REHABILITATION AND MOVEMENT SCIENCE, DOCTOR OF PHILOSOPHY (PH.D.) WITH A CONCENTRATION IN EXERCISE PHYSIOLOGY [COLLEGE OF HUMANITIES AND SCIENCES]

Program goal

The Ph.D. in Rehabilitation and Movement Science is an interdisciplinary degree program developed through a collaborative partnership of the departments of Kinesiology and Health Sciences, Physical Therapy, and Physical Medicine and Rehabilitation. The mission of this collaborative degree program is to prepare applied scientists capable of approaching multifaceted health care, preventive medicine and rehabilitation initiatives from an integrative perspective and to prepare graduates to assume research, teaching and leadership positions within rehabilitation and movement science professions.

There are two program concentrations: exercise physiology and neuromusculoskeletal dynamics. The exercise physiology concentration prepares individuals to conduct research, direct external funding initiatives and teach in the area of exercise physiology, with particular focus on physical activity’s impact on chronic disease states. The neuromusculoskeletal dynamics concentration prepares individuals for research, teaching and clinical initiatives associated with the identification and rehabilitation of movement disorders.

Student learning outcomes

Program core learning outcomes

At the completion of the program students will:

a. Develop the skills and abilities to collect and manage research data while ensuring ethical and responsible conduct of research
b. Develop the ability to analyze research data and subsequently interpret and synthesize results and draw appropriate conclusions
c. Demonstrate teaching effectiveness in the classroom and/or clinical environment
d. Disseminate research findings effectively in oral and/or written formats

Exercise physiology concentration-specific outcomes

a. Demonstrate comprehensive foundational knowledge of exercise physiology
b. Develop testable hypotheses and appropriate study designs to address relevant research questions in the field of exercise physiology

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

Apply online today. (https://www.vcu.edu/admissions/apply/graduate/)
Admission requirements

Degree: Ph.D.  Semester(s) of entry: Fall preferred  Deadline dates: Applications received prior to Jan. 9 will be given priority consideration. Applications received following the deadline may be considered if space and resources are available.  Test requirements: GRE

In addition to the general admission requirements of the VCU Graduate School (http://bulletin.vcu.edu/graduate/study/admission-graduate-study/admission-requirements/), applicants must:

a. Have completed at least one of a master's degree in a related area, 30 hours of post-baccalaureate work (e.g. course work at 500 level or greater) or a first-professional degree program
b. Provide official GRE score
c. Submit a curriculum vitae or professional resume indicating an applicant's educational and career experience as well as evidence of research potential

Admission decisions are made only on the basis of a completed application packet.

Applicants being considered for admission must complete an interview with a Ph.D. admissions committee representative and/or research faculty member with whom the student would like to work.

Degree requirements

In addition to general VCU Graduate School graduation requirements (http://bulletin.vcu.edu/academic-regcs/grad/graduation-info/), students pursuing the Ph.D. in Rehabilitation and Movement Science must successfully complete:

a. A minimum of 50 credit hours developed in conjunction with their advisers
b. Written and oral comprehensive examinations
c. All other university requirements of qualification for degree candidacy
d. Written dissertation based on a focused line of research
e. Oral defense of the dissertation

Curriculum requirements

Course Title Hours
Research core courses
STAT 543  Statistical Methods I  3
or BIOS 543  Graduate Research Methods I
STAT 544  Statistical Methods II  3
or BIOS 544  Graduate Research Methods II
Select two of the following:  6
ALHP 716  Grant Writing and Project Management in Health Related Sciences

BIOS 531  Clinical Epidemiology
BIOS 601  Analysis of Biomedical Data I
BIOS 606  Clinical Trials
BIOS 653  Biostatistical Methods I
EDUS 710  Quantitative Research Design
HADM 761  Health Services Research Methods I
HEMS 600  Introduction to Research Design in Health and Movement Sciences
PSYC 636  Research Methods in Developmental Psychology
SBHD 610  Behavioral Measurement

Core concentration
PHIS 501  Mammalian Physiology  5
REMS 701  Advanced Exercise Physiology I  3
Select one of the following:  3
  REMS 703  Cardiovascular Exercise Physiology
  REMS 704  Psychobiology of Physical Activity
  REMS 705  Metabolic Aspects of Physical Activity

Approved electives (from list below)  7

Labaratory rotations
REMS 710  Research Techniques in Rehabilitation and Movement Science  3

Professional development course work
REMS 690  Research Seminar in Rehabilitation and Movement Science (.5 credit-hour course repeated for a total of 3 credits)  3
REMS 793  Teaching Practicum in Higher Education  1
REMS 794  Research Presentation Seminar  1

Dissertation research
REMS 798  Research in Rehabilitation and Movement Science  12

Total Hours  50

Approved electives
Course Title Hours
BIOL 524  Endocrinology  3
HEMS 610  Laboratory Techniques in Rehabilitation Science  3
HEMS 675  Clinical Exercise Physiology  3
PHTX 614  Foundation in Psychoneuroimmunology  3
REMS 660  Neuromuscular Performance  3
REMS 692  Independent Study  1-3
REMS 702  Advanced Exercise Physiology II  3
REMS 703  Cardiovascular Exercise Physiology  3
REMS 704  Psychobiology of Physical Activity  3
REMS 705  Metabolic Aspects of Physical Activity  3
REMS 707  Programming for Rehabilitation Sciences  3

The minimum number of graduate credit hours required for this degree is 50.
