FORENSIC SCIENCE, BACHELOR OF SCIENCE (B.S.) WITH A CONCENTRATION IN FORENSIC BIOLOGY

The forensic biology concentration requires an additional 26 credits in biology, forensic science and elective credits beyond the core requirements and is well-suited for students interested in graduate study or careers in the forensic biology section of forensic laboratories. Students also will be prepared for work in molecular biology laboratories in both the public and private sectors. Students completing the forensic biology concentration will be eligible for a minor in chemistry. Additionally, students who complete BIOL 317 or BIOL 318 will be eligible for a minor in biology.

Learning outcomes
Upon completing this program, students will know and know how to do the following:

- Demonstrate a basic understanding of the laws of criminal procedure and rules of evidence
- Demonstrate proper crime scene investigation and reconstruction
- Demonstrate ethical and professional duties and responsibilities of the forensic scientist
- Be able to apply basic principles and laboratory procedures of biology to forensic science
- Demonstrate capabilities, use, potential and limitations of forensic laboratory theory and techniques

Special requirements
The forensic science program requires a minimum of 120 credits including completion of the College of Humanities and Sciences general education requirements, 50-52 forensic science core program credits and 26 concentration-specific credits.

For the forensic biology concentration, a minimum of three elective credit hours of advanced study (200- to 500-level) in an area of specialization must be taken. It is recommended that these credits be BIOL/BIOZ, CHEM/CHEZ, CRJS, FRSC/FRSZ, MATH or PHYS courses. FRSC 202 is not applicable for the major.

findings associated with natural and unnatural deaths.

investigation of topics in death scene investigations as well as autopsy
restricted to forensic science majors or by permission of instructor. An
CHEM 301 and CHEZ 301, each with a minimum grade of C. Enrollment
Semester course; 3 lecture hours. 3 credits. Prerequisites: FRSC 300,
FRSC 325. Forensic Medicine. 3 Hours.

methodology on which it is based. Crosslisted as: ANTH 310.
forensic anthropology including its development and the theory and
Semester course; 3 lecture hours. 3 credits. Prerequisite: ANTH 210 or
of crime scene investigation. Also introduces ethical and quality
physical evidence performed in crime laboratories, and the fundamentals
theory, concepts and practices used in any physical science by relating
them to the analysis of physical evidence performed in forensic
laboratories and the fundamentals of crime scene investigation, and their
relationship to the criminal justice system and criminal investigations.
Not applicable for credit toward B.S. in Forensic Science.

FRSC 300. Survey of Forensic Science. 3 Hours.
Semester course; 3 lecture hours. 3 credits. Prerequisites: BIOL 151
and BIOZ 151, each with a minimum grade of C. Pre- or corequisites:
CHEM 301 and CHEZ 301, and UNIV 200 or HONR 200. Enrollment
restricted to forensic science majors or by permission of instructor.
Introduces the theory, concepts and practices used in the analysis of
physical evidence performed in crime laboratories, and the fundamentals
of crime scene investigation. Also introduces ethical and quality
assurance issues of crucial importance in modern crime laboratories.

FRSC 309. Scientific Crime Scene Investigation. 3 Hours.
Semester course; 3 lecture/laboratory hours. 3 credits. Prerequisites:
CHEM 301 and either FRSC 300 or FRSC 350, each with a minimum
grade of C. Enrollment restricted to forensic science majors or by permission
of instructor. Provides scientific theory of crime scene investigation and
crime scene reconstruction and basic knowledge of proper crime scene
protocol and evidence processing techniques. Includes the processes for
documentation, collecting and preserving physical evidence.

FRSC 310. Forensic Anthropology. 3 Hours.
Semester course; 3 lecture hours. 3 credits. Prerequisite: ANTH 210 or
FRSC 300 with a minimum grade of C. A comprehensive overview of
forensic anthropology including its development and the theory and
methodology on which it is based. Crosslisted as: ANTH 310.

FRSC 325. Forensic Medicine. 3 Hours.
Semester course; 3 lecture hours. 3 credits. Prerequisites: FRSC 300,
CHEM 301 and CHEZ 301, each with a minimum grade of C. Enrollment
restricted to forensic science majors or by permission of instructor. An
investigation of topics in death scene investigations as well as autopsy
findings associated with natural and unnatural deaths.

FRSC 351. Forensic Science Service-learning. 2 Hours.
Semester course; 2 lecture hours. 2 credits. May be repeated for
a maximum of 4 credits. Prerequisites: FRSC 300 and at least one
additional FRSC/Z course, each with a minimum grade of C. Enrollment
restricted to forensic science majors or by permission of instructor.
Provides an opportunity to learn about the community's schools and how
to teach forensic science concepts to school-aged students. Each week,
VCU students will provide hands-on lab activities in community-based
programs to reinforce lessons learned through their school curricula.
Reflective writing, partner assignments and a final presentation are
required, in addition to 20 community partner hours. VCU students will
improve their ability to explain forensic concepts to those with differing
scientific backgrounds, have increased confidence when addressing
audiences and deepen their understanding of civic responsibility.

FRSC 365. Forensic Microscopy. 4 Hours.
Semester course; 4 lecture/laboratory hours. 4 credits. Prerequisites:
CHEM 301 and either FRSC 300 or FRSC 350, each with a minimum
grade of C. An in-depth course in the theory and practical application of
microscopy to the examination, identification and individualization of
physical evidence submitted to forensic laboratories.

