nursing and related sciences into the delivery of advanced nursing care to diverse populations and systems of health care delivery
3. Apply ethical analysis and clinical reasoning to assess, intervene and evaluate advanced nursing care delivery
4. Understand the implications of social, cultural, economic, policy and organizational systems that impact practice and outcomes
5. Synthesize evidence for practice to determine appropriate application of interventions across diverse populations and settings
6. Use quality processes and improvement science to evaluate care and ensure patient safety for individuals, populations and systems
7. Integrate organizational science and technology to make changes in the care environment to improve health outcomes and practice efficiency

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

**Program website:** nursing.vcu.edu/programs/post-masters-certificate (http://nursing.vcu.edu/programs/post-masters-certificate/)

**Nursing, Certificate in (Post-master’s certificate) with a concentration in family nurse practitioner**

The VCU School of Nursing family nurse practitioner concentration prepares graduates for advanced practice registered nurse roles by developing the knowledge and skills needed to diagnose and manage common acute and chronic health problems across the lifespan through
comprehensive physical and psychosocial assessments, use of decision-making/diagnostic reasoning processes, performance of advanced practice skills and procedures and implementation of evidence-based treatment strategies, including health promotion and disease prevention.

The FNP is prepared to provide direct care to individuals and families in a variety of primary care settings, including college health services, health maintenance organizations, community clinics, long-term care, assisted living, continuing care retirement communities, occupational health settings, urgent care and private practices.

Graduates of the FNP concentration are eligible to apply for certification as a FNP by the American Nurses Credentialing Center or the American Academy of Nurse Practitioners.

Program goals
Graduates will achieve advanced nursing practice competencies by demonstrating:

1. Systems and organizational leadership
2. Implementation of advanced nursing practice interventions
3. Effective use of research and technology
4. Systematic evaluation of interventions and outcomes

Student learning outcomes
Graduates will be able to:

1. Demonstrate core competencies in their advanced practice specialties
2. Integrate nursing and related sciences into the delivery of advanced nursing care to diverse populations and systems of health care delivery
3. Apply ethical analysis and clinical reasoning to assess, intervene and evaluate advanced nursing care delivery
4. Understand the implications of social, cultural, economic, policy and organizational systems that impact practice and outcomes
5. Synthesize evidence for practice to determine appropriate application of interventions across diverse populations and settings
6. Use quality processes and improvement science to evaluate care and ensure patient safety for individuals, populations and systems
7. Integrate organizational science and technology to make changes in the care environment to improve health outcomes and practice efficiency

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu/) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information
VCU School of Nursing Student Policy and Information handbooks (http://nursing.vcu.edu/about-us/resources/) are located on the school’s website.

Our international and non-native English-speaking students bring different perspectives and new thinking to our nursing programs. To ensure that all incoming student are prepared for the school's academic rigor, all international applicants and non-native English speaking applicants without a degree from a U.S. high school, college or university must provide additional information with their applications according to the English language proficiency guidelines on the program admission tab.

Visit the School of Nursing website for program-specific application instructions (http://nursing.vcu.edu/admission/application-instructions/post-masters-certificate/).
Admission requirements

Degree: Certificate
Semester(s) of entry: Spring
Deadline dates: Jan 15 (Nov 1 early action deadline; after Jan 15 consideration is given on a space-available basis)
Test requirements: 

To be considered for admission to the School of Nursing, applicants must:

1. Be eligible for readmission or in good standing at the last college or university attended
2. Meet the **general admission requirements** of the VCU Graduate School
3. Submit a completed application with all required materials to the School of Nursing
4. Have an earned master’s or doctoral degree in nursing as an advanced practice registered nurse (NP or CNS) from an accredited nursing school (e.g. ACEN, CCNE, CNEA)
5. Have a current, unrestricted R.N. license from a U.S. state or territory at the time admissions application is submitted (Applicants without a R.N. license in the U.S. should consult with the [Commission on Graduates of Foreign Nursing Schools](https://www.cgfns.org/) and the Virginia Board of Nursing [https://www.dhp.virginia.gov/nursing/] for the steps needed to obtain a Virginia R.N. license.)
6. Provide additional information with the application according to the English language proficiency guidelines for applicants who are international or non-native English speakers without a degree from a U.S. high school, college or university (Additional information can be found on the ‘Required materials’ tab of the [VCU International Admissions website](https://www.vcu.edu/admissions/apply/international/undergraduate-applicants/).)

Degree requirements

Twenty-seven graduate credit hours are required for the Post-master’s Certificate in Nursing with a concentration in family nurse practitioner.

In addition to general VCU Graduate School graduation requirements (p. 31), a candidate for the degree of Certificate in Nursing must be recommended by the faculty and must:

1. Meet academic requirements of the Graduate School
2. Complete all requirements for the prescribed curriculum within six calendar years of the first registration for work to be credited toward the degree
3. Earn a minimum grade of B or pass grade in all nursing courses
4. Earn a minimum cumulative grade-point average of 3.0 on a 4.0 scale in all work presented for graduation
5. Conform to School of Nursing policies in respect to pass/fail grading for course work or thesis study

The degree will be granted only after all requirements have been fulfilled and all fees to the university have been paid. Degrees are not granted in absentia unless written request is made to the dean and permission is granted.

Curriculum requirements

Students in nurse practitioner certification concentrations are required to have completed advanced health assessment, pharmacotherapeutics and pathophysiology courses. A gap analysis is required to determine specific plan of study.

Nursing, Certificate in (Post-master’s certificate) with a concentration in nursing administration and leadership

For students interested in a leadership role in a health care organization, the nursing administration and leadership concentration at the VCU School of Nursing offers a flexible and rewarding career path. Over the past three decades, this concentration has gained a reputation for educating some of the nation’s top nursing leaders. With a vision of shaping the future of health care through innovative nursing leadership, the NAL concentration prepares nurses to play an essential systems-level role in promoting and sustaining high-quality and safe patient care. Students gain advanced knowledge and skills in the areas of leadership, administration, management, health care finance, budgeting, outcomes management and evidence-based organizational practices in health care.

Graduates of the NAL concentration are prepared to succeed in nursing leadership positions and are eligible, depending on employment role, to...
apply for several different nursing administration certification exams offered through the American Nurses Credentialing Center of the American Nurses Association or the American Organization of Nurse Executives.

Program goals
Graduates will achieve advanced nursing practice competencies by demonstrating:
1. Systems and organizational leadership
2. Implementation of advanced nursing practice interventions
3. Effective use of research and technology
4. Systematic evaluation of interventions and outcomes

Student learning outcomes
Graduates will be able to:
1. Demonstrate core competencies in their advanced practice specialties
2. Integrate nursing and related sciences into the delivery of advanced nursing care to diverse populations and systems of health care delivery
3. Apply ethical analysis and clinical reasoning to assess, intervene and evaluate advanced nursing care delivery
4. Understand the implications of social, cultural, economic, policy and organizational systems that impact practice and outcomes
5. Synthesize evidence for practice to determine appropriate application of interventions across diverse populations and settings
6. Use quality processes and improvement science to evaluate care and ensure patient safety for individuals, populations and systems
7. Integrate organizational science and technology to make changes in the care environment to improve health outcomes and practice efficiency
