CHEMISTRY, BACHELOR OF SCIENCE (B.S.) WITH A CONCENTRATION IN PROFESSIONAL CHEMIST WITH HONORS

The curriculum in chemistry prepares students for graduate study in chemistry and related fields and for admission to schools of medicine, dentistry, pharmacy and veterinary medicine. It prepares students to teach in secondary schools or to work in chemical and industrial laboratories and in related fields of business and industry. The department also offers required and elective courses in chemistry to students in other programs of study.

The Department of Chemistry offers five areas of concentration for completing the Bachelor of Science in Chemistry: chemical science, professional chemist, professional chemist with honors, biochemistry and chemical modeling. With proper selection of electives, the degree satisfies admission requirements to most schools of medicine, dentistry, pharmacy and veterinary medicine.

Learning outcomes

• Structure: Students will demonstrate understanding of the relationship between molecular structure and function.
• Descriptive chemistry: Students will be conversant with common chemical phenomena both symbolically and sensorially.
• Measurement and numeracy: Students will perform calculations needed to describe and model common chemical phenomena.
• Communication: Students will develop written and oral communication skills needed to explain chemical phenomena to novices and experts.
• Literacy: Students will search, read and assess scientific literature.
• Laboratory skills: Students will develop and practice laboratory bench and instrumentation skills.
• Information processing: Students will interpret tables, graphs, drawings and models.
• Critical thinking: Students will practice critical thinking and problem solving.

Special requirements

The professional chemist with honors concentration is an intensive, research-based option for students interested in developing a research focus. This option requires a 3.0 GPA in chemistry to be maintained after completing eight credits of chemistry courses. As part of the requirement for completing this concentration, an honors thesis is written and the work is presented as a seminar in the Department of Chemistry. With the proper combination of courses, this degree can be certified as meeting the requirements of the American Chemical Society.

CHEM 403 and CHEM 406 and CHEZ 406 and CHEM 409 and CHEZ 409 are required to satisfy the requirements for the American Chemical Society certification of the professional chemist concentration. MATH 307 also is required for the American Chemical Society certification.

Students must complete 50 credits in chemistry and 22 credits of collateral requirements. A minimum grade of C is required in each prerequisite course:
