

# UNIVERSITY COLLEGE

---

The Academy for Interdisciplinary Innovation at University College (<https://uc.vcu.edu/>) is where bold thinkers, creative problem-solvers and lifelong learners come to design their futures. Whether you're starting college, exploring new directions or returning to advance your career, the Academy will help you build the skills, experiences and confidence you need to thrive.

By blending the strengths of interdisciplinary studies, the da Vinci Center for Innovation, the Institute for Transformative Learning and faculty from across VCU's schools and colleges, the Academy creates a dynamic environment where students learn by doing, experimenting and collaborating across disciplines.

The Academy for Interdisciplinary Innovation at University College offers programs and services to all VCU students, regardless of school/college or major.
