SOCIAL AND BEHAVIORAL HEALTH (SBHD)

SBHD 501. Topics in Cancer Disparities. 1 Hour.
Semester course; 1 lecture hour (delivered online). 1 credit. This course will provide an overview of cancer health topics to students from diverse disciplines, including the humanities and sciences, where they will learn more about the continuum of cancer research and various cancer topics. The course will be highly interactive, with emphasis placed on engaging the learner with the course materials. Students will meet every other week to attend a zoom session where they will hear from a guest lecturer about a cancer topic. All other assignments will be completed online.

SBHD 502. Principles of Community-engaged Research. 3 Hours.
Semester course; 3 lecture hours (delivered online). 3 credits. This course will provide an introduction to the principles of community-engaged research to students from diverse disciplines. Students will be introduced to key community-engaged research competencies, including the fundamental principles, identifying key stakeholders and developing a basic understanding of collaborations with community partners relevant to social and behavioral sciences. Students will complete the course with the skills necessary to identify the key concepts, barriers and opportunities to engage different stakeholders and to communicate with different audiences for health education and promotion purposes. This course will be highly interactive, and students will participate in online discussion groups and complete various assignments, which will provide ample opportunities for the practical application of the key principles in community-engaged research with relevance to public health and health promotion efforts. Students will have the opportunity to use technology to create an interactive learning environment and apply concepts to the various community-based scenarios to demonstrate an understanding of the material. Importantly, students will have the opportunity to learn from and with community members to further inform their understanding of community-engaged research within the context of social and behavioral sciences.

SBHD 605. Introduction to Social and Behavioral Health. 3 Hours.
Semester course; 3 lecture hours. 3 credits. This course addresses the influence of social and behavioral factors impacting public health, covering both historical perspectives and current issues. Topics covered include the theoretical foundations of social and behavioral health; the sociocultural context of health, health promotion and disease prevention interventions; and special populations and topics.

SBHD 608. Health Communication. 3 Hours.
Semester course; 3 lecture hours. 3 credits. Basic course for students in public health with limited experience conducting public health research. Focuses on the history and theories of health communication, social marketing and media advocacy, audience research and segmentation, entertainment education, e-health, provider/patient communication, technology transfer to service providers, media relations and media monitoring, emergency risk communication, and evaluating communication campaigns. Students plan an entire social marketing campaign.

SBHD 609. Research Methods in Social and Behavioral Health. 3 Hours.
Semester course; 3 lecture hours. 3 credits. Enrollment restricted to graduate students. Recommended preparation: SBHD 605. A didactic and experiential course that provides an introduction to applying social and behavioral qualitative, quantitative and evaluation research methods to public health issues.

SBHD 610. Behavioral Measurement. 3 Hours.
Semester course; 3 lecture hours. 3 credits. Recommended preparation: SBHD 605. Introduces students to theories and applications of measuring constructs in social and behavioral sciences. Examines test theories, processes involved in developing tests and the standards against which tests are compared.

SBHD 611. Health Literacy. 3 Hours.
Semester course; 3 lecture hours. 3 credits. Designed to provide doctoral students an overview of health literacy and its relationship to health outcomes and health disparities. Class material will cover the research and theories in contemporary literature in health literacy.

SBHD 612. Fundamentals of Cancer Health Equity. 3 Hours.
Semester course; 3 lecture hours. 3 credits. Enrollment is restricted to graduate students. This course is designed to provide students with training and skills development focused on the fundamentals of cancer prevention and control, and to specifically do so through a lens of health equity. The course takes a multidisciplinary approach to facilitate the understanding of the distribution of several types of cancer from local to global settings and how to identify their causes (risk factors). Students will learn about the national and international systems of cancer surveillance, how these sources of data drive research across multiple levels from patient-facing clinical settings to communities to those that inform policy-making. The course will also highlight the gaps in the current surveillance infrastructure and the limits of the data they produce as well as opportunities to improve their impact on the health of persons diagnosed with cancer. With a foundation in the principles of health equity, students will learn how to identify compelling research questions with real-world implications for improving public health across diverse communities, especially those who are most affected by cancer. This includes developing an understanding of the importance of ensuring equitable access to care across the cancer-control continuum -- from cancer prevention to screening and diagnosis of cancers, through treatment, survivorship and up to palliative care at the end of life.