FRSC 375. Forensic Evidence, Law and Criminal Procedure. 3 Hours.
Semester course; 3 lecture hours. 3 credits. Pre- or co-requisites:
FRSC 300 or FRSC 350. Open only to forensic science majors or by
permission of instructor. The law of criminal procedure and rules of
evidence as applied to forensic science. Topics will include scientific
versus legal burdens of proof, legal terminology and trial procedure.

FRSC 385. Forensic Serology. 3 Hours.
Semester course; 2 lecture and 2 laboratory hours. 3 credits. Prerequisites:
CHEM 301 and either FRSC 300 or FRSC 350, each with a minimum
grade of C. Examines the application of basic chemical, biological,
immunological and microscopic laboratory techniques to the
examination and identification of body-fluid stains, including both
presumptive and/or confirmatory identification of blood, semen, saliva,
urine and feces. Applies methods that are used in forensic laboratories
to identify the species of origin and includes a review of advanced
methods for automated serological analysis. Laboratory exercises
will supplement lectures to give students practical knowledge of the
laboratory procedures.

FRSC 391. Topics in Forensic Science. 1-3 Hours.
Semester course; 1-3 lecture hours. 1-3 credits. Maximum total of 6
credits for all forensic science topics courses may be applied to the
major. Prerequisites: CHEM 301 and either FRSC 300 or FRSC 350,
each with a minimum grade of C. A study in selected topics in forensic
science. See the Schedule of Classes for specific topics to be offered
each semester and additional prerequisites.

FRSC 400. Forensic Chemistry. 3 Hours.
Semester course; 3 lecture hours. 3 credits. Prerequisites: CHEM 409
and CHEZ 409; and either FRSC 300 or FRSC 350, each with a minimum
grade of C. Provides an understanding of presumptive and confirmatory
chemical analyses used in a forensic laboratory for the characterization
and identification of physical evidence, such as accelerants and
explosives, paints and polymers, suspected drug substances, and
toxicology. Chemical analyses as pertaining to firearms, toolmarks and
glass will also be explored.
FRSC 410. Forensic Pattern Evidence. 3 Hours.
Semester course; 3 lecture/laboratory hours. 3 credits. Prerequisite: FRSC 309 with a minimum grade of C. Enrollment restricted to forensic science majors or by permission of instructor. Covers topics in pattern evidence analysis including analysis of latent prints and impression evidence of footwear and tire treadmarks as applied to forensic casework. Covers both the theoretical and practical aspects using lectures and laboratory exercises focusing on the visualization, examination and interpretation of pattern evidence.

FRSC 412. Forensic Analysis of Firearms and Toolmarks. 3 Hours.
Semester course; 3 lecture/laboratory hours. 3 credits. Prerequisite: FRSC 365 with a minimum grade of C. Enrollment restricted to forensic science majors or by permission of instructor. An investigation of topics in firearms and toolmark examination for forensic applications. Covers both theoretical and practical aspects using lectures and laboratory exercises.

FRSC 438. Forensic Molecular Biology. 3 Hours.
Semester course; 3 lecture hours. 3 credits. Prerequisites: CHEM 302, CHEZ 302, and BIOL 310 or equivalent, each with a minimum grade of C. Provides an understanding of molecular biology testing methodologies as applied to analysis of forensic samples. Current topics in forensic DNA analysis will include quality assurance, DNA databanking, contemporary research and population genetics. Crosslisted as: BIOL 438.

FRSC 445. Forensic Toxicology. 3 Hours.
Semester course; 3 lecture hours. 3 credits. Prerequisites: CHEM 301, CHEM 302 and CHEZ 301, each with a minimum grade of C. Provides a comprehensive overview of the basic principles of toxicology and the practical aspects of forensic toxicology. Students will learn to define the toxic agents most commonly resulting in legal problems in U.S. society and also the process by which the U.S. judicial system is aided by scientific investigation. Crosslisted as: PATH 445.

FRSC 490. Professional Practices in Forensic Science. 3 Hours.
Semester course; 3 lecture hours. 3 credits. Prerequisites: CHEM 301; FRSC 300 or FRSC 350; and one additional forensic science course, each with a minimum grade of C. Enrollment restricted to seniors in forensic science with at least 85 credit hours toward the degree. An examination and evaluation of historical and current issues in the scientific analysis of physical evidence in criminal investigations. Individual and group activities relating to professional practices (ethics, quality control and testimony) of forensic scientists.

FRSC 492. Forensic Science Independent Study. 1-3 Hours.
Semester course; 1-3 independent study hours. 1-3 credits. May be repeated for a maximum of 6 credits. Prerequisites: CHEM 301; and FRSC 300 or FRSC 350, each with a minimum grade of C. Enrollment restricted to forensic science majors with at least sophomore standing and a minimum GPA of 2.5. A determination of the amount of credit and the written permission of both the instructor and the program director must be procured prior to registration for the course.

FRSC 493. Forensic Science Internship. 3 Hours.
Semester course; 3 research hours. 3 credits. Prerequisite: FRSC 300 or FRSC 350 with a minimum grade of C. Enrollment restricted to forensic science majors with a minimum GPA of 2.75. An application is required in advance of admission with permission of the internship coordinator. Through placement in an approved organization, the student will obtain a broader, more practical knowledge of forensic science and its applications. Written progress and final reports are required. Graded as pass/fail.
