

COMPUTER AND INFORMATION SYSTEMS SECURITY, MASTER OF SCIENCE (M.S.) [COLLEGE OF ENGINEERING]

Note: Admission to this program is temporarily suspended.

Program mission

The Master of Science in Computer and Information Systems Security provides for the scholarly and professional needs of several groups who have either accepted or are keen to take on the challenge of protecting information resources of firms and society at large.

Program goal

Graduates of this program are expected to take on leadership positions, including as chief security officer, in computer and information systems security in organizations. VCU's program takes a broad interdisciplinary approach to computer and information systems security that will help develop the student's ability to see the larger organizational, social, political, ethical and economic aspects of information security.

Student learning outcomes

Graduates of the program will be:

1. Prepared to take leading roles in planning, organizing, managing, designing and configuring security solutions in public and private organizations
2. Familiar with state-of-the-art security technologies and best practices

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (<http://bulletin.vcu.edu/academic-regs/>)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for

continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (<http://bulletin.vcu.edu/academic-regs/grad/candidacy/>)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (<http://bulletin.vcu.edu/academic-regs/grad/graduation-info/>)

Note: Admission to this program is temporarily suspended.

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Jul 1	GRE or GMAT
	Spring	Nov 1	TOEFL for international students

Applicants must meet all general admission requirements of the VCU Graduate School (<http://bulletin.vcu.edu/graduate/study/admission-graduate-study/admission-requirements/>).

The Master of Science in Computer and Information Systems Security, jointly offered by the Department of Computer Science in the College of Engineering and the Department of Information Systems in the School of Business, is designed primarily for students interested in professional roles in business, industry or government. Program graduates will serve as leaders within the computer and information systems security community and as strategic partners within the enterprises in which they work. They will stay attuned to, and anticipate changes in, the computer and information systems security environment and ensure that security solutions create a sound, competitive, cost-effective advantage for the enterprise.

Graduates of the program will be prepared to take leading roles in planning, organizing, managing, designing and configuring security solutions in public and private organizations and will be familiar with state-of-the-art security technologies and best practices. The program takes a broad interdisciplinary approach to computer and information systems security that will help students develop the ability to see the larger organization and social, political, ethical and economic aspects

of information security, as well as offering a unique graduate-level curriculum that is both technically and managerially oriented.

Note: Admission to this program is temporarily suspended.

Degree requirements

In addition to general VCU Graduate School graduation requirements (<http://bulletin.vcu.edu/academic-regs/grad/graduation-info/>), the M.S. in Computer and Information Systems Security requires 30 graduate credit hours, including a core curricular component and an elective component. The elective component consists of three courses chosen by the student and selected from CISS course offerings or, with the approval of the program co-directors, from courses offered by the departments of Computer Science, Information Systems, Criminal Justice and Forensic Science.

Curriculum requirements

Students with an accredited bachelor's degree or post-baccalaureate certificate in fields such as computer science or information systems should be adequately prepared for the graduate curriculum. Students from other academic backgrounds may need to complete undergraduate prerequisite courses. Prerequisites are determined by the faculty adviser at the time of admission.

Prerequisite courses

Course	Title	Hours
CMSC 312 or INFO 361	Introduction to Operating Systems Systems Analysis and Design	3
CMSC 355 or INFO 370	Fundamentals of Software Engineering Fundamentals of Data Communications	3
CMSC 401	Algorithm Analysis with Advanced Data Structures	3
CMSC 508 or INFO 364	Database Theory Database Systems	3
MATH 211 or CMSC 302	Mathematical Structures Introduction to Discrete Structures	3
STAT 212	Concepts of Statistics	3

Curriculum

Course	Title	Hours
Core component		
CISS/CMSC 618	Database and Application Security	3
CISS/CMSC 622	Network and Operating Systems Security	3
CISS 624/CMSC 620	Applied Cryptography	3
CISS 634	Ethical, Social and Legal Issues in Computer and Information Systems Security	3
CISS/INFO 644	Principles of Computer and Information Systems Security	3
INFO 646	Security Policy Formulation and Implementation	3
Elective component		
Choose four of the following courses. Students must select a minimum of one CMSC and one INFO course		12
CMSC 502	Parallel Algorithms	

CMSC 506	Computer Networks and Communications	
CMSC 525	Introduction to Software Analysis, Testing and Verification	
CMSC 612	Game Theory and Security	
CMSC 691	Special Topics in Computer Science	
INFO 609	Data-centric Re-engineering Analysis/ Planning	
INFO 611	Data Re-engineering	
INFO 614	Data Mining	
INFO 616	Data Warehousing	
INFO 632	Business Process Re-engineering	
INFO 641	Strategic Information Systems Planning	
INFO 642	Decision Support and Intelligent Systems	
INFO 691	Topics in Information Systems	
Total Hours		30

The minimum total of graduate credit hours required for this degree is 30.