SBHD 613. Community-engaged Research and Cancer Disparities. 3 Hours.
Semester course; 3 lecture hours (delivered online). 3 credits. Enrollment is restricted to graduate students. This course is designed to engage students from diverse disciplines, including social sciences, public health and basic sciences, to learn more about community-engaged research as a viable approach to address cancer health disparities. The course provides an overview of community-engaged research, of cancer health disparities and of understanding the significant role of social determinants as a contributing factor -- as well as a viable conceptual framework to addressing -- cancer disparities. The focus of this class is on learning to apply community-engaged research approaches to address cancer disparities. Community-engaged research is framed as an evidentiary approach that strongly aligns with the translational research continuum. This course will be highly interactive with a strong emphasis placed on engaging the learner with the course materials. Students will use VoiceThread (freely available to VCU students), a web-based application that allows them to use images, slides, videos and documents to create presentations that will allow others to view and respond as part of an asynchronous conversation. As part of their engaged experience, students will interview two cancer survivors to learn more about their experiences and to obtain their input on areas of improvement along the continuum of cancer prevention and control. Finally, students will develop a cancer research plan that provides the opportunity to apply their community-engaged research knowledge to address a cancer disparity of their choice.
SBHD 619. Research Methods in Social and Behavioral Health II. 3 Hours.
Semester course; 3 lecture hours. 3 credits. Prerequisite: SBHD 609.
Enrollment restricted to graduate students. Advanced application of
social and behavioral qualitative, quantitative, intervention and evaluation
research methods to public health issues.

SBHD 630. Theoretical Foundations of Social and Behavioral Health. 3 Hours.
Semester course; 3 lecture hours. 3 credits. This course addresses the
theoretical foundations of social and behavioral health, discussing both
classic and emergent theories. The course begins with an overview
of theoretical concepts, constructs and variables; how to construct
theoretical statements; and how to evaluate social science theories.
The majority of the course is spent describing theories and models at the
individual, interpersonal and community level and evaluating their utility
in changing health behavior. The course concludes with a discussion of
the state of the discipline and future directions in health behavior change
theory and research.

SBHD 631. Disseminating, Adopting and Adapting Evidence-based
Prevention Programs. 3 Hours.
Semester course; 3 lecture hours. 3 credits. Preventive interventions
that have been evaluated and found to be effective should serve as the
standard for community-based public health practice. This advanced
seminar will examine theories relevant to the diffusion of these evidence-
based interventions (EBI), EBI dissemination procedures and policy, and
evaluation of EBI adoption, fidelity monitoring and adaptation.

SBHD 632. Health Disparities and Social Justice. 3 Hours.
Semester course; 3 lecture hours. 3 credits. This seminar is designed to
provide students with an understanding of the concept of health
disparities, reasons for disparities and how social factors contribute
to disparities in health care and outcomes. The material will cover the
research and theories in contemporary medical, epidemiologic and social
justice literature.

SBHD 633. Structural Equation Modeling. 3 Hours.
Semester course; 3 lecture hours. 3 credits. Introduces students to
principles and applications of structural equation modeling for testing
theories in social and behavioral sciences. Examines latent variables
with continuous and discrete distributions, multimethod measurement
modeling under the latent variable framework, latent variable modeling
of longitudinal measurement designs and testing mediation and
moderation using structural equation modeling.

SBHD 634. Patient-Provider Interaction. 3 Hours.
Semester course; 3 lecture hours. 3 credits. Enrollment is restricted to
students in the social and behavioral sciences or healthcare policy
and research Ph.D. programs or with permission of the instructor. This
course will cover theories, principles and applications used to produce
high quality research in patient-provider communication. The course will
educate students on communication theories that support this research,
practical applications of these theories and different methodologies to
guide research. The course will provide an overarching focus on health
disparities and research conducted in particular topic areas to ameliorate
disparities in the experience of minority patients including, but not
limited to, racial, sexual and gender, and socioeconomic equality and the
intersection between these domains. Students will have the opportunity
to analyze published research as well as develop their own plans for a
research project.

SBHD 635. Anthropology and Public Health. 3 Hours.
Semester course; 3 lecture hours. 3 credits. Prerequisite: doctoral student
or M.P.H. student or permission of instructor. Provides students with an
advanced introduction to anthropology as a means for exploring public
health. Through ethnographic case studies (articles, books and films), the
course examines cultural dimensions of illness experience and diverse
models of healing and treatment, paying particular attention to political,
economic, spiritual and other cultural factors that influence health
inequalities, treatment and health behaviors. Approximately 80 percent
of the course material focuses on international health. The course is a
readings seminar rather than a methodological course; however, students
will be asked to think critically about the ways that anthropological
methods can contribute to public health practice.

SBHD 636. Community-based Participatory Research. 3 Hours.
Semester course; 3 lecture hours. 3 credits. Prerequisite: doctoral student
in social and behavioral health or permission of instructor. This seminar
provides students with an understanding of the theories, principles and
strategies of conducting CBPR. This class will meet once a week for
approximately three hours. Although some lectures will be presented, the
main format for the class will reflect the participatory as well as critical
reflectiveness required to conduct CBPR. Co-learning will be emphasized
against a backdrop of health research. The second major component
of this class will be an interactive and hands-on field experience where
students will experience the context and learn the methods to use when
conducting participatory research for health. Students will work closely
with a community partner and will use participatory research methods to
address a community partner need.

