BIOSTATISTICS, MASTER OF SCIENCE (M.S.)

Program goal
The mission of the VCU Department of Biostatistics is to improve human health through methodological research, the education of graduate students and health science researchers in biostatistical methods and applications, and collaborative health sciences research. Faculty members conduct methodological research motivated by collaborative alliances, which in turn contributes to and enhances the department's educational mission. By focusing on the integration of methodological and collaborative research, students develop strong biostatistical and communication skills, enabling them to assume leadership positions in academia, government and industry.

Student learning outcomes
This training program is designed to be completed in 12 months (three semesters: fall, spring, summer) and will help students achieve the following learning outcomes:

1. Explain biostatistical concepts, ideas and methods in plain terms to non-biostatistical researchers
2. Demonstrate the ability to effectively collaborate with biostatistical and health science researchers
3. Develop fluency in several computational languages
4. Display exceptional written and oral communication skills

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on graduation requirements.

Apply online today. (https://www.vcu.edu/admissions/apply/graduate/)

Admission requirements

In addition to the general admission requirements of the VCU Graduate School, applicants for the M.S. in Biostatistics must complete the verbal, quantitative and analytical writing sections of the Graduate Record Exam.

Additionally, the following mathematics courses or their equivalents are required for admission:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>MATH 307</td>
<td>Multivariate Calculus</td>
<td>4</td>
</tr>
<tr>
<td>MATH 310</td>
<td>Linear Algebra</td>
<td>3</td>
</tr>
<tr>
<td>STAT 212</td>
<td>Concepts of Statistics</td>
<td>3</td>
</tr>
<tr>
<td>STAT 309</td>
<td>Introduction to Probability Theory</td>
<td>3</td>
</tr>
</tbody>
</table>

Although not required, prior course work in additional mathematics, statistics or computer science is helpful.

Degree requirements
In addition to the general VCU Graduate School graduation requirements, M.S. students must complete a minimum total of 33 graduate credit hours of course work, participate in the Summer Student Training Program and present at the Biostatistics Student Research Symposium. M.S. students interested in applying to the Ph.D. program in biostatistics (with no concentration or with a concentration in genomic biostatistics) are strongly encouraged to take BIOS 513, BIOS 514, BIOS 653 and BIOS 654.
Biostatistics, Master of Science (M.S.)

Applied examination

Students pursuing the M.S. degree must pass an applied examination administered after completion of following courses: BIOS 524, BIOS 601, BIOS 602 and BIOS 606. This examination is graded as pass or fail. A student who does not pass the applied examination will have one opportunity to retake the examination.

Thesis

There is no thesis requirement for the M.S. program.

Elective courses

Choose at least 12 credits from the following 500- or 600-level courses (minimum three credits), which may be selected from the following list or other courses with program director approval.

BIOS 514 Mathematical Statistics II
BIOS 615 Advanced Inference
BIOS 631 Mixed Models and Longitudinal Data Analysis
BIOS 647 Survival Analysis
BIOS 649 Advanced Spatial Data Analysis
BIOS 653 Biostatistical Methods I
BIOS 654 Biostatistical Methods II

Total Hours 33

The minimum number of graduate credit hours required for this degree is 33.
