FORENSIC SCIENCE, BACHELOR OF SCIENCE (B.S.) WITH A CONCENTRATION IN FORENSIC CHEMISTRY

The forensic chemistry concentration requires an additional 30 credits in chemistry, calculus, forensic science and elective credits beyond the core requirements and is offered for those students who are interested in graduate study or careers in the chemical analysis of forensic evidence, including the areas of drug analysis, toxicology and trace evidence analysis. Students also will be prepared for work in private analytical laboratories. Students completing the forensic chemistry concentration will be eligible for a minor in chemistry.

Learning outcomes
Upon completing this program, students will know and know how to do the following:

• Demonstrate a basic understanding of the laws of criminal procedure and rules of evidence
• Demonstrate proper crime scene investigation and reconstruction
• Demonstrate ethical and professional duties and responsibilities of the forensic scientist
• Be able to apply basic principles and laboratory procedures of chemistry to forensic science
• Demonstrate capabilities, use, potential and limitations of forensic laboratory theory and techniques

Special requirements
The forensic science program requires a minimum of 120 credits including completion of the College of Humanities and Sciences general education requirements, 46-48 forensic science core program credits and 33 (forensic biology), 30 (forensic chemistry) or 31 (physical evidence) concentration-specific credits.

For the forensic science concentration, a minimum of three additional credit hours of advanced study (200- to 500-level) in an area of specialization must be taken. It is recommended that these credits be CRJS, BIOL, PHYS, MATH or CHEM courses. FRSC 202 is not applicable for the major.