SBHD 637. Program Evaluation. 3 Hours.
Semester course; 3 lecture hours. 3 credits. Enrollment is restricted to
students admitted to the doctoral program in social and behavioral
sciences or with permission of the instructor. This course examines
the evaluation methods used to determine whether -- and how -- health-
related programs are achieving their objectives. Several types of
evaluations will be covered, with a focus on process and outcome
evaluations. Topics relevant to evaluation practice, including evaluation
design and result dissemination, will be addressed. Students will learn
how to judge the quality of evaluation designs, distinguish appropriate
from inappropriate evaluations and be given the opportunity to apply
the principles and techniques of evaluation science to the creation
of a detailed evaluation plan. Materials will be presented in several
ways, including lectures, guest lectures, in-class exercises, student
presentations, classroom discussions and written assignments.

SBHD 638. Applications in Qualitative Research Methods. 3 Hours.
Semester course; 3 lecture hours. 3 credits. Prerequisite: doctoral student
in social and behavioral health or permission of instructor. This course
will cover theories, principles and applications to enable high quality
research using qualitative research methods. This course will educate
students on theories of qualitative research, different methodologies
used to gather qualitative data and practical applications of these
theories and methods to guide research development in this area.
Students will be given the opportunity to analyze published research,
conduct qualitative analyses using previously collected data, code and
quantify qualitative data, and develop their own plans for a research
project.
SBHD 639. Intervention Development and Implementation. 3 Hours.
Semester course; 3 lecture hours. 3 credits. Prerequisites: doctoral-level course work in research methods and health behavior theory; permission of instructor. The goal of this course is to provide students with knowledge and applied skills in the development and implementation of behavioral interventions to promote health and prevent disease. Students will receive training in evidence-based behavioral medicine approaches and best practice methods for effectively promoting behavior change in individuals and families. The course takes a sequential and hands-on approach in which students will learn about each step of the intervention development and implementation process and will gain experience applying what they learn to the development of their own intervention. Relevant methodological issues will be covered, with an emphasis on design and methods for randomized controlled trials testing individual-level behavioral interventions across settings. Students will learn to think critically about how to balance theory, empirically supported strategies and pragmatic considerations in the development and execution of intervention trials, with an emphasis on achieving maximum impact in their work. Course objectives will be achieved through lectures, experiential in-class activities, informal Q&A with PIs about their experiences developing and implementing intervention trials, student presentations, classroom discussion and written assignments that map on to key sections of a grant proposal.

SBHD 640. Seminar in Mixed Methods Research. 1 Hour.
Semester course; 1 lecture hour. 1 credit. Prerequisites: SBHD 609, SBHD 619 and SBHD 638, or permission of instructor. This course provides an overview of best practices in mixed methods research in the social and behavioral sciences and serves as a methods capstone course for SBS doctoral students who have completed the foundational research methods and applications in qualitative research methods courses.

SBHD 690. Departmental Seminar. 1 Hour.
Semester course; 1 lecture hour. 1 credit. Students and faculty meet weekly to discuss new research and literature in the field of social and behavioral health. Talks given by students and faculty will cover recent articles and trends in the field. Graded as S/U/F.

SBHD 691. Special Topics. 0.5-4 Hours.
Semester course; 0.5-4 lecture hours. 0.5-4 credits. Lectures, tutorial, workshops and/or library assignments in selected areas of advanced study which are not available in other courses or as part of the research training. Graded as S/U/F.

SBHD 692. Special Topics. 3 Hours.
Semester course; 3 lecture hours. 3 credits. This letter-graded course will include lectures and other activities in areas of advanced study which are not available in other courses or as part of research training.

SBHD 693. SBHD Internship. 1-3 Hours.
Semester course. variable hours (60 hours per credit). 1-3 credits. Requires students to conduct and prepare a written dissertation under the guidance of a faculty committee. The dissertation is written in traditional academic style and must be orally defended. Students must be continually enrolled in this course until successfully completed and approved. A minimum of 9 credits of this course must be taken to complete the degree. Graded as Pass/Fail.

SBHD 695. Independent Study. 1-3 Hours.
Semester course; 1-3 independent study hours. 1-3 credits. Provides the opportunity for students to explore a special topic of interest under the direction of a faculty member. A proposal for a course of study must be submitted to and approved by the program director of the social and behavioral science doctorate; credits will be assigned commensurate with the complexity of the project. Arrangements are made directly with the appropriate faculty member and the program director. Graded as S/U/F.

Semester course; variable hours. 1-15 credits. Requires students to conduct and prepare a written dissertation under the guidance of a faculty committee. The dissertation is written in traditional academic style and must be orally defended. Students must be continually enrolled in this course until successfully completed and approved. A minimum of 9 credits of this course must be taken to complete the degree. Graded as Pass/Fail.
