SCIENCE, BACHELOR OF SCIENCE (B.S.) WITH A CONCENTRATION IN PHYSICS

Learning outcomes
Upon completing this program, students will know and know how to do the following:

• Demonstrate broad and core science proficiency
• Demonstrate competency in at least two sciences or in a non-science area
• Apply learning to selection and pursuit of professional or graduate career objective
• Demonstrate proficiency in communication of scientific or research findings
• Demonstrate ability to apply the scientific method/approach to professional problems
• Demonstrate appreciation of the interrelation of core sciences to interdisciplinary problems

Special requirements
The Bachelor of Science in Science requires a minimum of 120 credits.

Along with the general education requirements of the undergraduate programs and the College of Humanities and Sciences for a Bachelor of Science degree, this curriculum requires 27 credits in foundation science and mathematics courses and 34 credits in supplemental courses in the concentration. In preparation for the required mathematical sciences courses, all students must take the Mathematics Placement Test. Science majors are strongly encouraged to select a minor in an area different from their area of concentration that will complement their career interests and contribute additional upper-level credits to their curriculum
