

BUSINESS, BACHELOR OF SCIENCE (B.S.) WITH A CONCENTRATION IN RISK MANAGEMENT AND INSURANCE

The B.S. in Business with a concentration in risk management and insurance is where business, analytics and relationships meet. The concentration prepares students to help people, organizations and communities anticipate uncertainty, recover from loss and keep commerce moving. Students learn how insurance and other risk management tools make it possible to launch startups, build major projects, protect data and respond to challenges such as natural disasters, cyberattacks and supply chain disruptions. Built on a solid foundation in business, the program emphasizes analytical thinking, practical decision-making and relationship management – skills that translate across industries and career paths in corporate risk management, consulting, underwriting, claims and emerging risk specialties.

Learning goals

Graduates will understand how to identify, assess and manage risk across organizations and industries. They will learn to use analytical and managerial tools to make informed decisions, strengthen business operations and support people and communities when disruptions occur. The program emphasizes problem-solving, communication and leadership skills that prepare graduates to anticipate uncertainty, respond effectively to change and contribute to resilient and sustainable enterprises in a global economy.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

1. Risk analysis and strategy – Identify and assess major sources of risk facing individuals, businesses and communities; evaluate alternative responses; and recommend strategies that promote stability and resilience.
2. Analytical decision-making – Apply data and quantitative reasoning to measure risk, compare options and support informed decisions in risk management and insurance.
3. Communication and leadership – Present risk insights and solutions clearly in written, visual and oral forms, and collaborate effectively with teams to address complex business challenges.
4. Ethical and professional judgment – Recognize the legal, regulatory and ethical dimensions of risk management, and apply professional standards that foster integrity, trust and confidence in business and society.

Special requirements

The School of Business has special **academic policies**, including policies on transfer credits, that apply to all undergraduate degrees.

School of Business progression policy

Students enrolled in undergraduate programs of the School of Business engage in a demanding curriculum designed to set them up for success in the world of business. In order to successfully maintain progress towards graduation, students are required to meet the following criteria in order to remain in their majors:

- Students are required to pass major and ancillary requirements within two attempts. If a student withdraws from a course, it will count as an attempt.
- Upon the third attempt at a course, students will be placed on business probation and must pass the course successfully in that third attempt.
- Students must maintain a minimum 2.0 major GPA.
- If a student's major GPA drops below 2.0, they will be placed on business probation and allowed one semester to raise their major GPA to 2.0.

Upon notification of being placed on business probation, students will receive a registration hold, and must meet with their business adviser prior to the add/drop deadline of the pursuant semester in order to create an action plan to either pass the repeated course successfully, or increase their major GPA.

Students who do not meet the performance expectations of business probation in that same semester will be required to change their major prior to the start of the next semester.

Students may appeal the change of major via the associate dean of the School of Business. Students must initiate the appeal with their assigned academic adviser. The associate dean may, at their discretion, extend the time period needed to meet the requirements, generally by only one semester. A student who wishes to appeal must submit his or her appeal at least one week prior to the start of the next semester in which they register for classes.

Degree requirements for Business, Bachelor of Science (B.S.) with a concentration in risk management and insurance

Course	Title	Hours
General education (https://bulletin.vcu.edu/undergraduate/undergraduate-study/general-education-curriculum/)
