

ACTUARIAL SCIENCE, MINOR IN

The minor in actuarial science prepares students for the two actuarial exams and part of the college courses required for a designation of Associate of the Society of Actuaries, Casualty Actuarial Society or Canadian Institute of Actuaries. Specifically the minor provides students with intense background in principles of actuarial models and opens a broad path to an actuarial professional world.

The minor in actuarial science is for non-actuarial science majors and requires a minimum of 18 credits. Required courses account for six credits and four electives complete the minor as outlined below. Students must attain a minimum cumulative GPA of 2.5 in these courses.

Students should earn a minimum grade of C in either MATH 200 or BUSN 212, as that is a prerequisite for the required actuarial science courses.

Course	Title	Hours
Required courses		
FIRE 319	Financial Mathematics	3
FIRE 320	Actuarial Probability Concepts	3
Electives		
Select four.		12
ACCT 203	Introduction to Accounting I	
ACCT 204	Introduction to Accounting II
