

GRADUATE INFORMATION

Registration for graduate study

In the biomedical engineering program, all new students begin their course of study in the fall semester (August). Spring semester admissions require the recommendation of the graduate program director and consent of the chair and the associate dean for graduate studies.

Students may begin a course of study in either the fall or spring semesters for other engineering and computer science graduate programs; however, a start in the fall semester is preferred. For Cardinal Education, students may begin a course of study in either the fall or spring semester.
